

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

A
GRAMMAR
OF THE
HINDI LANGUAGE:

IN WHICH ARE TREATED
THE STANDARD HINDI, BRAJ, AND THE
EASTERN HINDI OF THE RAMAYAN
OF TULSI DAS,

ALSO
THE COLLOQUIAL DIALECTS OF MARWAR, KUMAON,
AVADH, BAGHELKHAND, BHOJPUR, ETC.; WITH
COPIOUS PHILOLOGICAL NOTES.

BY THE
REV. S. H. KELLOGG, M. A.,
AMERICAN PRESBYTERIAN MISSION, NORTH INDIA;
CORRESPONDING MEMBER OF THE AMERICAN ORIENTAL SOCIETY.

PRINTED AT THE AM. PRES. MISSION PRESS, ALLAHABAD:

AND SOLD BY

THACKER, SPINK & Co., CALCUTTA.

P R E F A C E .

OF the two hundred and fifty million inhabitants of India, speaking a score or more of different languages, fully one fourth, or between sixty and seventy millions, own the Hindí as their vernacular. In all the great centres of Hindú faith in North India, alike in populous Benares, Allahabad and Mathurá, and in the mountains about the sacred shrines of Gangotrí, Kidárnáth, and Badrináth, among the Himalayas; in many of the most powerful independent native states of India, as in the dominions of the Mahárájá Sindhia, and the extensive territories under the Mahárájá of Jaipur and other Rájput chiefs; in short, throughout an area of more than 248,000 square miles, Hindí is the language of the great mass of the population. Only where Mohammedan influence has long prevailed, as in the large cities, and on account of the almost exclusive currency of Mohammedan speech in Government offices, have many Hindús learned to contemn their native tongue and affect the Persianized Hindí known as 'Urdú'.

Of the importance, especially to those who have been called to places of authority in North India, of thoroughly knowing a language so widely diffused, and of the need of a grammar which shall exhibit its chief phenomena, one would think that no doubt could be entertained. But chiefly because Urdú has been adopted by government as the official language, it has come to pass that although this dialect represents grammatically only a single western form of speech, and is the vernacular only of the Mohammadans of North India, it has been read and studied by foreigners in India, to the great neglect, even almost to the exclusion of the living Aryan speech which is the actual vernacular of the great mass of the Hindú population. Many, indeed, have even been led to believe that the Urdú with which they are themselves familiar, is essentially the vernacular of the Hindús as well as of the Mohammedans of North India; that the only difference between Urdú and Hindí consists in the use of a

*where is
Hindi
(Hindustani)
Urdú " " ?*

?

different alphabet; and that such a language as Hindí, apart and distinct from Urdú, exists only in name and not in reality. The refutation of such a theory needs no other argument than that which is afforded in the declensional and conjugational tables of this grammar.

Others, again, while rightly asserting for Hindí an individual existence, have still erred in their apprehension of the relation between it and Urdú. Thus when I first entered India, I was repeatedly assured that the main difference between Hindí and Urdú was one of vocabulary. And this statement, indeed, was quite correct, if it be understood to apply only to that special form of Hindí which is exhibited in those religious and educational works which owe their origin, directly or indirectly, to the foreigner in India. Many foreigners who have written books in Hindí, seem to have imagined that by merely substituting Sanskrit for the Arabic and Persian terms which are found in Urdú, that familiar dialect might be at once transformed into *bonâ fide* Hindí. Hence, apparently, has arisen the strange but popular notion, that the 'purity' of Hindí is to be measured by the degree to which a writer may have succeeded in excluding from his pages words of Arabic or Persian origin; a standard of purity, according to which the author of the *Rámáyan* has failed, and the gifted *Kabir*, with his free use of Arabic and Persian words, must renounce his claim to be considered a Hindí poet. But the early delusion on this subject was soon dispelled. When we fancied that we were speaking something like 'pure Hindí', the ^avillagers stared confounded at our sonorous Sanskrit terms, many of which were evidently less familiar to them than even the Arabic and Persian of the Urdú. Still it was equally plain that, although often using Arabic and Persian words, they themselves did not speak Urdú, except, perhaps, in condescension to our ignorance. Their Hindí, indeed, was scarcely more intelligible to us than was ours to them; but it soon became quite plain that the speech of the people differed from Urdú much more notably in grammatical forms than in vocabulary. Similarly, in literature, the difference between the Hindí, *e.g.*, of *Tulsí Dás*, *Súr Dás* or *Kabir*, and modern Urdú, is not by any means merely in their choice of words; it is not that they scrupulously exclude Arabic and Persian terms, for they do not. The special difficulties and peculiar-

What is what part
of India? X

ities, for instance, of the *Rámáyan*, are of a much more radical and serious nature. They concern, not mere vocabulary, but the very grammatical forms and syntax of the language. a

Regarding these distinctive peculiarities of Hindí, the student hitherto has had no adequate help. No grammar, indeed, has hitherto even attempted or professed to exhibit, with any approach to thoroughness or completeness, the actual colloquial and literary language of the Hindús of North India. Mr. Etherington in his grammar has confined his attention to that single modification of Hindí which agrees in grammatical form with the Urdú dialect; only giving, in his last edition, a brief synopsis of the Braj declensions and conjugations. On the other hand, Dr. Ballantyne in his brief Braj Grammar, as also Prof. De Tassy in his 'Grammaire de la Langue Hindouí', passing by the Urdú dialect, gave only the forms of the Braj; which, indeed, had been previously exhibited in an old Hindí Grammar published by Government in connexion with the College of Fort William. All grammarians of the Hindí hitherto, have alike entirely ignored the eastern type of Hindí, as represented, *e.g.*, with some admixture, in the *Rámáyan* of *Tulsí Dás*. Indeed, it is a remarkable fact that although of all Hindí books, the writings of *Kabír* excepted, none compare with the *Rámáyan* in universal popularity and general influence upon the people, and although this eastern Hindí, even more than the western Braj, may be regarded as *par excellence* the classic dialect of Hindí, yet not a Hindí grammar hitherto published, nor a Hindí dictionary, previous to the late valuable work of Mr. Bate, so much as hints the existence of any grammatical form or construction, peculiar to *Tulsí Dás* or any similar writer. What grammarian, for example, has ever noted the future in b, so common not only in the *Rámáyan*, but in all the modern eastern Hindí dialects? Or where has the fact been noted in any grammar, that one chief distinguishing characteristic of the Urdú and other western Hindí dialects, *viz.*, the passive construction of the perfects of transitive verbs with the case of the agent in *ne*, does not exist in eastern Hindí? and that this *ne* is never used by *Tulsí Dás*, even when he employs the passive construction?

This absence of the assistance needed by the Hindí student, has doubtless been the occasion of increasing the prevailing indifference

of Europeans to classic Hindí, and of turning many to the special study of the more fashionable Urdú, for which helps have become so abundant. Very many civilians in India, instead of seeking the rewards and honors offered by Government to the thorough student of the great Hindí poem of *Tulsí Dás*, have preferred to compete for the prizes which are offered for high proficiency in Arabic and Persian, languages utterly alien to all but the Mohammedan population of India. Too many missionaries, seeking to influence the religious thought of the people, have omitted to make themselves familiar with the one poem, which, more than any other, is exerting a present, living influence, direct or indirect, upon the religious thought of the Hindús of North India. And one chief reason of this neglect of their great vernacular epic is to be found in the utter absence of any work which might aid the student in its interpretation. For, as I know by a vexatious experience, it is by no means so easy as might be imagined, to obtain in a small station in India, a trustworthy pundit, really competent to guide the student to a thorough critical knowledge of the *Rámáyana* or any similar poetry. No less difficulties have hitherto met him who would acquaint himself with the actual speech of the Hindús in the district where he might be stationed. Most of these dialects have no literature; and whatever the intrinsic merits of some of them may be, the attempt to force any one of them into the field already preoccupied by the Urdú dialect as the *lingua franca* of North India, would doubtless be both unwise and futile. Still it is evidently very desirable that the magistrate in his court, should be able to understand the rustic witness, and the missionary disputing in the bazar, his adversaries, without the aid of a third and not always disinterested party. But no effort whatever has yet been made to indicate the actual nature and extent of those dialectic variations, which always perplex, and sometimes discourage him, who really desires a knowledge of the spoken language of the people, as well as that of their books.

Thus it was, that, embarrassed by these difficulties, I was led to take up the Hindí, with such pundits as might be procured, and note and arrange, primarily for my own use, and with no thought of writing a book, facts of the class above referred to. In this way, in the course of several years, gradually grew up a considerable body of

notes on Hindí, which has finally developed into this grammar. My aim has accordingly been, not merely to reproduce, under a new arrangement, the matter of grammars previously existing, but rather to supply their omissions and supplement their defects. All existing Hindí and Urdú grammars have been carefully studied, with this particular point in view. Thus, in addition to the fundamental matter pertaining especially to modern standard Hindí, or common to that with other Hindí dialects, the grammar now offered to the public will be found to contain a large amount of matter not to be found in any Hindí grammar hitherto published. I may be allowed to mention the following particulars.

i. For practical reasons, that variety of Hindí which agrees in grammatical form with the Urdú has been taken as the basis of the grammar. It is to this form of Hindí, for various reasons, that the student commonly first directs his attention; and, moreover, in virtue of the position of this dialect as a *lingua franca* throughout the whole Hindí area of North India, and its adoption by the educational authorities as the medium of vernacular instruction in all Hindí schools, it has a special claim to our primary consideration; and, for such reasons only, may be justly termed the 'standard dialect' of Hindí.* But while thus yielding to this 'standard Hindí' a priority in certain respects, I have endeavoured to treat with equal thoroughness, the two great dialects of classic Hindí literature, as of no less importance to the Hindí scholar. Of these dialects, the *Braj* and the old *Púrbi*, the former represents the western, as the latter represents the eastern type of Hindí. The very numerous and marked peculiarities of these two typical dialects, in declension, conjugation and

* This form of Hindí has also often been termed *kharí bolí*, or the 'pure speech'; and also, by some European scholars, after the analogy of the German, 'High Hindí'. Both the phrases 'standard Hindí' and 'High Hindí', have been employed in this grammar; though indeed it may be admitted that both are open to objection. In particular, to avoid a misapprehension, it should be carefully noted that by the phrase 'standard Hindí', it is not intended to suggest that all other dialectic forms are corruptions of forms of this 'standard dialect'. On the contrary, they are, very commonly, collateral branches of the old Aryan speech of India, and in most instances are older and less divergent from the ancient original, than those of 'standard' or 'High Hindí'.

syntax, have been for the first time collected, classified, and compared. It is not indeed claimed that all the various forms of these types which may occur in Hindí, will be found in these pages; nor will this be expected by any one at all familiar with the almost endless vagaries of Hindí writers. It is hoped, however, that the student of the *Prem Ságar*, the *Rájniti*, or the *Rámáyan* will rarely be disappointed in consulting this work.* Outside of these books any variations not noted in this grammar, will probably be found but slight and unimportant deviations from some central type herein exhibited.

ii. In addition to the various forms of literary Hindí, the declension and conjugation of nine or ten less important colloquial dialects have been exhibited in these pages. This is, I believe, the first attempt to set forth with any approach to completeness the actual living speech of the Hindí-speaking population of North India. It is indeed true that local variations may be adduced almost without number, which have not been mentioned in this grammar; but the dialects which have been exhibited, it is hoped, will be found to represent all of the leading varieties of speech from Bengal in the east to Gujarát and Sindh in the west. Moreover, all these numerous dialects may be readily assigned to two or three general types, so that excessive detail might embarrass rather than aid the student. I trust that in this respect this grammar may prove a valuable aid to the foreigner in India, who would learn to understand the special vernacular of the district where he may reside. For although colloquial speech cannot be learned from books alone, yet a grammar, if it indicate the forms for which we are to listen, may assist us in acquiring a knowledge of colloquial speech. Nor are these rude dialects without value in a literary point of view. For very often some unusual form in literature may be explicated by a reference to the colloquial of some rustic district; while for the purposes of the philologist, it is such wild, unpruned dialects

* A few passages in the *Rámáyan*, however, chiefly in the *Lanká Káṇḍ* and *Uttar Káṇḍ* have been written in pure Sanskrit. It scarcely needs to be said that we have regarded the explication of such passages as belonging to Sanskrit rather than to Hindí grammar.

as these, which of all others promise and yield the richest harvest of valuable fruit.*

iii. Especial attention has been given to the matter of illustration. In grammar, particularly, mere assertion, unsupported by example, is extremely unsatisfactory. And when one undertakes to write a grammar of any language not his own, examples constructed by the author himself to fit his rules, however correct they may be, can hardly inspire a student with perfect confidence in his guide. I have accordingly made it a rule to support every statement of any consequence in etymology or syntax, by one or more illustrations, which, with no exception of any importance, have been culled from native books, or taken down fresh from the lips of the people. Nor have I allowed myself to draw an illustration from any Hindí book written by a foreigner; for even those European scholars who have most thoroughly mastered an Oriental language cannot be regarded as models so trustworthy as native authors, who write in their own vernacular. Very few, if any, Hindí books have been written by Europeans, which in some casual turn of expression, or occasional peculiarity of idiom, do not betray their foreign origin; while the great majority of such books would prove in many important respects quite misleading to him who should trust them implicitly as guides to a knowledge of Hindí. While the abundant illustration characteristic of this grammar, as will be evident at a glance, has very materially increased the size and expense of the book, it is believed that its practical value to the student has thereby been much enhanced. The illustrations of literary Hindí have been drawn chiefly from the *Prem Ságar* and the *Rámáyan*. To this special use of these works, I have been led, partly by the fact that these books have been chosen by Government, for the examination of candidates in connexion with

* I have ventured for practical reasons to deviate in some cases from the common nomenclature of these dialects, and have preferred generally to indicate them by names indicative of the modern names of the province in which they are used. Thus, *Avadhí*, of course, denotes the dialect of Oude; *Riwáí*, that of the state of *Ríwá*; etc., etc. It may be noted here, that the Rájputáná dialect of *Mewár*, is also essentially that of the Mairs, and might, perhaps with equal propriety, be designated either *Mairwáí* or *Mewáí*. I have used the term *Old Púrbi* to denote the dialect of *the Rámáyan*.

the civil and military services of India, so that the illustration of their grammar and idiom is especially demanded. And I may venture to express the hope, that by all applicants for admission to the Indian services, or contestants in the competitive examinations which are held for Indian civilians, this grammar, with its copious illustrations from the *Prem Ságar* and *Rámáyan*, may be found to meet a real need. A second consideration which has seemed to justify a prominent reference to these books, is found in their undeniable popularity and influence among all classes of the Hindú population. For, however much may have been said against the Hindí of the *Prem Ságar*, and even of the *Rámáyan*, by critics commonly familiar only with Urdú, and therefore judging every thing in Hindí, either by English standards of taste, or from a Mohammedan point of view, the fact remains that the Hindús, from the highest to the lowest, learned and unlearned, greatly admire their style. Crowds, even of the most illiterate rustics, may often be seen listening eagerly to some Brahman intoning the measured rhyming prose of the *Prem Ságar*. And although much has been said of the unintelligibility of the *Rámáyan*, it is the experience of every missionary, at least everywhere in the Ganges valley, that a happy quotation from the *Rámáyan* in preaching or in conversation, is sure to awaken a look of intelligent appreciation from even the rudest villagers. No civilian, and especially no missionary, can well afford to remain ignorant of a book so popular and influential with the people; and if this grammar shall serve in any degree to aid and stimulate the study of the great poem of *Tulsí Dás*, one great aim of my work will have been accomplished. But while, for the reasons indicated, a large proportion of my quotations have been taken from the *Prem Ságar* and the *Rámáyan*, other books have not been ignored. In particular, I have now and then drawn, from the sententious Braj prose of the *Rájníti*, the western Hindí of *Kabír*, the *Sukh Bilás*, and the *Shaṭ Darsan Darpan* of Pundit *Nílkant* *Gore Shástrí*. *Márwári* can scarcely be called a literary dialect; the only work accessible to me, has been the *Márwári* 'Plays,' edited by Rev. Mr. Robson of the Scotch Presbyterian Mission, Beawr.

iv. Another feature peculiar to this grammar will be found in the philological notes, occupying in all about fifty pages, in which I

have attempted to indicate the probable origin and derivation of the forms of the Hindí language, and the relation of various dialectic forms to one another, and to the Sanskrit and old Prákrit dialects of India. In a field where, until the late researches of scholars like Mr. Beames and Dr. Hoernle, so little had been done, I cannot venture to hope that I have always succeeded in reducing apparent chaos to order, and in correctly pointing out the lines of derivation. I have only endeavored, with no little diffidence, to indicate the conclusions to which facts, so far as known, would seem to guide us. And while I have not been able to follow implicitly the guidance of any one individual, it has on several occasions been a satisfaction to find that authorities like the learned scholars mentioned, had been independently led to the same conclusions with myself.

v. Besides the above, much else will be found in this grammar which is strictly new, both in matter and in arrangement. In the sections, for instance, on pronunciation, I have aimed at more precision and accuracy than has been previously attempted. If some may deem that I have sometimes erred in the way of an over-refinement, I am still glad to know that some of the best practical masters of Hindí have recognised the chief distinctions which I have made in treating of this subject. A nomenclature of the tenses has been presented which is believed to be more uniform and philosophical than any which has been hitherto employed, and which, it is hoped, may commend itself to Hindí scholars. The chapter on Derivation, again, will be found more than a mere arbitrary list of terminations; I have endeavored rather to group them according to their probable mutual relations and affinities. In the section on Compound words, all, it is believed, is quite new. Strange to say, no Hindí grammar that I remember, has dealt with this most characteristic feature of the language, although an understanding of the subject is indispensable to the interpretation of almost any page of Hindí poetry. In the Syntax, attention has everywhere been given to those constructions which are characteristic of poetry, especially in archaic Hindí; and the construction of Compound Sentences, for the first time, has been separately and distinctly treated. The chapter on Prosody, it is hoped, will be found in completeness and accuracy, all that, for any practical purpose, the student of Hindí can desire.

The Prosody of Hindí deserves and will repay far more study than is commonly bestowed upon it. In no western language is an understanding of the laws of its prosody so essential to the interpretation and comprehension of its literature, as in Hindí; where, indeed, a purely native work in prose is a rare exception. Unfortunately, however, until very lately, there has been no English work on Hindí prosody; and the native works upon the subject, are so laden with technicalities and an enigmatical symbolism, as without the aid of a rare native prosodian, quite to baffle the student. I shall be glad if I have so cleared away the thorns which have obstructed the entrance, as to tempt my fellow missionaries and others to labour in this attractive field.

Finally, it should be remarked, that as this grammar is intended alike for the beginner and for the advanced student, I have endeavoured to indicate by the use of a large type those important fundamental matters to which chiefly the beginner will do well to confine his attention. Matter less fundamental, and intended rather for the advanced scholar, as, *e.g.*, in all the sections upon dialectic Hindí, has been uniformly printed in smaller type.

It gives me pleasure to express my grateful appreciation of the assistance and encouragement which I have received from many missionaries and members of the civil service, during the years that this grammar has been in progress. In particular, I would express my hearty thanks to the Rev. W. Robb of the Scotch Presbyterian Mission, Todgarh, Rájputáná, for his invaluable assistance in the compilation of the sections on the Mārwáří and other Rájputáná dialects, and afterwards in the correction of the proofs of the same. Indeed, it is only due to this gentleman to say, that whatever of value those sections may be found to possess, the merit is chiefly due to him. My thanks are also due to Mr. Beames, c.s., of Cuttack, Orissa, for valuable hints and constant encouragement in the work; and to the Rev. J. D. Bate, of the Baptist Mission, Allahabad, for many a useful suggestion, and for his very kind revision of the proof sheets during many months of my absence from Allahabad.

In conclusion, I desire to record my special obligations and thanks to the Rev. J. J. Caleb, of the Mission Press, Allahabad, for the great labour and patience which he has bestowed upon the printing

of this book. For many years this press has been sustained solely by the capital and enterprise of members of the Hindustání Christian community in Allahabad, and the creditable style in which Mr. Caleb has brought out this volume, affords a gratifying indication of their substantial progress and prosperity.

S. H. KELLOGG.

ALLAHABAD : }

~~~~~

N O T E .

In a field much of which has been quite untrodden hitherto, I have frequently found myself without a guide or help. But I have derived valuable assistance from the first volume of Mr. Beames' Comparative Grammar of the Aryan Languages of India; and regret that I could not have had the advantage of consulting the remaining volumes. I also owe much to Prof. Lassen's *Institutiones Linguae Præriticæ*, and Prof. Cowell's edition of the *Prâkrîta Prakâsha* of Vararuchi. In some parts of the grammar I have consulted with advantage, Prof. Monier Williams' Sanskrit Grammar (4th Ed.) Dr. Trumpp's learned Grammar of the Sindhî, came to hand too late to help me as it might have done. In the Prosody I am chiefly indebted to the *Ohhandârnava*, the *Ohhandodîpaka*, (a small but useful compendium issued by the Government of the N. W. P., now unfortunately out of print,) and especially to the *Shrîpinga-dâdarsha* of Kavi Hîrâ Ohand Kânjî, an exhaustive treatise on Prosody in the Braj dialect, with a Gujarâtî commentary. Besides these native authorities, the admirable chapter on Prosody by John Christian, Esq. of Manghîr, in the 1st edition of Mr. Etherington's Hindî Grammar has been of essential service.

On the general topics of the Grammar the following works have been consulted, *viz.*: the Hindustání Grammar of Prof. Forbes; the Introduction to Hindustání, by Prof. Williams; the Hindustání Grammars of Mr. Platt and Prof. Dowson; Prof. De Tassy's Grammaire de la Langue Hindouî; Shâpurjî Edaljî's Gujarâtî Grammar, the Marâthî Grammars of Mr. Stevenson and of Messrs. Bellairs and Askhedar; the Panjâbî Grammar of Mr. Newton, and the Bangâli Grammar of Shâma Charan Sarkâr.

The following abbreviations have been used :

*Ar.*, Arabic; *Av.*, Avadhî; *Br.*, Braj; *Bh.*, Bhojpûrî; *Bû.*, Bûndelkhandî; *G.*, Garhwâlî; *H. H.*, High Hindî, *i.e.*, the standard dialect; *K.*, Kanaujî; *Kum.*, Kumâonî; *O. P.*, Old Pûrbî, *i.e.*, the dialect of the *Râmâyan*; *Pr.*, Prâkrit

HINDÍ GRAMMAR.

CHAPTER I.

OF THE LETTERS.

1. THE Hindí language is commonly written, like the Sanskrit, in the Devanágari alphabet.* This alphabet, as used in Hindí, has eleven vowels and thirty-three simple consonants. To these we must add the nasal symbols, *Anusóar* and *Anunásik*, and the symbol for a weak aspiration, *Visarg*. The latter of these, however, is of very rare occurrence in Hindí. The letters are given below, with their equivalents in the Roman character. It will be observed that all the vowels but the short *a*, have two forms. Of these, the form first given is used as initial in a word or syllable; the second, as medial or final. It will aid the memory to observe that the alphabetical order of each class of letters, vowels, mutes, semi-vowels, and sibilants, is the order of the organs of utterance, beginning with the throat, and ending with the lips. The first five classes of consonants are technically known as the five *vargs*.†

VOWELS.

अ *a* आ *á* इ *i* ई *í* उ *u* ऊ *ú* ऋ *ri* ए *e*
ऐ *ai* औ *o* औ *au*

* More commonly called Nágari. † Sansk. वर्ग, 'a class.'

Nasal symbols, *Anunásik* ~, *Anuscár* ' *n*. Symbol of the weak final aspirate, *Visarg*, : *h*.

CONSONANTS.

Gutturals,	क <i>k</i>	ख <i>kh</i>	ग <i>g</i>	घ <i>gh</i>	ङ <i>ñ</i>	
Palatals,	च <i>ch</i>	छ <i>chh</i>	ज <i>j</i>	झ <i>jh</i>	ञ <i>ñ</i>	श्र ५
Cerebrals,	ट <i>t</i>	ठ <i>th</i>	ड <i>d</i>	ढ <i>dh</i>	ण <i>n</i>	
Dentals,	त <i>t</i>	थ <i>th</i>	द <i>d</i>	ध <i>dh</i>	न <i>n</i>	
Labials,	प <i>p</i>	फ <i>ph</i>	ब <i>b</i>	भ <i>bh</i>	म <i>m</i>	
Semivowels,	य <i>y</i>	र <i>r</i>	ल <i>l</i>	व <i>v</i>		
Sibilants,	श <i>sh</i>	ष <i>sh</i>	स <i>s</i>			
Aspirate,	ह <i>h</i>					

a. Besides the above, classical Sanskrit had three additional vowels, *ऋ ri*, *ॠ ri*, *ॡ ri*; and the Vedic Sanskrit, one additional cerebral consonant, *ळ l*, which is still preserved in the Maráthí. The Panjábí, Gujarátí, and Oríyá have also preserved the sound, though denoting it by different characters. This same consonantal sound is heard in the Mairwáří dialect of Hindí, and in some, at least, of the Himalayan dialects. So also the villagers of the central Doáb sometimes give the final *ल* of *पीपल*, 'the sacred fig tree,' an unmistakeable cerebral sound. But none of the above letters have any place in literary Hindí.

b. In addition to the above vowels, a short *ě*, nearly like *ě* in 'met', exists in the colloquial of some districts. It is heard, for example, in the local dialect about Ayodhyá, chiefly in certain verbal forms; as, *e.g.*, in the subst. verb, *ahēnun*, 'I am,' *ahēs*, 'thou art,' etc.* It may also be heard in some words in the Doáb, where it has arisen from the shortening of a previous long *e*; as, *e.g.*, in *bēṭiyá* for *biṭiyá*, dim. from *betá*, 'a son.' This sound is also said to be common in the N. W. Himalayas. It may be noticed, as further indicating the existence of this short *e*, that *व*, which, according to some books on Prosody, should be

* For further illustrations, see the tables of Declension and Conjugation.

uniformly long, in the Rámáyan is sometimes reckoned prosodially short. In these cases, it commonly appears as a substitute, either for short *i*, as in *jēhi*, for *jīhi*; or for a short *a*, as in *rākhēu*, for *rākhāu*.*

Lassen has noted the fact that this same letter also represented a long and a short sound in the literary Prákrit.†

2. The consonants are all vocalized by the short vowel *a*, which is theoretically inherent in each consonant. Thus, क properly represents, not *k*, but *ka*; प, *pa*; etc. The letters are indicated by adding the word कार *kár*; as, अकार *akár*, 'the letter *a*;' तकार, 'the letter *t*;' etc. र, when first in a compound consonant, as र्क *rk*, is indicated as रेक *reph*. When no particular letter is intended, the term अक्षर *akṣhar*, अक्षर حرف, often corrupted into अचक्षर *achchhar*, is used; as in the phrase, वह कौन सा अक्षर है *wah kaun sa akṣhar hai*, 'what letter is that,'

MODE OF WRITING THE DEVANÁGARI.

3. अ *a* being inherent in each consonant, is only written when initial in a word or syllable; thus, we write अप *ap*, तुअ *tua*, but प *pa*, त *ta*. The other vowels, when following a consonant, are substituted for the inherent *a*, and, in this case, the second of the two forms above given is used. But when the vowel sound is initial in a word or syllable, the first of the two forms is required; as, उक *uk*, उन *un*, इप *ip*, ईक *ikh*, गाओ *gdo*, दाई *dái*. Of the several non-initial vowel forms, ा *a*, ई *i*, ो *o*, and औ *au*, are written after, ि *i*, before, े *e* and ै *ai*, over, and ु *u*, ू *ú*, and ृ *ri*, under the consonants which they vocalize. Thus, the several vowel sounds are written after क, as follows:

क *ka*, का *ká*, कि *ki*, की *kí*, कु *ku*, कू *kú*, कृ *kṛi*, के *ke*, कै *kai*, को *ko*, कौ *kau*.

* Abundant illustrations of this statement will be found in the Rámáyan, Vid. chap xiv, On Prosody.

† Inst. Ling. Pracr. § 19. 4.

a. When initial, the vowels are all written as pronounced, before the following consonant; as, अत *at*, उद *ud*, ओर *or*, etc. Instead of ऐ *ai* initial, we sometimes find, in Hindî books, the combination औ; but this is not correct, and should never be imitated.

4. The consonants have but one invariable form. Excepting the cerebrals, they all have one perpendicular, with one horizontal stroke; which latter, again, is broken in three letters, viz., ध *dh*, भ *bh*, ञ *jh*.

a. But ञ *jh* has two additional forms, झ and ञ. The former is found in English and native prints; the latter is the regular form in Mārwarî. These forms, like ञ, and all the other consonants, are used both as initial and as non-initial.

b. In Mārwarî, *b* and *v* are distinguished merely by a diacritical point; thus, ब *b*, व *v*. The character ष is not commonly used; its place is regularly taken by व. No sibilant is used but स *s*.

5. In addition to the above simple consonants, a great number of compound letters are used. The compound form is used to denote the non-intervention between its elements of the inherent *a*. Thus, सत is *sata*, but स्त is *sta*; तव, *tava*, but त्त्व, *tva*. In certain cases, however, to be hereafter mentioned, the elementary forms are regularly used, even though no vowel sound intervene; as, कर्त्त, 'doing,' pronounced *kartā*; but the Sk. *kartta*, 'a doer,' is written कर्त्ता.*

a. It may be remarked, for the guidance of the student, that the use of the compound consonants is chiefly confined to the pure Sanskrit words in the language; in words of Prākṛit origin, the elementary letters are commonly preferred.

b. Consonants are compounded in three ways: viz., 1st, by writing one above the other, as, क्क *kk*, ट्ट *tt*; 2dly, by writing one after the other, omitting in all but the last the perpendicular stroke, and uniting the remainder of the character to that next following; as, ब्द *bd*, त्थ *th*, य्य *yy*; 3dly, some letters, when in combination, partially or wholly change their form; thus, क+ध becomes क्ध *kdh*; ज+ञ, ज्ञ *jh*.

(1) र takes two different forms, according as it is the first or last

* Vid. § 10. c.

letter of a compound. Thus, when initial in a conjunct, it is written as a semicircle above the second consonant, as in सर्प *sarp*; but when non-initial, it takes the form of a short stroke below the preceding consonant, as in ग्राह्य *grahya*.

(2) When a conjunct of which र *r* is the first member, consists of more than two consonants, the semicircle *reph* is written over the last letter, as in धर्म *dharm*, सर्व *sarv*. When a conjunct with *r* initial is vocalized by *i*, *ī*, *e*, *ai*, *o*, *au*, or followed by Anusvár, then *reph* is written to the right of them all; thus, धर्मी *dharmī*, मूर्ति *múrtti*, सर्वम् *sarvam*, etc.

6. Conjuncts are classified as strong, weak, or mixed, according to the character of the letters composing them.* Conjuncts formed of strong letters only, are termed *strong*, and those formed of weak letters only, *weak* conjuncts. Combinations of strong and weak letters, are called *mixed* conjuncts. The following list will be found to comprise all the more common combinations, arranged in these three classes.

STRONG CONJUNCTS.

क्क *kk*, क्ख *kkh*, क्त *kt*, ग्ग *gdh*, च्च *chch*, च्छ *chchh*, ज्ज *jj*, ज्ज् *jjh*, ट्ट *tt*, ट्ट् *tth*, ड्ग *dg*, ड्द *dd*, त्त *tk*, त्त *tt*, त्त *tth*, त्त *tp*, द्ग *dg*, द्द *dd*, द्द *ddh*, द्भ *dbh*, प्त *pt*, प्प *pp*, प्फ *p-ph*, ब्ज *bj*, ब्द *bd*, ब्ध *bdh*, ब्ब *bb*, ब्भ *bbh*.

WEAK CONJUNCTS.

न्न *nn*, न्य *ny*, न्न *nn*, न्न *nm*, न्य *ny*, न्न *nr*, न्य *nv*, न्य *ns*, म्न *mn*, म्न *mm*, म्य *my*, म्न *mr*, म्ल *ml*, म्भ *mh*, म्य *yy*, र्न *rn*, र्न *rm*, र्य *ry*, र्न *rv*, र्न *rsh*, र्न *rsh*, र्न *rh*, ल्न *lm*, ल्य *ly*, ल्न *ll*, ल्न *lh*, ल्य *ly*, व्न *vr*, व्न *vv*, श्न *shn*, श्य *shy*, श्न *shr*, श्न *shl*, श्न *shv*, श्न *shn*, श्न *shn*, श्न *shy*, श्न *shv*, स्न *sn*, स्न *sm*, स्य *sy*, स्न *sr*, स्य *sv*, स्न *ss*, ह्न *hn*, ह्य *hy*, ह्न *hr*, ह्न *hl*, ह्न *hv*.

MIXED CONJUNCTS.

क्न *km*, क्य *ky*, क्न *kr*, क्न *kl*, क्न *kv*, क्न *ksh*, क्य *khy*, ग्न *gn*, ग्न *gm*, ग्य *gy*, ग्न *gr*, ग्न *gl*, ग्य *gv*, ग्न *ghn*, ग्य *ghy*, ग्न *ghr*, क्न *ñk*, क्न *ñkh*, क्न *ñg*, क्न *ñgh*, च्य *chy*, च्न *chhr*, च्न *jñ*, च्न *jm*, च्य *jy*, च्न *jr*, च्न *je*, च्न *nch*, च्न *nchh*, च्न *nj*, च्न *njh*, द्न *dr*, द्न *nt*, द्न *nth*, द्न *nd*,

* By the strong letters are intended, all the five classes of mute letters, both smooth and aspirated; by weak letters, all other consonants.

नः *ndh*, तः *tn*, त्म *tm*, त्य *ty*, त्र *tr*, त्व *tv*, त्स *ts*, थ्य *thy*, द् *dn*, ध्य *dhy*, ध्र *dhr*, ध्व *dhv*, न्त *nt*, न्य *nth*, न्द *nd*, न्ध *ndh*, प्न *pn*, प्त *pt*, प्य *py*, प्र *pr*, प्ल *pl*, प्स *ps*, ब्य *by*, ब्र *br*, भ्य *bhy*, ब्र *bhr*, क् *rk*, क्क *rkh*, र्ग *rg*, र्घ *rgh*, र्च *rch*, र्छ *rchh*, र्ज *rj*, र्त *rt*, र्थ *rth*, र्द *rd*, र्ध *rdh*, र्प *rp*, र्ब *rb*, र्भ *rbh*, ल्द *ld*, ल्य *lp*, ल्व *lv*, श्च *shch*, श्क *shk*, श्त *sh̄t*, श्थ *sh̄th*, श्प *sh̄p*, श्म *sh̄m*, श्य *sh̄y*, स्व *sk*, स्त *st*, स्थ *sth*, स्प *sp*, स्फ *sph*.

7. *Anunásik* ~ simply denotes the nasalization of a preceding vowel, and can therefore never begin a syllable. It is written directly over, or to the right of the vowel thus nasalized; thus, कर्हँ *kahán*, कौँ *kaun̄*. In books edited by foreigners, Anusvár is always written instead of Anunásik.

Anusvár, which, in strict accuracy, denotes a stronger nasalization than the above, is written, like Anunásik, over, or to the right of the preceding vowel; as, अंश *aṅsh*, बांह *báṅh*, सोँ *soṅ*.

Visarg, meaning 'rejection,' (*i. e.*, of सृ or र्), indicates a weak aspiration, which has euphonically taken the place of those letters. It is only found in pure Sanskrit words, and even then, though occurring in the original, is very commonly omitted in Hindí. It is written thus, ∴; as, *e. g.*, in दुःख *duḥkh*, more commonly written and pronounced दुख *dukh*, = दुस् + ख *dus + kha*.

8. Besides these, there are several other signs used in Sanskrit, which, as they occasionally appear in Hindí, may here be explained.

Virám, 'pause,' is written under a consonant, thus, क् *k*, and denotes the absence of the inherent *a* by which the consonant is vocalized.

Avagrah, † indicates the elision of an initial अ *a* after a final ए *e* or ओ *o*, as, त्रिंशोऽध्याय *trinsho'dhyáya*, for त्रिंशोअध्याय *trinsho adhyáya*. It is therefore analogous to the English apostrophe. The *half pause* † is written at the end of the first line of a couplet; the *full pause* ‡ at the end of the second. These marks are only prosodial, and, besides these, there are no other marks of punctuation. But in a few books issued by English publishers, the English marks have been introduced. In native works, space is not even left between the words.

9. The symbol २ between two words, indicates that the former of the two is repeated, as, वह अपने २ घर गए, *wah apne apne ghar gae*.

a. The mark **o** is used, like the period in English, to indicate the abbreviation of a word; as, रामायण **जा०** *Rámāyaṇ Bā.* for रामायण **जासकावद** *Rámāyaṇ Bāi Kāṇḍ.*

b. The orthography of Hindí is as yet in a very unsettled state. **व** is constantly substituted for **ब**, even in Sanskrit words, where rule or usage would demand it; as in किरण, for किरब, गुन, for गुब, etc. The same confusion exists with reference to the characters **ज** and **ञ**, and also the sibilants **श**, **ष**; the tendency is to substitute **ष** for the other sibilants. The Sanskrit rules of orthography are the only recognized standard at present; but these rules, it should be remembered, apply only, as has been remarked, to the spelling of such Sanskrit words as exist in the language in an unaltered and uncorrupted form.

PRONUNCIATION OF LETTERS.

10. The vowels, in Hindí, are pronounced, for the most part, nearly as in the continental languages of Europe. **अ** *a* has no exact counterpart in English, though the last *a* in such words as 'total,' 'America,' very nearly represents it. It is said to correspond exactly to the short *a* in German. Many foreigners in India pronounce this **अ** *a* as *a* in 'cat,' but the correct sound is entirely different.

a. In conversation and in reading prose, **अ** *a* final, after a consonant, as a general rule, is silent; as in गुण, pronounced *gun*, not *guna*; रात, *rát*, not *ráta*. But to this general rule there are a few important exceptions.

(1) **अ** *a* final is, of necessity, always distinctly pronounced in a few monosyllables; as, न *na*, त *ta*, छ *chha*. —

(2) So, also, it is very slightly sounded after **र** *r* or **व** *v* final in a conjunct, and after **य** *y* final, preceded by **इ** *i*, **ई** *ī*, or **ऊ** *ū*; as, शास्त्र, *shástra*, इन्द्र, *indra*, बिप्रा, *bipra*,* ईश्वरत्त्व, *ishvaratva*, गुरुत्त्व, *gurutva*; तिय *tiya*, प्रीय, *príya*, इन्द्रीय, *indríya*, राजसूय, *rájasúya*.

(3) When, in prose and in conversation, **य** *ya* final is preceded by **अ** *a*, this *aya* is not to be distinguished in sound from **ऐ** *ai*, which is

* It should be noted, that while the Paṇḍits give this pronunciation of these conjuncts with **र**, yet the common people usually separate the letters, and pronounce, *shástar*, *bipar*, etc.

even occasionally, though inaccurately, written for it ; as, समय *samaya*, always pronounced, and sometimes written, समै *samai* ; छय *chhaya*, also pronounced, and sometimes written, छै *chhai*. Conversely, it may here be noted, that अय *aya* is sometimes inaccurately written for ऐ *ai* ; as often in the Rám. बयर *bayar*, for बैर *bair*, etc.

b. Observe, that when, in the formation of compound words, a silent final अ *a* becomes medial, it still remains silent, though in the middle of a word ; as, अन्नदाता, pronounced *anndátá*, not *annaddátá* ; फलदायक, *phaldáyak*, not *phaldadáyak*.

It should be noted that the above remarks refer only to अ *a* as inherent in a consonant. When non-inherent, it is always pronounced, whether medial or final ; as, तुअ *tua*, हराअ *harua*.

c. The inherent *a*, when final in roots or primitive words, in reading prose and in conversation, is always silent before all added terminations. Thus, in verbal forms, करना, root कर, is pronounced *karná*, not *karaná* ; चलता, *chaltá*, not *chalatá* ; बोलती, *bolítí*, etc. So, also, in all derivatives ; as, पुरवा *purvá*, dim. from पूर *púr* ; कुआरपन, *kuárpan*, from कुआर *kuár* ; मूरखपन *múrahpan*, from मूरख *múrahk*. It also becomes silent, when medial in the final syllable of dissyllabic verbal roots, before all terminations beginning with vowels ; as, निकला *niklá*, from the root निकल *nikal* : but, in the same root, when the termination begins with a consonant, it is pronounced, as, e. g., निकलता, *nikaltá*.

(1) This rule holds good without exception, in the standard dialect. But in the Braj and other dialects, where the verbal terminations, in several instances, consist of a consonantal sound only, the inherent *a* final in the root is necessarily pronounced. Thus, e. g., although we pronounce जानता, *jántá*, root जान *jána* ; in the Kanaují dialect, the corresponding जानत is pronounced *jánat* ; so, also, चलन, root चल *chalu*, *chalan*, etc.

(2) The pronominal gen. अपना is pronounced, sometimes *apná*, and sometimes *apaná*. The latter is most commonly used by the mass of the people. It is to be noticed that although the regular nom. of this pronoun is आप *áp*, yet the न does not belong to the termination, but represents the न of the original आत्मन. After the analogy of the language, therefore, the pronunciation *apaná*, is the more defensible. The pronunciation, *apná*, has possibly arisen from a popular misapprehension, regarding आप or अय as the radical element, instead of आपन ; in which case, following the analogy of verbal roots, the *a* of अ *pa* would be silent.

d. The final *a* inherent of the Denominative numerals, चौक, तीन, चम्म, is always pronounced, thus, *chauka, tina, namma*; तीन तीन नौ, pronounced *tin tina nau, lit.*, 'three threes nine.'

e. In poetry, the inherent *a* is always pronounced, even when final, as in the following half stanza; समरथ कहै नहिं दोष गुसाई; which is read, *samaratha kahan nahin dosha gusain*. But when it falls on the metrical pause, it is commonly silent; thus, झूलत पलना रघुवर पुलकित मारै, *jhulata palana Raghubar pulakita mai*.

11. आ *d* is pronounced like *a* in 'father'; इ *i*, like *i* in 'pin'; ई *ī*, as *i* in 'machine'; उ *u*, like *u* in 'pull'; ऊ *ū*, like *oo* in 'tool'; ऋ *ri*, as *ri* in 'brink'.

a. इ *i* and उ *u* final, though, like *a* final, always sounded in poetry, in the colloquial are but very faintly, if at all pronounced; as मति, pronounced *mati* or *mat*; परन्तु, pronounced *parantu* or *parant*.

(1) But some of the dialects, on the other hand, often lengthen a final *i*; as in Kanauji, मती *matī*, for मति *mati*; Kamāoni, चली वेर *chali ver*, for चलि कर *chali kar*.

b. Theoretically, ऋ differs from रि, in that the tongue vibrating, is not allowed to touch the gums, as in the consonant र. But this distinction is never regarded.

12. ए *e*, ऐ *ai*, and ओ *o*, औ *au*, are diphthongs: ए *e* and ऐ *ai* are the diphthongs of इ *i*; ओ *o* and औ *au*, of उ *u*. ए *e* is pronounced nearly like *e* in 'they'. Its elements are अ + इ *a+i*. ऐ *ai* is not quite the English *i* in 'time'.— Like this English *i*, a diphthong, it differs from it, in that the short *i*, instead of the long *ī*, is the latter element of the diphthong; *i. e.*, ऐ = *á+i*, but *i* in time = *á+i*. Thus, *e.g.*, the common word, है *hai*, 'is', is not correctly pronounced exactly like the English word 'high'. ओ *o* corresponds to the English *o* in 'go': it never has the sound of the English *o* in 'top'. Its elements are अ + उ *a+u*. औ *au* differs from the English *ou* in 'our', in the same way that ऐ *ai* differs from *i* in 'fine'. It is composed of अ + उ *á+u*; the English *ou*, of *á+ū*.

13. Anunásik (◌̃), as has been remarked, simply indicates the nasalization of the preceding vowel. The sound is

heard in the proper pronunciation of such French words as *bon*, *enfant*, etc. But in many Hindí books, especially those published by foreigners, this sound is represented by the symbol *Anusvár* (°).

14. *Anusvár* properly represents a nasal sound stronger than that of Anunásik : it is best heard before the sibilants, as in *अंश ansh*, *बांश bansh*.

a. But in words introduced from the Sanskrit, with little or no alteration, the sign Anusvár is very often used, after a short vowel, to express the nasal of the class of a following mute consonant ; and may thus represent, as the case may be, any one of the five nasals, ङ, झ, ञ, ण, or म. Thus, e.g., we may either write *मङ्गल* or *मंगल mañgal*, Anusvár having here the power of ङ. Similarly, in *संबन्ध sambandh*, the first Anusvár, preceding the labial ङ *b*, has the power of the labial nasal म *m*, but the second, before the dental झ *dh*, has the power of the dental nasal ण *n*.

b. But in the case of words much corrupted from the Sanskrit, after a long vowel, Anusvár, even before a mute consonant, denotes, not a consonant, but a nasalization ; as, e.g., *सोँठ*, pronounced *sonth*, not *sonth*, *चाँद*, *chánd*, *साँद*, *sáñr*, etc.

(1) In the cases referred to, Anusvár stands in the place of an original nasal consonant, preceded by a short vowel ; as, e.g., in *काँटा*, for *कवटक*. The question has been raised, whether the Anusvár in such cases denotes a consonant or merely a nasalization. But all the Pundits that I have been able to consult, insist on the inorganic character of the nasal, and I notice that Mr. Beames, in his *Comparative Grammar*, takes the same view. As he justly remarks, the lengthening of the preceding vowel, according to all the analogies of the language, argues the loss of a letter from the original conjunct.*

c. Occasionally in poetry, Anusvár, in Sanskrit words, following a final consonant in the end of a line, represents the letter म, and must be so pronounced ; as, e.g., *गुणमयं*, *gunamayam* ; *अयं*, *ayam*.

15. क *k* and ग *g* are pronounced, respectively, as *k* in 'key', and *g* in 'give': ग *g* never has the sound of *g* in 'gin'.

* Vid. Comp. Gramm. p. 296.

16. च *ch* and ज *j* are pronounced nearly as *j* in 'just', and as *ch* in 'church', but slightly more dental.

17. ट *t* and ड *d*, though often compared to the English *t* and *d*, have no precise equivalents in English. In pronouncing them, the tongue should be thrown well back, so as to strike, not the gums, as in the English *t* and *d*, but the roof of the mouth.

a. ढ is often written with a diacritical point (ँ), and is then represented in the Roman character by *r*. To utter this correctly, place the tongue in the same position as for ड *d*, and try to pronounce the English *r*; the proper sound will then be given. The corresponding aspirate ढ has also the same double sound, which is represented by ढ्ह *r̥h*.

(1) Great care should be taken to acquire the correct pronunciation of this letter, which is, undoubtedly, for western organs, the most difficult of all the Hindí sounds: very few Europeans ever give it correctly. The learner should carefully observe that this is equally distinct from the English *r*, and the Hindí र. The sound, when correctly given, much more resembles the cerebral ढ, with which, indeed, it is constantly interchanged; many words being written and pronounced indifferently with ड *d*, ढ्ह *dh*, or ढ्ह *r̥*, ढ्ह *r̥h*; as बुढ़ा *buṛhā* or बुढ़ा *buḍhā*. The Panjābī distinguishes these two sounds by two separate characters.

18. The sounds of त *t* and द *d* do not exist in English. In pronouncing them, press the tongue, not against the gums, as in the English *t* and *d*, but against the front teeth.

19. प *p* is pronounced like the English *p*. ब *b* differs from the English *b*, only in that the contact of the lips is less firm. Many words thus fluctuate, in orthography and pronunciation, between ब *b* and व *v*.

20. Each of the above consonants has its aspirate; *i.e.*, it is combined with the *spiritus asper* so as to form but one vocal utterance. The same direction applies to the

pronunciation of all the aspirates, *viz.*, utter the smooth consonant with a forcible expiration; the corresponding aspirates will then be given. In the English phrases, 'up-hill,' 'brick-house,' pronounced so that the *p* and *k* shall be closely joined to the following *h*, we have the correct sound. Especial care should be taken that no vowel-sound be interpolated between the smooth consonant and the aspiration; thus, फल is pronounced *phal*, not *pahal*; खाना, *khána*, not *kahána*, which has a very different meaning.

a. The greatest pains should be taken by the learner to master the pronunciation of these aspirates. A native, however illiterate, never confounds the smooth and aspirated consonants; and, except in the case of फ *ph*, which is often by the uneducated corruptly pronounced as *f*, never fails to give the aspirate its correct pronunciation. He never separates the smooth consonant from the following aspiration.

21. ञ *ñ* has the sound of *ng* in 'sing'; it is only found immediately before a guttural consonant, and never begins a word or syllable.

ञ *ñ* has the sharp sound of *n* in 'pinch.' Like ञ, it is never initial, and is only found before a consonant of its own class.

ञ *n*, like the other letters of the class to which it belongs, has no equivalent in any European language. It is pronounced after the analogy of the other cerebrals; *i. e.*, the tongue should be turned back, as for ट and ढ, so as to strike the roof of the mouth; in that position, endeavour to pronounce *n*.

a. This nasal, while the only nasal admissible before a consonant of its own order, is not, like the former two, confined in use to such a position, but may occur separately, as, *e. g.*, in the common words, गुण *gun* and बरान *baran*. It never occurs as initial in a word.

b. The common people in the valley of the Ganges, as well as most foreigners in India, make no distinction between this and the dental ञ *n*, which is often substituted for it, even in writing. Educated Hindoos, however, carefully distinguish the two letters, and the correct sound should be acquired.

न *n* is slightly more dental than the English *n*, being pronounced, like the foregoing nasals, after the analogy of the class to which it belongs; *i. e.*, with the tip of the tongue against the front teeth.

म *m* is sounded like the corresponding English letter.

22. य *y* is generally pronounced like *y* in English.

a. But sometimes it is pronounced like ज *j*, especially when initial in Sanskrit words; as, *e.g.*, युग *yug*, pronounced जुग *jug*; योग्य *yogyā*, pronounced जोग *jog*. So also it is pronounced as *j*, when doubled and final; as सूर्य, pronounced and occasionally written सूरज *súraj*. As above remarked,* य final, preceded by short *a*, blends with it so as to give the diphthongal sound ए *ai*; as समय *samaya*, pronounced समै *samai*, etc.

र *r* has no precise equivalent in English; it has a rolling sound like the German *r*, but much softer.

ल *l* is not quite identical in sound with the English *l*. In its utterance the tip of the tongue touches the front teeth, instead of the gums. The resulting sound is distinctly softer and more dental than the English *l*.

व *v* has a sound intermediate between the English *v* and *w*, but more like *v*, which letter is therefore chosen as the usual Roman equivalent.

a. But in a conjunct, after any consonant but र *r* or त *t*, it has a softer sound, like the English *w*; as, *e.g.*, ह्रै *hrai*, स्वर्ग *svarg*. In the common conjunct, स्व *sv*, the common people usually soften व still further to its cognate vowel, उ *u*; pronouncing, *e.g.*, स्वर *svar*, as if it were written सुर *sur*, etc. Similarly, in some parts of the country, people say ईसुर *ísur*, for ईश्वर *íshwar*. व initial in the pronoun वह *vah* generally receives the softer sound. Examples of the harder sound, in the conjuncts र्व *rv* and त्व *tv*, are तत्त्व *tattva*, महत्त्व *mahatva*; पूर्व *púrv*, सर्व *sarv*. † In these conjuncts with र, व is often hardened to ब, so that many pronounce पúrb, sarb.

23. श *sh* is pronounced like *sh* in 'shut'; the palatal ष *sh* differs little from श; the lingual contact is slightly further back, as in the cerebral mutes.

* Vid. § 10 a. (1). † The inherent *a* of र्व is never pronounced.

४ *s* is the dental sibilant, and, like the other letters of its class, differs from the corresponding English letter, in that the tongue, in its utterance, touches the teeth instead of the gums.

५ *h* does not differ from the English *h*.

a. ष is very often pronounced exactly like ख *kh*; e.g., दोष *dosh* is pronounced either *dosh* or *dokh*. Accordingly, ष is often inaccurately written for ख; as दुष for दुख; राषा for राखा, etc. This is the uniform usage in Mārwarī, as also in much old Hindī.

24. In pronouncing compound letters, each element should be distinctly articulated, whether the letters be different or the same; e.g., कुता is *kut-tá*, not *kut-á*; पत्थर *pat-thar*, not *path-ar*. But this should not be exaggerated.

25. The following peculiarities of pronunciation occur in Mārwar and Mairwára. The vowel-sound in the plural termination आँ *án* is pronounced very nearly as *a* in 'all', but a little less open. The sound of औ *au* also closely resembles that of आ in आँ. च *ch* and छ *chh* are both pronounced like च; thus, चक्की is pronounced *sakkí*, and चाक, *sás*. ञ is pronounced lightly, and often entirely dropped. The cerebral ङ *!* is common, and is pronounced by rolling the upturned tongue along the palate. It is sometimes indicated by a diacritical point under ङ.

26. The grammarians of the Indian languages have not, for the most part, indicated so many distinctions between the pronunciation of the Indian and English letters as have been made in the above sections. But we are none the less confident that a large part of the Hindī letters do differ slightly from their nearest English equivalents. Let the reader, if in India, ask some native who is learning English, to read an English sentence, and it will soon appear to the attentive listener, that he pronounces very few of the English letters quite correctly. Perhaps there is no better way than this to train the ear to catch the nice distinctions of pronunciation to which we have adverted. So long as both words and sounds are foreign, the sounds are not so closely noticed; but when the native pronunciation of the vowels and consonants is applied to English words, the difference is instantly apparent.

27. It should be observed, before leaving the subject of pronunciation, that Accent, although unquestionably existing in Hindī, is much less strongly marked than in English, and is quite subordinate in

importance to Quantity. Even in conversation, the native habitually observes the quantity of each syllable. In the enunciation of sentences, therefore, the student should be careful to avoid that strongly accentuated style, which is so characteristic of English speech, and give to every long vowel in an unaccented syllable, its full quantity.

28. It will be apparent from the above sections, that, with the two exceptions of श and ष , which each represent two sounds, the Devanāgarī alphabet is strictly phonetic. As the pronunciation of words in which श and ष occur, varies, even in the same locality, they will be uniformly represented in the present work by the Roman letters *sh* and *y*.

The same ambiguity attaches to the Bangālī *y*; but the Bangālīs distinguish the two sounds by a diacritical point. So also in the Mahājanī or script alphabet, used in business, *b* and *v* are distinguished in the same way, merely by a dot.

To these two exceptions may be added the compound character, $\text{ज्ञ} = \text{ज} + \text{ञ}$, $j + ñ$, which is invariably pronounced in Hindī as if it were *gy*. This conjunct will therefore be represented in this book by the Roman letters *gy*; as ज्ञान , *gyán*, not *jñán*.

29. As above remarked, it is extremely important that the student accurately discriminate in pronunciation between closely related letters. Because the undisciplined ear at first detects little or no difference between, *e.g.*, a smooth and an aspirated consonant, or between the cerebral and dental letters, it is often imagined that a failure to distinguish them in pronunciation cannot be a very serious matter. No mistake could be greater or more fatal to one who wishes to understand the people, and be understood by them. As a matter of fact, multitudes of words of different meaning, differ only in these similar letters; so that by the neglect of an aspirate, the substitution of our English *t* for the Hindī dental, or converting the hard ड़ *r* into the Hindī र *r* or English *r*, we may say something so foreign to our intention, if not worse, as to make our speech, if understood at all, a matter only of ridicule.

a. The foreigner is most apt to blunder in the following particulars, *viz.*: a smooth consonant is substituted for an aspirate; the cerebral *t* and *d*, or the English *t* and *d*, which have a somewhat similar sound, are substituted for the corresponding Hindī dentals; and, especially, the cerebral ड़ *r* is pronounced like the Hindī र *r*, or the English *r*; doubled consonants are indistinctly pronounced. To

these common mistakes may be added an English tendency to shorten a final unaccented long vowel; so that, e. g., कर्ता *kartá* is mispronounced *karta*; पानी *pání*, *pány*; माली *máli*, *mály*, etc.

30. As the best means of impressing the above remarks upon the mind, we subjoin a list of common words similar in sound, but differing in meaning.

LIST OF SIMILAR WORDS.

खाना <i>khána</i> , 'dinner, food, to eat'.	गाड़ी <i>gáří</i> , 'a carriage'.
कहाना <i>kahána</i> , 'to cause to say'.	गारी <i>gáří</i> , 'abuse'.
काना <i>kána</i> , 'a one eyed man'.	
खाना <i>خانا khána</i> , 'a room'.	दुरी <i>chhurí</i> , 'a knife'.
कीड़ा <i>kirá</i> , 'a worm'.	चूड़ी <i>chúří</i> , 'a bangle'.
खीरा <i>khírá</i> , 'a oucumber'.	चूना <i>chhúna</i> , 'to touch'.
काटना <i>kátna</i> , 'to cut'.	चूना <i>chúna</i> , 'to leak'.
कातना <i>kátna</i> , 'to spin'.	जाड़ा <i>jára</i> , 'cold'.
खड़ा (होना) <i>khara (honá)</i> , 'to stand'.	जाड़ा <i>jhára</i> , 'sens. obscene'.
कड़ा <i>kará</i> , 'hard'.	जाल <i>jhál</i> , 'spice, pungency'.
खरा <i>khará</i> , 'pure'.	जाल <i>jál</i> , 'a net'.
खर्रा <i>kharrá</i> , 'a curry comb'.	टीका <i>tíká</i> , 'inoculation; a sectarial mark'.
खट्टा <i>khattá</i> , 'sour'.	ठीका <i>thíká</i> , 'hire'.
कट्टा <i>kattá</i> , 'a large louse'.	
कटा <i>katá</i> , 'cut'.	दाल <i>dál</i> , 'a split pulse'.
खपरा <i>khaprá</i> , 'a tile'.	डाल <i>ḍál</i> , 'throw'. (<i>imperat.</i>)
कपड़ा <i>kaprá</i> , 'a cloth'.	ढाल <i>ḍhál</i> , 'a declivity'.
गाओ <i>gáo</i> , 'a cow'.	धो <i>dho</i> , 'wash'. (<i>imperat.</i>)
घाओ <i>gháo</i> , 'a bruise'.	दो <i>do</i> , 'give'. (<i>imperat.</i>)
घड़ा <i>ghará</i> , 'a water-jar'.	
गड़ा <i>gará</i> , 'buried'.	धोबी <i>dhobí</i> , 'a washerman'.
गढ़ा <i>garhá</i> , 'a ditch'.	दोबी <i>dobí</i> , 'a Brahmanical title'.
घोड़ा <i>ghorá</i> , 'a horse'. [<i>soldier</i>].	बकरी <i>bakrí</i> , 'a goat'.
गोरा <i>gorá</i> , 'white, a European	बखरी <i>bakhrí</i> , 'a house'.

ताला <i>tála</i> , 'a lock'.	बुढ़िया <i>buṛhiyá</i> , 'an old woman'.
टाला <i>tála</i> , 'a quagmire'.	बुड़िया <i>buṛiyá</i> , 'sens. obscæn.'
पढ़ना <i>paṛhná</i> , 'to read'.	बूढ़ा <i>búṛhá</i> , 'old'.
पड़ना <i>paṛná</i> , 'to fall'.	बुरा <i>burá</i> , 'bad'.
पानी <i>páni</i> , 'water'.	भाई <i>bháí</i> , 'brother'.
पाणि <i>páni</i> , 'hand'.	बाई <i>bái</i> , 'rheumatism'.
	भई <i>bháí</i> , 'became'. (<i>Fem.</i>)
पुड़िया <i>puṛiyá</i> , 'a powder'.	मोटी <i>motí</i> , 'fat, thick'. (<i>Fem.</i>)
फुड़िया <i>phuṛiyá</i> , 'a boil'.	मोती <i>motí</i> , 'a pearl'.
फुरिया, <i>phuriyá</i> , 'true'.	
फल <i>phal</i> , 'fruit'.	रोती <i>rotí</i> , 'erying'. (<i>Fem. part.</i>)
पल <i>pal</i> , 'an instant'.	रोटी <i>rotí</i> , 'bread'.
वात <i>bát</i> , 'a word, a thing'.	सात <i>sát</i> , 'seven'.
बाट <i>bát</i> , 'a road'.	साथ <i>sáth</i> , 'with'.
मात <i>bhát</i> , 'boiled rice'.	साठ <i>sáth</i> , 'sixty'.
माट <i>bát</i> , 'a bard'.	

31. Besides the Devanágari, Hindí is written in two other alphabets, the *Káyathí* or *Kaithí*, and the *Mahájantí* or *Sarráffí*. The word *Káyathí* is from *Káyasth* or *Káyasth*, the name of the writer caste among the Hindoos; and the character is so called because certain slight alterations better adapt it to the purpose of rapid writing. Books are printed in this character, but it is by no means so common as the Devanágari, and is not much used west of Allahabad. The *Mahájantí*, (from the Hindí *mahájan*, 'a banker'), also called *Sarráffí*, (from the corresponding Ar. *صراف*), is only used in business, and is the character in which receipts, drafts, etc., are commonly written. These alphabets will be found opposite p. 18.

a. It will be observed that the *Mahájantí* is derived directly from the *Káyathí*; most of the characters differ from it chiefly by the omission of the horizontal or perpendicular stroke or both. Some, however, have assumed a form widely differing from both the *Káyathí* and *Nágarí*. It will be observed also that in the *Mahájantí*, one sign is made to represent both the long and short sounds of any vowel, whether initial or non-initial. Similarly, no distinction is made between *ऋ* and *ॠ*, or *ॡ* and *ॢ*. *Anusvár* is never written in the *Mahájantí* character. It will be also noticed that the *Káyathí* form of *ॠ* is identical with the form which this letter assumes in Devanágari, when it is the last member of a conjunct.

32. An attempt has been made to indicate in the Devanāgarī character, by means of diacritical points, the various letters peculiar to the Arabic and Persian alphabets as used in Urdū. A few common Hindī books, as the *Baitāl Pachísí*, and *Sinhásan Battísí*, contain a large admixture of Persian and Arabic words, and are sometimes met with printed in this pointed Nāgarī. The various pointed letters are given below. A point written under any of the vowels, indicates that the vowel is followed or preceded by ع Ayin; ع, when it occurs alone, represents the consonant ع.

क़, ख़, ग़, ط, ظ, ز, ض, ث, ف, ص, ح : ۞.

CLASSIFICATION OF LETTERS.

33. All the letters, both vowels and consonants, may be classified according to the organ by which they are pronounced, as in the following table.

	I.	II.	III.	IV.	V.	VI.
Gutturals,	क़ का	ख़ ख	ग़ घ	ङ		ह
Palatals,	ख़ ई ख़ ऐ	च छ	ज ङ	झ	य	श
Cerebrals,	क़ृ (क़ृ)	ट ठ	ड ढ	ण	र	ल
Dentals,	(लृ) (लृ)	त थ	द ध	न	ल	स
Labials,	व व ओ औ	प फ	ब भ	म	य	

a. In Col. I, ख़, ऐ, and ओ, औ, are classified according to their second diphthongal element, as respectively palatal and labial; but they are also related to the guttural sounds, by their initial element, क़ or का. Letters of the same organ are said to be *cognate* to each other.

34. The letters may again be classified according to the nature of the vocal effort made in their utterance. If, in the utterance of a letter, the breath be completely arrested, the resulting sound is reckoned *hard*; if the breath be but partially arrested, or be allowed to escape freely, the resulting letter is called *soft*. Thus, in the above table, the consonants in Col. II, together with the sibilants, are called hard; all the other letters, whether vowels or consonants, are reckoned soft.

Nāgarī.	Kaithī.	Mahājanā.	Nāgarī.	Kaithī.	Mahājanā.
अ	ल	ॐ	ठ	ठ	ॐ
आ	ला	ॐ	ड	ड	ॐ
इ	लि	ॐ	ण	ण	ॐ
ई	ली	ॐ	त	त	ॐ
उ	लु	ॐ	थ	थ	ॐ
ऊ	लू	ॐ	द	द	ॐ
ऋ	लृ	ॐ	ध	ध	ॐ
ॠ	लृ	ॐ	न	न	ॐ
ए	ले	ॐ	प	प	ॐ
ऐ	ली	ॐ	फ	फ	ॐ
ओ	ली	ॐ	ब	ब	ॐ
औ	ली	ॐ	भ	भ	ॐ
क	क	ॐ	म	म	ॐ
ख	ख	ॐ	य	य	ॐ
ग	ग	ॐ	र	र	ॐ
घ	घ	ॐ	ल	ल	ॐ
ङ	ङ	ॐ	व	व	ॐ
च	च	ॐ	श	श	ॐ
छ	छ	ॐ	ष	ष	ॐ
ज	ज	ॐ	स	स	ॐ
झ	झ	ॐ	ह	ह	ॐ
ञ	ञ	ॐ			ॐ
ट	ट	ॐ			ॐ

a. The following relations between the letters should be carefully noted. Each hard consonant in Col. II, has its cognate soft consonant in Col. III, and *vice versa*. Thus, to the hard क in Col. II, corresponds the soft ऋ in Col. III; and to the soft aspirate, भ, in Col. III, corresponds the hard aspirate ब in Col. II. Each soft consonant in Col. III and each vowel, except the gutturals, has its cognate semivowel in Col. V. Thus, the labial semivowel, य, corresponds to the soft labial consonant ञ, in Col. V, and to the labial vowels, उ, ऊ, in Col. I. So also, cognate to the vowels व and ई, are the soft mute व and the palatal semivowel य. व, strictly speaking, is a guttural sibilant, so that it is written in Col. VI, with the sibilants. Each of the consonants, therefore, except the labials, has its corresponding sibilant. The student is now prepared to understand the principles of Sandhi.

CHAPTER II.

SANDHI.*

35. By the term 'Sandhi' ('union') is technically denoted the euphonic combination of concurrent letters. Its laws apply uniformly to the Sanskritic element in Hindí, in respect of the correct orthography of pure Sanskrit (*Tatsama*) words, and the formation of compounds from such single words.

a. In the Prakritic element of Hindí, the laws of Sandhi are constantly disregarded. Still we may observe, even in Prakritic words, the operation of these laws at a former period, in producing many modern forms; and a knowledge of the principles of Sandhi will thus often enable the student to recognize, without a tedious and perhaps fruitless search in the Dictionary, the various peculiar and corrupted words with which Hindí poetry, especially, abounds.

GUN AND VRIDDHI.

36. In treating of Sandhi, we have first to notice the subject of *Gun* and *Vridhi*. *Gun* essentially consists in the prefixing of a short *a* to the several simple vowel sounds; so that अ + इ or ई = ए; अ + उ or ऊ = ओ; अ + ऋ = अर. By *Gun*, therefore, is denoted this change of इ or ई to ए, उ or ऊ to ओ, and ऋ to अर.

* This chapter and the following may be omitted by the beginner.

37. *Vriddhi* consists in the prefixing of a long *á* to these same simple vowels; or, which is the same thing, prefixing a short *a* to the *Guṇ* of those vowels. Thus, by *Vriddhi*, आ + अ = ऐ; आ + उ = औ; आ + ऋ = आरः or अ + ए = ऐ; अ + ओ = औ; and अ + अर = आर.

By *Vriddhi*, therefore, is denoted the change of अ or ई to ऐ, उ or ऊ to औ, and ऋ to आर. अ is technically regarded as itself a *Guṇ* vowel, and is therefore susceptible of the *Vriddhi* modification only.

38. Observe, further, that vowels of the same organ, whether simple or diphthongal, are said to be similar to each other. Thus, अ, ई, ए, ए, are similar to each other. Vowels of different organs are said to be dissimilar; thus, *e.g.*, अ, उ, ऐ are mutually dissimilar.

39. Observe, finally, that, according to § 34, *a.*, the vowels of each organ, except the gutturals अ and आ, have their cognate semivowel. Thus, the cognate semivowel of अ, ई, ए, and ऐ, is य; of उ, ऊ, औ, and औ, the cognate semivowel is व; and of ऋ, र. The following table will present this whole matter at a glance.

<i>Primitive short vowel.</i>	<i>Similar Long vowel.</i>	<i>Guṇ.</i>	<i>Vriddhi.</i>	<i>Cognate Semivowel.</i>
अ	आ	अ	आ	
इ	ई	इ	ऐ	य
उ	ऊ	उ	औ	व
ऋ	(ऋ)	अर	आर	र

The following common rules of Sandhi will be now readily understood.

SANDHI OF VOWELS.

40. Any simple vowel, long or short, followed by a similar simple vowel, long or short, coalesces with it into its own long. In the application of this, and all succeeding rules of Sandhi, the inherent *a* is never regarded as silent. Thus, कल्प + अन्त becomes कल्पान्त; पाप + आत्मा, पापात्मा; कृपा + आयतन, कृपायतन; अहि + ईश, अहीश; भानु + उदय, भानूदय.

41. क or का, followed by a dissimilar simple vowel, long or short, blend with it into the Guṇ of that vowel; and when followed by a Guṇ or Vriddhi vowel, blend with it into the corresponding Vriddhi. Thus परम + ईश्वर becomes परमेश्वर; न + इति, नेति; महा + ईश, महेश; हिम + उपल, हिमोपल; वेल + ऊपरि, वेलोपरि; एक + एक, एकैक; सदा + एव, सदैव; देव + ऋषि, देवर्षि; अमित + जोषस, अमितौषस; महा + जोषधि, महौषधि.

42. The simple vowels, इ, ई, उ, ऊ, ऋ, followed by any dissimilar vowel, are changed into their cognate semivowels. Thus, इति + आदि becomes इत्यादि; सु + आल्य, स्वल्य; अनु + एषी, अन्वेषी; etc.

43. The Guṇ diphthongs, ए and ओ, followed by any vowel, are changeable, respectively, to अय and अव; and the Vriddhi diphthongs, ऐ and औ, under the same conditions, are changeable to आय and आव.

a. This is, in fact, only a special application of the foregoing rule, according to which, the i and u, which are, respectively, the second elements in the above diphthongs, harden into y and v, leaving the first element, a or ā unchanged.

b. This rule will chiefly be of service to the Hindī scholar, in enabling him to recognize the roots of those Sanskrit words with which Hindī abounds. Thus, by Guṇ of the radical vowel, we have, from the root वि, 'to conquer', जे + अ = जय, 'victory'; similarly, from भू, 'to be', भे + अ = भव, 'existence'. So also, by Vriddhi of the radical vowel, and addition of the termination अक, we have, from the root नी, 'to guide', ने + अक = नायक, 'a leader'; similarly from पू, 'to purify', पे + अक = पायक, 'fire'.

44. Sometimes, in a few Sanskrit phrases, rarely met, क initial, following ए or ओ, is elided, and ए or ओ remain unchanged. Thus, in the Rāmāyaṇ we find तेपि for ते अपि and तेति for ते अति. But these in Sanskrit, would be written with Avagrah,* thus; तेऽपि, तेऽति.

SANDHI OF CONSONANTS.

45. A hard consonant,† before any soft letter, must be changed to its own unaspirated soft. Thus, अगत + अम्बा becomes अगादम्बा; अनुमत्त + आदि, अनुमदादि; भविष्यत्त + वरता, भविष्यद्वरता. In Sanskrit, it is also true that a soft consonant before a hard consonant, must be changed to its own unaspirated hard. But Hindī scarcely affords examples of the operation of this rule.

*Vid. § 8. †Vid. § 34.

46. If the second consonant be a nasal, the first is changed into the nasal of its own class. Thus, तद् + मान् becomes तन्मान् ; चित् + मय्, चित्तमय्.

47. त् or द् final, followed by च् or ज् are changed to that following letter. Thus, न् before the resulting conjunct being dropped, we have, from सन्त + चित्, सच्चित् ; from सन्त + जन, सज्जन.

48. न्, before any vowel-sound, or one of the consonants न्, म्, य्, or ज्, in all pure Sanskrit words, is changed to ञ्, when following either of the three cerebral letters, ऋ, र्, ए. This rule operates, even though a guttural or labial mute, a semivowel, a nasal, or a vowel, Anusvár or ह्, or any combination of these, intervene between न् and the above cerebral letters. Thus, we correctly write ऋञ् for ऋन्, शरञ् for शरन्, आभूषञ् for आभूषन्. So also, e.g., we correctly write रामायञ्, not रामायन्, on account of the initial र्, even though the combination आमाय् intervene between the र् and the nasal.

a. This rule is especially to be remembered in order to the correct spelling of pure Sanskrit words in Hindí. But it must be no less carefully observed, that the rule applies to such words only. In all other words, न् under the above circumstances, in the standard dialect, remains unchanged. Thus, although we must write कारञ्, and not कारन्, it would not be correct to write करञ्, for करना, because करना, unlike कारञ्, is not an uncorrupted Sanskrit word. In some of the dialects, indeed, as, e.g., Mārwarí, Garhwálí, etc., ञ् often appears even in these corrupted Prákrític words; but this is to be attributed, not at all to the operation of the above principle of euphony, but to a preference for the cerebral nasal, which those dialects everywhere exhibit, dragging it in constantly, in the most unexpected places.

49. न्, before any mute consonant, is changeable to the nasal of that class, which may be always written as Anusvár.* Before all other consonants it becomes Anusvár. The operation of this rule is especially to be noticed in the numerous Sanskrit compounds in which सस् 'with', 'together', is the first element. Thus, e.g., सस् + कल्प = सङ्कल्प or संकल्प; सस् + चित् = सच्चित्त; सस् + ताप, सन्ताप; सस् + शय = संशय.

50. Final ञ्, in composition, becomes र्, before all soft letters except र्, when preceded by any vowel other than च् or ज्. Instances of this change are common in Sanskrit compounds; as, e.g., आशीस + चाद = आशीर्वाद; दुस् + जन = दुर्जन. When र् follows, ञ् is dropped, and the preceding vowel is lengthened; as in नीरोज्, from निस् + रोग्.

* Vid. § 14, a.

51. ओ is substituted for अस् (or अः) before short अ, or a soft consonant; अ following, is then elided, and the elision marked by Avagrah. This rule is illustrated by such compounds as मनोहर, from मनस + हर; रजोगुण, from रजस + गुण; also in the headings of chapters, as प्रथमोऽध्यायः for प्रथमस अध्यायस. So likewise, such Sanskrit phrases in the Rámáyaṇ as सोपि, योसि, सोसि, are to be explained; यस् (यः) and सस् (सः), before अपि and अस्, have first become सो and यो by the above rule, and then the following initial अ has been elided. Avagrah, in these instances, is inaccurately omitted.

52. In all Sanskrit words, ष must be written for स, not final, after any vowel but अ or आ and after either क or र. Thus we write, correctly, भविष्य, not भविस्य. But Hindí yields few examples under this rule.

53. स final, in Sanskrit compounds, is changed to Visarg or ह, before क, ख, घ, and ङ. This rule is illustrated by numerous compounds with the negative prefix निर, and a few other words; as, निष्प्रमाद for निर्प्रमाद; निष्कलंक or निःकलंक, for निर्कलंक; प्रातःकाल, for प्रातस्काल.

54. In Sanskrit, the number of these euphonic rules is much greater, but those that we have given will be found sufficient to indicate and explain the correct writing of nearly every Sanskrit word ever used in Hindí.

CHAPTER III.

OF THE CONSTITUENT ELEMENTS OF HINDÍ.

55. When, long before the Christian era, the Aryan, Sanskrit-speaking people entered what is now called Hindusthán, they found it inhabited by people of another race and another tongue. This inferior race, as the tide of Aryan invasion rolled on eastward, retreated before it, falling away, some into the mountains on the north, more into the jungles and hills of Central and Southern India, where, under various names, preserving still their ancient dialects, and superstitious demon-worship, they are found to-day. Many, however, doubtless remained in their ancient homes, where the stream of Aryan immigration and Aryan speech soon swept over them, and

they became the servants of the invading race. Although the aboriginal speech must thus soon have disappeared from Northern and Western India, it is scarcely conceivable that it should not, before its disappearance from the scene, have influenced, to some extent, the language of the Aryan invaders. To this external, Turanian influence, we shall probably not err in attributing many peculiarities of those ancient Indian dialects known as *Prákrit*, 'common, vulgar', which for centuries co-existed with the Sanskrit, much as, in ancient Italy, the various provincial dialects co-existed with the Latin of the court and of the forum.

56. Out of these *Prákrit* dialects, rather than from the classic Sanskrit, arose the Hindí, as well as the other modern Aryan languages of India. Their relation to the primitive Sanskrit finds an almost exact parallel, in the relation of the modern Romance languages of Europe to the classic Latin.* But the Hindí, almost from its very birth, about 1000 A.D., has been subjected to foreign influence. The successive invasions and final occupation of the country by the Muhammadans, gave rise to the so-called Urdú or Hindustání. This is, essentially, merely a dialect of Hindí, in the broader sense of the term; in which, to a large extent, the vocabulary, and in a less degree, the grammar of the Hindí has been modified by a substitution of Arabic and Persian, for Sanskrit and *Prákrit* words and constructions. But besides this, there is probably no dialect of Hindí, however pure, which has not received at least a few Arabic and Persian words from the Muhammadan conquerors of India.

57. From the above brief sketch of the origin and history of modern Hindí, it is apparent that Hindí, though essentially as truly an Aryan tongue as Sanskrit, contains, besides the Aryan,† which constitutes its form and most of its substance, a Turanian and a Shemitic element.

As to the Turanian or aboriginal element preserved in Hindí, little that is satisfactory can be said. We are not aware that any such thorough and systematic comparison of Hindí with the modern

*An interesting and suggestive note on this subject will be found in Muir's *Sanskrit Texts*, Vol. II, pp. 146—149.

† Most Aryan words in Hindí are of Sanskrit or *Prákrit* origin. But a few, brought in by the Muhammadan invasions, have come from the old Zand through the modern Persian.

aboriginal and Dravidian dialects of India, has been made, which might cast light upon this question. It would be difficult, probably, to find many scholars competent for such an investigation. But, if we mistake not, modern researches would seem to indicate that the Turanian influence in the Hindí and other Indo-Aryan dialects, has often been unduly exaggerated.

a. Some have thought that they could trace this influence almost throughout the entire Hindi grammatical system. The indication of the case-relation by certain appended particles, rather than by inflection, or organic additions to the word; the conjugation of the verb chiefly by means of auxiliaries, instead of by tense and modal inflections,—these, among other deviations from the Sanskrit and Prákrit dialects, and corresponding agreements with the Dravidian languages of S. India, have been attributed to extra-Aryan influence. But all these analogies are probably more fancied and apparent, than real and significant. The relation of the postposition to the Hindí substantive, is, in fact, quite another thing from the 'agglutination' of words in the Turanian languages. It has been abundantly demonstrated that the Hindí particles indicative of case-relation, are, in reality, *boná fide* Sanskrit words, greatly corrupted, which were originally apprehended, not as 'agglutinated' to the noun, but as in some sort of grammatical construction with it. The striking correspondence, pointed out by Dr. Caldwell in his Comparative Grammar, between the Dravidian dat. sign, *ko* or *ku*, and the Hindí dat. postposition, *ko*, is now regarded by the best scholars as probably only a casual coincidence; and, in view of the Sanskrit origin, which may be clearly demonstrated in the case of the other Hindí postpositions, the Turanian origin of this one particle becomes highly improbable. As to the difference noted between the Sanskrit and the Hindí conjugation, it is only precisely similar to what we observe, to a greater or less extent, in every European language, where, in consequence of the abrasion and loss of the terminations and inflections which characterized the synthetic languages from which they severally arose, the use of auxiliaries became a simple necessity of speech. As to vocabulary, it is, in the first place, a notable fact, that as the various Indo-Aryan dialects become better known, and their phonetic laws better understood, many words, which at first resisted all attempts to prove their Aryan origin, and therefore might have been imagined to be aboriginal, have finally been satisfactorily identified or connected with classic Sanskrit terms. Still there can be little reason to doubt that, more especially among the vulgar words of various local dialects, investigation will finally leave a residuum of words unquestionably Turanian. Prof. Williams has suggested, in his Sanskrit Grammar, that the cerebral letters, which the Hindí has received from Sanskrit, are probably derived from the aboriginal dialects. It is, at least, a fact worth noticing in this connection, that, of those Hindí words which begin with a cerebral, much the

larger part belong to the Prákrític, rather than the pure Sanskrit element of Hindí. For example, of 89 words in the *Prem-Ságar* beginning with one of the cerebral letters, *t, th, d, dh*, only 21 are pure Sanskrit, to 68 Prákrític words; whereas, of 128 words beginning with *k*, we find 21 of Prákrític origin to 107 pure Sanskrit words; i. e., in the case of words with initial cerebrals, over three-fourths are Prákrític; while of words with an initial *k*, five-sixths are Sanskrit. And it may be further observed, that the cerebral letters prevail most in those sections of the Hindí country where, as in the Himálayas and the wastes of Rájputáná, the aborigines, if not still remaining, may be supposed to have held the ground the longest.

58. In brief, the Turanian element in Hindí must be regarded as, in any case, of minor prominence and importance. In grammar and in vocabulary alike, Hindí is emphatically an Aryan language. But some foreigners have gone to the extreme of denying that Hindí, properly so called, contains any other than Sanskrit and Prákrític words; and, in their zeal for what they term 'pure Hindí', scrupulously exclude from their writing, if not from their speech, all Arabic and Persian words.* But it should not be forgotten that, in such a matter as this, we have to do, not with theories, but with facts. Now we are free to assert that if we take classic Hindí works, such as, in prose, the *Prem-Ságar*, and in poetry, the *Rámáyan*, we do not find, in point of fact, that the language which the people of the country call Hindí, is thus free from any Arabic and Persian admixture.

a. In proof of this assertion, the student may note the following list of Arabic and Persian words occurring in the *Rámáyan*. We follow the Hindí spelling. गरीबन निवाच, साहेब, जहाज, बराबरी, अस्वार, बकसीस, बजार, लायक, बाग, हाल, फौज, सोर, बन्दीखानः, इयाले, बजाज, सराफ, बुनर, सक्क, गुमान, खबर, तरवार, दरबार, गर्द, ताज, जोर, कागद, गनी, गरीब, जिनिस, दाम, जहाज, बाद, लगाम, चीन, etc. In other Hindí writers, as, e.g., Kabir, they are much more numerous. Nor, if we attend to the colloquial of the people, shall we fail to hear, even in the most secluded districts, and from Hindoos living quite apart from the Muhammadans, such Arabic and Persian words, as *hukm, sarkár, yá, bandobast, sáhib, bukhshish, majúrí* (for *mazdúrí*), *jamíndár* (for *zamíndár*), etc., etc.

b. It may be noted here, with regard to the character and extent of this Arabic and Persian admixture, that in the case of all words having any special reference to government and law, the conquering Muhammadans have succeeded in imposing their own words upon

* Vide, e.g., Etherington's Hindí Grammar, Preface, pp. iv, v.

the colloquial Hindí to the exclusion of the Sanskrit. And if any one, in his zeal for 'pure Hindí', will attempt to use, instead of these, the corresponding Sanskrit words, he will probably find that none but a few Pundits will understand him. As to Arabic and Persian words of other sorts, the proportion found in Hindí varies, as might be expected, in different parts of the country; being greatest in the extreme N. W., and gradually diminishing toward the E. and S.

59. Inasmuch as the Arabic and Persian alphabets differ widely from the Devanágari, all words from those languages containing letters not represented in those alphabets, when received into Hindí, undergo certain modifications. These are, in brief, as follows:—

a. Both ط and ت are represented by त; as, طلب, तलब, 'wages'; تکرار, तकरार, 'contention'.

b. The three sibilants, ث, س, and ص, all become स; as ثابت, साबित, 'proved'; سائیس, सईस, 'a groom'; صاحب, साहिब, 'sir, master'. ش often becomes श; but in many sections of the country (as, for example, through the central Doáb and in Mārwar) it is regularly sounded as स; thus, شروع, शुब or सुब, 'beginning'; شك, शकू or सकू, 'doubt'.

c. The letters ذ, ز, ض, and ظ, all pronounced in Urdú as z, become ज in Hindí, as ذرا, जरा, 'a little'; زمین, जमीन, 'land'; ضامن, जामिन, 'a surety'; ظاهر, जाहिर, 'manifest'. But in Mārwarí and some other forms of Hindí, ذ final becomes द, as in कागद, for کاغذ, 'paper'.

d. ح and ه both become ह; as حال, हाल, 'state'; हर, हर, 'every'. In Mārwarí, when medial, they commonly disappear; as, e.g., شهر 'a city', साह for صاحب, 'sir'. The gutturals خ and غ become, respectively, ख and ग; as, e.g., in خاک, 'dust', for خاک, 'grief', for غم, and गुलाम, 'a slave', for غلام. ق commonly becomes क, as in हकू, 'right', for حق; and कौल, 'word', for قول. But the common people in the central Doáb often change a final ق to त; thus, تحقیق, 'investigation', becomes तैकीत; موافق, 'like', माकित. ع is always dropped; thus, عقل becomes अकल, 'intellect'; واقع, वाकि, 'existent, real'. But short a before ع, on the rejection of ع, is lengthened; as मासूम, 'known', for معلوم. ر is ordinarily unchanged; but in Mārwarí, I have found डजीर, 'a minister of state', for وزیر, where the consonantal r has been softened to the cognate vowel.

e. The sound of ف may be regarded as fairly naturalized in most Hindí dialects. Not only is its pronunciation retained in Arabic

and Persian words when introduced into Hindí, where it is represented by क, as in बरफ, 'a banker', for برف; but, to a great extent, the common people substitute the foreign sound of *f* for *ph* even in Indian words; pronouncing, e.g., फल ('fruit') *fal*, instead of *phal*; फिर ('again') *fir*, etc.

f. Arabic and Persian words not containing any of the above letters, for the most part enter Hindí without change, the Devanágari furnishing the equivalents of all the other Arabic letters. Occasional changes and corruptions indeed occur which can scarcely be reduced to rule. There seems to be at least a tendency in some parts of the country to reject a consonant following any sibilant; thus we hear, in the Doáb, मजूर, 'a laborer', for مزدور; मजुद, 'firm', for مضبوط; and in Márwáří, मसौत, 'a mosque', for مسجد. We should also note a decided tendency to substitute *i* for *a* as in निमक, 'salt', for نمك; कारिन्द., an agent', for كرنند.

60. But we may now pass to the consideration of words of Sanskrit origin, which make up not less than nine-tenths of the language. These have been divided by native writers into *Tatsama* and *Tadbhava* words. The word *Tatsama*, तत्सम, meaning 'the same as that', appropriately denotes all purely Sanskrit words; i.e., all such as have entered Hindí with no alteration save the loss of the ancient affixes of declension. The word *Tadbhava*, 'of the nature of that', denotes, on the other hand, all corrupted Sanskrit words, which, by the addition, loss, or change of certain letters, have come to appear in Hindí in a form more or less modified, and often greatly disguised.

OF TATSAMA WORDS.

61. *Tatsama* words, as is evident from the above description, appear in every dialect under one and the same form. But inasmuch as pure Sanskrit words in Hindí, like most words of Latin and Greek origin in English, are especially appropriated to the expression of higher or scientific thought, it is evident, that the proportion of these *Tatsamas* actually found in the various Hindí dialects, must needs vary greatly, in proportion to their literary cultivation. Moreover, it must not be forgotten that, to a limited extent everywhere, but more especially in Western Hindí, Arabic and Persian words have often usurped the place of the Sanskrit *Tatsamas*. And so it has

come to pass, that, speaking in a general way, the proportion of Tatsamas current in Hindí, regularly increases as we go eastward, till we reach the Bangálí, in which they reach a maximum. The following remarks will help to indicate the nature and extent of this Tatsama element.

62. In very many cases, the Tatsama and Tadbhava forms of the same word coëxist in the language. Thus, *e.g.*, we have दर्शन, Tatsama, and देखना, Tadbhava; क्रोध, Tatsama, कोह, Tadbhava. In some cases, the two forms retain the same meaning; thus, क्रोध and कोह both signify 'anger'; योग्य and योग, 'fit, worthy'. In such cases, one form is often dialectic. Thus Tadbhava forms, with ह् for an aspirated mute, are especially characteristic of the old Púrbi of the *Rámáyan*, as, *e.g.*, लाह, सोहा, कोह, for लाभ, सोभा, क्रोध. But where Tatsamas and Tadbhavas coëxist in the same dialect, it often happens that, with the difference in form, we find a difference also in signification; thus, मेघ, Tatsama, is 'a rain-cloud'; but the corresponding Tadbhava, मेंह, is always, 'rain, a shower'. Often, the Tatsama is the general term, and the Tadbhava, the more specific one; as स्थान, 'a place', in general; but ठाना, 'a police-station'. Where the words will admit it, the Tatsama word is often appropriated to a higher sense, and the Tadbhava is restricted to a lower signification. Thus, the Tadbhava देखना is, 'to see, seeing', in general; but the Tatsama दर्शन, is 'beholding', in a higher sense, as of a superior in rank, an idol, or a deity. Thus, people say, जगन्नाथ का दर्शन करना, 'to behold Jagannáth', but never जगन्नाथ को देखना, 'to see Jagannáth'.

a. The careful regard to etiquette for which the Hindoos are noted, is manifest, not only (as will hereafter appear) in the appropriation of certain pronominal forms and verbal inflections for the indication of various degrees of respect, but also, and very often, in the choice of a Tatsama or Tadbhava word.

63. Of purely Sanskrit nouns and adjectives, the case-terminations have been lost, and they regularly appear in Hindí, under the form which they assume in the Sk. nom. sing., minus the nom. case termination. Thus, the bases यत्न, इच्छा, अग्नि, धेनु, दातृ, मातृ, हरित, धनवत्, नामन, महिमान, तेजस्विन, respectively appear in Hindí as यत्न, इच्छा, अग्नि, धेनु, दाता, माता, हरित, धनवान, नाम, महिमा, and तेजस्वी.

a. The only nouns exempted from the operation of this law are crude bases in अस and उस, as, *e.g.*, मनस, चक्षुस, which, in Hindí,

have lost, not only, as in Sanskrit itself, the nom. sing. termination, but also the final radical च, as found in the Sansk. nom. sing., so that the above words appear in Hindí as मन, चक्षु. But, in a single instance in the *Rámáyana*, Tulsí Dás has written (doubtless for the sake of the metre) the root of the strong Sanskrit cases, दातार for दाता, 'a giver'.

b. Sansk. adjectives in वत्, occurring in Hindí, frequently substitute for the nom. sing., the base in वन्त, of the strong cases. as, e.g., दयावन्त, 'merciful', पापवन्त, 'sinful'; so also, कुदावन्त for क्षुदावन्त, 'hungry'.

c. As has been remarked, Hindí nouns exhibit, in their declension, only the scanty remainder of the Sanskrit case-terminations, so corrupted and modified as to be recognized only with difficulty. The unchanged Sanskrit forms are, however, occasionally met with, but are no more organically connected with the Hindí, than such Latin phrases as 'id est', 'et cetera', are thus connected with English. Examples are, सर्वस्य, gen. sing. of सर्व, 'all'; अर्थात् = viz., abl. sing. of अर्थ; पितरौ, 'parents', nom. dual of पितृ; वर्षाः, 'the rains', nom. plur. from वर्ष; सुखेन, 'with pleasure', instr. sing. of सुख. But the most of these are very rare; and, with few exceptions, are only found in poetry.

64. Sanskrit comparatives and superlatives occur in Hindí, with the usual loss of their case-terminations, but are by no means common, and, with a few exceptions, they belong rather to literature than to the colloquial. Examples are, of superlatives, श्रेष्ठ, 'most excellent', from श्रे; प्रीयतम, 'dearest', from प्रीय. Comparatives are yet more uncommon; we have noted मन्दतर, 'slower', from मन्द; पुण्यतर, 'more holy', from पुण्य. It may be remarked that these Sanskrit comparatives, when they occur in Hindí, very commonly lose the comparative sense and are, in effect, superlatives.

65. The numerals and pronouns appear in Hindí (as might be expected of words in such incessant use by all classes) in an extremely mutilated and corrupted form. But the unchanged Sanskrit numerals are occasionally found in Hindí literature, especially in the headings of chapters. So also, we occasionally meet certain cases of the Sanskrit pronouns; more especially, the gen. sing. of the 1st and 2nd personal pronouns, मम and तव.

66. The Hindí verbs, without an exception, are Tadbhava words. Still, in poetry, parts of Sanskrit tenses are occasionally found; thus,

from the root नम, we have नमामि, 'I salute', 1st sing. pres. Parasmai. But such forms as this have no organic connexion with the language. The Hindí, however, besides the regular Tadbhava participles of its verbal conjugation, admits, even in the colloquial, various Sanskrit participles in an unaltered form. Thus, we have the pres. part. *Ātmane* in मान; as, from the root वृत्, वर्तमान, 'existing, present', and, very rarely, the indecl. past part, in स्या as, in the *Rámáyan*, चित्वा. Much more common is the past part. in त्त or न (त्त); as, e.g., from कृ, कृत, 'done, made'; from वच, उक्त, 'spoken, said'; from पू, पूर्ण, 'filled'; from मुह, मोहित, 'fascinated'. Not uncommon are fut. pass. participles; whether those in तव्य, as from कृ, कर्तव्य, 'worthy to be done'; or कर्णीय, as ग्रहणीय, 'to be received', from ग्रह; or in य, as दृश्य, from दृश्, 'to be seen, visible'. Very rare is the 2nd fut. part. Parasmai in स्य; as, from भू, 'to be', the final consonant त्त having been rejected, भविष्य, 'future.' Sanskrit also contributes to Hindí many adverbs, prepositions and conjunctions, in an unaltered form. A list of these will be given in the appropriate place.

OF TADBHAVA WORDS.

67. The plan of this work will not allow the space necessary to an exhaustive discussion of the Tadbhava words of Hindí; but a brief exhibition of the processes by which they have been formed, will be found of service in the study of the Hindí dialects, and aid the student to an intelligent acquaintance with the language. Accordingly, referring the student elsewhere for a full discussion of this matter,* we propose to notice, as briefly as may be, the more important of those phonetic laws which have operated and are still operating in the Hindí dialects of N. India.

Of Vowel Changes.

68. As has already appeared,† Hindí exhibits a decided tendency to the omission of the short vowels. The inherent *a* is constantly

* Little has as yet been written on the subject; the student, will however, find Mr. Beames' Comparative Grammar of great value. The "Essays in aid of a Comparative Grammar of the Gaurian languages", by Dr. Hoernle, are well worth careful study. Vid. Journ. As. Soc. Beng. Part I, No. II, 1872, and Part I, No. II, of 1873. † Vid. §§ 10, 11.

dropped from unaccented syllables, even though its omission be not marked by the use of a conjunct consonant. **इ** and **उ** are very commonly silent when final; in other positions they usually remain.

a. But Mr. Beames has noted the frequent elision of **अ** and **उ** initial, in Sanskrit compounds in which one of the inseparable prepositions **अधि**, **अपि**, **अभि**, **उप**, *etc.*, is the first member. Among his illustrations are **भांकना**, 'to peep', from Sk. **अध्यक्ष**, 'overlooking'; **भीगना**, 'to be wet', from Sk. **अभ्यंज**; **बैठा**, 'seated', from Sk. **उपविष्ट**; to which may be added others, as **पुरोहित**, 'a family priest', from **उपरोहित**; and **पठावना** or **पठावन**, 'to send', from the Sk. causal base, **उपस्थाप**. **अ** initial is sometimes omitted in simple words also; as, *e.g.*, in **लाडू**, 'a pumpkin', for Sk. **अलाडू**.

b. The Sk. fem. term. **आ** is often elided; as in **जात**, 'a thing, word', Sk. **वार्ता**; **नींद**, 'sleep', Sk. **निद्रा**. So also **ई** final in feminines in **इनी**, whence come Hindi feminines in **नी**; as **मालिन**, 'a gardener's wife', from **माली**, for **मालिनी**; **सेठन**, the wife of a **सेठ**.

c. **ए** final is dropped in many words now used as adverbs or prepositions, but originally Sk. locatives sing.; as **समीप**, 'near', for Sansk. **समीपे**; **संग**, 'with', for **संगे**, *etc.*

69. **अ** is often changed to **इ** in unaccented syllables, especially in Western Hindi. Thus, **स्मरण**, 'remembrance', becomes **सुमिरन**; **पहला** 'first', is constantly pronounced and often written, **पहिला**.* **अ** is changed to **इ** in **नेवला**, 'a weasel', Sk. **नकुला**.

a. The vowels **इ** and **उ** often supersede **अ** in a preceding syllable, or cause it to be exchanged for the cognate *gun* diphthong. Illustrations of the substitution of the simple vowel are **हमी**, 'a tamarind tree', for Sk. **अम्लिका**; **उंगुली**, 'a finger', for Sk. **अंगुली**. In **सँघ**, 'a hole dug by burglars', Sk. **सधिं**, and **चोंच**, 'the beak of a bird', Sk. **अचुं**, the *gun* diphthong is the substitute.

b. Very often in Sk. words, **अ**, when followed by the semivowels **य** or **व**, coalesces with them into the cognate diphthong, commonly the *eriddhi*. Thus, the Sk. **नयन**, 'eye', becomes **नैन**; **समय**, 'time', **समै** or **समे**; **सलज**, 'salt', **लोन**, but also **लून**; **अपर**, 'another', by the previous substitution of **व** for **प**, **चौर**.

c. Here may best be noticed the operation of a law by which **ओ** was regularly substituted in Prākṛit for the Sanskrit declensional

* For further illustrations, see the section on Dialectic Changes.

इ ई इ, उ, ए,
and उ, ए, इ, उ
the initial

Sanskrit

X

termination ञ् (ञः).^{*} Although, in most Tadbhava words, the corruption of this termination in the standard dialect, has proceeded still further, till only ञ or ञ् final is left, yet many illustrations still remain, as in the pronouns, where, *e.g.*, the rel. जो and the (Braj) interr. जो, stand respectively for the Sk. यः and ञः. Similarly, we have, from the Sk. परस्मिन्, परसें, 'the second day before or after the present'.

d. Quite anomalous is a tendency, exhibited chiefly in the numerals, by which ञ becomes रे, as, *e.g.*, in तैतीस, 'thirty-five', for Sk. पंचविंशत्; सैंतासीस, 'forty-seven', for Sk. चत्वारिंशत्. The same tendency is illustrated in बैंगल, 'egg-plant', for Sk. वंगल, and a few other words. These cases, it will be observed, are quite distinct from the similar change of ञ to र, already noticed, which is evidently due to the epenthesis of र.

70. र, र्, उ, and ऊ present few instances of change. But र is changed to ऊ, in सूँघना, 'to smell', from Sk. शिङ्गु; and र् to ञ, in परखन, 'testing', for Sk. परीक्षण. उ has become ञ in the common word बिजली, 'lightning', for Sk. विद्युत्. In जार्ह, 'rheumatism', for Sk. वायु, I am inclined to regard the र् final as having arisen from the cognate उ, उ final having been dropped, and र (र) lengthened in compensation. In बिन्दी, 'a dot', from Sk. बिन्दु, we have apparently a real change of उ to र्; unless, indeed, after the analogy of many other Tadbhavas in र्, र् represents, in this instance, the र of a Prákrit form, बिन्दिक (P).

71. श्च undergoes various changes. When initial it always appears in Tadbhava words as रि, as in रिचि for श्चि. When non-initial, the most common substitution is र, as in गिह, 'a vulture', for श्च; बिच्छू, 'a scorpion', for श्चिक. It may be changed to र्, as in सींग, 'a horn', for श्चंग, and मौच for श्चमु, 'death'; or even र, as in गेह, 'a house', for श्च. It often becomes उ, commonly under the influence of a contiguous labial; as in सुरत, 'remembrance', for श्चुति; or ऊ, as in मूखा, 'dead', for श्चुतः. Less frequently it appears as ञ, as in मट्टी, 'earth', Sk. श्चुत्तिका; पावस, 'the rainy season', Sk. प्राशुष. In many cases, even when non-initial, it is represented by the consonant र, in combination with one or more vowels; most commonly रि, as in गिहख, 'a householder', for श्चुख; or even र्दि, as in चिदिजन, 'creating', for श्चुजन; or, under the influence of a labial, र, as in रक, 'a tree', for Sk. श्चुव.

* Cf. Vararuchi Prákr. Prak. V, (1).

72. अ, इ, and उ, in the penult of Sanskrit or Prákrit words, regularly appear as long in Hindí, in all cases where the original ultimate syllable has been dropped. This is most of all to be noted in a large class of Sanskrit and Prákrit words formed by the suffix क. This includes a few Sanskrit nouns of agency, but especially, a very large number of words, chiefly Prákrit, formed by the addition of an inorganic क to the original Sanskrit base.* This law will be found to cover most Tadbhava masc. nouns in आ final, and fem. nouns in ई, as also many nouns in ई, denoting trades. Examples are, चीता, 'a leopard', Sk. चित्रकः; (Prákrit चित्तयो?); घोड़ा, 'a horse', Sk. घोटकः, (Prák. घोडयो?); मक्खी, 'a fly', Sk. मक्षिका; बालू, 'sand', Sk. बालुका; घी, 'clarified butter', Sk. घृतः; नार्ह, 'a barber', Sk. नापितः. The ई and उ of these words have probably arisen directly from intermediate forms, इयो, उयो, † य and अ having been euphonicly inserted after the elision of क. ‡

73. When, in the process of phonetic decay, a Sanskrit conjunct has been reduced in Hindí to a simple consonant, a short vowel, preceding such a conjunct, is regularly lengthened. Thus, the Sk. हस्त, 'hand', becomes, in Hindí, हाथ; अग्नि, 'fire', आग; इक्षु, 'sugarcane', ईख; मिष्टः (मिष्टकः), मोठा; विंशति, 'twenty', बीस.

a. Sometimes, instead of the long vowel, the cognate गुण diphthong is the substitute; as in कोढ़ी, 'a leper', Sk. कुहो; खोठ, 'ginger', Sk. शुबिठ. अ under such circumstances commonly becomes ई, as in पीठ, 'back', from पृष्ठ; दीठ, 'sight', from दृष्टि.

b. But in some such cases, chiefly Sanskrit compounds with various prefixes, in which the accent rests on the radical syllable, the accent has prevented the lengthening of the vowel, as in derivatives from the Sk. उत्था, (उद + था), 'rising', where H. has उठना, etc., and not ऊठना.

74. Long vowels are almost invariably changed to their own short, when any long or heavy appendage is added to a word. This occurs especially in the first member of compounds; as in छटमार, 'a highwayman', where छट is for छाट, 'a road'; पनहारा, 'a water-carrier', for पानीहारा; फुलदारी, 'a flower-garden', for फूलदारी; चित्तकाल, 'winter',

* Concerning this Prákrit suffix, see Lass. Inst. Ling. Prac. §§ 89, 1; 164, 19; *et passim*. † Vid. § 77, b, (1). ‡ Vid. § 78.

for शीतकाल. So also where heavy terminations have been added; as in बुढ़ाप, 'old age', from बूढ़; मिठाई, 'sweetmeats', from मीठा, 'sweet', Sk. मिष्ठुकः. For the diphthongs the corresponding simple vowel is the substitute, as in बिटिया, dim. from बेटा, 'a son'; कुटका, 'a younger son', from कोटा, 'little', Sk. कुट्टः, (कुट्टकः).

75. Diphthongs final in Prákrit and Sanskrit are in Hindí regularly reduced to their simple vowel. Thus the Prák. nom. sing. term. ओ, for Sk. अः, in archaic Hindí, and among the moderns, in Naipáli, and often in other Himalayan dialects, regularly becomes उ. Thus Sk. अरः, 'an arrow', Prák. अरो, is in the *Rámáyan*, अर; अनुरागः, 'affection', Prák. अनुरागो, old H. अनुरागु. It should be observed; however, that in later Hindí,* this short उ also has been dropped, leaving, e.g., अनुराग *anurág*, for अनुरागु. Similarly, ए or ऐ final, in the conjugation of verbs, often appears as इ; as in होइ for होए, Sk. भवति; चाहि for चाहे, etc. ए medial becomes इ, in सित, 'white', for श्वेत.

a. But where, in Prákrit, after elision of a final consonant, we have अओ, इओ, उओ final, the standard Hindí presents आ, ई, and ऊ. In the western and Himalayan dialects, ओ and औ appear for the Prák. अओ.† ओ medial becomes ऊ in भूलन, for दोहन; and औ medial, औ in मोती, for Sk. मौक्तिकं.

b. Most changes of ए and ओ to ऐ and औ are dialectic. The reverse process is exhibited in पोता, 'a grandson', for Sk. पौत्र, and कोयट, 'a pilot', for Sk. कौवर्त.

76. The modern Hindoos, in the colloquial, constantly prefix a short अ to words beginning with a conjunct in which स is the first letter; thus, e.g., स्त्री, 'a woman', becomes अस्त्री, or, with some, अस्त्री; स्थान, 'a place', अस्थान, etc. Such forms are occasionally found in literature; as, e.g., in the *Rámáyan*, अस्तुति, for स्तुति, 'praise', and अस्नान, for स्नान, 'bathing'.

77. When, by the elision of a medial consonant, two vowels have been brought into contact, Hindí, instead of allowing the hiatus to remain, as in Prákrit, very often, though by no means always, seeks to avoid it, either, where the rules of *Sandhi* will permit, by uniting the concurrent vowels; or, in other cases, by inserting a consonant, usually य or व. Thus, the Sk. अरति, 'he walks', त being elided,

* Vid. § 68. † Vid. §§ 101...103.

becomes, in old Hindí, **अलख**, and in many modern dialects, **अले** or **अले**. The Sk. **पिपासितः**, 'thirsty', **प** and **त** being elided, and **व** inserted, becomes **पिपासा**; **आलुलः**, 'crazy', **ल** being elided, and **ख** inserted, becomes **आलला**, but sometimes **आलला** or **आलरा**. Occasionally, as in **सूई**, 'a needle', Sk. **सूची**, and **कोकल**, 'the cuckoo', Sk. **कोकिल**, the hiatus is suffered to remain.

a. While these combinations often take place in accordance with the Sanskrit rules of *Sandhi*, this is by no means always the case. The following exceptions may be especially noted.

(1) A short vowel after a long often disappears; as in **रोना**, 'to cry', where **रोन** is for **रोचन**, from **रोचन**. The short vowel, however, sometimes maintains its ground, as, e.g., above, in **कोकल**, for Sk. **कोकिल**.

(2) The simple vowels, **अ+इ**, **अ+उ**, sometimes coalesce into the *vriddhi*, instead of the *gun*, which the Sanskrit law would require; but this often is dialectic. Examples frequently occur in the conjugation of verbs; as, e.g., **हंसे**, 'he laughs', from **हसइ**, Sk. **हसति**; and probably **जलौ**, 2nd plur. imperat., 'walk', from the old H. **जलवु**.

b. The semivowels **य** and **व**, after **अ** or their cognate vowels, **इ** and **उ**, are often treated as vowels, so that **अ+य**, like **अ+इ**, becomes **ऐ** or **ए**; **अ+व**, like **अ+उ**, = **ओ** or **औ**; **इ+य**, like **इ+इ**, = **ई**, and **उ+व**, like **उ+उ**, = **ऊ**. Thus, as before noted, **समय**, 'time', becomes **समै**; **भव**, 'existence', **भौ**; **बुद्धिय**, 'the senses', **बुद्धी**.*

(1) This principle apparently leads to the explanation of those nouns in **ई** and **ऊ** referred to in § 72. The **क** of the ultimate being rejected, **य** or **व** was inserted to fill the hiatus, giving us, e.g., for the Sk. **घोटिका**, 'a mare', Prák. **घोटिका**, first a form **घोटिया**, from which would successively come the forms **घोटिय**, and finally, **घय** becoming **ई**, **घोटा**. By a similar process, from the Sk. **बालुका**, Prák. **बालुका**, we should have the successive forms, **बालुवा**, **बालुव**, **बालू**. It may be noted here, that in the colloquial throughout Oude and the Doáb, the intermediate forms thus postulated as the original of nouns fem. in **ई**, still exist. In the dialect of W. Oude, e.g., we have **भैंसिया**, (as if from a Sk. form **महिसिका**) for **भैंसी**, 'a buffalo-cow'; **घोटिया**, Sk. **घोटिका**, 'a mare', etc., etc.†

*Vid § 79. † It is to be remembered, in investigating words of this class, that this suffix **क** was in Prákrit added indifferently to almost any word. Lassen's words are 'omnibus thematis'. Vid. Lass. Inst. Ling. Prác. passim.

OF CONSONANTAL CHANGES.

Simple Consonants.

78. Any smooth mute, except ट or ड, also म, य, ख, ख, and ह, when single and non-initial, may be elided. The vowels thus brought together, combine, if similar; if otherwise, the hiatus often remains, as in Prákrit; but in the modern dialects, य or ख is preferably inserted. Examples are, Sk. मेसकः, 'an assembly', Prák. मेलसो, H. मेसा, for the older Már. मेसो; Sk. भगिनी, 'sister', H. बहिन, where the medial aspirate, ग being rejected, has arisen from the aspiration of भ; Sk. सूची, 'a needle', H. सूई; Sk. रात्रि, 'night', H. रैन; Sk. चतुर्थ, 'fourth', H. चौथा; Sk. हृदय, 'the heart', H. हिय; Sk. उदय, 'rising of the sun', Old H. उर; Sk. कुप, 'a well', H. कुप्पा; Sk. दीप, 'a lamp', H. दिया; Sk. पूर्विमा, 'the day of new moon', H. पून्घो; Sk. विवाह, 'marriage', H. व्याह, for विवाह. नाक, 'the nose', for Sk. नासिका, has probably arisen from a collateral form नासका.

a. ख, when elided, would seem in most cases to have first passed into ह. The older Hindí generally preserves the form in ह, and, rarely, even those in ख. Thus, in the futures, we have करहि, 'thou wilt do', for करखि, 2nd sing. fut.; but in यहतेहि, 'thou wilt regret', 2nd sing. fut., the ख is preserved. After करहि, comes next करह and finally करे. In सोदर, 'a twin brother', for Sk. सहोदर, we have an example of the less common elision of ह in nouns. The irregular Sandhi, अ+ओ=ओ, instead of औ, may be noted. In the case of verbs, the elision of ह medial is much more common. Additional examples are अहे for अहहि, 'is', करो, 'do, make', for करहु, etc.

79. The labials, प, ब, म, य, when medial after á or a, very commonly soften into the cognate vowel उ, which then combines with the preceding a into the diphthong औ or औ. Thus the Sk. अपर, 'another', becomes in Hindí, first अवर, and then और; लवण, 'salt', becomes लोन; गमन, 'going', गौना, 'the going home of a bride'; बामन, 'a dwarf', औना; प्रभाव, 'excellency', प्रौ. In such cases, the nasal element of म is often retained, in the form of an *Anusvár* attached to the diphthong, as in H. औरी, 'a whisk', for Sk. चमर. So also, the palatal य, under similar conditions, passes into the cognate

vowel **इ**, whence, by *Sandhi*, arises the diphthong, **इ** or **ऐ**; as, *e.g.*, in **सैन**, 'sleeping', for Sk. **शयन**; **सने** or **सने**, 'time', for **समय**. When **इ** precedes **य**, the **य** combines with it into the cognate long vowel, as in **इंद्रो**, 'an organ of sense', for **इन्द्रिय**.

80. A final consonant is usually rejected. Thus, **यज्ञस्**, 'renown', becomes **जस**; **आत्मन**, 'self', becomes **आप**. By the same law, **न** final is dropped in all numerals; as, *e.g.*, in **आठ**, 'eight', **दस**, 'ten', for **आष्टन्**, **दशन्**.

81. Initial consonants commonly remain unchanged. The exceptions occur, for the most part, in the case of the sibilant **स**, initial in a conjunct;* or if in other letters, they may be traced to the disturbing influence of a neighboring sibilant or aspirate. Thus the Sk. **विमूर्ति**, 'superhuman power', becomes **भ्रूत**; **क्षुस**, 'chaff', **भूसा**; **पाञ्च**, 'a noose', **फांस**; **वष्पि**, 'vapor', **भाफ**.

82. When medial, hard mutes, as in other Aryan languages, are frequently softened. Examples are **काग**, 'a crow', Sk. **काक**; **सूची**, 'a small awl', Sk. **सूची**. The change is especially common with the cerebrals, as, *e.g.*, in **घोड़ा**, a 'horse', Sk. **घोटक**; **पढ़न**, 'reading', for **पठन**. **प** more commonly passes through **ख** or **व** into the cognate vowel **उ**, and thus loses its consonantal character entirely. But occasionally it stops at **व**; as in **ताव**, 'heat', for Sk. **ताप**, and in the fifties; as, *e.g.*, **बावन**, 'fifty-two'; **चौवन**, 'fifty-four'; **सत्तावन**, 'fifty-seven', *etc.*, where **व** is for the **प** of **पाँच**, which remains in some other numbers of the same series; as, *e.g.*, **तिरपन**, 'fifty-three'. I should therefore suppose that such forms as **बापन**, **चौपन**, *etc.* must have preceded the forms now in use, but hitherto I have not met with them in Hindí. Maráthi preserves the form **चौपन**; but the other forms agree with Hindí. Rarely, a nasal is substituted for a cognate mute, as in **पसीना**, 'sweat', for Sk. **प्रस्रव**.

83. Letters of one organ are often substituted for those of another. Thus, palatals are exchanged for cerebrals or dentals. The most familiar illustration is found in the case of the numerals, 41, 43, 45, 47, 48, where **त** is the substitute for **च**; as, *e.g.*, in **चकतालीस**, 'forty-one', for **चकवालीस**, Sk. **चकवत्वारिंशत्**. Mr. Beames has noted a large number of examples, involving the apparently cognate roots, **चप**, **उप**, **टप**, **दब**, *etc.*, from the Sk. **चि**.†

* Vid. § 97. † Vid. Comp. Gram. § 57.

a. The cognate languages present numerous instances of the change of the palatals to the sibilants, but this is scarcely found in Hindí outside of the Rájputáná and Himalayan dialects. In the Márwáří dialect, the rule is universal, in respect to च and छ, which, although still written, are always pronounced as s.

84. Very common is the substitution of the cerebrals, whether initial or medial, for the dentals. Examples are numerous; as, e.g., दिग, 'side', Sk. दिक्; डर, 'fear', Sk. दर; डाह, 'burning, envy', from Sk. दह्; पड़ना, 'to fall', from Sk. पत्; टीका, 'a sectarian mark', for तिलक, which is also used; झुटा, 'old', for Sk. वृद्ध. In this case, however, the cerebral is probably due to the absorption of the ऋ. Here may be noted a large class of words from the Sk. root, स्थ्; as ठाँ, 'a place', for Sk. स्थान; ठाना, 'a police-station', as if from a form स्थानकः, etc.

a. But in some cases a Sanskrit cerebral is changed to a dental, as in the Hindí, दबना, 'to be pressed down', from Sk. डप्, etc.

b. Through the change of ङ to ञ, the cerebrals, and, through the cerebrals, the dentals, modulate into र. This is especially characteristic of the eastern Hindí, which constantly substitutes र for ङ, as also for ल. Thus, पड़ना, 'to fall', from Sk. पत्, becomes, in E. Hindí, परन; so also the regular form लड़की, 'a girl', from the root लट, appears in the Rámáyan as लरकि. In सालाव, 'a tank', for Sk. सडाग, the cerebral ङ is changed to ल. Similar is H. सेला, 'a servant, disciple', for Sk. सेट, and Már. खुटवो, 'to open', for खुलना, where ल is for ट. In कुल्हारी, 'an axe', for Sk. कुठार, ल्ह is the substitute for ठ. In the numerals, from eleven to eighteen, the ढ of दशन् regularly becomes र, except in सोलह, 'sixteen', where ल is the substitute. But the dialects give also सोरह, after the analogy of the other numbers in question. ढ is changed to ल in झाजन, 'thatching', for झादन.

85. In the standard Hindí, the Sanskrit cerebral nasal is regularly changed to the dental nasal in all Tadbhava words, as, e.g., in गुन, 'virtue', for गुण; पुन, 'merit', for पुण्य; and universally in the infin. termination of verbs, wherever the laws of Sandhi would require ङा; as in करना, 'to do, make', instead of करङ्गा; मरना, 'to die', for मरङ्गा. But in the Himalayan and Rájputáná dialects the reverse tendency is exhibited, the cerebral nasal being constantly preferred to the dental.

86. **व** initial is regularly changed to **ख** in all Tadbhavas, as in **खुम**, 'an age', for **युम**. It is also hardened when doubled and final, as in **सूरख**, 'the sun', for **सूर्य**. **र** is changed to **ख** in **खलिता**, 'a river', Sk. **खरित्**; as also in **खाल**, 'hair', if from **वृ**, 'to cover'. But this is far less common than the reverse change of **ख** to **र**, which is very frequent throughout the Hindí country.

87. The sibilants are all prone to change. **ष** is constantly pronounced, throughout the Doáb, as **स**; as, e.g., in **दिषा**, 'region', for **दिशा**, etc., etc. **श** very commonly becomes **स**, as in **मनुष**, 'a man', for **मनुष्य**; **दोष**, 'a fault', for **दोष**, etc. But in writing, **ष** is generally retained, and in some districts, as in **Márwár**, has usurped the character **स** in all words whatever. **ष** becomes **ह** in **ह**, 'six', and **हत्था**, 'sixth', for Sk. **षष्**, **षष्ठ**. **श** becomes **ष** or **ह** in **खालष**, 'covetousness', for **खालसा**. Similarly we find **शोभा**, 'beauty', for Sk. **शोभा**. The tendency of the sibilants to pass into the pure aspirate, of which the cognate languages afford so many examples, is abundantly illustrated in Hindí. Thus the **ष** of **दशन्** is changed to **ह** in all the numerals from eleven to eighteen inclusive, as also the **श** of **सप्तति** in the seventies throughout, except in **सत्तर**, 'seventy', and **उनारी** 'seventy-nine' which is from another root. Thus the Sk. **त्रयोदशन्**, 'thirteen', becomes **तेरह**; **एकसप्तति**, 'seventy-one', becomes **एकहत्तर**, etc., etc. This change, as regards these numerals, is found in all dialects alike; but, except in some of the **Rájputáná** and **Himalayan** dialects, it is rarely met with in other words. Certain pronominal and verbal forms of extensive or universal use, are, however, to be explained by reference to this principle. These, however, will be noted in another place.

88. Very common is the substitution of the pure aspirate **ह** for any of the aspirated mutes **ख**, **घ**, **च**, **छ**, or **भ**. Examples are, **मुंह**, 'mouth, face', for **मुख**; **मेंह**, 'rain', from **मेघ**; **कहना**, 'to speak', from the root **कृ**; **दही**, 'curdled milk', for **दधि**; **बहरा**, 'deaf', for **बधिर**. If initial, however, the letter commonly remains unchanged. I have only found instances of such a change of an initial aspirate in the case of **भ**. A notable example is found in the verb **होना**, 'to be', from the Sk. **भू**. To this may be added **हांडी**, 'a pot', and **चुंडी**, 'a cheque', for Sk. **भांड**, **मुंड**. This change of these aspirated letters is more common in the old **Púrbi** than in modern literature; additional examples will be found in the section on the dialects.

89. Before leaving this subject of the changes of single letters, it may be well to refer to an old Prákrit habit of adding to various words the affix क. This Prákritic क is not to be confounded with the Sanskrit affix क, which is added to roots to form adjectives and nouns of agency. Unlike that, this Prákrit क is wholly unmeaning.* Although, in modern Hindí, this affix has commonly disappeared, yet its former existence is to be noted, as having influenced the form of a great number of modern words. And even so late a writer as Tulsí Dás, *cir.* 1600 A. D., frequently uses nouns, pronouns, and numerals, with this old Prákrit affix.† We shall have frequent occasion hereafter to refer to this usage.

90. The Hindús have an odd habit of inverting syllables, which should be remembered in the investigation of obscure words. Thus, in the west, people say मतखल for मतखल, 'object'; in the Doáb, नहान, 'bathing', for हनान, Sk. स्नान, and खीराम for खीमार, 'sick'; in Tirhut and Garhwál, चहुंपना, for पहुचना, 'to arrive', etc., etc.

OF CONJUNCT CONSONANTS.

91. This subject of the treatment of conjunct consonants in Hindí, is so extensive and complicated, that the limits of this work will not allow us more than to indicate the general principles which have operated in the case. We shall enter into detail only so far as may be necessary briefly to illustrate these general laws, and refer the student for a full discussion of the subject to Mr. Beames' Comparative Grammar.‡

* Even Sanskrit contains many words thus formed; as, *e.g.*, घोटक, 'a horse, कावटक, 'a thorn'; मेसक, 'an assemblage', etc. But in Prákrit the use of this affix was greatly extended. On this subject, which is of some etymological importance, the student may consult Vararuchi, Prákṛ. Prak. iv, (25); Lassen, *Inst. Ling. Prac.* pp. 288, 460, 461, 475.

† Vid. § 105, k.

‡ It is proper that I should here express my indebtedness to Mr. Beames for much in this chapter, more especially in the present section. Although the substance of this chapter was written prior to the appearance of Mr. Beames' work, I have derived from him many additional examples, and have remodelled this section, with a view to greater brevity and clearness, somewhat after the plan of his chapter on 'Compound Consonants'.

92. The general principles which regulate the treatment of conjunct consonants in Tadbhava words, may be briefly summed up under two heads, *viz.* :

(1) Where the members of the conjunct are of equal or nearly equal strength, the Hindí, in older words, rejects the first of the two consonants; in those of later formation, it separates them by a vowel.

(2) Where the members of the conjunct are of unequal strength, as a general rule, the stronger remains, and the weaker is dropped. In some cases, however, the remaining consonant, under the influence of the vanishing letter, is itself modified, and often transferred to another order.

a. Prior to the rejection of one element of a conjunct, there was, in the Prákrit period, an assimilation, in the case of strong conjuncts, of the first to the second consonant; and, in the case of mixed conjuncts, of the weaker to the stronger. Not a few examples of this earliest process are preserved in Hindí; as, *e.g.*, in पत्थर, 'a stone', मक्खी, 'a fly', and the old form, हत्थ, 'hand', for the Sk. प्रस्तर, मक्खिका, and हस्त. Further illustrations will be found below.

b. When, under the application of these rules, a conjunct has been reduced to a simple consonant, a short vowel, originally preceding the conjunct, is usually lengthened in compensation. But when long and heavy syllables follow, and in a few other cases, this compensatory lengthening of the vowel is sometimes neglected.

c. For the interpretation of these general principles, it is to be remembered that the first four letters of the five 'vargs' are called *strong*, and all the others *weak* letters.* It is further to be noted, that in the practical application of these principles, the strong letters are regarded as of equal strength, but the weak letters vary in strength among themselves.†

* Vid. § 6.

† Mr. Beames arranges the weak consonants in the order of their strength, as follows, *viz.* : first the nasals, then the sibilants, and, last of all, the semivowels. The nasals and the sibilants he regards as of equal strength. The semivowels he arranges in the following order, beginning with the strongest; *viz.*, ख (with the power of क्ख), घ (with the power of क्ख), ल, र, व (softened to व्), य (softened to य्). Vid. Comp. Gramm. p. 360.

93. The following examples and remarks will illustrate the above rules. In the following strong conjuncts, the first consonant is rejected; मोती, 'a pearl', for Sk. मौक्तिका; दूध, 'milk', Sk. दुग्ध; सात, 'seven', Sk. सप्तन्. The vowel remains short in युत, 'connected', for युक्त; and generally when an accented syllable has in Sanskrit followed the conjunct; as in उठना, 'rising', from Sk. उत + स्था. Most strong conjuncts, in words written as Tatsamas, are by the common people among the modern Hindús, divided in pronunciation. Thus, शब्द, 'a word', becomes सखद; तिस्र, 'satisfied', तिरपत; कर्म, 'work', करम, etc.

94. In the following conjuncts, the elements being of unequal strength, the weaker is rejected; viz., अग्नि, 'fire', H. आग; ऊर्ध्व, 'wool', H. ऊन; गर्भिण, 'pregnant', H. गाभिन; ज्योतिष, 'astrology', H. जोतिष; प्रावृष, 'the rains', H. पावस; मूल्य, 'price', H. मोल; नैह, H. नेह; स्त्री, 'a woman', H. तिया.

a. र following ष in a conjunct is very often separated from it by अ; as in परकार्ध, 'shade', Sk. प्रतिज्ञाया; प्रकाश, 'brightness', H. परगास, प्रसाद, 'favor', परसाद, etc.

b. The root ज्ञा, 'to know', becomes जा, as in जानना, 'to know'; this is further weakened to य, in सियाना, 'wise', and अयान, 'foolish', for सज्जान, अज्जान.

95. A nasal initial in a conjunct with a mute usually vanishes, leaving *Anusvár*, and lengthening a preceding short vowel. This class of words is very numerous. Examples are कांटा, 'a thorn', Sk. कण्ठिक; चांद, 'the moon', Sk. चन्द्र; तांबा, 'copper', Sk. ताम्र, etc.

96. य, र, and व, in a conjunct with a dental, disappear, transferring the dental to their own organ. Thus the conjunct तय becomes थ in सथ, 'true', for Sk. सत्य, and मीथ, 'death', Sk. मृत्यु. दय becomes थ in आज, 'to-day', Sk. अद्य; धय becomes ङ in सङ्ग, 'twilight', Sk. सन्ध्य. र very often modifies the dental, if first, and more rarely, if second in the conjunct. Examples are, बाट, 'a road', Sk. वर्तन; बूढ़ा, 'old', from Prák. बर्धक, for Sk. वृद्ध; पाट, 'cloth', Sk. पत; कोटा, 'little', Sk., कुट्ट. This assimilation, in the case of a labial, is much more rare. The chief examples are afforded by the numerals, in the combinations of द्वि, 'two', as बारह, 'twelve', for Sk. द्वादशन; बाईस, 'twenty-two', Sk. द्वाविंशति, etc. Analogous is the derivation of आप, 'self', from the Sk. आत्मन.

97. A sibilant, in a conjunct with a stronger letter, disappears,

commonly aspirating the remaining consonant. Thus, we have झाधी, from Sk. हस्तिन्, 'an elephant'; पच्छिम, 'west', Sk. पश्चिम; खन, 'an udder', Sk. खन; सूखा, 'dry', Sk. शुष्क; आठ, 'eight', Sk. अष्टन्. In some cases the aspirate assumes a separate existence, and is even transferred to the beginning of a syllable; as in हड्डी, 'a bone', Sk. अस्थि; हनान, 'bathing', Sk. स्नान; पुहुप, 'a flower', Sk. पुष्प. For a conjunct formed by क, त, or प preceding a sibilant, the regular substitute is छ. Thus क्षय, 'destruction', becomes छय; आक्षर, 'a letter', आक्षर; मत्स्य, 'a fish', मछ; ईच्छित, 'desired', इच्छित.

a. But, in conjunction with क, the sibilant often merely leaves an aspiration, without changing the letter, as, in old Hindí, आक्षर, 'a letter', for Sk. आक्षर, and मक्खी, or माखी, 'a fly', for Sk. मच्छिका.

b. In a large class of words beginning with ख, chiefly derivatives of the root ख्या, 'to stand', the dental has been transferred to the cerebral *varg*. Such are, e.g., the words, ठाँ, 'a place', ठाना, 'a police station'; ठाढ़ा, 'erect', Mar. कडा, 'where', etc., etc. With a weaker letter the sibilant remains, as in आवसि, 'necessary', for Sk. अवश्य, etc.

98. While the foregoing exposition of the phonetic laws which have operated in the development of the Hindí, is necessarily but brief and incomplete, it is hoped that it may at least indicate the path of research to the student; and aid him in interpreting the various strange and irregular forms which one often encounters in old Hindí books, and in the diverse local dialects of modern Hindí.

OF DIALECTIC PECULIARITIES.

99. Before leaving this general subject, it will be advisable, as a preliminary to the subject of declension and conjugation, to notice briefly the peculiar characteristics of the chief dialects exhibited in this grammar. These peculiarities are both lexical and etymological. Notable differences often obtain in words chosen to convey the most common ideas. Thus, 'to send', in the standard dialect, is भेजना, in Mārwarí, भेलखो; in the E. पठावन. 'To call', in the standard dialect, is बुलाना, in the Rámáyan. बोलन, in E. Hindí, S. of Allahabad, गोहरावन. But the indication of these lexical differences, belongs to a dictionary rather than a grammar.

100. As to differences in the forms of words, these respect, in some instances, merely individual letters; the word, both in its root and termination, remaining essentially the same. Some dialects, again, in some cases, present us with an inflectional system, so different from that prevailing elsewhere, as to compel us to postulate for it a separate origin. Thus, in such different forms as, *e.g.*, eastern II. ब्र, High Hindí, बड़ा, K. बड़ो, B. बड़ो, 'great', we have nothing which is not explicable by the laws of phonetic change. But, on the other hand, in the case of the futures चलूंगा, E. Hindí, चलब, B. and K. चलिहो, 'I will go', we have differences inexplicable by any phonetic law, and must therefore assign each of these variant forms to a different origin. Differences of this latter sort, can only be exhibited in detail, when we come to treat of declension and conjugation. It will suffice at present to indicate briefly a few distinguishing peculiarities of the various dialects.

101. In the Braj, the inflectible आ final of the standard dialect, (for Prák. ओ, Sk. ऌ:) in adjectives, and verbs, commonly appears as औ; but in nouns, the Prákritic ओ has become आ. Often in verbs, and more rarely in nouns, ए final is *vriddhied* to ऐ. *Anuscár* is used much more freely than in High Hindí. Short *a* in close roots is very often lengthened; as, *e.g.*, in राखनी for रखना, 'to keep'; चालनी, 'to walk', for चलना; संच, 'true', for सच.

102. The Kanaují is related closely to the Braj. Where the Braj, as above, has औ, the Kanaují retains the Prákritic ओ. ए final remains unaltered. *Anuscár* is used in season and out of season.

103. The Márwáří and Mairwáří agree with the Kanaují in presenting औ instead of the inflected आ, and extend this usage so as to include nouns, saying, *e.g.*, घोड़ो, instead of घोड़ा, 'a horse', etc. आ is preferred to a medial *a*, as in Braj, as in लागबो 'to adhere', for लगाना, माटो, for मट्टी, 'earth', etc. These dialects, and, it is said, the Rájputaná dialects generally, agree in that, unlike those of the Ganges valley, they constantly prefer the cerebral nasal ञ to the dental न. Thus, the standard forms, अपना, 'own', होना, 'to be', are, in Márwáří, अपबो, होबो. Quite peculiar, again, is the aversion of these dialects to the letter ह; which, when medial, is very commonly dropped; the concurrent vowel-sounds then coalesce, according to the rules of *Sandhi*. Thus, कदना, 'to say', becomes, in Már., कैबो, for

कह्यो, from कहियो; चाहिये, 'ought', चीये; साहिव, 'sir', becomes साब;* शहर, Ar. شهر, 'a city', शेर; पहिला, 'first', पैलो; कह्यो, 'said', कयो, etc. But in S. Rájputáná, ह is very commonly substituted for स, as, e.g., in हमक, 'understanding', for समक, etc. The Ar. تاج, 'a throne', becomes तगत; the Persian پادشاه, 'a king', बाको. ल initial becomes न्न in नानत, 'a curse', for Ar. لعنت; and नन्दन, 'London'. The Sk. अद्भुत, 'wonderful', is transformed into उद्भुध.

a. As appears from the above examples, in the Rájputáná dialects ह is very commonly preferred to स in unaccented syllables. I have obtained no written examples, but it is evident that the *Sandhi* रे, in the above cases, must have arisen, not from स+र, but स+ह. Occasionally, य or छ is inserted between the concurrent vowels, as in कयायो, for कहायो (कहाना); सायब, for साहिव, etc.

104. Inasmuch as the Kumáoní and Garhwálí, so far as we know, possess no literature, our materials for the illustration of these dialects are comparatively scanty. But it will be abundantly evident from the sequel, that their affinities are not with the contiguous dialects of the valley of the Ganges, but with those of Rájputáná. We note, especially, the preference of the cerebral to the dental nasal, as in अपया, 'own', for अपना; बनायो, 'made', for बनाया, and in infinitives generally, as रोयो, 'to cry', for रोना. There are also indications of the same aversion to ह, that we have noted in the Rájputáná dialects. Thus, in Garhwálí we hear ओलो, 'he will be', for होहलो, H. H. होगा. In Kumáoní, काँ, and याँ, 'where', 'here' stand for कहाँ, यहाँ; and कोयो, for कहना, 'to say'. The *Sandhi* in this last case indicates a previous substitution of उ for the unaccented अ, instead of ह, as in W. Hindí. स becomes ह in हाखिला, 'a honey-comb', for साखिला; and च becomes स in निस्वो, 'under', for नीचे. Very many nouns terminate in उ or ऊ as in archaic Hindí, as, e.g., खाडू, 'a sheep'. These dialects are marked in general by great abbreviation, especially of verbal forms, but this will be illustrated in the tables of conjugation.

105. Coming to the eastern dialects, that of the *Rámáyan* claims special attention. It should be observed, however, that Tulsí Dás has allowed himself the utmost freedom in drawing grammatical forms from various Hindí dialects, and even from the old Prákrit, as the exigencies of the metre, or his personal fancy might suggest.

* For this *Sandhi*, Vid. § 77, a, (1).

The student should of course carefully discriminate between such foreign elements, and those which are distinctive of that form of Hindí in which the poet wrote. Although, *e.g.*, the Braj perf. part. in **बै**, and the K. in **बो** are often found in the *Rámáyan*, as also the Bhoj. perf. in **ब**, neither of these are to be regarded as belonging to the old Púrbi, in which the poem is written.

a. The Prákritic term. **बो**, which elsewhere appears as **बा**, **बो**, or **बौ**, is, in the *Rámáyan*, regularly reduced to **ब**. Thus **दूल्हा**, 'a bridegroom', becomes **दूल्ह**; **तीसरा**, 'third', **तीसर**; **जीता**, perf. part., 'conquered', **जीत**; **बड़ा**, 'large', **बर**, *etc.* Many nouns which in High Hindí end in the silent *a*, in the *Rámáyan* terminate in **उ**. Examples are numerous, as **सब**, 'an arrow', **सिर**, 'the head', **मुँहु**, 'the face', for the modern standard forms, **सर**, **सिर**, **मुँह**.*

b. Diphthongs are often resolved into their elements, especially in the conjugation of verbs, as, *e.g.*, **करइ**, for **करे**; **भयउ**, for **भये**. These forms have frequently been referred to a careless style of writing; but we think that investigation will show that they are, in most instances, *boná fide* grammatical forms. The dicesis of the vowels will, in most cases, be found to indicate the elision of an original consonant. Thus **करइ**, 'he does', stands for a Prákrit form, **करति**, for Sk. **करोति**, where **त** has been elided. But we shall have occasion to notice this matter again hereafter.

c. For **रे**, **इय** is sometimes written, as in **जियव**, for **जीव**. Some words are written indifferently with **आव**, **आउ**, or **औ**; thus we find **रावदे**, **राउदे**, and **रौदे**, all signifying 'your excellency'. **रे** is sometimes written for **अय** as in **रेन**, for **अयन**, 'a place'.

d. **र** is very often substituted for **अ** or **इ**, before affixes and suffixes. Thus, we have **आरेक**, 'a child', for **आलक**; **भयेउ**, 'was', for **भयउ**; **कहेउ**, 'say', for **कइउ**, *etc.* This change never occurs in roots, except in the final vowel. This **र**, thus derived, is prosodially common, but more often short than long.

e. Quite characteristic is the frequent allowance of an hiatus,

* This final *u* is the characteristic vowel of the final diphthong *o* of the Prák. nom. sing. This termination represents a stage of the language immediately preceding the modern forms, in which, the *u* being no longer sounded, it is no longer written, so that all this class of words are reduced to the form of nouns ending in a silent *a*.

where both Sanskrit and modern Hindi would avoid it, either by *Sandhi*, or by the retention or insertion of a consonant. Thus we have पित्र, 'husband', for Sk. प्रिय, modern Hindi, पिय; सुपुत्र, 'a son', for सुपुत्र; जिवन्त, 'living', for जियन्त, etc. The semivowels य and व are often softened to ह and उ, producing a hiatus, which is suffered to remain; as, e.g., पित्रार, 'love', for प्यार; दूधारे, 'at the door', for द्वारे.

f. Quite characteristic is the very frequent substitution of the simple aspirate ह for an aspirated mute.* Thus we find, लाह, 'gain', for लाभ; कोह, 'anger', for क्रोध; नाह, 'lord', for नाथ, etc., etc. Instances of this change occur in every dialect, but it is especially common in the *Rāmāyaṇ*.

g. The cerebral ह ? does not occur. Its place is usually taken by र, 'as in परे, 'they fell', for पड़े; लरकिन, obl. plur., 'girls', for लड़कियों. But sometimes an original ट for a modern ह is retained; as in घट, 'an earthen jar', for the modern घड़ा. र is also very commonly preferred to ल as in तरे, 'under', for तले; दूबरि, 'thin, lean', for दुबली; दिखरायो, 'showed', for दिखलाया. न is regularly substituted for ल, as in गुन, 'virtue', for गुल; and स, for श, as in सोक, 'grief', for शोक.

h. The unmeaning Prākritic suffix क is of frequent occurrence.† The following instances may be noted: of nouns; दारिका, 'a wife', मुठिका, 'the fist', नौका, 'a ship', for दारा, मुट्टी, and नौ; of numerals, चारिक, 'four', पचासक, 'fifty', कोटिक, 'a crore'; of pronominals, etc., कितिक, 'how much', कहुक, 'some', बहुतेक and बहुतेक, 'much', कबहुक, 'ever'.

106. The modern eastern dialects exhibited in this work, are exclusively colloquial, and their peculiarities need be only briefly noticed. The Avadhí, or dialect of Oude,‡ as well as the Riváí, bordering it on the S., are both characterized by the existence of the same short ए which we find in the *Rāmāyaṇ*. Abundant illustrations will be found in the tables of conjugation. In the Avadhí, all masculine nouns are commonly made to terminate in वा or उना in the nom. sing. Thus, तोता, 'a parrot', is in Av. तोताना, or तोतवा; घर, 'house', घराना or घरवा, etc. || Feminine nouns commonly terminate in या or वा. A final vowel, long in High Hindi, is shortened before या, but remains long before वा. Thus नदी, 'a river', becomes नदिया or नदीवा; बालू, 'sand', बालुया, etc.

* Vid. § 88. † Vid. § 89. ‡ Sometimes called Kosalí. || Observe that, by *Sandhi*, a or á + u = au.

α. These forms in **वा**, it may be observed, occur commonly in the Kanaujī dialect also. The forms in **जा** I have heard often on the frontiers of Rīvá, and should suppose that they were as common there as in Oude.

107. Mr. Beames has indicated, in the Journ. R. A. Soc.,* the following peculiarities of the Bhojpuri dialect. The *gun* and *viridhi* vowels are preferably left uncombined, so that, *e.g.*, for **र** and **औ** we have **अर**, **आउ**. The final inflected **आ**, is often shortened to *a*. Soft are preferred to hard mutes, as, *e.g.*, in **भोगना** 'to throw', for **भेकना**. **ल** very commonly becomes **र**, and **व**, **स**. **र** is substituted for **ड**, as in the *Rámáyan*; thus **घोड़ा**, 'a horse', becomes **घोर**. For the inflected **आ** of substantives in High Hindí, **बआ** or **उआ** are constantly substituted, as in **करिआ**, 'black', for **काला**; **बेटुआ**, 'a son', for **बेटा**.†

CHAPTER IV.

OF SUBSTANTIVES.

Gender.

108. Hindí substantives are affected by gender, number and case. We have first to consider the subject of gender. Only two genders, masculine and feminine, are recognized. The neuter of Sanskrit, (which has been retained in the Maráthí,) the Hindí, as well as the closely related Panjábí, has lost, so that the gender of many nouns is of necessity ambiguous, being apparently determined solely by popular usage.

109. As a general principle, Sanskrit nouns, introduced into Hindí, if masculine or feminine, retain their original

* Vol. III, Part 2.

† I judge that the hiatus here marks the place of an original Prákritic *h*; the forms are therefore older than those in *d* or *o*, or even those found elsewhere in *iyá* and *uyá*.

gender; or if neuter, become masculine in Hindi. But there are many exceptions to this principle.

a. Among the most common exceptions may be noted the following words, which, although masculine in Sanskrit, have become feminine in Hindi, *viz.* : आग (Sk. अग्नि), 'fire'; आँच (Sk. अर्चि), 'flame'; आन (Sk. अन्म), 'heat of the sun'; अंकार, 'a tinkling'; धूप, 'incense'; आस (Sk. वास), 'odor'. जयार, 'a strong wind', if derived, as some say, from the Sk. masculine, वायु, is another common illustration; but the original identity of the two words is not certain.

b. The following Sanskrit masc. nouns, are in Hindi commonly reckoned fem., though occasionally masc., *viz.* ; जय or जै, 'victory'; तान, 'a tune'; दाह, 'burning', and, from the same Sanskrit root, डाह, 'envy', 'malice'. आँख, 'the eye', वस्तु, 'a thing', and गात, 'the body', from the Sk. neuters, अक्षि, वस्तु and गात्र, have become fem. So also देह, 'the body', and पुस्तक, 'a book', in Sanskrit, masc. or neut., are fem. in Hindi. मृत्यु, 'death', masc. or fem. in Sanskrit, in Hindi is always fem., as also is the derived Tadbhava, मोक्ष.

c. Of the contrary change from a Sanskrit fem., to a Hindi masc., I have noted only one common example, *viz.*, मोती, 'a pearl', from Sk. मैत्रिकं.

d. In some cases, the reason of the change of gender may perhaps be found in the influence of coexisting Urdú equivalents. Thus, *e.g.*, the words जयार, वस्तु, पुस्तक, may have become fem. through the influence of the Urdú, جيز, كتاب and كتاب. In the case of some Tadbhavas, the words may possibly not be, in fact, descended directly from the Sanskrit, but from similar Prákrit words, which have not been preserved in literature.

110. Although, as thus appears, the gender of a Hindi word is often apparently quite arbitrary, yet there are certain rules by which the gender of most nouns may be known. These rules respect, either the signification of nouns, or their terminations. As respects their signification, we have the following principles to guide us.

111. The following are masculine, *viz.* :—

(1) All names of males.

(2) Names of large, or coarse and roughly made objects, as contrasted with small, or more finely made objects of the

same kind; as गाढा *gāṛā*, 'a cart', in contrast with गाढ़ी *gāṛī*, 'a carriage', fem.; रस्सा *rassā*, 'a heavy rope', पोथा *pothā*, 'a tome'; in contrast, respectively, with रस्सी *rassī*, 'a small rope', and पोथी *pothī*, a book'.

(3) Names of metals, alloys, precious stones, and rocks generally; as सोना *sonā*, 'gold'; रूपा *rūpā*, 'silver'; जस्ता *jas-tā*, 'pewter'; हीरा *hīrā*, 'a diamond'; कंकर *kaṅkar*, 'nodular limestone.'

Exc. The following are feminine, *viz.*; चांदी *chāndī*, 'silver'; and compounds in which मृत्तिका or मक्खी (मखिका) is the last member, as पान्दुमृत्तिका *pāṅdumṛttikā*, 'opal'; सोनामक्खी *sonāmakkhī*, 'goldstone'.

(4) Names of the year, of the months, of the days of the week, and of the astrological *Karans*; * as संवत् *samvat*, 'a year'; बुध *budh*, 'Wednesday'.

(5) Names of mountains and seas, whether common or proper; as पहाड़ *pahār*, 'a mountain'; सागर *sāgar*, 'the ocean'; गिरि *giri*, 'a mountain'; विंध्य *vindhya*, 'the Vindhya range'.

(6) Names of the heavenly bodies, as सूर्य, pronounced *sūraj*, रवि *ravi*, etc., 'the sun'; शुक्र *shukr*, 'the planet Venus'; केतु *ketu*, 'a comet'.

(7) Most words denoting affections of the mind; as प्रेम *prem*, 'love'; क्रोध *kop*, 'anger'; लोभ *lobh*, 'avarice'.

Exc. All Sanskrit nouns of this class in आ *á* final are feminine; as इच्छा *ichchhá*, 'desire'; also the three following, *viz.*, अर्षेण *aṛainch*, 'enmity'; क्रुध *krudh*, and occasionally, क्रोध *krোধ*, 'anger'.

(8) All nouns denoting agency or relationship. This includes the following :

a. Many nouns in ता *tā*, from Sanskrit bases in तृ *tṛi*; as दाता *dātā*, 'a giver'; योद्धा *yoddhá*, 'a warrior', from यु *yu*, 'to fight'; where the final ता *tā*, for the sake of euphony, has been changed to धा *dhā*.

b. Some nouns in ई *ī*, from Sanskrit bases in इ *in*, as कारी *kārī*, 'a doer', and its compounds.

* The Puṇḍits reckon eleven *Karans*, seven moveable, and four fixed, of which two equal a lunar day.

c. A large class of Sanskrit nouns in क *k*; as उपदेशक *upadeshak*, 'an instructor'; रचक *rachak*, 'a maker'.

d. Another large class of Sanskrit nouns in न *n* (ञ *ñ*), especially common in poetry, as the last member of compound words; as हरण *haran*, 'a remover'; दुःखभञ्जन *dukhbhañjan*, 'a destroyer of grief'; पतितपावन *patitpāwan*, 'purifier of the guilty'.

e. A large class of compounds, in which the last member is a Sanskrit root, either unchanged, or affected with *gun*; as रजनीचर *rajnīchar*, 'a demon', lit. 'night-walker', धरनीधर *dharnīdhar*, 'supporter of the earth'; पापहर *pāphar*, 'remover of sin'.

f. A numerous class of Tadbhava substantives in या *yá* (व्या *iyá*, ह्या *iyá* and रेया); as गवैया *gawaiyá*, 'a singer'; लेवैया *lewaiyá*, 'a taker'; ठंडोरिया *ṭhandhoriyá*, 'a crier'.

112. The following are feminine, *viz.* :

(1) All names of females.

(2) Names of the lunar days; as द्विज *dúj*, 'the second'; अष्टमी *ashṭamī*, 'the eighth'; अमावस *amāvas*, 'the day of new moon'.

(3) Most names of rivers; as गंगा *gangá*, 'the Ganges'; लवना *lavaná*, 'a river in Tirhut'.

Exc. सोन *son*, 'the Sone', सिन्धु *sindhu*, 'the Indus', and ब्रह्मपुत्र, 'the Brahmaputra', are masculine.

113. As to the gender of trees, plants and flowers, no general rule can be given, further than this, that the majority of names, especially of large trees, are masculine. The many various names of the lotus, as *jalaj*, *saroruh*, *kamal*, etc., are all masculine. But the names of a large number of plants and fruits are feminine. As the most of these are rarely used, it is not necessary to enter into further detail here.

114. It would not be easy to assign a reason for these rules in every case. In some instances, doubtless, the gender of the prevailing common term, has determined the gender of the individuals included under it. Thus, names of mountains are probably masc., because the generic terms, *parbat*, *giri*, etc., signifying 'mountain', are masc. So, probably, names of metals, etc., are masc., because the common terms, *dhātu*, 'a metal', *pañjar*, *pāñjar*, etc., 'a stone', *ratn*, 'a jewel', are masc. In the case of the exceptions, *chāndī*, and the compounds of *mrīṭhiká* and *makṣhiká*, the fem. terminations *ī* and *ī* have occasioned the deviation from the rule. So also, the days of the week are reckoned masc., because the words, *din*, *divas*, etc., 'a solar day', are masc.; but the names of

the days of the month are fem., as following the gender of *tithi*, 'a lunar day'. Still, at last, the ultimate reason for these rules must be found in the imagination of the people, which assigned the gender of inanimate objects, according as masculine or feminine attributes were supposed to be predominant in them.

115. The following rules have respect to the terminations of nouns.

Nouns having the following terminations are masculine, *viz.* :—

(1) Most Tadbhava nouns in *आ á* or *आं án* final; as *घड़ा ghará*, 'an earthen jar'; *डेरá derá*, 'a tent'; *झोला jholá*, 'a wallet'; *धूआं dhúán*, 'smoke'.

Exc. Diminutives ending in *या* are feminine, as, e.g., *थैलिया thailiyá*, 'a small bag'; *चिरिया chiriyá*, 'a small bird'; *फुड़िया phuriyá*, 'a boil'. The following are also fem., *viz.* : *गूआ gúá*, 'betel nut'; *जोंगा jhóngá*, 'a shrimp'; *टोआ toá*, 'the act of feeling'; *बिरिया biriyán*, 'time'. *ठां thán*, 'a place', is masc. or fem.

N. B. Tadbhava masc. nouns in *á* may be recognized as such, by their uniform inflection of *á* to *e* in the oblique cases of the singular.

(2) Most nouns in *उ u* or *ऊ ú*, in their diphthongs, *ओ o* or *औ au*, or in the cognate semivowel *व v*, whether with or without *Anusóar*; as *मधु madhu*, 'honey'; *कलेज kalejú*, 'a luncheon'; *चढ़ाओ charháó*, 'an ascent'; *मह्यौ mahyau*, 'buttermilk'; *भाव bháv*, 'an emotion'; *गांव gánv*, 'a village'.

The following lists comprise all common exceptions.

a. Nouns fem. in उ u.

आकशु <i>achakshu</i> , 'spectacles'.	तर्कु <i>tarku</i> ,* 'a spindle'.
आयु <i>áyu</i> , 'age'.	बस्तु <i>bastu</i> ,* 'a thing'.
इक्षु <i>ikshu</i> , 'sugarcane'.	मृत्यु <i>mrityu</i> ,* 'death'.
चंचु <i>chanchu</i> , the 'beak of a bird'.	रेणु <i>renu</i> , 'sand'.
जंबु <i>jambu</i> ,* 'the rose-apple'.	

b. Nouns fem. in ऊ ú, ऊं ún.

आफू <i>áphú</i> , 'opium'.	[grass].	जू <i>jún</i> , 'a louse'.
उलू or ऊलू <i>ulú</i> or <i>úlú</i> , 'a kind of	दारू <i>dárú</i> , 'ardent spirits'.	
गू <i>gú</i> , 'excrement'.	बालू or बाब <i>bálú</i> or <i>bárú</i> , 'sand'.	

*Also rarely masculine.

चमाऊ <i>chamáú</i> , 'shoes fixed to pat-	भू <i>bhú</i> , 'the earth'.
चमू <i>chamú</i> , 'an army'. [tens].	रेहू पेहू <i>rehú pehú</i> , 'abundance'.
चंपू <i>champú</i> , 'a work in alternate prose and verse'.	लावू <i>lavú</i> , 'a pumpkin'.
जागू <i>jágú</i> , 'a place'.	लू <i>lú</i> , 'the hot wind'.
	सारू <i>sáru</i> , 'a starling'.

c. Nouns fem. in जो o, जौ oy.

छाँसो <i>chháon</i> , 'shade'.	भौ <i>bhon</i> ,* 'the eyebrow'. [wan'.
जोखो <i>jokhon</i> , 'risk'.	सलनो <i>salno</i> , 'the full moon in Sá-
बासो <i>báo</i> , 'wind'.	सरसो <i>sarson</i> , 'a kind of mustard'.
	सो <i>son</i> , 'an oath'.

d. Nouns fem. in औ au, औ au.

गौ <i>gaun</i> ,† 'opportunity'.	पौ <i>pau</i> , 'the one in dice'.
दौ <i>daun</i> , 'flame'.	लौ <i>lau</i> , 'the flame of a candle'.

e. The following in च v, are feminine, viz.: नेव *nev*, 'a foundation'; टेव *tev*, habit, custom'; राव चाव *ráv cháv*, 'merriment'.

f. The following are of either gender, viz.: खराऊ *kharáún*,‡ 'wooden sandals'; ठाँसो *tháon*, 'a place'; सहाऊ *saháú*, 'help'.

Rem. Many words are written indifferently with one or another of these cognate letters; as, e.g., बासो or बाव; भाव or भाऊ; सौ or सूं; भौ or भौ, etc.; but as this does not affect their gender, it has not been thought necessary to repeat them under each list.

(3) Abstract nouns in त्वा *tva* and या *ya* final are all masculine; as ईश्वरत्त्व *ishvaratva*, 'godhead', from ईश्वर *ishoar*, 'God'; राज्य *rájya*, 'a kingdom', from the base राजन *rájan*.

a. These are all Tatsamas and are all derived from concrete nouns. When, in any case, a Tadbhava form exists, derived from such a Tatsama, its gender is commonly determined by that of the Tatsama, according to § 109; as, e.g., राज, for *rájya*, masc.

(4) Nouns formed with the suffixes ज *j*, 'born of', पन *pan*, पना *paná*, or पा *pá*, English, 'hood', 'ness', are all masc.; as जलज *jalaj*, 'a lotus', from जल *jal*, 'water', and the suffix ज *j*, lit. 'the water-born'; लड़कपन *larakpan*, 'childhood'; बुढ़ापा *burhápa*, 'old age'; मूर्खपन *múrahpan*, 'foolishness'.

*Also *bhaun*. † Occasionally masc. ‡ In the E. always fem.

Rem. The anomalous form लुच्छपनी *luchchhpaní* is fem.

(5) Nouns in न *n* (ञ *n*) are both masc. and fem.; but the majority are masc. Among masculines in न *n* may be particularly noted the following, *viz.*:

a. All nouns of agency; as दहन *dahan*, 'a consumer'; गंजन *ganjan*, 'a destroyer'; etc.

b. A large class of Tatsamas, (Sanskrit neuters,) as अयन *ayan*, 'a place'; दान *dán*, 'a gift, alms'; दर्पण *darpan*, 'a mirror'; ज्ञान *gyán*, 'knowledge'.

c. A few abstract nouns from Sanskrit nouns in *n* final in a conjunct; as यत्न *yatn*, commonly pronounced and often written as a Tadbhava, जतन *jatan*, 'labor'; स्वप्न *swapn*, 'sleep'.

d. Add to these a large class of verbal nouns in न *n* (Tadbhavas); as चलन *chalan*, 'going, walk'; करण *karan*, 'action, deed'; मारण *maran*, 'slaughter'.

Exc. The following list comprehends most common fem. nouns in न *n*:

अदवान <i>adván</i> , 'braces for tighten- [ing a bedstead].	धरन <i>dharan</i> , 'a beam', 'accent'.
आनवान <i>ánván</i> , 'spirit, proper pride'.	धुन <i>dhun</i> , 'propensity', 'ardor'.
आवनआवन <i>ávanávan</i> , 'tidings of [arrival].	फूटन <i>phútan</i> , 'a quarrel'. [tree].
उवन <i>utran</i> , 'fragments', 'cast-off [clothes].	बकायन <i>bakáyan</i> , 'the name of a रहन <i>rahan</i> , 'method'.
ऊन <i>ún</i> , 'wool'.	रेन <i>rain</i> , 'night'.
कान <i>kán</i> , 'shame'.	सुटकून <i>sutkun</i> , 'a rod'.
केन <i>kain</i> , 'a bamboo twig'.	सूँघन <i>súngan</i> , 'act of smelling'.
खिरकिन <i>khirkin</i> , 'a window'.	सूथन <i>súthan</i> , 'drawers'.
घिन <i>ghin</i> , 'disgust'. [thatch].	सेन <i>sain</i> , 'a hint', 'a wink'.
छान <i>chhán</i> , 'a bamboo frame for a	हुन <i>hun</i> , 'name of a coin'.

116. Nouns which have the following terminations are feminine, *viz.* :

(1) Pure Sanskrit nouns in आ *á* final. Under this head, we may note especially:—

a. Nouns in आ *á* and ना *ná* (ञा *ná*), from roots either unaltered or affected with *gun*, as, from the root इच्छ्, इच्छा *ichchhá*, 'desire'; from तृष्, तृष्णा *trishná*, 'thirst'; from लिख्, लेखा *lekhá*, 'a line'.

b. Abstracts in ता *tá*, derived from nouns and adjectives; as, from नम्र, 'courteous', नम्रता *namratá*, 'courtesy'; प्रभु, 'lord', प्रभुता *prabhutá*, 'lordship'. These are very numerous.

Exc. A few Tatsama nouns in आ *á*, from bases in अन् *an*, are masculine, according to § 109. The principal of these are अचिन्मा *anímá*, 'the faculty of becoming invisible'; मूर्धा *múrdhá*, 'the head'; यक्ष्मा *yakshamá*, 'pulmonary consumption'; श्लेष्मा *shleshmá*, 'the phlegmatic humor'.

Rem. But the following, from bases in अन् *an*, have become fem. in Hindí; viz., प्लीहा *plíhá*, 'the spleen'; महिमा *mahimá*, 'majesty'. तारा *tárá*, 'a star', is both masc. and fem.

(2) Many nouns in इ *i* final are feminine.

a. Under this head are to be noted, especially, all abstract nouns in ति *ti* and नि *ni*; as मति *matí*, 'the mind'; संगति *saṅgati*, 'intercourse'; ग्लानि *gláni*, 'weariness. Under this class come also such nouns as वृद्धि *vridhí*, 'increase'; बुद्धि *buddhí*, 'wisdom'; where the final affix ति *ti* has become धि *dhi* by sandhi.

Exc. But the following nouns in इ *i* are masc., viz. :

a. Names of animals, as कपि *kapi*, 'a monkey'; कृमि *kṛimí*, 'a worm'.

b. All compounds with धि *dhi*; as परिधि *paridhí*, 'circumference'; निधि *nidhí*, 'a treasure'; वारिधि *váridhí*, 'the ocean'.

c. To these add all nouns in the following list, viz. :

अतिथि <i>atithí</i> , 'a guest'.	पाणि <i>páni</i> ,* 'the hand'.
अक्षि <i>akshí</i> , 'the eye'.	मणि <i>maní</i> ,* 'a jewel'.
अग्नि <i>agni</i> , 'fire'.	यष्टि <i>yashṭí</i> , 'a stick'.
अक्षि <i>akshí</i> , 'edge of a weapon'.	राशि <i>ráshí</i> , 'a heap quantity'.
अर्चि <i>archí</i> , 'flame'.	वह्नि <i>vahní</i> , 'fire'.
असि <i>asi</i> , 'a sword'.	वारि <i>vári</i> or बारी <i>bári</i> , 'water'.
अस्थि <i>asthí</i> , 'a bone'.	व्रीहि <i>vṛíhí</i> , 'rice'.
आराति <i>árátí</i> , 'an enemy'.	शालि <i>sháli</i> , 'rice'.
दधि <i>dadhí</i> , 'curd'.	सचि <i>sachí</i> , 'intimacy'.
ध्वनि <i>dhvani</i> , 'sound'.	सुरभि <i>surabhí</i> 'nutmeg'.

(3) Most nouns in ई *í* final are feminine, as रोटी *rottí*, 'bread'; बिन्ती *bintí*, 'supplication'; गाली *gáli*, 'abuse'.

* Sometimes masc.

α. Except those included under § 111, (8) b., and the following:

अमो <i>amí</i> , 'nectar'.	दही <i>dahí</i> , 'curdled milk'.
अरो <i>arí</i> , 'an enemy'.	पानी <i>pání</i> , 'water'.
घी <i>ghí</i> , 'clarified butter'.	मोती <i>motí</i> , 'a pearl'.
जी <i>jí</i> , 'life', 'soul'.	हाथी <i>háthí</i> , 'an elephant'.

Rem. These exceptions can all be explained as corruptions of Sanskrit masc. or neut. nouns. Thus, अमो and घी are corruptions of अमृतं and घृतं; अरो and दही, of अरि (अरिक्) and दधि (दधिकं); जी and पानी, of जिवं and पानियं; मोती, of मौक्तिकं. They thus all come under the general principle laid down at the beginning of this chapter.

(4) All nouns in हट *haṭ*, वट *waṭ*, or वत *waṭ*, are feminine; as चनचनाहट *chanchanáhaṭ*, 'a throbbing'; बुलाहट *buláhaṭ*, 'a calling'; बनावट *banáwaṭ*, 'a fabrication'; सगावत *sagáwaṭ*, 'relationship'.

Rem. It may be observed (1) that these nouns in *haṭ* are all derived from verbal roots in *á* final, and are, for the most part, alliterative, and imitative words: and (2) that the *व* and the *ह* are in some dialects frequently dropped.

117. It is to be observed; in the application of the above rules, that each rule is to be regarded as limited by all that has gone before, even though words thus excepted be not expressly mentioned. Thus, e.g., *dhobí*, 'a washerman', is masc., though not explicitly excepted from § 116 (3), because it is already included under § 111 (8) b.

117. The above rules have especial reference to those words of Sanskrit origin, which make up the chief part of the Hindí language. With regard to the gender of such Arabic and Persian words as occasionally appear in Hindí, the following principles will enable the student, in most cases, to determine their gender.

(1) Most Arabic and Persian words in *आ á* or *ह h* (*Ar.* 1 or 2), are masc.; as दरया *daryá* (دريا), 'a river'; खान: *khánah* (خانه), गुनाह *gunáh* (گناه), 'sin'.

Exc. The following common words are fem., viz.: खता *khatá* (خطا), 'a fault'; तरह *tarah* (طرح), 'manner'; दवा *dawá* (دوا), 'medicine'; दुआ *duá* (دعا), 'a prayer'; दुनया *dunyá* (دنیا), 'the world'; बला *balá* (بلا), 'a calamity'; रह *rúh* (روح), 'spirit'; सलाह *saláh* (صلاح), 'counsel'; सुबह *subh* (صبح), 'morning'.

(2) A large class of Arabic trisyllables, in which त *ta* is the first syllable, and उ *u*, the vowel of the last syllable, and which have the final consonant doubled, or the final vowel lengthened, in the second syllable, are masc.; as ताल्लुक *taalluq* (تعلق), 'connexion'; तालावत *talávat* (تلاوت), 'reading'. The word तवज्जुह *'tawajjuh'* (توجه), is an exception. But words of this form, though common in Urdu, are quite rare in Hindí.

(3) Most Arabic and Persian words in त *t* त and श *sh* श are fem., as हुकूमत *hukúmat* (حکومت), 'government'; नालिश *nálish* (نالش).

Exc. The most common exceptions to the above rule are the following, *vis.*: गोशत *gosht* (گوشت), 'meat'; तखत *takht*, Mār. तगत (تخت), 'a throne'; दरखत *darakht* (درخت), often mispronounced *darakhat*, and even *darkhat*, 'a tree'; दस्त *dast* (دست), 'a hand'; दोस्त *dost* (دوست), 'a friend'; नक्श *naksh* (نقش), 'a picture', 'a print'; बुत *but* (بت), 'an idol'; वक्त *wakt* (وقت), often mispronounced *wakat*, and even *wakht*: शर्बत *sharbat* (شربت), 'a drink'.

(4) Arabic dissyllables (infinitives) with त *ta* for the first syllable, and ई *í* as the vowel of the last syllable, are generally fem.; as तद्बीर *tadbír* (تدبير), 'an expedient'; तजवीज *taj-wíj* (تجویز), 'a plan'. तावीज *táwíj* (تأویذ), 'an amulet', is masc., but will scarcely be met with in Hindí, except, possibly, in the extreme west.

118. Most compound words follow the gender of the last word; as ईश्वरेच्छा *íshwarechchá*, fem., 'the will of God'; गोपीनाथ *gopínáth*, masc., 'lord of the milk-maids'.

Exc. But the following Tadbhava copulatives, most frequently take the gender of the first word, *vis.*: आलचलन, आलच्यवहार, fem., 'walk', 'behaviour'.

FORMATION OF FEMININE NOUNS.

119. Tadbhava masc. nouns in आ *á* final* usually form their feminines by the substitution of ई *í* for आ *á*. † Thus

* Vid. § 115 (1) N. B. † Always, where the *a* represents an original *akāḥ*.

घोड़ा *ghorá*, 'a horse', makes घोड़ी *ghorí*, 'a mare'; बेटा *betá*, 'a son', बेटी *betí*, 'a daughter'.

a. A few such nouns, chiefly names of occupations or trades, make the fem. in इन *in*; as, e.g., कसेरा *kaserá*, 'a brazier', fem., कसेरिन *kaserin*; दूल्हा *dúlhá*, 'a bridegroom', fem., दुल्हिन *dulhin*, 'a bride'. ठडेर *thatherá*, 'a brazier', makes the fem., ठडेरी *thatherí*. भटियारा *bhāṭiyārā*, 'an inn-keeper', makes its fem., भटियारी *bhāṭiyārí* or भटियारिन *bhāṭiyārin*.

120. Many nouns ending in a consonant, both Tatsamas and Tadbhavas, also form their feminine by adding the termination ई *í*. Examples are, of Tatsamas; देवी *deví*, 'a goddess', from देव *dev*; पुत्री *putrí*, 'a daughter', from पुत्र *putra*; ब्राह्मिणी *brāhmaní*, 'a Brāhman woman', etc.: of Tadbhavas, भेड़ी *bherí*, 'a ewe', from भेड़ *bher*; बंदरी *bandarí*, 'a female monkey', from बंदर *bandar*, etc.

121. Masc. nouns in ई *í* commonly form their feminine by adding न *n*, the final vowel being previously shortened; as घोबी *dhobí*, 'a washerman', fem., घोबिन; माली *málí*, 'a gardener', fem., मालिन *málin*; नाई *nái*, 'a barber', fem., नाइन *náin*. Nouns of this class are all Tadbhavas, and commonly denote professions and occupations.

122. Masc. nouns denoting occupations or trades, if ending in a consonant, form the fem. by the suffix इन *in* or नी *ní*; as, e.g., सोनार *sonár*, 'a goldsmith', fem., सुनारिन *sunárin* or सुनारनी *sunární*; कलार *kalár*, 'a distiller', fem., कलारिन *kalárin* or कलारनी *kalární*.

a. So also, many pure Sanskrit masc. nouns form their fem. in नी *ní*. These include, especially, many names of animals; as सिंहनी *siṅhaní*, 'a lioness', from सिंह *siṅh*; हिरनी *hirnī*, 'a doe', from हिरण *hiraṇ*.

Rem. In some cases, *i* takes the place of *a* before the termination; as from श्नाम 'a serpent', the fem., नागिन. पति, 'a husband', makes its fem., पत्नी.

a. In like manner is formed (a final vowel being shortened) the fem. of Tatsama nouns of agency in ई *í*; as हितकारी *hitkārí*, 'a friend', fem., हितकारिणी *hitkārīnī*.

123. The suffix *ānī*, is added to Sanskrit nouns, to denote 'the wife of'; as, e.g., *पंडितानी paṇḍitānī*, 'the wife of a pundit', from *पंडित paṇḍit*; *इंद्रानी indrānī*, 'the wife of Indra'. This usage is extended to a very few Persian words; as, especially, *मिहतरानी mihtarānī*, 'the wife of a sweeper', from *मिहतर (میتار)*.

124. A few family and class names, much corrupted, form their fem. by adding the suffix *āin*, a final long vowel being rejected. Thus, *दोबी dobi*, 'a class of Bráhmans', makes its fem., *दुबाइन dubāin*; *पांडे pānre*, 'a brahmanical title', fem., *पड़ाइन paṛāin*.

125. As in other languages, the feminine noun is, in many instances, quite a different word from the corresponding masc. term. Examples are, *सांड sānṛ*, 'a bull', fem., *गाओ gāo*, 'a cow'; *पुरुष puruṣh*, 'a man', fem., *स्त्री strī*, 'a woman'; *भाई bhāi*, 'a brother', fem., *बहिन bahin*, 'a sister'; *पिता pitā*, 'a father', fem., *माता mātā*, 'a mother'.

126. Nouns of agency in *या* retain the same form in either gender; as, e.g., *गवैया gawaiyā*, 'a singer', *लपतिया lapatiyā*, 'a liar', masc. or fem.

127. In the fem. term, *ī*, as found in Tatsama nouns, we have simply the regular Sanskrit fem. termination. But the same terminations in the fem. of Tadbhava nouns in *ī* will be found to represent the Sanskrit fem. term., *ikā*. Thus, as, e.g.; *घोड़ा ghōḍā*, 'a horse', is for the Sanskrit *ghoṭakah*; so *घोरी ghōṛī*, 'a mare', is for the Sanskrit *ghoṭikā*, through an intermediate form, *ghōriyā*. Similarly, *अही aḥī*, 'a cowherdess', from *ahī*, Sk. *ābhīrah*, has arisen from a Prakritic form *abhīrikā*, whence *ahīriā*, *ahīriyā*, *ahīri*. Tadbhava feminines in *ī*, *in*, *ni*, have probably all arisen from Sanskrit masc. bases in *in*, fem., *inī*. Thus, e.g. *मलिन mālīn*, 'a gardener's wife', from *mālī*, (Sk. *mālin*, nom. sing., *mālī*), is for *mālinī*; *धोबि dhobi*, 'a washerman', masc., *dhobī*, for a form, *dhāvīnī*; *सुनारिन sunārīn* or *सुनारनी sunārānī*, 'a goldsmith's wife', points to a Sk. masc. base, *svaṛṇakāris*, (fem. *svaṛṇakāriṇī*), for the more common *svaṛṇakāra*.

DECLENSION OF NOUNS.

128. Declension respects those modifications of the noun by which are expressed the relations of number and case.

a. Hindī, in common with all the Indo-Aryan languages, has lost the dual, and only recognizes a singular and plural. If, very rarely, we meet a Sanskrit dual form, as, e.g., *पितौ pitrau*, 'parents', from *पितृ*, 'father', such forms have no organic connection with the language.

129. The distinctions of number and case are marked, in part, and in a limited and imperfect degree, by certain inflectional changes; and in part, and more precisely, by the addition of certain particles to the base. Practically, Hindí has but one declension, from which certain classes of nouns exhibit slight variations, to be noted below. The following four rules cover all the inflectional changes to which substantives are subject in the standard dialect.

(1) Most Tadbhava masc. nouns in आ *á*, inflect the final vowel to ए *e*, and those in आ *án*, to ऐ *en* or ए *e*, throughout the oblique singular; all other nouns, masc. or fem., are uninflected in the singular. Examples of inflected nouns are the following: कुत्ता *kuttá*, 'a dog', obl. sing., कुत्ते *kutte*; घोड़ा *ghorá*, 'a horse', obl. sing., घोड़े *ghore*; ताँबा *tánbá*, 'copper', obl. sing., ताँबे *tánbe*; बनियाँ *baniyán*, 'a shopkeeper', obl. sing., बनिये *baniyen* or बनिये *baniye*; धूँआँ *dhúán*, 'smoke', obl. sing., धूँए *dhúen*. Examples of uninflected nouns are माली *máli*, 'a gardener', घर *ghar*, 'a house', लड़की *laríki*, 'a girl', माता *mátá*, 'a mother', बिरियाँ *biriyán*, 'time', रात *rát*, 'night', etc., all which, as to form, may be either in the nom. or obl. sing. Similarly all Tatsama masc. nouns in आ *á*, as राजा *rájá*, 'a king'; आत्मा *átmá*, 'spirit', पिता *pitá*, 'father', etc., retain the same form unchanged throughout the singular.

Exc. The following Tadbhava masc. nouns remain unchanged in the sing., viz.: काका *káká*, 'a paternal uncle', चाचा *chachá*, 'a maternal uncle', लाला *lálá*, 'a school-master', 'a title of respect', and a few other nouns expressive of relationship.

a. A few Persian nouns, ending in the obscure *o h*, follow the analogy of inflected Tadbhavas and make the obl. sing. in ए *e*, as, e.g., बन्दे *bandah*, 'a servant', obl. sing., बन्दे *bande*.

b. Occasionally the voc. sing., even of inflected Tadbhava masc. nouns, remains uninflected. Thus, 'son!', is either बेटे *beté*, or बेटा *betá*.

c. It is difficult to give any rule or rules, by which the beginner,

unacquainted with Sanskrit, may be able infallibly to distinguish Tadbhava masc. nouns in ञा, from Tatsama nouns having the same termination. It will however be of service to observe, that

1st, All nouns of agency and relationship in ता, and

2nd, All abstract nouns in ञा, including especially a large number of common fem. nouns in ता, and a few in ना (ञा), are pure Sanskrit and are never inflected.

On the contrary, most common concrete terms in ञा are Tadbhava and maec., and are inflected as above to ए throughout the obl. sing. For example, the following, viz. : दाता *dātā*, 'a giver', कोमलता *komaltā*, 'softness', इच्छा *ichchhā*, 'desire', तृष्णा *trishnā*, 'thirst', are thus indicated as Tatsama nouns and uninflected. But, on the contrary, the concrete terms, घड़ा *gharā*, 'a earthen jar', लड़का *larṅkā*, 'a boy', घुटना *ghuṭnā*, 'the knee', are Tadbhavas, and are inflected to ए in the obl. sing.

(2) All such masc. nouns as are inflected by the above rule to ए *e* or ए *en* in the obl. sing., retain the same inflection in the nom. plur. In all other masculine nouns the nom. sing. and plur. are alike. Thus लड़का *larṅkā*, 'a boy', obl. sing., लड़के *larṅke*, makes its nom. plur. also लड़के *larṅke*, 'boys'; गढ़ा *garhā*, 'a ditch', obl. sing., गढ़े *garhe*, nom. plur., गढ़े *garhe*, 'ditches'. रुपिया *rupiyā*, 'a rupee', makes the obl. sing. and nom. plur., रुपये *rupaye*, or रुपए *rupae*. On the other hand, घर *ghar*, 'a house', योद्धा *yoddhā*, 'a warrior', भाई *bhāī*, 'a brother', have in the nom. plur., also, घर *ghar*, 'houses', योद्धा *yoddhā*, 'warriors', भाई *bhāī*, 'brothers'.

a. Although, thus, in many nouns the number is not apparent from the termination, yet practically this will be found to occasion no ambiguity. As in the use of such English words as 'deer', 'sheep', etc., the number is generally quite evident from the context.

(3) All fem. nouns in इ *i*, ई *ī*, उ *u*, ऊ *ū*, make the nom. plur. in ञा *ān*; all other fem. nouns, in ए *en*.

a. Observe, that fem. nouns in ञा *ā*, occasionally, and those in इ *i*, or ई *ī*, always, insert a euphonic य *y* before all such added terminations, ई *ī* final before य being regularly

shortened. Examples are लड़की *lar'kí*, 'a girl', nom. plur., लड़कियाँ *lar'kiyáñ*; विधि *vidhi*, 'a divine law', nom. plur., विधियाँ *vidhiyáñ*; वस्तु *bastu*, 'a thing', nom. plur., वस्तुयाँ *bastuáñ*; जोर *jurú*, 'a wife', nom. plur., जोरियाँ *juruyáñ*. But बात *bát*, 'a word', भेड़ *bher*, 'a sheep', make the nom. plur., बातें *báten*, भेड़ें *bheren*.

a. ऋचा *richá*, 'a sacred ode', and घटा *ghatá*, 'a heavy cloud', make the nom. plur. either ऋचारें *richáen*, घटारें *ghatáen*, or ऋचार्ये *richáyen*, घटार्ये *ghatáyen*.

b. व *v* is rarely inserted as the euphonic letter instead of य *y*; chiefly after a labial vowel, as in भौवें *bhauven*, 'eyebrows', nom. plur. of भौ *bhaun*; and in one instance, after र *r*, as in पुतलियाँ *putliyáñ*, for पुतलियाँ *putliyáñ*, 'dolls', 'puppets', from पुतली *puthí*.

c. A number of fem. nouns in र्या *iyá*, chiefly diminutives, form the plur. by the addition of *Anusvár* only; as टिलिया *tiliyá*, 'a young hen', nom. plur., टिलियाँ *tiliyáñ*; डिलिया *ḍibiyá*, 'a small box', nom. plur., डिलियाँ *ḍibiyáñ*; चिरिया *chiriyá*, 'a bird', nom. plur., चिरियाँ *chiriyáñ*. Similarly, विधवा *vidhvá*, 'a widow', makes the nom. plur., विधवाँ *vidhváñ*.

d. गार *gáe* or गाओ *gáo*, 'a cow', and रोम *rom*, 'fine hair', 'down', both reject the final letter before the plur. terminations; as in the nom. plur., गारें *gáen*, रोरें *roen*.

e. The numerals, when used collectively, either as substantives or adjectives, make the nom. plur. in ओँ; otherwise, the nom. plur. remains unchanged, as चारों *cháron*, nom. plur., 'the four', or चारों घोड़े *cháron ghore*, 'the four horses'; but चार घोड़े *chár ghore*, 'four horses'.

(4) All nouns whatever, masc. and fem., terminate in ओँ throughout the oblique plural; *Anusvár* being dropped in the vocative only.

a. In the case of nouns inflected to र *e* in the obl. sing., this termination ओँ *on* is substituted for the final vowel. If the noun end in र *r* or र *i*, the vowel, if long, is shortened, and a euphonic य *y* is inserted before the termination. A final long ऊ *ú* is shortened. In all other cases the termination is simply added to the nom. sing.

Examples are, of nouns inflected to **र** in the sing., घोड़ा *ghorá*, 'a horse', obl. plur., घोड़ों *ghorón*, voc. plur., घोड़े *ghoró*; कुत्ता *kuttá*, 'a dog', obl. plur., कुत्तों *kutton*, voc. plur., कुत्तो *kutto*: of nouns in **ई** and **ए**, बिल्ली *billí*, 'a cat', obl. plur., बिल्लियों *billiyon*, voc. plur., बिल्लियो; धोबी *dhobí*, 'a washerman', obl. plur., धोबियों *dhobiyon*; विधि *vidhi*, 'a law', obl. plur., विधियों *vidhiyon*: of other nouns, पुस्तक *pustak*, 'a book', obl. plur., पुस्तकों *pustakon*; रात *rát*, 'night', obl. plur., रातों *rátón*; जोर *jurú*, 'a wife', obl. plur. जोरों *jurón*; पिता *pitá*, 'a father', obl. plur., पिताओं *pitáon*.

a. Occasionally we meet with the obl. plurals, देवतों *devton*, राजों *rájón*, आत्मों *átmon*, from देवता *devtá*, 'a deity', राजा *rájá*, 'a king', आत्मा *átmá*, 'the spirit'; but these forms are incorrect, and have not the sanction of good usage. They correctly follow the usage of all Tatsama nouns, and for the obl. plur. add the termination to the nom. sing., making देवताओं *devtáon*, राजाओं *rájáon*, आत्माओं *átmáon*.

b. The following nouns, viz., गाय *gáe*, 'a cow', रोम *rom*, 'down', गाँव *gáñw*, 'a village', नाँव *náñw*, 'a name', दाँव *dáñw*, 'a time', पाँव *pañw*, 'the foot', drop the final letter before the obl. plur. termination. In the last four the *Anusvár* before the final consonant is also often dropped, so that the obl. plur. of these nouns, becomes गाँवों *gáon*, रोवों *roon*, गाँवों *gáon*, नाँवों *náon*, दाँवों *dáon*, पाँवों *páon*.

130. In the Braj dialect, **रे** is rarely substituted for **र** in the obl. sing. of Tadbhava nouns in **आ**, as in मेरै for मेले; but more commonly the inflection remains as in High Hindí. A voc. sing. in **आ** from masc. nouns in **ई**, is occasionally found, as मालिआ, 'O gardener'; स्वामिआ, 'O Lord', from माला, स्वामी. In the nom. plur. of fem. nouns, **रें** is often substituted for **रं**, as in रातें for रातें, 'nights'. The nom. plur. of fem. nouns in **ई** is often formed by the addition of *Anusvár*, as in पोथीं, for पोथियाँ, 'books'; अलीं, for अलियाँ, 'friends'. An irregular masc. nom. plur., मरदानियाँ, 'a class of servants', is found in the *Prem Ságar*. In the obl. plur., **ओं** is occasionally *vridhdhied* to **ौं**, as in घरों for घरौं, 'houses'; but, more commonly, the obl. plur. is formed by the termination **न** or **नि**. A final long vowel is shortened before these letters, and **य** sometimes inserted after a final **र**.

Examples are, पापी, 'a sinner', obl. plur., पापिन, पापिनि, or पापियन; नारी, 'a woman', obl. plur., नारिन or नारियन; पेड़, 'a tree', obl. plur., पेड़न; पाद, 'a foot', obl. plur., पादन.*

131. In the dialect of the *Rāmāyan*, as in many modern eastern dialects, a final long vowel in nouns is regularly shortened throughout. Thus, for ब्रूहा, 'a bridegroom', we have ब्रूह; for छट्टा, 'an earthen jar', छट; for नारी, 'a woman', नारि, etc., etc.

a. All nouns whatever, in this dialect, are declined in precisely the same way. The class of (High Hindī) Tadbhava substantives in ञा does not exist, and all nouns are unchanged in the sing., except that for the acc. or dat., the termination हि or हिं is often added to the uninflected base; thus, रामहि or रामहिं, 'Rām', or 'to Rām', मुनिहि or मुनिहिं, 'the sage', or 'to the sage'. In the following, this form is apparently used as an abl.; गुरुहि पूज, करि कुलविधि राजा, 'the king, having made inquiry of his Guru and performed the family rites'. Occasionally, at the end of a line, in old Hindī poetry, we find the termination स्, commonly represented by *Anusvár*. It may be added (1) to a nom. sing.; as, आज्ञान संशये, 'to-day there is no doubt', in which case it is to be regarded as a neuter termination; or (2) to an acc. sing., as समेत सुग्रीवे, 'together with Sugrīv'. The voc. sing. is regularly like the nom.

b. The nom. plur. of all nouns, masc. and fem., is like the nom. sing.; the obl. plur. is formed by adding न, न्ह or न्हि, to the nom. sing.; as, from मुनि, 'a sage', obl. plur., मुनिन्ह; सुर, 'a god'; obl. plur., सुरन्हि; नारि, 'a woman', obl. plur., नारिन. In some instances, अन्ह is added after a vowel-termination, the euphonic ष being characteristically omitted; as in कौतुकिअन्ह, dat., 'to the eager', from कौतुकि.

c. In a single instance, we find in the *Rāmāyan* a fem. nom. plur. in ऐ, viz., भौहिं, 'eyebrows',† from भौ. इ is here to be regarded as merely euphonic, in place of the more common ष or ष. Also we have a single instance of a masc. nom. plur. in ञा, in ब्रह्मनियां, 'musicians'.‡

d. The following Sanskrit case-forms occur, viz.; masc. instr. sing., सरेण, 'with an arrow'; also सुखेन, used adverbially, 'joyfully'; neut. acc.

* For the rejection of स्, Vid. § 130, (4) b.

† माखे लखन कुटिल भई भौहिं, 'angry grew Lakshman, knitted were his eyebrows'.

‡ सेवक सकल ब्रह्मनियां जाना । पूरन किये दान सनमाना, 'the servants all, and the different musicians, he loaded with gifts and honor'.

sing., ब्रह्म, 'Brahma'; masc. abl. sing., पदात्, 'from (their) rank'; neut. loc. sing., मनसि, 'in the heart'; masc. nom. plur., नरा, 'men'; masc. voc. sing., राजन्, 'O king!'; fem. voc. sing., सीते, 'O Sítá!'.

e. In many instances, we find in the *Rámáyana* the termination ओ, added to substantives and words used substantively; as अघ्नो, अघ्नो, रक्षो, etc. This, however, is not a case-ending, but serves merely to emphasize the noun, and is therefore equivalent to the High Hindí emphatic particle, ही;* e.g., अघ्नो अघ्निर न अस कहति, 'even one blind or deaf would not speak thus'.

132. The Mārwarí, as also the other Rájputáná dialects, and the Kumáoní and Garhwáli, exhibits ओ, instead of आ, as the sign of the nom. sing. of all Tadbhava masc. nouns; which, again, is inflected in the obl. sing. to आ, instead of ए, in all the dialects in question. Thus, e.g., for the High Hindí, घोड़ा, 'a horse', we have घोड़े, obl. sing., घोड़ा. All other nouns agree with the High Hindí throughout the singular.

a. But the case of the agent, in Mārwarí nouns of this class, ends in रे, and to this form no postposition is affixed. Thus we have घोड़े=घोड़े ने. In all other nouns, the case of the agent sing., is like the nom. All Mārwarí nouns have also an inflected loc. sing. in रे, as, e.g., घरे, 'in the house', घोड़े, 'on the horse'.

b. The nom. plur. of all Mārwarí Tadbhava masc. nouns in ओ, ends in आ. Thus, from घोड़ा, 'a horse', we have the nom. plur., घोड़ा, 'horses'. Mewarí, Garhwáli, and Kumáoní all follow the same rule. Other Mārwarí masc. nouns are unchanged in the nom. plural. All Mārwarí fem. nouns make the nom. plur. in आँ; ई final, before this termination, is hardened to ए. Examples are, घोड़ी, 'a mare', nom. plur., घोड़ाँ; बात, 'a word', nom. plur., बातँ. The obl. plur. form of all Mārwarí nouns terminates in आँ. The above rules for Mārwarí declension apply to all the Rájputáná dialects.

133. The peculiarities of the remaining dialects will be sufficiently clear from the tables of declension. As they have no literature, it is unnecessary to enter into further detail.

134. In strict truth, the rules above given cover the whole subject of the declension of nouns. And it is to be noted, that to a

* This form has apparently arisen from the Braj form, हु, of this particle, by the elision of h, and sandhi of the then concurrent vowels, so that, e.g., ekau is for ekahú.

very limited extent in High Hindî, more freely in Braj poetry and almost constantly in all archaic Hindî, the oblique form of the noun may of itself, without the aid of any additional word, express any of the relations denoted by the seven oblique cases of the Sanskrit. But inasmuch as this scanty declensional system, almost denuded of the ancient Sanskrit case-endings, was found inadequate to express without ambiguity the various relations of the noun in a sentence, certain particles are in the modern dialects regularly appended to the oblique form of the noun. These particles are, most of them, similar to prepositions in English, but as they invariably follow the noun, are accurately termed *postpositions*.

135. Although the relation of the noun to these postpositions is certainly less intimate than that of the Latin or Sanskrit case-terminations to the stem, still, reasons of practical convenience have led most grammarians to arrange the declension of the noun after the Sanskrit model in eight cases, as follows; Nominative, Accusative, Dative, Agent, Ablative, Genitive, Locative, and Vocative.

a. What we have termed the case of the Agent, has usually been called, after the terminology of Sanskrit grammars, the Instrumental case. But as, in Hindî, this case never denotes the instrument, but the agent only, it seems better to drop a term which can only mislead.

136. The following table exhibits the postpositions, as they are usually assigned to express the functions of the several cases.

TABLE I:

	<i>High Hindî.</i>	<i>Kanaujî.</i>	<i>Braj.</i>	<i>Mârwarî.</i>	<i>Mewârî.</i>
Acc. Dat.	को, तर्ह.	को.	कोँ.	को.	को.

गो, गा, etc. † Also, in Chand, मंइ, मंइं, मइ, मइं, मइि and मइय.

137. Besides the postpositions enumerated in the table, the following may be noted. **को**, in the acc. sing., is found occasionally in eastern Hindí; it is evidently identical with the termination of the accusative in Bangáli. **से** and **सन** are sometimes found for the abl. postposition **से**. **से** is sometimes colloquially added to **से** in the Doáb, thus, **से से**; it emphasizes the idea of 'source', 'beginning'; thus, **पहाड़ से से नदी तक**, 'quite from the mountain to the river'. **दा**, (**दे**, **दी**,) is the genitive sign in Panjábí; it is, however, occasionally found in books written in western Hindí, as also **नू** (Panj.), acc., for **को**.

138. The postposition **को** may be expressed by the English preposition 'to', when indicating the dative case. When it is the sign of the accusative, it is incapable of any separate translation, but gives a certain definiteness to the noun with which it is connected. It may be here remarked that the accusative appears in Hindí under two forms, the one being identical with the nominative, the other consisting of the noun, inflected where possible, with the addition of the postposition **को**. As the sign of the accusative after verbs of motion, **को** must be translated by 'to', as **घर को चलो**, 'go to the house'. **तर्हे** is used, in the standard dialect, only with the reflexive pronoun **आप**, in the form, **आपने तर्हे**. It is exactly equivalent to **को** as the sign of the direct object of a verb. Strictly speaking, **ने** is the Engl., 'by', but in rendering into English idiom, it will be found necessary to translate the case of the agent precisely as the nominative. The full explanation of the use of this case is necessarily deferred to the chapter on verbs. The abl. postposition, **से**, is sometimes to be translated 'from' or 'by', and sometimes, 'with'.

139. The gen. postposition, **का** *ká*, is, accurately speaking, an adjective particle, equivalent to such English phrases as 'pertaining to', 'belonging to', etc. The noun, by the addition of this particle, is in reality converted into a possessive adjective;* which, as will hereafter appear, follows the

* The following remarks by Prof. Lassen, well illustrate this point. He speaks of the corresponding Maráthí gen. in *chá*, but his remarks apply equally to the Hindí: 'Mahratthi nimirum non dicunt, 'patris equum', 'oppidi cives', sed 'paternum equum', 'oppidanos cives'. Adjectivum autem quum sit, facile apparet cur terminatio pro vario regiminis genere varietur'.

regular rules for the inflection of adjectives, and is made to agree with the noun it defines in gender, number and case.

140. The following rules regulate the use of the three forms of the genitive postposition.

(1) का *ká* is used before all masc. nouns in the nom. sing., or in that form of the acc. which is the same as the nom. sing.

(2) के *ke* is used before all masc. nouns when in any case but the nom. sing. The only exception has been stated under rule (1).

(3) की *kí* is used before all fem. nouns in any case whatever, singular or plural. The following examples will make the matter clear. Thus we say;—

धोबी का बेटा *dhobí ká betá*, 'the washerman's son'.

माली के बेटे *má lí ke bete*, 'the gardener's sons'.

बढ़र के लड़के पर *barhá í ke larke par*, 'on the carpenter's child'.

राजा के गाँवों में *rájá ke gáon men*, 'in the king's villages'.

पंडितों का घर *pañḍiton ká ghar*, 'the house of the pundits'.

ब्राह्मण की पोथी *bráhmaṇ kí pothí*, 'the Bráhmaṇ's book'.

राजा की आज्ञा पर *rájá kí ágyá par*, 'on the king's command'.

ईश्वर की बातें *ishvar kí baten*, 'the words of God'.

पहाड़ों की चोटियों पर *paháron kí choṭion par*, 'on the peaks of the mountains'.

N.B. The student will carefully observe that the gender or number of the noun to which the gen. particle is attached, has nothing whatever to do with the inflection of the particle. It is determined solely by the gender, number and case of the *following* noun.

141. Of the various postpositions commonly assigned to the loc. case, में is the English 'in'; पर is 'on'; तक and तक तक alike denote the limit to which, 'up to', 'as far as'.

a. It should be observed, that, in fact, the locative, like the accusative, has two forms, the one consisting of the oblique form of the noun, singular or plural, with one of the locative postpositions attached; and the other form consisting of such oblique form only,

the postpositions being omitted. In the case of uninflected sing. nouns, the latter form will of course be identical with the nom. sing. Thus we may say, उस समय में, or उस समय, 'at that time'; नगर के बीच, or नगर के बीच में, 'in the middle of the city'.

b. That this is a true locative case, is plain from the fact that the *d* final of the gen. postpositions and of adjectives, is always inflected to *e* before the form in question, even when it is similar to the nom. sing. Nor is it correct to regard the postposition as in this case arbitrarily omitted. In reality, we have here simply a trace of the ancient inflectional system of declension. The inflectional ending has, indeed, in the majority of nouns, entirely disappeared, leaving the noun, if singular, in form like the nominative, but the real character of the word is discernible from its power to occasion the inflection of any attributive adjunct.

142. The remarks made above as to the meaning and use of the postpositions, apply, for the most part, equally to the corresponding dialectic postpositions. The obl. postposition, से, or तै, used in the Braj and other dialects, must always be translated 'from' or 'by', never, 'with'. The Braj form, पै, is almost always rendered 'on', but rarely is used in the sense of 'by', where, in High Hindí, we would have से.* लौं or लों are exactly equivalent to तक.

143. The gen. postposition appears in the *Rámáyan* under three different forms, viz., केर or केरा, obl. masc., केरे, fem., केरि; † कर, inflected, before fem. nouns only, to करि; क, to which we may assign the fem. inflected form, कै. As these are apt to confuse the beginner, we give the following examples of the use of each form : प्रभु कह गरल बंधु खिसि केरा, 'the Lord said, It is the poison of the moon, brother'; मिटे न जीवन्ह केर कलेसा, 'the pain of the creatures is not removed'; परहितहानि लाभ बिन्ह केरे, 'whose gain is the injury of others' well-being'; सीता केरि करहु रखवारी, 'guard Sítá', or 'keep a watch of Sítá'; प्रधान भक्ति संतन कर संगी, 'the first (form of) devotion is association with the good.' कर is also used before masc. nouns in an oblique case; हम काहु कर मरहिं न मारे, 'I may not be killed by any one', *lit.*, 'die, killed by any one'; आकरि तैं दासी से अबिनासी, 'that immortal One, whose handmaid thou art'; नीकी तुलसी क, 'the welfare of Tulsí'; उमा संत के रहइ बड़ाई, 'Umá, this is the greatness of the good'. Besides these the regular inflections, के and की, are also found in the *Rámáyan*; so also, rarely, the Kanaují gen. sign, को, and the Braj, कौ. The numerous

* Vid. Syntax. † Also, *metri gratiá*, केरी.

forms of the loc. postposition scarcely require illustration, as they are not likely to be confounded with other words. The Sanskrit प्रयत्न, often corrupted to प्रजंत, in the sense of तक, 'up to', is rarely met; an example is योजन एक प्रजंत, 'for as far as a yojan'.

144. The Mārwarī forms call for little remark. The gen. postpositions, रे, रा, रो, correspond in usage respectively to का, को, की, in the standard dialect; with the single exception, that when the gen. denotes possession or duty, रे is used before masc. nouns in the obl. sing., instead of रा. The same remarks apply to the use of को, का, की, etc., in Mewarī. Examples are, बठोठ रे सिरदार डूंग जी है, 'the ruler of Bathoṭh is Dūng Jī'; ऊ ब्राह्मण रे घर गीयो, 'he went to the Brahman's house'; दश हजार रो रोकड़, 'ten thousand of treasure'. कुं. for को, (=का.) is occasionally found, as देवन कुं देव, 'the god of gods'. The gen. postpositions, तबो and हंदो (=का.) so far as we are aware, are used only in poetry. Examples are, धूवां हंदी जाक = धूरं का जहाज, 'a steamer'; दिल्ली तबो नवाब, 'the Nawáb of Delhi'. तनो (for तबो) occurs, in one instance only, in the *Prem Ságar*, with the 2nd pers. pron., तुम-तनो, 'your', for तुम्हारा. मांहि, often मांहि, (=में,) 'in', in Mār. is regularly used as a postposition, as धूल पगड़ी मांहि, 'dust on the turban'; but it more rarely occurs in its primitive sense as a substantive, in construction with a preceding genitive, as मुलक को मांहि, 'in the country', for मुलक मांहि = मुल्ल में; कैद रे मांहि, 'in captivity', = कैद में. The same usage with the dialectic equivalents of में occasionally occurs in the *Rámáyan* and other archaic Hindi poetry. In the colloquial, सूधी is often treated as a predicative adjective, and is then made to agree with the subject of the sentence in gender and number. Thus they say, बाब्यो गाम सूधी गयो, 'the shopkeeper went as far as the village'; घोबिन ताल सूधी गयो, 'the washerwoman went as far as the lake'. The following sentences illustrate the remaining Mār. postpositions: डूंगर सिंगने एकड़ लेगयो, 'he has seized and carried off Dūngar Sing'; चढि किला ऊपरै, 'having climbed upon the fort'. ऊपरै is sometimes construed with the genitive, like मांहि, as घोड़ा को ऊपरै, 'on the horse'. सूं is used like से, as अनग्रह सूं करी लड़ाई, 'he fought with the English'.

145. In western Hindí, I have met an acc. and dat. postposition ना, =को. It is evidently connected with the corresponding Mār. नै, Panj. नूं. दा as the gen. postposition, is the regular substitute for का in Panjábí; it is found very rarely in western Hindí. करके, though

really a participle from करना, 'to do', or 'make', is colloquially used as a postposition with the inflected forms of both nouns and pronouns, throughout the Ganges valley. It is equivalent to से in the sense of 'from' or 'by'; it is never to be rendered 'with'. Thus we may say, पाप करके रहित, 'free from sin', for पाप से रहित or पाप रहित. But in the following from the *Rámáyan*, it is equivalent to में, 'in'; सर सम लगे मातृ सर करके, 'fastened like arrows in (his) mother's breast'. तोड़ी very rarely occurs as a dialectic substitute for तक.

146. The word लोग *log*, Sk. and Garh., लोक, is appended to plural nouns when it is intended to denote the plural as a class. The plural inflection is then added, not to the noun itself, but to the appended लोग. In the case of inflected Tadbhavas in आ, the noun is inflected to ए before the word लोग, whether in the nom. or obl. plur. In all other cases, the noun in connection with लोग remains uninflected.

Examples are, nom. plur., राजा लोग *rájá log*, 'kings', as a class; धोबी लोगों में *dhobí logon men*, 'among washermen'; कवि लोगों को *kavi logon ko*, 'to poets'. Thus, such a phrase as 'ten kings came', we must translate, दस राजा आए *das rájá áe*, as there is no reference to kings as a class; but the phrase, 'kings are wealthy', as referring to the class, 'kings', must be translated, राजा लोग धनी होते हैं *rájá log dhaní hote hain*.

a. This usage of the word लोग is properly confined to nouns denoting persons, though it is occasionally used, perhaps jocosely, in reference to animals, by the common people, who might say, e.g., बंदर लोग *bandar log*, much as we would say, 'the monkey folk'. It has indeed been strenuously denied that लोग is ever used except in reference to persons, but the word occurs with मृग in the following phrase from the *Rámáyan*; मृग लोग सरेन हिय, 'they killed deer with the arrow'.

b. The word लोग is often used alone where in English we have 'they', in the sense of 'people, in general'; as लोग कहते हैं, 'they say', = French, 'on dit'. लोग has also a feminine form, लुगारू, 'woman', but this is never appended as a sign of plurality to other nouns.

c. Besides लोग, the word गज, 'host', is also occasionally added to nouns to denote plurality, but its use in prose is rare, and is restricted

to a few nouns, as, *e.g.*, देवता गण, 'the gods', तारा गण, 'the stars', etc. The word सब, 'all', is also colloquially added as a sign of plurality, instead of लोग, in some eastern dialects.

147. In poetry, besides गण, many other words also are appended to nouns as indicative of plurality or multitude. The most common are the following, *viz.* : वृंद, as भूधर वृंद, 'mountains'; जन, as भक्त जन, 'worshippers'; निकर, as रविकर निकर, 'sunbeams'; संकुल, as जंतु संकुल, 'animals'; ज्ञात, as ऋषि ज्ञात, 'sages'; समूह, as पाप समूह, 'sins', *i.e.*, 'the whole of my sins'; समाज, as संत समाज, 'the good', *i.e.*, 'the assemblage of the good'; बन्ध, as भट बन्ध, 'warriors'; समुदाई, as वटु समुदाई, 'young Brahmins'; ठात, as कपि ठात, 'the monkeys'; षोच, as षाच षोच, 'sins'. The word आवली is added to a few nouns to denote order in a line; as रोमावली, 'the line of hair along the breast bone'; बलकावली, 'a flock of cranes', as always flying in a line. Two nouns of plurality are occasionally appended to a word, as निसंखर निकर बन्ध, 'a multitude of demons'.

a. In many cases the noun of plurality may be translated, 'assemblage', 'multitude', 'flock', etc., but very often it will be found that English idiom will only admit the translation of the noun as a simple plural. The above words are by no means all equivalent to लोग, nor are they all used interchangeably among themselves.

148. As Hindí has no article, the distinction indicated in English by the definite and indefinite article, cannot always be expressed in Hindí. घोड़ा may be either 'a horse' or 'the horse'; स्त्रियाँ may be 'women' or 'the women'. The indefinite article may be sometimes rendered by the numeral एक, 'one', or the indefinite pronoun, कोई, 'some', 'any'; but it is oftener incapable of translation. The definite article, occasionally, when strongly demonstrative, may be expressed by the remote demonstrative pronoun, वह. In the case of nouns in the accusative, the force of the definite article may be often expressed by the use of the form with को, as घोड़े को, which may mean, 'the horse'. But the student must not therefore understand that the acc. with को is always to be rendered with the definite article.

149. In exhibiting the declension of nouns according to the foregoing rules, it will be convenient to classify them according to gender in two declensions, each of which has two varieties.

The first declension will comprise all masculines. Of this declension the first variety will include all Tadbhava* nouns in **घा** or **घाँ** which are inflected in the obl. sing. to **र** or **रे**, and the second variety, all other masculine nouns. Nouns of the first variety are declined like

घोड़ा *ghorá*, 'a horse'.

SINGULAR.	PLURAL.
N. घोड़ा <i>ghorá</i> , 'a horse'.	N. घोड़े <i>ghore</i> , 'horses'.
Ac. घोड़ा <i>ghorá</i> or घोड़े को <i>ghore ko</i> , 'a horse', or 'to a horse'.	Ac. घोड़े <i>ghore</i> or घोड़ों को <i>ghorōṅ ko</i> , 'horses' or 'to horses'.
D. घोड़े को <i>ghore ko</i> , 'to a horse'.	D. घोड़ों को <i>ghorōṅ ko</i> , 'to horses'.
Ag. घोड़े ने <i>ghore ne</i> , 'by a horse'.	Ag. घोड़ों ने <i>ghorōṅ ne</i> , 'by horses'.
Ab. घोड़े से <i>ghore se</i> , 'from a horse'.	Ab. घोड़ों से <i>ghorōṅ se</i> , 'from horses'.
G. घोड़े का (के or की) <i>ghore ká (ke or kí)</i> , 'of a horse', 'horse's'.	G. घोड़ों का (के or की) <i>ghorōṅ ká (ke or kí)</i> , 'horses' or 'of horses'.
L. घोड़े में, पर, तक, तलक, <i>ghore men, par, tak, talak</i> , etc., 'in, on, to a horse'.	L. घोड़ों में, पर, तक, तलक <i>ghorōṅ men, par, tak, talak</i> , etc., 'in, on, to horses'.
V. हे घोड़े <i>he ghore</i> , 'O horse'.	V. हे घोड़ो <i>he ghoro</i> , 'O horses'.

a. The second variety of masculine declension includes all other masculine nouns of whatever termination, and may be represented by **घर** *ghar*, 'a house'. It differs from the above, only in that the inflection of the noun is confined to the oblique plural. As the postpositions are the same with all nouns, it will be unnecessary to give the remaining paradigms in detail. It will be remembered that the second form of the loc. is like the nom.

घर *ghar*, 'a house'.

SINGULAR.	PLURAL.
N. घर <i>ghar</i> , 'a house'.	N. घर <i>ghar</i> , 'houses'.
Ac. घर <i>ghar</i> or घर को <i>ghar ko</i> , 'a house' or 'to a house'.	Ac. घर <i>ghar</i> or घरों को <i>gharōṅ ko</i> , 'houses' or 'to the houses'.

* Vid. § 60.

So also is declined the Tatsama noun,

राजा *rájá*, 'a king'.

SINGULAR.

PLURAL.

N. राजा *rájá*, 'the king'.

N. राजा *rájá*, 'kings'.

Ac. राजा *rájá* or राजा को *rájá ko*,
'the king'.

Ac. राजा *rájá* or राजाओं को *rájáon ko*,
'the kings'.

So also decline masc. nouns ending in any other vowel, as the following :

माली *máli*, 'a gardener'.

SINGULAR.

PLURAL.

N. माली *máli*, 'a gardener'.

N. माली *máli*, 'gardeners'.

Ac. माली *máli* or माली को *máli ko*,
'a gardener'.

Ac. माली *máli* or मालियों को *máliyon ko*,
'gardeners'.

बिच्छू *bichchhú*, 'a scorpion'.

SINGULAR.

PLURAL.

N. बिच्छू *bichchhú*, 'a scorpion'.

N. बिच्छू *bichchhú*, 'scorpions'.

Ac. बिच्छू *bichchhú* or बिच्छू को *bichchhú ko*,
'a scorpion'.

Ac. बिच्छू *bichchhú* or बिच्छूओं को *bichchhuon ko*,
'scorpions'.

150. The second declension comprises all feminine nouns. The first variety includes all feminines in इ *i*, ई *í*, उ *u* or ऊ *ú*; the second variety, all other feminines.

As an example of the first variety, we may take

पोथी *pothí*, 'a book'.

SINGULAR.

PLURAL.

N. पोथी *pothí*, 'a book'.

N. पोथियाँ *pothiyán*, 'books'.

Ac. पोथी *pothí* or पोथी को *pothí ko*,
'a book'.

Ac. पोथियाँ *pothiyán* or पोथियों को *pothiyon ko*,
'books'.

Like पोथी is declined

आंसू *ánsú*, 'a tear'.

SINGULAR.

PLURAL.

N. आंसू *ánsú*, 'a tear'.

N. आंसुआँ *ánsuán*, 'tears'.

Ac. आंसू *ánsú* or आंसू को *ánsú ko*,
'a tear'.

Ac. आंसुआँ *ánsuán* or आंसुओं को *ánsuon ko*,
'tears'.

a. The second variety of fem. declension may be illustrated by the word

रात *rát*, 'night'.

SINGULAR.	PLURAL.
N. रात <i>rát</i> , 'night'.	N. रातें <i>rátēn</i> , 'nights'.
Ac. रात <i>rát</i> or रात को <i>rát ko</i> , 'night'.	Ac. रातें <i>rátēn</i> or रातों को <i>rátōn ko</i> , 'nights'.

As an example of fem. nouns in मा we take

माता *mátá*, 'a mother'.

SINGULAR.	PLURAL. ['mothers'.
N. माता <i>mátá</i> , 'a mother'.	N. माताएँ <i>mátāēn</i> or माता <i>mátá</i> , *
Ac. माता <i>mátá</i> or माता को <i>mátá ko</i> , 'a mother'.	Ac. माताएँ <i>mátāēn</i> or माताओं को <i>mátāōn ko</i> , 'mothers'.

151. The following tables present the chief forms of dialectic declension. It will be noticed that the case of the Agent is wanting in the modern eastern dialects given, *vis.*, the Avadhí, Riwáí and Bhojpurí. The peculiar construction with ने, elsewhere referred to, is distinctively a western idiom, and is not found in the local speech much east of Cawnpore. In the column representing the Old Púrbí of the *Rámáyan*, the word छट, (for the regular form, छड़ा, 'an earthen jar',) is taken as a representative of the declension instead of छोड़ा, which, though universally employed in the modern dialects, does not occur in the *Rámáyan*.

152. It is to be observed that not only in the old Púrbí, as indicated in the tables, but in most Hindí poetry, the postpositions, though sometimes used, are as often omitted, and the oblique form of the noun, if there be such, or if not, the nom. form, may represent any one of the cases. The same peculiarity appears, though to a much more limited extent, in some Braj prose. This omission of the postpositions is not to be regarded as mere poetic license. The classic poetry, which is still held as the model for poetical composition, presents the language at a much earlier stage than the modern Hindí. Tulsí Dás, whose *Rámáyan* is held as the standard of poetical excellence, wrote in the latter half of the 16th century. Kabír, whose writings are also highly esteemed, wrote over a hundred years before Tulsí Dás. In this old Hindí poetry we see the Prákrit speech just at, or rather just past, a transition

* The more common form.

period. In its last stage of decay the ancient case-terminations had been almost all lost, so that one form, very often the ancient genitive, had to express all the various relations formerly distributed among six cases. It was out of this state of things that the modern system of declension by postpositions, not all at once, but gradually arose, as it was felt to be demanded by the utterly decayed state of the language. The ancient Hindí poetry exhibits the language just at the beginning of this period of grammatical reform. Postpositions are indeed used, but sparingly as compared with modern Hindí prose, and the Prákrit system of declension still largely prevails. But this ancient declension, so abraded and worn out as scarcely to deserve the name, is accurately represented not by eight, but by two, or, if we count a vocative which now and then appears, three cases only. The recognition of this is essential to the grammatical understanding of ancient Hindí verse.

153. As the various forms of declension, except the first, agree in all cases but the nom. plur., we give only one paradigm in full. The dialectic declension of nouns belonging to the second variety of High Hindí declension, differs from that of other masc. nouns, only in the omission of the inflection in the obl. sing. and nom. plur., as in the standard dialect. It is therefore unnecessary to give any separate paradigm of nouns of this class. The few forms in brackets are supplied from analogy.

TABLE II :
घोड़ा, 'a horse';

		High Hindi.	Kanaji.	Braj.	Mārvāḍī.	Mewārī.

घोड़ौ ते.	घोड़ा है, etc.	{घटन्हि, घटन. घटन्ह,	घोड़वन से.	घ्याड़न ते.	घोर सब } से. से.
घोड़ौ को.	घोड़ा को.	{घटन्हि, घटन. घटन्ह,	घोड़वन कर.	घ्याड़न कर.	घोर सब क.
घोड़ौ मा.	घोड़ा } मा. पर.	{घटन्हि, घटन. घटन्ह,	घोड़वन } मा. म.	घ्याड़न म.	घोर सब } में. परि.
(घोड़ा).	(घोड़ा).	(घटन).	घोड़वन.	घ्याड़ै.	घोर सब.

omitted, yet they are occasionally added to the base, as in the other dialects. *log* is also added to denote plurality; rarely the noun is inflected in the plural. Avadhí plural, *ghorèn* is also used.

TABLE III :

1st Variety ; नारी, 'a woman'.

* The inherent *a* of the ultimate is sounded; pronounce, *báta*. A special character is used in Gárhwalí to denote such a final *a*. † So in the only book I have seen; I should suppose, from the analogy of the contiguous Gárhwalí, that it would be pronounced *báta*.

Origin of the Declensional forms.

154. In all Tatsama nouns and many Tadbhavas, the distinctive termination of the Sanskrit nom. sing., has entirely disappeared in modern High Hindí. In archaic and poetic Hindí, as also in Naipálí and other Himalayan dialects, *u* final often remains in masc. nouns, where it represents the Prák. termination *o*, for the Sk. *aḥ*; as, *e.g.*, in *desu*, for Prák. *deso*, Sk. *deshah*, H. H. *desh*; and *láhu*, Prák. *láho*, Sk. *lábhaḥ*, H. H. *lábh*.*

a. Tadbhava masc. nouns in *á*, inflected to *e* in the sing., always represent Sanskrit or Prákrit nouns formed by adding the affix *ka* to bases in *u*. This added *k* was first rejected by § 78, and then the concurrent vowels were combined. Thus, *e.g.*, for the Sk. *ghaṭa*, we have a Prák. theme, *ghaṭaka*, nom. sing., *ghaṭakah*, whence, by §§ 78, 69, *c.*, *k* being rejected, and the final *aḥ* changed to *o*, we have a form *ghaṭao*, which by *Sandhi*, yields first a form in *au*, the common Braj termination; which, again, is softened to *o* in *ghaṭo*, as in most western dialects, and is finally reduced to *á* in the High Hindí form, *ghaṭá*. By a similar process, we obtain in succession from the Sk. *melakaḥ*, for *melaḥ*, the forms, *melao*, Mār. *melo*, H. H. *meld*.

b. Tadbhava nouns fem. in *é* commonly stand for Sanskrit or Prákrit nouns ending in the fem. affix *iká*, whence have arisen, successively, forms in *id* and *iyá*.† By a similar process are explained the Avadhí fem. nouns in *ívá*; as, *e.g.*, *nadívá*, (H. H. *nadá*) which presupposes a Prák. theme, *nadiká*. After the same analogy are derived fem. nouns in *ú*, as, *e.g.*, *bálú*, for Sk. *báluká*, whence, Prák. *báluá*, Av. *báluyá*, H. H. *bálú*. Similarly we explain a few Tadbhava masc. nouns in *é* and *ú*; as, *e.g.*, from Sk. *dhávikah*, H. H. *dhobí*, through intermediate forms, *dhávio*, *dhobiyá*, and also, H. H. *bichchú*, for a Prák. form, *vinchhuo*, for vulgar Sk. *vṛishchukah*, for *vṛishchikah*.

155. Except in the case of inflected Tadbhava masc. nouns in *á*, the Hindí has retained, in the sing., no trace of the old Sanskrit or Prákrit declensional system. In the case of these nouns in *á*, the original addition of the affix *ka*, has served so far to retard the process of phonetic decay, as to preserve in the obl. sing. termination *e*, the remainder of the Sk. gen. sing. Thus, *e.g.*, the gen. sing. of the Sk. *ghoṭakah*, has successively passed through the following changes, all of which are explicable by principles laid down in Chap III, *viz.*; Sk. gen. sing. *ghoṭakasya*, Prák. *ghoṭakassa*, *ghoṭaassa*, *ghoṭádha*, *ghoṭádá*, and, *y* being euphonicly inserted, *ghoṭaya*, whence H. H. obl. sing. *ghoṭe*. ‡ In the Mārṇwáí and some other dialects, *y* apparently was not inserted, so that

* Vid. §§ 63, 75, 75, *a.* In Bhagelkhandí, as represented in the Baptist translation of the N. T., Serampore, 1821, this *u* is added, from analogy, even to Arabic and Persian nouns, as, *e.g.*, *shaksu*, *shahrú*, for *shakhs*, *shahr*.

† Vid. §§ 77, *b.* (1), 127. ‡ Vid. §§ 77, 77 *b.*

from the *sandhi* of the concurrent vowels, *ad*, we have the obl. sing., *ghoṛá*. In such eastern forms as *ghoṛavá*, *v*, instead of *y*, has apparently been inserted in the place of the lost *k*.

b. I am inclined to think that the *hi* or *hiḥ* which we find in the obl. sing., in archaic Hindí, is to be identified with the same termination which occurs in the loc. sing. of certain Prákrit dialects, as, e.g., in *aggihiḥ*, for Sk. *agnes*, H. H. *ág meḥ*. It is thus to be derived, through the intermediate form, *mhiḥ*, from the Sk. loc. sing. term., *smiṇ*, which, although in Sanskrit found only in pronominal declension, in some forms of Prákrit is assumed by substantives also. I have indeed noted no example of the use of this termination in the objective construction of nouns in Prákrit; but as such instances do occur in the case of the pronouns, we are justified in assuming such an extension of the use of the loc. in the case of nouns also. The only other hypothesis of the origin of this termination, which would connect it with the Sk. gen. sing. term., *śya*, fails to account for the final *Anusvár*; nor, so far as I have observed, does the Hindí form in question ever occur, like the termination *e*, in a genitive construction with the postpositions.

156. The nom. plur. in *e*, of Tadbhava nouns in *a*, might possibly have arisen from the Sk. nom. sing. neut. term. *aní*, which was often assumed in Prákrit by masc. nouns.* On this supposition, we must refer the dialectic nom. plur. in *á* to the Sk. masc. nom. plur. term. *ás*. But, on the whole, I am inclined to prefer Dr. Hoernle's suggestion, that the inflected nom. plur. of the nouns in question is, in fact, identical with the obl. sing.; i. e., it is originally a gen. sing., so that we are to understand this as really an elliptical expression, leaving *log*, *vrind*, or some such noun of multitude to be supplied. This hypothesis explains both forms of the masc. nom. plur. inflection, as also such rare and now vulgar idioms as *kutte log*, etc. In the Bhagelkhandi N. T. we find the modern gen. plur. *tihágre*, of the 2nd personal pronoun, similarly assumed into the nom.

a. The fem. nom. plur. in *áḥ*, stands for the Prák. term. *á*, Sk. *ás*. Thus *makkhiyáḥ*, is for the Prák. *makkhiá*, Sk. *makkhiás*. The inserted *y* evidently marks the place of the lost *k*, all trace of which has disappeared from the sing.

b. The origin of the fem. nom. plur. in *eḥ*, is more obscure. It may possibly have arisen from the Sk. neut. nom. plur. term. in *áni*, which, according to Prof. Lassen, was sometimes assumed in Prákrit, even by fem. nouns. From the Prákrit form of this termination, *áiḥ*, *eḥ* and *aiḥ* might easily have arisen by contraction.† But this is not certain. The Gahwálí fem. nom. plur. in *a* is evidently derived immediately from the corresponding Prákrit termination, *á*.

* Vid. Lassen Inst. Ling. Prac. § 164, 17; 175, 7.

† Vid. Lassen Inst. Ling. Prac. § 95, 1.

157. The various forms of the obl. plur. in *on*, *auṣ*, *áṣ*, *an*, *ani*, are all to be explained as different corruptions of the Sanskrit gen. plur. termination in *ám*. In the forms in *on* and *auṣ*, the *m*, as often, has been, as it were, separated into its labial and nasal elements, whence the labial diphthong. The *n* which appears in various dialectic forms, is identical with the *n* which in Sanskrit was regularly inserted before the gen. plur. termination, after all bases ending in vowels. The final *i* in the Braj plur. is probably due to a weakening of a final *a*, so that, e.g., *putrani* is for *putrana*, for Sk. *putrándm* (Prák. *puḍḍṇaṣ*). Similarly, from *syár*, Prák. *sidlo*, Sk. *shṛigálah*, we have the gen. plur. forms, Prák. *siáldṇaṣ*, H. *siyáron*, *syárauṣ* and *syáran*; and from *nadí*, *nadiyon*, as if for a form *nádikáṇám* (Prák. *náḍṇaṣ*), whence, *k* being dropped, as above, we may derive the various forms, *nadiyon*, *nadiyan*, etc. The Braj and Kan. obl. plur. forms in *n*, as *pápin*, for *pápiyon* or *pápiyan*, have probably arisen from the simple base, as those longer forms, from the increased base in *ka*; so that, e.g., *pápin* stands for an original *pápinám*, but *pápiyon*, etc. for an original *pápikáṇám*.

a. The origin of the obl. plur. forms in *nh* and *nhi*, is obscure. Mr. Beames suggests that they have arisen from a confusion between the common plural in *n*, and the Prák. plur. term. *hín*, said to be still preserved in *Maṛáṭhí*. The student is referred to Vol. II. of Mr. B's. Comparative Grammar, where he will find the question fully discussed.

Origin of the Postpositions of declension.

158. The explanation of the genitive postpositions will best precede that of the dat. and acc. postposition, *ko*. The origin of these genitive postpositions has long been one of the vexed questions of Hindí philology; but Dr. Hoernle of Benares, in a late able essay, may be regarded as having at last reached a solution of the problem. For the exhibition of his conclusive argument, we refer the reader to the essay in question,* and here briefly note the results of his investigation.

The various forms of the Hindí gen. postposition, viz. *ká*, *kau*, *ko*, *ka*, *kar*, *keró*, *kerá*, *ker*, *dá*, *go*, *ro*, *lo*, are all corruptions of Prákrit modifications of *kṛíta*, the Sk. past part. of *kṛí*, 'to do'.

This participle received in Prákrit the addition of the common affix *ka*, so that by the elision of *t*, and change of *ṛ* to *er*, it assumed the form *keraka* or *kerika*. In Prákrit, this participle was often used after a gen. noun, with which it was made to agree, but without any modification of the sense. Thus it came at last to supplant the gen. termination, and became itself a sign of the gen. case, as it is to-day in Hindí. From *kerakah*, we obtain the Hindí postpositions *keró*, *kerá*, *ker*, precisely as we have *ghoró*, *ghorá*, and *ghor*, from *ghoṭakāḥ*:

* Vid. Journ. As. Soc. of Bengal, Part. I; No. II, 1872.

and; *ar* instead of *er* being substituted for the *ri* of *krīta*, from *karakah*, we derive the forms *kara*, *kar*. These are therefore the oldest forms of the Hindī postposition. In the case of the 1st and 2nd personal pronouns in High Hindī, and in Mārwarī universally, the initial *k* and the final *k* of *karakah*, or *karakah* having both been elided, the forms *ro* and *rā* remained. The Braj, Kananjī and High Hindī forms, *kau*, *ko*, *kā* may have arisen, either from the forms above given, or from another Prāk. form of *krīta*, viz., *kidaḥ* or *kadaḥ* which would yield, by the elision of *d*, *kau*, *ko*, or *kā*, or by the elision of the initial *k*, as in the case of the Mārwarī gen. sign., *dā*, which is the form in Panjābī. The Mārwarī postposition, *ko*, may be compared with another Prākritic form of this same word, *kelaka*, for *keraka*. This theory of the origin of these postpositions accounts for all the forms that I have met, except the very rare old Mārwarī forms, *tanau*, and *hundo*, regarding which I have no satisfactory suggestion to make.

159. The analogy of the gen. postpositions will lead us to a probable theory as to the dat. postpositions, *kauṣ*, *kon*, *ko*, *kuṣ*, *ku*, *kai*. The same Prākritic participle, *keraka*, which came to be the sign of the gen., was also used in the forms *kerakam* and *kerake*, (*krītam*, *krīte*,) as the sign of the dative. And if these forms were so used, it is as likely that the Prākritic equivalents, *kadam* or *kade*, might have been so used. From the former of these, by elision of *d*, I would derive the Braj dat. sign, *kauṣ*,* whence we have the High Hindī, *ko*, just as in the infinitive, we have the Kan. *karno*, for the Braj, *karnauṣ*. The eastern form *ke* has probably arisen from *kade*. By a similar process, may also probably be derived the Mār. dat. and acc. sign *nai*, from another Prākritic form, *kinne*, of the same participle, *krīte*, the initial *k* being rejected, just as, in this same dialect, in deriving *ro* from *kerakah*. The corresponding Mew. postposition, *ai*, is apparently a still further reduction of the same affix, by the elision of *n*.

a. The dat. and acc. postpositions, with a medial aspirate, viz., *kahūṣ*, *kāhū*, *kahas*, *kāḥ*, may perhaps, as Dr. Hoernle suggests, have arisen from a different origin, as the Sk. *sakāśhe*,† which was sometimes used as a sign of the dat. and acc. But it is quite possible that they, like the foregoing, may have arisen from the same *kerakam*, *kerake*, *h* having been euphonicly inserted, after the elision of *t*, as before the nom. plur. termination in *bhaṅghaiṣ*, for *bhaṅghvaiṣ*.

b. On the derivation of the apparently related Himalayan dative and accusative case-signs, viz. *kañi*, *sañi*, *huṇi*, I have obtained no light.

160. It has been common to compare the postposition *ne*, denoting the agent, with the termination of the instr. sing. of the 1st decl. of Sk. nouns, as, e.g. the Hindī, *Rām ne*, with the Sk. *Rāmena*. It may perhaps also be connected with the Sanskrit termination of nouns of agency, in *ana*. But the origin of this postposition has not yet been demonstrated; and if we regard the analogy

* Vid. § 79. † Vid. Benfey's Sansk. Diet., sub voc.

of the postpositions already considered, it seems more reasonable to seek its original in some single word. The Sk. instr. affix, *ina*, could scarcely have separated itself from its noun, as the common theory supposes.

161. The postposition *se* with its variations, *son*, *sín*, *san*, *sen*, *hai*, etc., is probably to be connected with the Sk. preposition, *sam*, 'with', or, more accurately, with 'sa', of which *sam* is the acc. sing. *Se* is probably a genitive from the same stem, for *sasya*, as *mele* is for *melasya*.

a. *Ten*, *te* and *tan*, are evidently related to the Sanskrit adverbial affix, *tas*, which is added to any noun in Sanskrit with an ablative sense. It is to be noticed that, under the form *to*, this affix had become the regular abl. termination in Prákrit. Compare the Sk. *pítritas*, with the Braj *pitá ten*.

162. The various forms of the loc. postposition, *meñ*, are all referable to the Sk. *madhya*, 'middle', generally to its loc. sing., *madhye*. The various forms, *madhya*, *mañhi*, *mahi*, *máhi*, *mah*, all exhibit successive processes of derivation, *dh* becoming *h*, and *y*, by § 88, first becoming *i* and then disappearing. In the forms *májjh*, *majhi*, *jh* is substituted for the conjunct *dhy* (§ 96). The long form *máhai* suggests an increased Prákritic form, *madhyako*. The various forms with *Anusvár*, *máhiñ*, *mahañ*, *meñ*, *moñ*, *majjham*, are possibly to be referred to the acc. form, *madhyam*. *Meñ* or *maiñ* has arisen from *máhiñ*, and *máñ* from *mahañ*, by rejection of *h*, and *Sandhi* of the concurrent vowels.

a. The other loc. postposition, *par*, in all its variations, is derived from the Sk. *upari*, 'on'. The Márwári, always tenacious of old forms, has retained the initial vowel to the present day. From this original have proceeded in succession, the Bhoj. *pari*, H. H. *par*, Braj *pai* and Urdú *pa*.

b. The postposition *tak* is connected by Prof. Williams * with the Sanskrit affix *daghna*, used in the same sense; thus, we may compare the Hindí, *ghuñe tak*, 'up to the knee', with the Sk. *jánu-daghna*, of the same meaning. With the same affix, through the operation of a few common changes, may also be connected the postposition *talak*, which has the same meaning. The elements of the conjunct *ghn* in *daghna* being separated and then transposed, as is often the case in Hindí, we would have a form *danagh*, whence by the substitution of the cognate hard smooth mute, for the soft mutes, *d* and *gh*, and change of *n* to *l*, we reach *talak*, the form in question.

c. The postposition *lagi* or *lági*, having the same meaning as the above, is to be identified with the Sk. indecl. past part., *lagya*, Prák. *lagia*, from the root *lag*, 'to be attached'. The forms *loñ* and *lauñ*, are to be derived from the other Prákrit form of the same participle, viz., *lagitúna*, or *lagiúna*, for the Sk. *lagitvd*, whence, by the rejection of the medial *g*, and *Sandhi* of the vowels, * final passing into *Anusvár*, we have the forms *lauñ* and *loñ*.

* Sansk. Grammar, § 80 XX

CHAPTER V.

ADJECTIVES.

163. The Hindí adjective is exceedingly simple, and presents little requiring special explanation. Adjectives fall into two classes, *viz.*, *uninflected* and *inflected*. Uninflected adjectives, as the term implies, remain unchanged before all nouns and under all circumstances, like the English adjective, and require no explanation. Inflected adjectives all terminate in आ *á*, and cōrrespond in all respects to Tadbhava nouns of the same termination, inflected to ए *e* in the oblique cases. The rules for the inflection of such adjectives are the same as those given for the inflection of the genitive postposition, का, *viz.* :—

(1) Before a masc. noun in the nom. sing., आ *á* final is unchanged.

(2) Before a masc. noun in any other case, आ *á* final is changed to ए *e*.

(3) Before a fem. noun in any case, sing. or plur., आ *á* final is changed to ई *í*.

The following examples will illustrate the construction of adjectives:

UNINFLECTED ADJECTIVES.

सुंदर फूल *sundar phúl*, 'a beautiful flower', or 'beautiful flowers'.

सुंदर फूल पर *sundar phúl par*, 'on a beautiful flower'.

सुंदर फूलों का *sundar phúlon ká*, 'of beautiful flowers'.

सुंदर लड़की *sundar laríkí*, 'a beautiful girl'.

सुंदर लड़कियां *sundar laríkíyān*, 'beautiful girls'.

सुंदर लड़की का *sundar laríkí ká*, 'the beautiful girl's'.

सुंदर लड़कियों को *sundar laríkíyon ko*, 'to beautiful girls'.

धर्मी पुरुष *dharmmí purush*, 'a virtuous man', or 'virtuous men'.

धर्मी पुरुष का *dharmmí purush ká*, 'a virtuous man's'.

धर्मी पुरुषों में *dharmmí purushon men*, 'among virtuous men'.

धर्मी स्त्री *dharmmī strī*, 'a virtuous woman'.
 धर्मी स्त्रियां *dharmmī striyaṅ*, 'virtuous women'.
 धर्मी स्त्री को *dharmmī strī ko*, 'to a virtuous woman'.
 धर्मी स्त्रियों को *dharmmī striyaṅ ko*, 'to virtuous women'.

INFLECTED ADJECTIVES.

काला घोड़ा *kālā ghorā*, 'a black horse'.
 काले घोड़े *kāle ghorē*, 'black horses'.
 काले घोड़े का *kāle ghorē kā*, 'the black horse's'.
 काले घोड़ों पर *kāle ghorōṅ par*, 'on black horses'.
 काली बिल्ली *kālī billī*, 'a black cat'.
 काली बिल्लियां *kālī billiyāṅ*, 'black cats'.
 काली बिल्ली पर *kālī billī par*, 'on a black cat'.
 काली बिल्लियों को *kālī billiyōṅ ko*, 'to black cats'.

164. A very few adjectives in आँ *āṅ* follow the analogy of Tadbhava masc. nouns of the same termination, and are inflected to एं *ēṅ*, obl. masc., and ईं *īṅ*, fem., according to the rules above given for adjectives in आ *ā*.* The same rule applies to all ordinal numeral adjectives ending in वाँ *vāṅ*. Examples are, बायें हाथ, *bayēṅ hāth*, 'on the left hand'; दसवीं घड़ी पर, *dasvīṅ gharī par*, 'at the tenth hour'; बीसवें महीने में, *bīsavēṅ mahīne mēṅ*, 'in the twentieth month'.

Rem. Adjectives do not, as a rule, assume the plural terminations, ऐं, आँ, औं. When the adjective comes last, in the poetic style, they are very rarely added. The perfect and imperfect participles of verbs, when used adjectively, are subject to the same rules as inflected adjectives.

165. The affix आ *sā* is added to adjectives to express resemblance, with the accessory idea of a lesser degree of the quality.

a. This affix is inflected to ए *e* and ई *ī* according to the rules for the inflection of Tadbhava adjectives in आ. The adjective preceding आ *sā*, if capable of inflection, must also be inflected. Examples are,

* Vid. § 160, (1, 2, 3.)

लाल सा फूल *lál sá phúl*, 'a reddish flower'; नीली सी चिड़ियाँ *níli sī chiriyān*, 'blueish birds'; पीले से पत्ते *píle se patte*, 'yellowish leaves'.

b. The same particle may also be added to a noun or pronoun, converting it into an adjective expressing likeness; the pronoun must be put in the oblique form. Thus, *e.g.*, we may say, खड़ग सा हथियार *kharaḡ sá hathiyār*, 'a sword-like weapon', मुझ सा पापी *mujh sá pápī*, 'a sinner like me', तुम सा मित्र *tum sá mitr*, 'a friend like you'.*

c. सा *sá* is also added to the genitive both of nouns and pronouns, when the likeness intended is not, as in the previous case, to the person or thing itself, but to something pertaining to the person or thing. Both the genitive and the appended सा are then inflected to agree with the following noun.

Thus we say, पंडित की सी बोली *paṇḍit kī sī bolī*, 'speech like that of a pundit'; हाथी का सा मुँह *hāthī kā sá muṅh*, 'a face like an elephant's'; बाघ के से दाँत *bāḡh ke se dānt*, 'teeth like those of a tiger'.

d. This idiom is to be explained by supposing an ellipsis of the substantive after the genitive. Thus, *hāthī kā sá muṅh* is for *hāthī kā muṅh sá muṅh*; as we say in English, 'a face like an elephant's', for 'a face like an elephant's face'.

e. Sometimes the noun qualified is omitted, as in the following; '*parbat kī kundalā sī dīkhdī partī hai*', 'something like a mountain cave appears'. Here we must evidently supply some feminine noun, as, *e.g.*, *bastu*.

166. Identical in form, but of different origin and meaning, is the particle सा *sá*, which is added in like manner to adjectives to denote intensity or excess.

Examples of this usage are, बहुत सा आटा *bahut sá átā*, 'a great deal of flour'; थोड़ी सी रोटी *thorī sī rotī*, 'a very little bread'; ऊँचा सा पहाड़ *ūnchá sá pahār*, 'a very high mountain'; बड़े से घोड़े *bare se ghore*, 'very large horses'.

a. *Sá*, as used in this sense, is derived from the Sanskrit affix *shas*, '-fold', through the Braj *so*. *Sá*, the affix denoting likeness, has come from the Sanskrit *sama*, 'like', through the intermediate (Braj) form, *saun*, as the H. H. inf. *karná* has come through the Braj *karnaun*.

* With such expressions as the above, compare such English colloquial forms as 'sick-like', 'weak-like', etc.

167. The dialectic forms of adjectives present no new peculiarity. Tadbhava High Hindí adjectives in आ, inflected, in Braj take the termination औ, and in Mārwarí and other western and the Himalayan dialects, औ. The inflection of such adjectives in each of these dialects is the same as that of the corresponding class of nouns. Occasionally *Anuscár* is added to the Braj obl. masc. inflection. Examples are the following : for H. H., छोड़ा, Braj, छोड़ौ, Mār., Mew., Kan., etc., छोड़ौ, 'little'; Braj, मीठे बचन सैँ or मीठेँ बचन सैँ, 'with a pleasant word', for H. H., मीठे बचन से; Mār., बड़ो घोड़ा, 'a large horse'; बड़ी घोड़ी, 'a large mare'; बड़ा घोड़ा, 'large horses'; बड़ा बाहो रो तगत, 'the throne of the great king'. Kanaují forms of the adjective occasionally occur in poetry, as, in the *Rámáyan*, साँखरो, for H. H., साँखला, 'sallow'.

a. In the dialect of the *Rámáyan*, the class of Tadbhava adjectives in आ is wanting, and all adjectives alike are uninflected; except that as noted below, they occasionally assume the Sanskrit fem. nom. sing. terminations. But sometimes इ is added for the fem. Thus, we have बर राज, 'a great king', and बर हानि or बरि हानि (fem.), 'a great injury'. सम is the usual substitute for सा; as, e.g., दसरथ सम राज, 'a king like Dasarath'.

168. Occasionally, in poetry, some adjectives, chiefly Tatsamas, assume certain Sanskrit terminations, indicative of case and gender. Thus we often meet adjectives with the Sanskrit fem. terminations, ई (after bases in अन् or इन्,) and आ. Such forms occur most frequently in the latter part of compound words. The final ई is often shortened for the sake of the metre. Examples are कामिनी.....रतिमदमोचनी 'beautiful women, destroyers of the pride of Rati'; भगति अति पावन, 'devotion most holy'; सीता पुनीता, 'Sítá, the pure'; गुरुइ कै गिरा विनीता, 'the modest speech of Gurur'. More rarely, we meet with the termination म(ं) of the Sk. acc. sing., masc. or neut., as, e.g., अजं नित राम नमामि, 'Rám, the unborn, I ever adore'; निकंदय द्वंद घनं, 'destroy all my doubt'.

Comparison.

169. The Hindí adjective has no separate form to express the degrees of comparison. The comparative degree is

expressed by simply putting the noun or pronoun with which comparison is made, in the ablative case, thus; यह घर उस से बड़ा है *yah ghar us se bará hai*, 'this house is larger than that'; वह वृक्ष आम के पेड़ से ऊँचा है *wah vrikshám ke per se únchá hai*, 'that tree is higher than a mango tree'; शहद से मीठा *shahad se mithá*, 'sweeter than honey'.

a. The superlative degree is expressed by using with the adjective, the abl. of सब *sab*, 'all'; thus, सब से बड़ा *sab se bará*, 'the greatest'; i.e., 'great with all'; सब से नीचा *sab se nich*, 'the lowest'; यह मछली सब मछलियों से सुंदर है, *yah machhlí sab machhliyon se sundar hai*, 'this is the most beautiful of all fishes'.

b. Comparison may also be expressed by prefixing the words और *aur* and अधिक *adhik*, 'more', and sometimes, with the same signification, the Persian *ziyádah*, corrupted in Hindí to जियाद: *jíyáda*, or, colloquially, in the Doáb, जास्ती *jástí*.

c. Where no comparison is intended, a high degree of any quality is expressed by prefixing various words to the adjective, as in English and other languages. Most commonly, the word बहुत *bahut*, 'much', 'very', is prefixed, as बहुत गहरी नदी *bahut gahrí nadí*, 'a very deep river'. Sometimes, colloquially, बड़ा *bará*, 'great', is used instead of बहुत; as बड़ा भारी पत्थर *bará bhári patthar*, 'a very heavy stone'; but this use of बड़ा is not considered elegant. The intensive affix, सा *sá*, (§ 166) has the same force. Other words, used especially in literary Hindí, are अति *ati*, 'very', अत्यन्त *atyant*, 'extremely'; as अति सुंदर *ati sundar*, 'very beautiful'; अत्यन्त भयानक *atyant bhayának*, 'exceedingly terrible'. The word परम *param*, (cf. Lat. *primus*) is often prefixed to Tatsama adjectives in the same sense as the above, as, e.g., परम अद्भुत *paramadbhut*, 'very wonderful'; परमशुद्ध *paramshuddh*, 'very holy'.

d. Sometimes the superlative degree of comparison is elegantly expressed by placing the noun or pronoun with which comparison is made, in the loc. case with मैं *men*, either with or without सब *sab* prefixed; as, e.g., वह सब बुद्धिमानों में बुद्धिमान था *wah sab buddhimánon men buddhimán thá*, 'he was the wisest of the wise'; इन पेड़ों में बड़ा यही है

in peron men bará yahí hai, 'of these trees this is the greatest'. Compare the similar English idiom, 'brave among the brave.'

170. A few Sanskrit comparatives and superlatives occur, the former often in a superlative sense; as, *e.g.*, पुण्यतर *punyatar* from पुण्य *punya*, 'more holy', or 'very holy'. But superlative forms are much more common, as उत्तम *uttam*, 'best'; श्रेष्ठ *shresht*, 'most excellent', from श्री; प्रियतम *priyatam*, 'dearest', from प्रिय; पापिष्ठ *pápisht*, 'most sinful', from पापी *pápi*.

a. Persian comparatives and superlatives have found no place in Hindí, unless we except the word जिहतर (جہتر), which one occasionally hears from Hindoos who are in the habit of using much Urdú.

171. The same general principles of derivation which have been indicated (§§ 54—157) in explanation of substantive forms, apply equally in regard to adjectives. Thus Tadbhava adjectives in *d* have always arisen from Prakritic bases increased by the addition of a consonant, usually *k*; and all Tatsamas ending in the silent *a*, from the simple Sanskrit base. Thus the adjective *káld*, 'black', must be derived, not directly from the Sk. *kála*, but from an increased Prakritic base, *kálaka*. On the other hand the Tatsama, *sundar*, 'beautiful', has arisen directly from the Sk. *sundara*, with only the loss of the case-termination. Tatsamas in *l* commonly represent Sk. bases in *in*, as *dhanl*, from the base *dhanin*.*

CHAPTER VI.

NUMERALS.

172. The Hindí numerals are quite irregular in their formation, and it will be necessary for the student to commit them all to memory as far as 100. The Sanskrit numerals are also in common use in books, especially in numbering chapters and sections.

Both the Hindí and Sanskrit numerals are given in the following table, with the figures corresponding.

* Vid. §§ 63, 127.

		Hindí.		Sanskrit.	
1	१	एक	<i>ek.</i>	एक	<i>ek.</i>
2	२	दो	<i>do.</i>	द्वि	<i>dvī.</i>
3	३	तीन	<i>tīn.</i>	त्रि	<i>tri.</i>
4	४	चार	<i>chár.</i>	चतुर्	<i>chatur.</i>
5	५	पाँच	<i>pānch.</i>	पंचन्	<i>pañchan.</i>
6	६	छ	<i>chha.</i>	षष्	<i>ṣhaṣh.</i>
7	७	सात	<i>sát.</i>	सप्तन्	<i>saptan.</i>
8	८	आठ	<i>áth.</i>	अष्टन्	<i>aṣṭan.</i>
9	९	नौ	<i>nau.</i>	नवन्	<i>navan.</i>
10	१०	दस	<i>das.</i>	दशन्	<i>dashan.</i>
11	११	ग्यारह	<i>gyárah.</i>	एकदशन्	<i>ekadashan.</i>
12	१२	बारह	<i>bárah.</i>	द्वादशन्	<i>dvádashan.</i>
13	१३	तेरह	<i>terah.</i>	त्रयोदशन्	<i>trayodashan.</i>
14	१४	चौदह	<i>chaudah.</i>	चतुर्दशन्	<i>chaturdashan.</i>
15	१५	पन्द्रह	<i>pandrah.</i>	पंचदशन्	<i>pañchadashan.</i>
16	१६	सोलह	<i>solah.</i>	षोडशन्	<i>ṣhodashan.</i>
17	१७	सत्रह	<i>satrah.</i>	सप्तदशन्	<i>saptadashan.</i>
18	१८	अठारह	<i>aṭhārah.</i>	अष्टादशन्	<i>aṣṭādashan.</i>
19	१९	उनीस	<i>unís.</i>	ऊनविंशति	<i>únaviṅshati.</i>
20	२०	बीस	<i>bís.</i>	विंशति	<i>viṅshati.</i>
21	२१	इक्कीस	<i>ikkís.</i>	एकविंशति	<i>ekaviṅshati.</i>
22	२२	बाईस	<i>báís.</i>	द्वाविंशति	<i>dváviṅshati.</i>
23	२३	तेईस	<i>teís.</i>	त्रयोविंशति	<i>trayoviṅshati.</i>

		Hindí.		Sanskrit.	
24	२४	चौबीस	<i>chaubís.</i>	चतुर्विंशति	<i>chaturvīṅshati.</i>
25	२५	पचीस	<i>pachís.</i>	पंचविंशति	<i>pañchavīṅshati.</i>
26	२६	छब्बीस	<i>chhabbís.</i>	षड्विंशति	<i>ṣadvīṅshati.</i>
27	२७	सतार्वीस	<i>satáís.</i>	सप्तविंशति	<i>saptavīṅshati.</i>
28	२८	अठार्वीस	<i>aṭháís.</i>	अष्टाविंशति	<i>aṣṭāvīṅshati.</i>
29	२९	उनतीस	<i>untís.</i>	ऊनत्रिंशत्	<i>únatrinśat.</i>
30	३०	तीस	<i>tís.</i>	त्रिंशत्	<i>trinśat.</i>
31	३१	इकतीस	<i>iktís.</i>	एकत्रिंशत्	<i>ekatrinśat.</i>
32	३२	बत्तीस	<i>batís.</i>	द्वात्रिंशत्	<i>dvātrinśat.</i>
33	३३	तैंतीस	<i>tentís.</i>	त्रयस्त्रिंशत्	<i>trayastrinśat.</i>
34	३४	चौतीस	<i>chauntís.</i>	चतुस्त्रिंशत्	<i>chatustrinśat.</i>
35	३५	पैंतीस	<i>paintís.</i>	पंचत्रिंशत्	<i>pañchatrinśat.</i>
36	३६	छत्तीस	<i>chhattís.</i>	षट्त्रिंशत्	<i>ṣaṭtrinśat.</i>
37	३७	सैंतीस	<i>saintís.</i>	सप्तत्रिंशत्	<i>saptatrinśat.</i>
38	३८	अड़तीस	<i>artís.</i>	अष्टात्रिंशत्	<i>aṣṭātrinśat.</i>
39	३९	उन्नालीस	<i>untáís.</i>	ऊनचत्वारिंशत्	<i>únachatvāriṅ-</i> [<i>śat.</i>
40	४०	चालीस	<i>chálís.</i>	चत्वारिंशत्	<i>chatvāriṅshat.</i> [<i>śat.</i>
41	४१	इकतालीस	<i>iktáís.</i>	एकचत्वारिंशत्	<i>ekachatvāriṅ-</i> [<i>śat.</i>
42	४२	बयालीस	<i>bayáís.</i>	द्विचत्वारिंशत्	<i>dvichatvāriṅ-</i> [<i>śat.</i>
43	४३	तैंतालीस	<i>tentáís.</i>	त्रिचत्वारिंशत्	<i>trichatvāriṅ-</i> [<i>rinśat.</i>
44	४४	चौआलीस	<i>chauáís.</i>	चतुश्चत्वारिंशत्	<i>chatushchatvā-</i> [<i>rinśat.</i>
45	४५	पैंतालीस	<i>paintáís.</i>	पंचचत्वारिंशत्	<i>pañchchatvā-</i> [<i>śat.</i>
46	४६	छियालीस	<i>chhiyáís.</i>	षट्चत्वारिंशत्	<i>ṣaṭchatvāriṅ-</i>

		Hindí.		Sanskrit.	
47	४७	सैंतालीस	<i>saintális.</i>	सप्तचत्वारिंशत्	<i>saptachatrín</i> [shat.
48	४८	अड़तालीस	<i>artális.</i>	अष्टचत्वारिंशत्	<i>ashṭachatrín</i> [shat.
49	४९	उनचास	<i>unchás.</i>	ऊनपंचाशत्	<i>únapanchásat.</i>
50	५०	पचास	<i>pachás.</i>	पंचाशत्	<i>pañchásat.</i>
51	५१	एकान्वन	<i>ikáwan.</i>	एकपंचाशत्	<i>ekapanchásat.</i>
52	५२	बावन	<i>báwan.</i>	द्वापंचाशत्	<i>ducapanchásat.</i>
53	५३	तिरपन	<i>tirpan.</i>	त्रिपंचाशत्	<i>tripancháshat.</i>
54	५४	चौवन	<i>chauwan.</i>	चतुःपंचाशत्	<i>chaturpañchá-</i> [shat.
55	५५	पचपन	<i>pachpan.</i>	पंचपंचाशत्	<i>pañchapanchá-</i> [shat.
56	५६	छप्पन	<i>chhappan.</i>	षट्पंचाशत्	<i>shatpañcháshat.</i>
57	५७	सत्तान	<i>satáwan.</i>	सप्तपंचाशत्	<i>saptapanchá-</i> [shat.
58	५८	अठान	<i>atháwan.</i>	अष्टापंचाशत्	<i>ashṭápañchá-</i> [shat.
59	५९	उनसठ	<i>unsath.</i>	ऊनषष्टि	<i>únashashṭi.</i>
60	६०	साठ	<i>sáth.</i>	षष्टि	<i>shashṭi.</i>
61	६१	एकसठ	<i>iksath.</i>	एकषष्टि	<i>ekashashṭi.</i>
62	६२	बासठ	<i>básath.</i>	द्वाषष्टि	<i>dwáshashṭi.</i>
63	६३	तिरसठ	<i>tirsath.</i>	त्रिषष्टि	<i>trishashṭi.</i>
64	६४	चौसठ	<i>chaunsath.</i>	चतुःषष्टि	<i>chaturshashṭi.</i>
65	६५	पैंसठ	<i>painsath.</i>	पंचषष्टि	<i>pañchashashṭi.</i>
66	६६	छियासठ	<i>chhiyásath.</i>	षट्षष्टि	<i>shatshashṭi.</i>
67	६७	सरसठ	<i>sarsath.</i>	सप्तषष्टि	<i>saptashashṭi.</i>
68	६८	अड़सठ	<i>arsath.</i>	अष्टषष्टि	<i>ashṭashashṭi.</i>
69	६९	उनहत्तर	<i>unhattar.</i>	ऊनसप्तति	<i>únasaptati.</i>

		Hindí.		Sanskrit.	
70	७०	सत्तर	<i>sāttar.</i>	सप्तति	<i>saptati.</i>
71	७१	एकहत्तर	<i>ikhattar.</i>	एकसप्तति	<i>ekasaptati.</i>
72	७२	बहत्तर	<i>bahattar.</i>	द्वासप्तति	<i>dvāsaptati.</i>
73	७३	तिहत्तर	<i>tihattar.</i>	त्रिसप्तति	<i>trisaptati.</i>
74	७४	चौहत्तर	<i>chauhattar.</i>	चतुःसप्तति	<i>chatuṣsaptati.</i>
75	७५	पचहत्तर	<i>pachhattar.</i>	पंचसप्तति	<i>pañchasaptati.</i>
76	७६	छिहत्तर	<i>chhihattar.</i>	षट्सप्तति	<i>ṣaṭṣaptati.</i>
77	७७	सतहत्तर	<i>sathattar.</i>	सप्तसप्तति	<i>saptasaptati.</i>
78	७८	अठहत्तर	<i>aṭhhattar.</i>	अष्टसप्तति	<i>aṣṭasaptati.</i>
79	७९	उनासी	<i>unāsī.</i>	उनाशीति	<i>únāshīti.</i>
80	८०	अस्सी	<i>assī.</i>	अशीति	<i>ashīti.</i>
81	८१	इकासी	<i>ikāsī.</i>	एकाशीति	<i>ekāshīti.</i>
82	८२	बयासी	<i>bayāsī.</i>	द्वयाशीति	<i>dvyaśhīti.</i>
83	८३	तिरासी	<i>tirāsī.</i>	त्र्यशीति	<i>tryashīti.</i>
84	८४	चौरासी	<i>chaurāsī.</i>	चतुशीति	<i>chaturshīti.</i>
85	८५	पचासी	<i>pachāsī.</i>	पंचाशीति	<i>pañchāshīti.</i>
86	८६	छियासी	<i>chhiyāsī.</i>	षड्शीति	<i>ṣhaḍshīti.</i>
87	८७	सतासी	<i>satāsī.</i>	सप्ताशीति	<i>saptāshīti.</i>
88	८८	अठासी	<i>aṭhāsī.</i>	अष्टाशीति	<i>aṣṭāshīti.</i>
89	८९	नवासी	<i>navāsī.</i>	नवाशीति	<i>navāshīti.</i>
90	९०	नव्वे	<i>navve.</i>	नवति	<i>navati.</i>
91	९१	एकानवे	<i>ikānave.</i>	एकनवति	<i>ekānavati.</i>
92	९२	बानवे	<i>bānave.</i>	द्वानवति	<i>dvānavati.</i>

		Hindí.		Sanskrit.	
93	९३	तिरानवे	<i>tiránave.</i>	त्रिनवति	<i>trinavati.</i>
94	९४	चौरानवे	<i>chauránave.</i>	चतुर्नवति	<i>chaturnavati.</i>
95	९५	पञ्चानवे	<i>pachánave.</i>	पञ्चनवति	<i>pañchanavati.</i>
96	९६	षड्विंशानवे	<i>chhiyánave.</i>	षट्त्रयविंशति	<i>shatṭṛayavintati.</i>
97	९७	सप्तानवे	<i>satánave.</i>	सप्तनवति	<i>saptanavati.</i>
98	९८	अष्टानवे	<i>aṭhánave.</i>	अष्टानवति	<i>aṣṭánavati.</i>
99	९९	नव्वानवे	<i>ninánave.</i>	नव्वनवति	<i>navvanavati.</i>
100	१००	शे	<i>sau.</i>	शत	<i>shata.</i>
1000	१०००	{सहस्र हजार*}	<i>sahasra. hajár.</i>	सहस्र	<i>sahasra.</i>
100000	१०००००	लाख	<i>lákhh.</i>	लक्ष	<i>laksha.</i>
1000000	१००००००	नियुत	<i>niyut.</i>	नियुत	<i>niyuta.</i>
10000000	१०००००००	करोड़	<i>karor.</i>	कोटि	<i>koṭi.</i>

a. The following are of less frequent occurrence, viz. : अर्ब *arb*, 'one hundred *karor*', = 'one billion'; खर्ब *kharb*, 'one hundred *arb*', = 'one hundred billion'; नील *níl*, 'one hundred *kharb*', = 'ten trillion'; पद्म *padm*, 'one hundred *níl*', = 'one quadrillion'; संख *sankh*, 'one hundred *padm*', = 'one hundred quadrillion'.

173. Many of the above numerals have slightly different forms. We subjoin the most common variations.

1, { एक. † शेक.	3, { तीनि. त्रय. †	9, नव.
2, { दोक. † दो. † दो. † दु. †	4, { चारि. † चारिक. † चौ. §	11, { एग्यारह. इग्यारह.
	6, छः	14, चारिदस. †

* This is a Persian word; but it is in common use in Hindí. Etymologically it is identical with the Sanskrit form, *sahasra*.

† In *Bámáyán*.

‡ Braj.

§ Kanauj.

16, {	शेअरइस.*	46, इतालीस.	82, बासी.

43, तैतालीस.		81, इक्यासी.	{
44, चवालीस.			{
			100, सहस.*

a. To the above list may be added the anomalous form from the *Rámáyana*, नवसप्त, *lit.*, 'nine-seven', 'sixteen'. इह is occasionally substituted for दस, 'ten', as in the phrase, दहदिशि, 'the ten points of the compass'. Many of the above forms merely present differences of orthography.

174. The numbers above one hundred proceed as in English, except that the copulative conjunction is omitted. Thus, एक सौ एक *ek sau ek*, 'one hundred and one'; तीन सौ सठ *tín sau sáth*, 'three hundred and sixty'; एक हजार बीस *ek hajár bis*, 'one thousand and twenty'.

a. But the copulative is sometimes inserted in poetry, even in the lower numbers, as बीते कल्प सात अरु बीसा, 'seven and twenty *kalpas* passed.'

b. The numbers between 100 and 200 are sometimes expressed by writing the smaller number first, with the affix *á*, as e.g., चालीसा सौ, 'a hundred and forty'. Other modes of expression will be noticed in the sections concerning fractional and denominative numerals.

* In *Rámáyana*.

† Kanaují.

‡ In Tirhut.

175. The numeral एक is added to other numerals in the sense of the English 'about'; as, e.g., चालीस एक, 'about forty'; सै एक, 'about a hundred',—not एक सै एक, which is 'one hundred and one'. But to एक the word आद (Sk. आदि) is added in the same sense, as एक आद सेर आटा, 'a seer or so of flour'.

176. Ordinarily the numerals are not used in the inflected plural form. But when they are used to denote a totality or aggregation, they may take, both in the nom. and obl. cases, the termination ओं.* Thus, चार पेड़ *chár per* is 'four trees', but चारों पेड़ *cháron per*, 'the four trees'; so also बीस आर *bīs áe* is 'twenty came', but बीसों आर *bíson áe*, 'the twenty came'.

a. This termination ओं *on* added to the numbers 'one hundred', 'one thousand', etc., always denotes an indefinite number of these aggregates. In this idiom, सैकड़ा *saikrá* is always substituted for सै *su*, 'one hundred'. Examples are, सैकड़ों पेड़ *saikrón per*, 'hundreds of trees'; हजारों *hajáron*, 'thousands'; लाखों रुपए *lákhon rupae*, 'lákhs of rupees'.

b. Dialectic forms are, for दोनों, 'both, the two', B., दूनों, दोन्यौं, दुहुं; Old Púrbi, द्वौ, दुहुनि, दुओं: for तीनों, 'the three', B., तीन्यौं, तिहुं; for चारों, 'the four', B., चहुं. चारौं, etc.

c. एक exceptionally takes the obl. plur. form एकन्ह, in a few places in the *Rámáyan*.

177. The Hindí idiom in such indefinite expressions as 'one or two', 'four or five', differs slightly from the English. The numbers, except in the case of 'one' and 'two', are rarely taken consecutively, and the larger very often precedes the smaller. The disjunctive conjunction is always omitted. Thus we say, दो एक, 'one or two'; दो चार, 'two four',='two or three'; दस बीस, 'ten or twenty'.

* I doubt if this is, in reality, identical with the plur. term. *on*, as has been commonly assumed. It is probably to be connected with the Sanskrit aggregates formed by the affix *yam*, so that, e.g., *cháron*, 'the four', is really a corruption of the Sk. *chatushtayam*, and *bíson* pre-supposes a form *viṣhatayam*. This, it will be observed, accounts for the appearance of the termination *on* in the num., as th common theory does not.

Ordinals.

178. The *Ordinals*, up to 'sixth', are as follows, *viz.* :—

पहला, पहिला <i>pahlá, pahilá</i> , 'first'.	चौथा <i>chauthá</i> , 'fourth'.
दूसरा <i>dúsrá</i> , 'second'.	पाँचवाँ <i>pánchwán</i> , fifth'.
तीसरा <i>tísrá</i> , 'third'.	छठा, छठवाँ <i>chhatthá, chhathwán</i> , ['sixth'.

The ordinals above 'sixth' are all formed by adding *wán* to the cardinal numbers. Both the आ *á* and वाँ *áw* final of the ordinals are inflected, like Tadbhava adjectives of the same terminations, to च and च् for the obl. masc., and च् *i* and च् *ín* for the fem. Thus, from दस *das* 'ten' is formed दसवाँ *daswán*, 'tenth'; पचास *pachás*, 'fifty', पचासवाँ *pacháswán*, 'fiftieth', etc.

a. Further examples of the use of the ordinals are पहिली पुस्तक *pahlí pustak*, 'the first book', सातवें पर्खे में *sátwén parbh men*, 'in the seventh chapter'; दसवाँ महीना *daswán mahíná*, 'the tenth month'.

b. The following dialectic variations occur in the *Rámáyan*, *viz.*, सातव, 'seventh', अठव, 'eighth', नवम, ninth'.

179. When referring to the lunar days, another set of ordinals is used. The month is reckoned as consisting of two parts, each of 15 lunar days, corresponding to the waxing and waning half of the moon. The waning half is commonly called कृष्णपक्ष or खदी; the waxing half, शुक्लपक्ष or सुदी. The month is reckoned to begin with the full moon, and the lunar days are counted twice in a month from one to fifteen. Although the names of these days are, strictly speaking, numeral adjectives in the feminine gender, agreeing with तिथि, 'a lunar day', this noun is rarely written, and they are practically used as nouns. They are as follows :—

तिथि.	तिथि.
1st, परिखा <i>paricá</i> .	4th, चौथ <i>chauth</i> .
2nd, दूस <i>dúj</i> .	5th, पंचमी <i>pañchamí</i> .
3rd, तीच <i>tíj</i> .	6th, छठ <i>chhatth</i> .

7th, सप्तमी <i>sattamí.</i>	11th, एकादशी <i>ekádasí.</i>
8th, अष्टमी <i>ashṭamí.</i>	12th, द्वादशी <i>dvádasí.</i>
9th, नौमी <i>naumín.</i>	13th, तेरस <i>teras.</i>
10th, दशमी <i>dasmin.</i>	14th, चौदस <i>chaudas.</i>
	15th, अमावस <i>amávas.</i>

a. The days of the second fortnight are reckoned in the same way, except that the fifteenth, or day of full moon, is called पूर्वमासी or पून्या.

b. The following are dialectic variations, viz. : 7th, सातें; 8th, आठें; 15th, अमावस, मावस.

c. Sometimes the lunar days are denoted by the Sanskrit ordinals throughout. In so far as these differ from the above, they are as follows :—

1st, प्रथमा <i>prathamá.</i>	7th, सप्तमी <i>saptamí.</i>
2nd, द्वितीया, <i>dwitiyá.</i>	9th, नवमी <i>navamí.</i>
3rd, तृतीया, <i>tṛitiyá.</i>	10th, दशमी <i>dashamí.</i>
4th, चतुर्थी, <i>chaturthí.</i>	13th, त्रयोदशी <i>trayodashí.</i>
6th, षष्ठी <i>shashṭí.</i>	14th, चतुर्दशी <i>chaturdashí.</i>

Fractional Numbers.

180. The fractional numbers are very irregular. The more common are the following :—

½,	{ पाको <i>páo.</i>	-¼, पैने <i>paune</i> , lit., 'a quarter less	[than'.
	{ चौथाई <i>chautháí.</i>	1¼, सवा <i>savá.</i>	
⅓,	तिहाई <i>tiháí.</i>	1½, डेढ़ <i>derh.</i>	
⅔,	आधा <i>ádhá.</i>	2½, अढ़ाई <i>arháí.</i>	
¾,	पौन <i>paun.</i>	+¼, साढ़े <i>sáre.</i>	

181. Observe, that पैने *paune*, prefixed to any number, or noun of measure, denotes a quarter less than that number or measure; सवा *savá*, similarly prefixed, denotes a quarter more than that number

or measure. डेढ़ *ḍerh* is similarly used, to denote one and a half times such number or measure. When either of these three stand alone, unity is to be understood; but in this case पौने *paune* is the substitute for पौने; it is used with units only. अढ़ाई *arháí*, used alone, is $2\frac{1}{2}$; prefixed to any numeral or noun of measure, it denotes two and a half times that number or measure. साढ़े *sáṛhe* is never used alone. Prefixed, as above, to a noun or number, it denotes one half more than the following number or measure. It is never used with 'one' or 'two', where डेढ़ and अढ़ाई take its place. आधा *ádhá*, 'half', is very commonly shortened to आध *ádh* before numerals, as आध सौ *ádh sau*, 50. For आध, the Sk. अर्द्ध is sometimes used.

a. The following examples will illustrate the use of these fractional numbers:—

$\frac{1}{2} \times \frac{1}{4} = \frac{1}{8}$,	आध पाओ <i>ádh páo</i> .	250,	अढ़ाई सौ <i>arháí sau</i> .
$1\frac{1}{2} \times \frac{1}{4} = \frac{3}{8}$,	सवा पाओ <i>savá páo</i> .	375,	पौने चार सौ <i>paune chár sau</i> .
$1\frac{1}{2} \times \frac{1}{4} = \frac{3}{8}$,	डेढ़ पाओ <i>ḍerh páo</i> .	450,	साढ़े चार सौ <i>sáṛhe chár sau</i> .
$2\frac{1}{2} \times \frac{1}{4} = \frac{5}{8}$,	अढ़ाई पाओ <i>arháí páo</i> .	1225,	सवा हजार <i>savá hajár</i> .
$2\frac{1}{4}$,	सवा दो <i>savá do</i> .	1500,	डेढ़ हजार <i>ḍerh hajár</i> .
$5\frac{1}{2}$,	साढ़े पांच <i>sáṛhe páñch</i> .	1725,	पौने दो हजार <i>paune do hajár</i> .
$7\frac{3}{4}$,	पौने आठ <i>paune áth</i> .	2500,	अढ़ाई हजार <i>arháí hajár</i> .
75,	पौने सौ <i>paune sau</i> .	3500,	साढ़े तीन हजार <i>sáṛhe tীন hajár</i> .
150,	डेढ़ सौ <i>ḍerh sau</i> .	150000,	डेढ़ लाख <i>ḍerh lákh</i> .

b. They are used with nouns of measure, quantity, etc., as follows: डेढ़ कोस *ḍerh kos*, 'a kos and a half'; पौने दस गज *paune das gaj*, '9 $\frac{3}{4}$ yards'; अढ़ाई मन *arháí man*, '2 $\frac{1}{2}$ mans'; पाओ चित्ताक *páo chitták*, ' $\frac{1}{2}$ chitták'; साढ़े बारह हाथ *sáṛhe bárah háth*, '12 $\frac{1}{2}$ cubits'; सवा बरस *savá baras*, 'a year and a quarter'.

Proportionals.

182. To express proportion, गुना *guná* or गुन *gun* is added to the numerals, some of which then assume forms slightly abbreviated.

Illustrations are the following: दुगुना *duguná*, 'two-fold'; चौगुना *chauguná*, 'four-fold'; तिगुना *tiguná*, 'three-fold'; सतगुना *satguná*, seven-fold'; दसगुना *dasguná*, 'ten-fold'; सौगुना *sauguná*, 'a hundred-fold'.

a. Besides गुना the affix हरा is also sometimes added to a few numerals, in a similar sense, as दोहरा, 'double'; तिहरा, 'three-fold'.

b. When, either in a literal or metaphorical sense, the idea of a string or cord is involved, लड़ा may be similarly added, as तिलड़ा, 'triple'; चौलड़ा, 'quadruple'.

Denominatives.

183. Multiplicatives, such as the English 'twice', and 'thrice', are not found in Hindí. The Hindí idiom is illustrated in such phrases as the following, viz. ; ग्यारह सात सतहत्तर *gyárah sát sathattar*, lit., 'eleven sevens seventy seven'; छ तीन अठारह *chha tîn aṭhārah*, 'six threes eighteen'; which correspond to the English idioms, 'seven times eleven', and 'three times six'. Numbers thus used may be termed *Denominative numerals*. They have, in many cases, a form slightly different from that of the Cardinals. These special forms are as follows :—

1, { एक <i>ekam</i> .	4, { चौक <i>chauka</i> .
{ कं <i>kam</i> .	{ चौका <i>chauká</i> .
1½, सम <i>sama</i> .	4½, डोचा <i>ḍhonchá</i> .
1½, { डोड़ा <i>ḍaurhá</i> .	5, पंचे <i>pañje</i> .
{ डेरोड़ा <i>ḍeorhá</i> .	5½, पोचा <i>ponchá</i> .
2, दूना <i>dúna</i> .	6, छक्का <i>chhakká</i> .
2½, { ढाम <i>ḍháma</i> .	6½, खोचा <i>khonchá</i> .
{ ढामा <i>ḍháma</i> .	7, सत्ते <i>satte</i> .
3, { ती <i>tí</i> .	7½, सतीचा <i>satonchá</i> .
{ तीन <i>tína</i> .	8, अट्टे <i>aṭṭhe</i> .
3½, { हुंटा <i>húntá</i> .	9, { नाम <i>nama</i> .
{ होंटा <i>honṭá</i> .	{ नम्मा <i>namma</i> .

10, दहाम *dahám*.

184. The above are the only numbers which present peculiar forms, and even these forms are not substituted in every case. The only way to master their idiomatic use, is to commit the multiplication-table to memory. Meantime the following remarks will suffice. **एक**, commonly written **कै**, is substituted for **एक**, in the series of 'one' only; as **चार कै चार**, *lit.*, 'four ones four', *i.e.*, 'once four is four'. In the first of the series, however, we have simply **एकन एक**, 'once one is one'; probably a contraction for **एक कै एक**. In all other places in the table **एकै** is the substitute, as, *e.g.*, **दस एकै दस**, 'ten times one is ten'. From the series of two onwards, **दूना** is used as the Denominative numeral for **दो**; it seems to be a modification of the Marāthī form of the numeral, **दोन**. From twos to tens, the fem. form, **दूनी**, is used; from tens onward, the masc. Thus, **सात दूनी चौदह**, $7 \times 2 = 14$, but **बारह दूना चौबीस**, $12 \times 2 = 24$. **ती** is substituted for **तीन** from threes to tens only; in all other cases, **तीन** is used. Thus, **चार ती बारह**, $4 \times 3 = 12$; **ग्यारह तीन तैंतीस**, $11 \times 3 = 33$. From threes onward, **चौक**, (pronounced *chauka* before consonants,) is the substitute for **चार**; in the twos, the longer form, **चौका**, is preferred. Thus, **पांच चौक बीस**, $5 \times 4 = 20$; **दो चौका आठ**, $2 \times 4 = 8$. **पंचे** is the substitute for **पांच** throughout, as **दस पंचे पचास**, $10 \times 5 = 50$. The sing. form, **छक्का**, 'six', is used from elevens on; from twos to elevens, the plur., **छक्के**, is preferred; as **चार छक्के चौबीस**, $4 \times 6 = 24$; **बारह छक्का अठ्ठार**, $12 \times 6 = 72$. **सत्ते**, 'sevens', (as if plur. of **सत्ता**,) is used throughout, except in the elevens, where **सात** is employed; *e.g.*, **छ सत्ते ब्यासीस**, $6 \times 7 = 42$; but **ग्यारह सात सत्तहत्तर**, $11 \times 7 = 77$. Similarly **अट्टे** is used for 'eight', except in the elevens, where we have **आठ**; *e.g.*, **पांच अट्टे चालीस**, $5 \times 8 = 40$; **ग्यारह आठ अठासी**, $11 \times 8 = 88$. **नम्म** is used for nine in the twos only; **नम्मा**, from the threes to the tens; **नौ** is retained in the elevens; **नम्मा** is used from the twelves onward. Thus, **दो नम्म अठारह**, $2 \times 9 = 18$; **चार नम्मा छत्तीस**, $4 \times 9 = 36$; **ग्यारह नौ निनानवे**, $11 \times 9 = 99$; **बारह नम एक सौ आठ**, $12 \times 9 = 108$. **दहाम** is substituted for **दस** in every instance. Above ten the cardinal numbers are employed as Denominatives.

a. In the multiplication table the word *utar*, 'over', is sometimes added to the smaller number in the numerals from 100 to 200. In this case the word *sau* always comes last, as, *e.g.*, *bisotar sau*, 120. Observe that *bisotar* = *bisa* + *utar*.

b. The fractional Denominatives from $3\frac{1}{2}$ to $7\frac{1}{2}$ are chiefly used in surveying.

c. In numeration the words **एकार्ह**, **द्वार्ह** and **सैकड़** are used respectively for 'units', 'tens', 'hundreds'. Of a similar nature are the words, **सत्ताया**, $1\frac{1}{2}$, **ठारह** and **अड़ैया**, $2\frac{1}{2}$, which are used in the headings of the multiplication-table.

Collectives.

185. The terminations **आ á** and **ई í** are added to some of the cardinals, to denote collective numbers; as **बीसा bisá**, 'a score'; **बत्तीसी battísí**, 'a thirty two'; **चालीसा chálísá**, 'a forty'. Besides these, the following words are used as collective numbers, *viz.* :—

जोड़ा <i>joṛá</i> ,	} 'a pair'.	गाढ़ी <i>gáḥí</i> ,	} 'a five'.
जोड़ी <i>joṛí</i> ,		पंचा <i>pañjá</i> ,	
गंडा <i>gaṇḍá</i> ,	'a four' (chiefly of	कोड़ी <i>koṛí</i> ,	'a score'.
	cowries).	सैकड़ा <i>saikrá</i> ,	'a hundred'.

a. The cardinal numbers are often used as collectives, without any change of form.

Derivation of the Numerals.

186. The Hindi numerals are all derived from the Sanskrit, through intermediate Prakrit forms; and by referring to the general principles set forth in Chapter III, the student will be able himself to demonstrate their derivation. We only note a few of the more obscure forms.

a. The numbers of the series *uná*, 19, *unís*, 29, *untáls*, 39, etc., have arisen from the combination of the Sk. *úna*, 'lessened', with the next higher number. The full form of the prefix was *ekona*—*eka* + *úna*. Thus, even in Sanskrit, we have, e.g., for *navatrisshat*, 39, the alternative form, *ekonachatvātrishat*, H. *untáls*, *lit.*, 'forty less one'. The *ek* was early dropped, even in Sanskrit, giving, e.g., *únatrisshat* for *navadashan*, 19, whence by regular processes we have the H. *unáts* or *unís*. The instability of the labial mutes is illustrated by their disappearance in the numbers *unáts*, 19, *unchás*, 49, for *únatís*, and *únapachás*. A regard for euphony has probably led to the preference for the form *naváts*, 89, instead of *unmave* after the analogy of other similar numerals.

b. The student will note the peculiar change of *d* to *r* or *l*, in the series from 11 to 18, as, e.g., in the H. *bárah*, 12, for Sk. *dvádashan*, etc. Similarly, the final *t* of the Sk. *saptatí* becomes *r* in the seventies, as in *sattar*, 70, for *saptatí*. The initial *w* of the last syllable in certain of the fifties represents the *p* of the Sk. *pañcháshat*; as, e.g., in *ikáwan*, 51, for the Sk. *ekapancháshat*. *Sau* or *sat*, 100, has arisen ultimately from the Sk. *shat*, but immediately from

Prakritic forms, *sataka*, *satika*, nom. sing., *satakaḥ*, *satikaḥ*, whence, *satao*, *satio*, and finally, *t* being elided, *sau*, *sai*.

187. The irregular fractional numbers are derived as follows, *vis*:—

Páo, '¼', from the Sk. *páda*, nom. sing., *pádaḥ*, whence by §§ 69, c., 78, *páo*. Or possibly it may have arisen by a similar process from an increased form, *pádaka*. *Paun*, ⅓, and *paune*, '—¼', come from the Sk. *pádana*—*páda* + *ána*, 'a quarter less'. *Ádhá*, '½', is from *arddhaka*, secondary form of Sk. *arddha*: *sawá*, '1½', or, as a prefix, '+¼', from the Sk. *sapáda*, (*sa* + *páda*,) 'with a quarter': *ḍeṛh*, from the Prák. *divaddhe*, Sk. *dwi* + *arddha*; the labial is preserved in the Denominative fractional forms, *ḍaurhá*, *ḍeorhá*. Mr. Beames happily illustrates this form by the German idiom, '*halbwei*', 1½. (Can *aṛhá*, 2½, be similarly connected with a Sk. compound *trayo* + '*rdhá*?) *Sáṛhe*, '+½', is from the Sk. *sa* + *arddha*, (*sárddhaka*,) 'with one half'. In the rare forms, *ḍhonchá*, '4½', *poncha*, '5½', *khonchá*, '6½', *satonchá*, '7½', we evidently have as the last member the Sk. *uchcha*, (*uchchaka*,) 'superior', H. *úṅchá*: *ḍhonchá* apparently stands for *chatur* + *uehchaka*, the initial *ḍh* representing the final *r* of *chatur*, 'four'. Initial consonants were freely elided in Prakrit. The *kh* of *khonchá* is evidently for the *sh* of the Sk. *ḡhasḥ*, 'six'.

188. The ordinals are derived from the Sanskrit ordinals, through intermediate Prakrit forms. Thus *pahlá*, *daswán*, *pacháswán* have respectively arisen from the Sk. *prathama*, *dashama*, and *pañchāshattama*.

CHAPTER VII.

PRONOUNS.

189. The pronouns in Hindí, as in all other languages, exhibit many irregularities in their forms of declension. Old inflectional case-endings which have quite vanished from the noun, except in certain dialects, here appear in the regular system of declension; although, indeed, the analytical forms, even in pronominal declension, largely prevail over the inflectional. The Hindí pronoun, except in some of the Rájputáná dialects, has quite lost the distinction of gender, which was still retained in the Prakrit. There is no distinctive pronoun for the third person; the demonstratives, *यह* *yah*, 'this', *वह* *wah*, 'that', and, after a relative

pronoun, expressed or implied, the correlative pronoun, *so*, supply its place.

190. In the pronouns of the 1st and 2nd persons, *मैं main* and *तुम tum*, *रा rá* appears as the sign of the genitive, instead of *का ká*, and is appended to a stem different from that which we find in any other case. The reflexive pronoun, *आप áp*, is peculiar in retaining a purely inflectional gen., *आपना apná*, for the Sk. *आत्मनः*. In none of the pronouns, except in the case of the ag. sing. of the 1st and 2nd persons, is the base in the oblique cases identical in form with the nom. sing.

191. It will aid the memory to observe the close analogy in the declension of the different pronouns. In both demonstratives, the relative, correlative and interrogative pronouns, *ज* appears as the inflective sign of the oblique singular throughout; and *न n*, or, in the longer forms, *न्ह nh*, as the sign of the oblique plural. A similar analogy will be found to run through each of the dialectic systems of declension. Observe, further, that throughout all the varieties of declension, an initial *palatal*, viz., *च*, (rarely *च्*), its long vowel, *च्*, or its *gun* diphthong, *चै*, or the cognate semivowel, *य*, marks the proximate demonstrative; an initial *labial*, viz., *ड*, its long vowel, *डै*, its *gun* diphthong, *डौ*, or its cognate semivowel, *ब*, marks the remote demonstrative; *ज* initial marks the relative; *स* or *त* initial, the correlative; and *क*, the interrogative pronoun. Thus the declension of any one of these five pronouns may be transformed into that of any other, by simply substituting the proper pronominal initial. Thus, to tabulate the above, we have, in standard Hindí, the following pronominal bases :—

	<i>Prox. Dem.</i>	<i>Rem. Dem.</i>	<i>Rel.</i>	<i>Correl.</i>	<i>Interr.</i>
Nom.	य	व	ज	स	क
Obl.	यै	वै	जि	ति	कि

a. The idea of indefiniteness is expressed by adding to the interrogative inflected base, in standard Hindí, *कैँ*, in other dialects, *क*, *उ*, or *ऊ*, or with the aspirate, *हि*, *ही*, or *हू*.

b. After the same analogy are formed from these pronominal bases six classes of adverbs, which will be noticed in Chapter X.

192. The first personal pronoun is declined as follows :—

मैं *main*, 'I'.

SINGULAR.		PLURAL.	
N.	मैं <i>main</i> , 'I'.	हम <i>ham</i> ,	'we'.
Ac.	{ मुझे <i>mujhe</i> ,	हमें <i>hamen</i> ,	
D.	{ मुझ को <i>mujh ko</i> ,	हम } <i>ham</i> or	'us', 'to us'.
		हमों } <i>hamon ko</i> ,	
Ag.	मैं ने <i>main ne</i> , 'by me'.	हम } <i>ham</i> or	'by us'.
		हमों } <i>hamon ne</i> ,	
Ab.	मुझ से <i>mujh se</i> , 'from me'.	हम } <i>ham</i> or	'from us'.
		हमों } <i>hamon se</i> ,	
G.	मेरा <i>merá</i> , 'my', 'mine'.	हमारा <i>hamará</i> ,	'our', 'ours'.
	(-रे,-री,) (- <i>re,-rí</i> ,)	(-रे,-री,) (- <i>re,-rí</i> ,)	
L.	{ मैं, <i>mujh men</i> ,	हम } मैं, <i>ham, hamon</i>	'in' or 'on us'.
	{ पर, or <i>par</i> ,	हमों } पर, <i>men, or par</i> ,	
			'in' or 'on me'.

193. After the same model is declined the second personal pronoun,

तू *tú*, 'thou'.

SINGULAR.		PLURAL.	
N.	तू <i>tú</i> , 'thou'.	तुम <i>tum</i> ,	'you'.
Ac.	{ तुझे <i>tujhe</i> ,	तुम्हें <i>tumhen</i>	
D.	{ तुझ को <i>tujh ko</i> ,	तुम } <i>tum</i> or	'you', 'to you'.
		तुम्हों } <i>tumhon ko</i> ,	
Ag.	तू ने <i>tú ne</i> , 'by thee'.	तुम } <i>tum</i> or	'by you'.
		तुम्हों } <i>tumhon ne</i> ,	
Ab.	तुझ से <i>tujh se</i> , 'from thee'.	तुम } <i>tum</i> or	'from you'.
		तुम्हों } <i>tumhon se</i> ,	
G.	तेरा <i>terá</i> , 'thy', 'thine'.	तुम्हारा <i>tumhárá</i> ,	'your', 'yours'.
	(-रे,-री,) (- <i>re,-rí</i> ,)	(-रे,-री,) (- <i>re,-rí</i> ,)	
L.	{ मैं, <i>tujh men</i> ,	तुम } मैं, <i>tum, tumhon</i>	'in' or
	{ पर, or <i>par</i> ,	तुम्हों } पर, <i>men, or par</i> ,	'on you'.
			'in' or 'on thee'.

a. In the dat. and acc. sing., we occasionally find the forms, मेरे तर्हे, तेरे तर्हे; but these are archaic, and have about disappeared from standard Hindí.

194. In the above pronouns, the plural forms, हम and तुम, as in the corresponding English pronouns, are often used for the singular. The sing. of the 2nd personal pronoun, is only used, in the standard dialect, to express either extreme familiarity, or, more commonly, aversion and contempt. It is however used, at least by Christians, in addressing the Deity. The singular of the 1st person is to be preferred to the plural used in a singular sense.

195. The longer forms, हमें, तुम्हें, are restricted to a plural signification. They are not, however, extensively employed, but instead of these, when a plural is intended, the word लोग *log*, duly inflected for the several cases, is added to the bases हम and तुम. Thus, in a plural sense, instead of the forms given in the paradigms, in standard Hindí we preferably have, N., हम लोग, तुम लोग; Ac., हम लोगों को, तुम लोगों को; G. हम लोगों का, तुम लोगों का, etc., etc.

196. When these pronouns are used appositively with any noun or adjective in the gen. case, instead of the gen. forms given above, the base of the oblique cases must be used, and the postposition, का, के, or की, be appended to the following noun only. Thus we must translate, 'of unlucky me', मुझ आभागी का; 'of us carpenters', हम बढ़रवों का; 'of you wise men', तुम बुद्धिमानों का, etc. हमारे बढ़रवों का would mean, 'of our carpenters'; तुम्हारे बुद्धिमानों का, 'of your wise men'.

197. The genitives of the personal pronouns are occasionally used substantively, with the obl. plur. inflection, in which case the objects denoted must be determined from the context. The following example is from the *Bhāgavat Purān*; आन देशों में तुम्हारे से बड़े सुर धीर हुए हैं, 'in other countries there have been heroes and braves greater than yours'.

198. The close analogy between the next six pronouns will best appear by exhibiting their declension in a tabulated form, as follows:—

TABLE IV : STANDARD

	PROX. DEMONST.		REM. DEMONST.		RELATIVE.	
	यह <i>yah</i> , 'this'.		वह <i>wah</i> , 'that'.		जो <i>jo</i> , 'who', 'which'.	
SINGULAR.	N.	यह <i>yah</i> , <i>yih</i> .	वह <i>wah</i> , <i>wuh</i> .	जो <i>jo</i> .		
	Ac.	यह <i>yah</i> ,	वह <i>wah</i> ,	जो <i>jo</i> ,		
	D.	इसे <i>ise</i> . or	उसे <i>use</i> , or	जिसे <i>jise</i> , or		
	Ag.	इस को <i>is ko</i> .	उस को <i>us ko</i> .	जिस को <i>jis ko</i> .		
	Ab.	इस ने <i>is ne</i> .	उस ने <i>us ne</i> .	जिस ने <i>jis ne</i> .		
	Ab.	इस से <i>is se</i> .	उस से <i>us se</i> .	जिस से <i>jis se</i> .		
	G.	इस का * <i>is ká</i> .	उस का * <i>us ká</i> .	जिस का * <i>jis ká</i> .		
L.	इस } में <i>is men</i> , <i>par</i> .	उस } में <i>us men</i> , <i>par</i> .	जिस } में <i>jis men</i> , <i>par</i> .			
PLURAL.	N.	ये यह <i>ye</i> , <i>yah</i> .	वे वह <i>we</i> , <i>wah</i> .	जो <i>jo</i> .		
	Ac.	इन्हें <i>inhen</i> ,	उन्हें <i>unhen</i> ,	जिन्हें <i>jinhēn</i> ,		
	D.	इन } को <i>in or inhon ko</i> .	उन } को <i>un or unhon ko</i> .	जिन } को <i>jin or jinhon ko</i> .		
	Ag.	इन } ने <i>in or inhon ne</i> .	उन } ने <i>un or unhon ne</i> .	जिन } ने <i>jin or jinhon ne</i> .		
	Ab.	इन } से <i>in or inhon se</i> .	उन } से <i>un or unhon se</i> .	जिन } से <i>jin or jinhon se</i> .		
	G.	इन } का * <i>in or inhon ká</i> .	उन } का * <i>un or unhon ká</i> .	जिन } का * <i>jin or jinhon ká</i> .		
	L.	इन } में <i>in or inhon men</i> , <i>par</i> .	उन } में <i>un or unhon men</i> , <i>par</i> .	जिन } में <i>jin or jinhon men</i> , <i>par</i> .		

* का is of course inflected to को or की according to § 140. † कौन is often

PRONOMINAL DECLENSION.

तिस } से	<i>tin</i> or	किस } से	<i>kin</i> or		
तिसनें } से	<i>tinhon se.</i>	किसनें } से	<i>kinhon se.</i>		
तिस } का *	<i>tin</i> or	किस } का *	<i>kin</i> or		
तिसनें } का *	<i>tinhon ká.</i>	किसनें } का *	<i>kinhon ká.</i>		
तिस } में	<i>tin</i> or <i>tinhon</i>	किस } में	<i>kin</i> or <i>kinhon</i>		
तिसनें } पर	<i>men, par.</i>	किसनें } पर	<i>men, par.</i>		

colloquially used for *किस*, and *कोई*, for *किसी*, but the forms are inaccurate.

199. Observe, that the relative pronoun, **जो**, does not precisely correspond to the English relative, 'who', 'which'. It is rather 'the one who' or 'which', 'that which'. Thus, **जो आदमी आया** 'the man who came'; **मैं ने जो कहा सो किया**, 'what I said, that I have done'.

200. The plural of the indefinite pronoun, **कोई**, is often expressed by repeating the pronoun; thus, **कोई कोई आया**, 'some (persons) came'; **मैं ने किसी किसी को देखा**, 'I saw some, (or several) persons'. This often has an intensive force, *i.e.*, 'some few'. Or **कितने** may be the substitute, as **कितने कहते थे**, 'some (a number) were saying'.

201. **कौन**, as also, still more rarely, **कोई**, is occasionally uninflected in the oblique singular, as in the following from the *Prem Sagar*, **कौन रीति से कुछ उषे**, 'in what manner Krishna was born'.

202. The emphatic particle **ई** *í* or **ही** *hí* is sometimes added to all the above pronouns. In the oblique plural, **ई** *ín* is substituted for the final **ओं** *on*.

Examples are, **यही** *yahí*, 'this very'; **मैं ही** *main hí*, 'I myself'; **उसी को** *usí ko*, 'to that very person'; **उन्हीं ने कहा** *unhín ne kahá*, 'those same persons said'. But, rarely, **ही** also follows the plur. inflection; as, *e.g.*, **उन्हीं ही से** *unhon hí se*, 'from those very persons' or 'that very person'.

203. When any of the pronouns are used substantively, they take the proper postpositions as given in the tables. When they are used adjectively, *i.e.*, with a noun, if in any oblique case, the inflected form of the pronoun, sing. or plur., is placed before the noun, and the postposition is added to the noun only.

Thus we say, **उस पर** *us par*, 'on that', or 'on him'; but **उस घोड़े पर** *us ghore par*, 'on that horse'; **किस के घर को गया** *kis ke ghar ko gayá*, 'to whose house did he go'; but **किस घर को** *kis ghar ko*, 'to what house'; **उस के देश के लोग** *us ke desh ke log*, 'the people of his country'; but **उस देश के लोग** *us desh ke lag*, 'the people of that country'; **जिन का** *jin ká*, 'of whom'; but **जिन बनियों का** *jin baniyon ká*, 'the shop-keepers whose'; **तिन कवियों को** *tin kaviyon ko*, 'to those poets'.

204. Observe, that the longer plural forms, in **जो**, can only be used in a substantive sense; the shorter forms may

be used either adjectively or substantively. Thus, 'of those horses', is **उन घोड़ों का**,—never **उन्हीं घोड़ों का** ; but, on the other hand, we may say either **उन ने कहा**, or **उन्हीं ने कहा**, 'he' or 'they said'.

205. The plural forms of these pronouns are used for the singular, whenever it is intended to express respect. The longer forms are considered more respectful than the shorter. Since, thus, ambiguity might sometimes arise, the word **लोग** is preferably added to the pronoun, to denote plurality. In the oblique cases, this word, with the plural inflection, is inserted between the shorter form of the inflected base and the postposition. Thus, 'they' is **वह लोग** ; 'in their village', **उन लोगों के गाँव में** ; 'those who came', **जो लोग आए**, etc.

206. It will be observed that all the pronouns hitherto considered, except the indefinite, present two forms of the acc. and dat. in both the sing. and plur. ; the one, purely inflectional, in **ए** (sing.) or **एँ** (plur.); the other, analytic, consisting of the base of the oblique cases with **को**. These may both be used as either dative or accusative ; but the forms with **को** are preferred for the accusative, and the others, for the dative. Sometimes the employment of one or the other is determined merely by a regard to euphony, as, *e.g.*, **मैं ने उसे माली को दिया**, 'I gave it to the gardener'; where the immediate repetition of **को** would have been unpleasant to the ear.

207. All the above pronouns, when used adjectively, may take the nom. form, with a noun in the acc.

Thus, we may say, **जो घर मैं देखता हूँ**, 'the house which I see'; **यह बात कहकर**, 'saying this thing'. So also when used substantively, the nom. form of the accusative may be employed, but of things only, as **मैं यह कहता हूँ**, 'I say this'; **जो हम सुनते हैं वहाँ कहते हैं**, 'we say those very (things) which we hear'. But with **कौन** and **कोई** this usage is not considered elegant.

208. Besides the interrogative **कौन** *kaun*, 'who', and the indefinite pronoun **कोई** *koī*, 'any one', 'some one', etc.,

another interrogative pronoun, क्या *kyá*, 'what', and another indefinite pronoun, कुछ *kuchh*, 'some', 'any', 'something', 'anything', is employed. The following principles regulate the usage of the two *Interrogative* pronouns.

(1) कौन *kaun* may be applied both to persons and to things; क्या *kyá*, to things only, except in expressions denoting surprise, as, e.g., क्या मूर्ख *kyá múrakh*, 'what a fool!' More commonly, in such a case, the emphatic particle, ही *hí*, is added to the pronoun, as क्या ही बड़ा राजा *kyá hí bará rájá*, 'what a great king!'

(2) कौन *kaun* is used both substantively and adjectively, in both the nom. and obl. cases, but when used substantively, it refers to persons only.

Examples are, कौन है *kaun hai*, 'who is it?'; तुम ने किस को बुलाया *tum ne kis ko buláya*, 'whom did you call?'; किस का है *kis ka hai*, 'whose is it?'; किस लड़के का *kis larke ka*, 'what boy's?'; तुम ने किस महाजन से पूछा *tum ne kis mahájan se púchá*, 'of what banker did you inquire?'; किस घर में *kis ghar men*, 'in what house?'

(3) क्या *kyá* can be used adjectively in the nom. only: in the oblique cases it is always used substantively.

a. The acc., काहे को *káhe ko*, 'for what', is commonly used as the equivalent for the English 'why'. The gen., काहे का *káhe ka*, 'of what', usually denotes the material. Examples are, तुम काहे को आए *tum káhe ko áe*, 'why have you come?'; यह क्या है *yah kyá hai*, 'what is this?'; यह काहे का बना है *yah káhe ka baná hai*, 'of what is this made?'

209. The two *Indefinite* pronouns, कोई *koí* and कुछ *kuchh*, are both used either substantively or adjectively, and of both persons and things. But when used substantively, कोई *koí*, like कौन, refers to persons only, and कुछ *kuchh*, to things only. When used adjectively, either may be used to denote both persons and things.

a. The distinction between these two pronouns, when used adjectively, appears to be this; that कुछ *kuchh* always conveys, more or

less distinctly, a partitive sense. Examples of their use are, कोई है *koí hai*, 'is there any one?', or 'there is some one'; but कुछ है *kuchh hai*, 'there is some'; मैं ने किसी को देखा *main ne kisi ko dekhá*, 'I saw some one'; कुछ लड़के आए *kuchh larke áe*, 'some boys came'.

210. क्या *kyá* is declined in the singular only; कुछ *kuchh* is indeclinable.

a. The obl. form *kisi*, which many grammarians have assigned to *kuchh*, is properly a dialectic variation of the obl. form of *koí*. It will be found in the tables of dialectic declension. Prof. De Tassy similarly assigns to *kuchh*, obl. plur. forms, *kinhán*, *kinún*,* but these are to be regarded as mere variations of *kinhon*, the obl. plur. of *koí*.

क्या *kyá* is declined as follows:—

क्या *kyá*, 'what?'

SINGULAR.

N. क्या *kyá*, 'what?'. Ab. काहे से *káhe se*, 'from what?'.
 Ac. } काहे को *káhe ko*, 'for what?'. G. काहे का *káhe ká*, 'of what?'.
 D. }
 Ag. Wanting. L. काहे में *káhe men* 'in' or पर *par*, 'on what?'

211. The *Honorific* pronoun, आप *áp*, is used instead of the 2nd personal pronoun, तू *tú* or तुम *tum*, whenever it is intended to show respect to the person addressed. In the singular it is declined exactly like a masculine noun of the second variety of declension; *i.e.*, Nom., आप *áp*, Acc. Dat., आप को *áp ko*, Gen., आप का, etc.

a. But when more than one person is addressed, the plural is denoted by affixing the word लोग *log*, which is then regularly declined throughout the plural, the word आप remaining unchanged; as, आप लोग देखिये *áp log dekhiye*, 'your excellencies will please to see'; मैं आप लोगों से कहता हूँ *main áp logon se kahtá hún*, 'I say to your excellencies'.

b. The honorific pronoun आप is also, much more rarely, used for the person spoken of, when that person is present, so that the reference will be evident. But in such cases it is better to use, instead of आप, the proper title of the person addressed, as साहिब, पंडित, लाला, etc.

* Rudiments de la Langue Hindouí, p. 35.

212. The *Reflexive* pronoun, आप *áp*, 'self', although, like the foregoing, derived from the Sanskrit आत्मन्, is differently declined. The singular number is declined as follows:—

आप *áp*, 'self'.

SINGULAR.

N.	आप	<i>áp</i> .	Ab.	आप से	<i>áp se.</i>
Ao.	आप) को	<i>áp ko,</i>	G.	अपना (-ने,-नी)	<i>apná, (-ne,-ní.)</i>
D.	अपने) अपने लहें	<i>apne ko or apne lai.</i>			
Ag.	आप ने	<i>áp ne.</i>	L.	आप) अपने)पर	<i>áp or apne men, par.</i>

a. The plural forms are the same as the singular, with the exception of the Gen., आपस का *ápas ká*, and the Loc., आपस में *ápas men*, 'among themselves'.

Examples of their use are, आपस की बातचीत *ápas kí bátchít*, 'mutual conversation'; वे आपस में झगड़ा करते हैं *ve ápas men jhagrá karte hain*, 'they are quarreling among themselves'.

213. The genitive of the reflexive pronoun must always be substituted for the genitive of the other pronouns, when the pronoun refers to the subject of the verb, and also in certain other cases, which will be duly noted in the chapter on Syntax. For the present one or two examples will suffice.

Thus, वह अपने घर को जाता है *wah apne ghar ko játá hai*, 'he is going to his own house'; but वह उस के घर को जाता है *wah us ke ghar ko játá hai*, 'he is going to his house', i.e., the house of another person. Similarly, स्यार अपने बिल में छिपा रहा *syár apne bil men chhipá rahá*, 'the jackal remained hid in his hole'.

214. It will be noticed that all the shorter forms of the reflexive pronoun are identical with those of the honorific pronoun, आप. Thus, उस ने आप को मारा may mean, 'he struck you', (honorific form.) or 'he struck himself'. Whenever, therefore, the sense might be ambiguous, the longer form of the reflexive is to be preferred; thus, उस ने अपने को मारा can only mean, 'he struck himself'.

215. The genitive अपना sometimes assumes the plural termination

जों, and is then used as a noun, in the sense 'one's own people'. Thus, वह अपने के पास आया, 'he came to his own (people)'.

DIALECTIC PRONOMINAL DECLENSION.

216. The tables annexed to this section exhibit the pronominal declension of ten dialects. Preliminary to the tables, the following remarks and illustrations of the forms current in the more important dialects may be found of service. The Braj forms are so uniform and regular as scarcely to demand illustration. The tables exhibit all the common Mārwarī colloquial forms. The remarks in the following paragraphs refer especially to the Mārwarī of the 'Plays'.

217. The aspirated and unaspirated bases of the 1st personal pronoun are indifferently employed; thus, म्हारी अरज सुनू 'hear my supplication'; सुन मारी बात 'hear my word'. में is used alone, as ag. sing. in the following, गुरु की आज्ञा में पाई, 'I have received the command of my Gurú'. Instead of the regular base, ष, of the Mar. obl. sing. of the 2nd personal pronoun, तै (Braj, तै) is sometimes used, as तै नै गोरख नाथ भरमयो, 'Gorakh Náth has led thee astray'.

218. हैं and जो are the common nom. sing. forms of the two demonstratives, यह and वह. Thus we read, जो डकू लिय, 'he, writing a note'; हैं दगो कियो अंगरेज, 'this treachery has the Englishman committed'. But जो is found for हैं (यह) and जो for जो (वह), as जो जोगी जंग जायो, 'this jogí has come into the jungle'; जोई नाथ राबो, 'that same lord, O queen!' Besides the forms given in the tables, the 'Plays' often use the Braj जा (H. H. उस) in the obl. sing., as, e.g., जा नु पायो, '(he) has found that'; where नु is for नै (H. H. जो). The base दुब also occurs in the ag. (plur. of respect) in the following; अमर कियो दुब, 'he has made (me) immortal'. जे occurs in the same case, as in जे ब्रह्म ज्ञान सुबायो मा नै, 'he declared to me the knowledge of Brahma'. Finally, उ also is used as a base in the obl. sing., as in पींगला उरी लुगारै, 'Píngalá his wife'.

219. Besides ज्यो, जो and जे are also used for the relative. The most common sing. inflection is ज्या, as दोही बावंद तेरो ज्यां नै बसे, 'in whom dwells that lord of thine'. This inflection alone expresses the case of the agent, but नै is occasionally borrowed from the Braj,

in this and other cases ; as, *उपों नै छर्यो खीस पर हल*, 'he who placed (his) hand upon (my) head'.

220. Besides the forms of the interrogative given in the tables, *किब* and *कोन* are found in the obl. sing. ; thus, in the case of the ag., *किब पापी भरमायो*, 'what sinner has led (him) astray?'; *कोन राज त्याग तपस्या कीनी*, 'who, leaving his kingdom, has practiced austerities?'. So also the regular form, *कोन*, occurs in the case of the agent, as, *कोन उस्ताद नें ग्यान दिया*, 'what teacher hath given (thee) knowledge?'. *काहा*, for *क्या*, 'what?', occurs in the 'Plays', but this is Braj. The regular Mār. form *काँहें* occurs in the following ; *म्हारे काँहें सराय खूं काम*, 'what business of mine in the *sarāe*?'. *काँ* (for *क्या* or *काँहें*) is used in the following, merely as a sign of a question ; *दिना पवन काँ पाबो*, 'is there rain without wind?'

221. Mewārī, it will be observed, is distinguished from all other Hindī dialects in retaining separate forms for the masc. and fem., in all except the two personal pronouns. It should be further observed, that the Mewārī pronominal genitives in *हो* are less common than those in *को*. The longer plural forms of the personal pronouns, in *यों* and *वरों*, are preferred to the shorter for the true plural. In the colloquial of both Mārwar and Mewār, the reflexive genitive, *अपना*, is rarely used. The genitive of the several pronouns commonly takes its place, even when referring to the subject of the sentence. Thus the Mārwarīs would usually say, *मूं म्हारे काम करूं*, = *मैं अपना काम करूंगा*, 'I shall do my work'; *ऊ वों के गाम गीयो*, = *वह अपने गांव गया*, 'he went to his village'; *वे वों का घोड़ा चढ़या*, = *वे अपने घोड़ों पर चढ़े*, 'they mounted their horses', etc.

222. In the Old Pūrbī of the *Rāmāyan* all the postpositions, excepting that of the agent, which has no existence in this dialect, are often employed with the pronouns as in standard Hindī. But they are much more frequently omitted, and the inflected base of the pronoun, sing. or plur., may then represent any oblique case whatever. This is indicated in the tables by placing the postpositions in a parenthesis.

a. This remark as to the use of the oblique forms of the pronouns, applies not only to the old eastern Hindī, but, more or less, to all archaic Hindī poetry, as, e.g., to the writings of the Rājput bard, Chand, Kabir and others. Abundant illustrations will be found in the Syntax.

223. In the *Rāmāyan* *मैं* is used, instead of *मो* or *मोहि*, in the case

of the agent; as, *जो मैं पूछा नहीं होई*, 'that which I may not have asked'. The same remark applies to *तू* or *तैं*.*

224. Observe, that while the longer oblique forms, *मोहि*, *तोहि*, of the personal pronouns, are constantly used in the *Rámáyana*, both with and without the postpositions, on the other hand, the shorter oblique forms, *मो* and *तो*, always take the postpositions.

a. But in the archaic Hindí of Chand, according to Mr. Beames, even *मो* and *तो* are used for all cases more frequently without than with the postpositions. Among his examples are, *किम उधार मो होइ*, 'how shall there be salvation for me?'; *नाथ मो नाम चंद*, 'lord, my name is Chand'; *सुनिय बात तो ताल*, 'hearing this word, thy father'.†

b. *हम* is occasionally used in the gen. plur., for *हमारा*, as in the following from the *Rámáyana*; *ते पुन्यपुंज हम लेखे*, 'in my esteem, they are treasuries of merit'.

c. Besides the more common oblique forms of the 1st pers. pron., given in the tables, a form *मइ*, in the compound, *मइ सम*, (= *मुक्त वा*,) 'like me', occurs in one place only in the *Rámáyana*. Quite analogous to this, is an obl. sing. form, *तइ*, of the 2nd pers. pron., noted by Prof. De Tassy in his Hindouí Grammar.

d. The Sanskrit genitives sing. of the personal pronouns, *मम*, *तव*, 'my', 'thy', frequently occur in the *Rámáyana*, as in other Hindí poetry, but they cannot be accounted Hindí, and are therefore omitted from the tables.

225. The regular Old Púrbi forms of the Demonstrative pronouns, are *इइ*, *ईइ*, or *एइ*, 'this', and *ओ*, 'that'. But for *इइ*, a form *येइ* also occurs; as *राम भक्त कर लच्छन येइ*, 'this is a mark of devotion to *Rám*'. In the obl. sing., the proximate demonstrative is inflected to *इहि* or *रहि*; the remote, to *ओहि*, or rarely, *योहि*. Examples are, *इहि विधि भरत मज्जन करि*, 'in this manner *Bharat*, bathing'; *पुनि पुनि पूछति ओहि*, 'again and again she asks him'; *मेर अभाग्य जिआवत योही*, 'my evil fortune keeps him alive'; *रहि के हृदय*, 'in the heart of this (demon)'. *इहिं मह रघुपति नाम*, 'in this, the name of the lord of *Raghu*'.

a. In the plural, we most commonly meet the inflected forms, *इन्ह*, *उन्ह*, which, like the obl. sing. forms, are used, after the manner of the dialect, either with or without the postpositions. Thus, *राखिय*

* It should be observed, however, that the *Rámáyana* exhibits great confusion in the use of the direct and passive construction.

† Vide Journal As. Soc. of Bengal, Part I, No. II, 1873.

इन्हें आंखिन मार्यो, 'keep these (two) in your eyes'. For the dat. and acc. plur., forms इनहीं and इनहीं exist; as अगदीस इनहीं बन दीन्हा, 'the lord of the world gave a wilderness to these'. For these, इहें and उहें also occur.

b. In the *Rāmāyaṇ* we meet a form ओउ of the Remote demonstrative pronoun. The final उ is not an essential part of the word, but an emphatic particle, = Br. उ, H. H., उी. But sometimes it seems to be added merely *metri gratiā*, as, e.g., in the following; लोचन सजल जोरि कर दोउ : प्रभु सन कहु कहि सकत न ओउ ॥ 'his eyes full of tears, joining both hands, to the lord nothing could he say'.

c. Similarly, in old Hindī, we find the emphatic nom. sing. forms, इहो, इहे, (for यही,) of the Prox. demons. pronoun, इह (यह). Thus, निज लोकहिं दिरच गये देवन्ह इहे सिखाइ, '*Brahmā*, having delivered this instruction to the gods, went to his own world'; इहो कहत, 'saying just this'. The final रे or ओ has arisen from the *sandhi* of the final inherent अ of इह with the emphatic particle ई or उ, = H. H., उी. In the forms इहा, इहु, of the same pronoun, the final vowel is simply lengthened *metri gratiā*.

d. In the *Rāmāyaṇ* and other Hindī poetry, we occasionally meet the Sanskrit demonstrative अयं, 'this', as पापौघमय तव तनु अयं, 'per-
vaded by sin and impurity is this body of thine'.

226. The most common forms of the obl. sing. of the Relative and Correlative pronouns in the *Rāmāyaṇ* and similar poetry, are जिहि or जेहि and तिहि or तेहि. जाहि and ताहि also occur, but are to be assigned, not to eastern Hindī, but to the Braj. All these forms, as above remarked, are used in any case, either with or without the postpositions; as, e.g., जेहि दिस नारद बैटे, 'in what quarter *Nārada* was seated'; तिहि गिरि पर बट विसाला, 'on that mountain was a large fig-tree'. Instead of these longer forms, the Braj obl. forms, जा and ता, are often used, but generally with the postpositions. Like जे and ते, however, these are also sometimes used substantively without the postpositions, as in the following line; जा छट प्रेम ना बसे ता छट जानु मसान, 'in whose body love dwells not, regard his body as a burning-ground (of the dead)'. S.B.

a. The genitive is thus commonly expressed in the *Rāmāyaṇ* by जिहि, जेहि, and तिहि, तेहि, or जाकर, etc., as जेहि सुमिरत, 'by remembering (of) whom'; जा करि तैं दासी, 'whose handmaid thou art'. But the Braj inflected genitives, जासु, तासु, occasionally occur, and, still more rarely, जास, as, e.g., यह संवाद जास मन आवा, 'into whose heart this conversation enters'. A form ताहु, for तिहि, is found in a few

places, as *सरल गये प्रभु ताहु न त्यागा*, 'the lord hath not forsaken him (who) hath taken refuge with him', *lit.*, 'gone to his feet'.

b. *जेह* is found in the obl. sing. for *जेहि*; as *जेह मातु कीन्ही जाकरी*, 'who hath made (his) mother crazy'. In the phrase *खेड मन समुक्ति* (*Ram. L. K.*), 'thinking this in his mind', *खेड* is an emphatic form of the acc. sing. = H.H., *खोही*. Very rarely, the correlative *खो* is treated as if indeclinable, as, *e.g.*, *राम परायन खो परि होई*, 'over him, *Rám* is chief'.

c. Instead of the longer forms, *जिन्ह* and *तिन्ह*, *जे* and *ते* also sometimes occur in the obl. plur.; as, *e.g.*, *धन्य जे जाये*, 'blessed are they who bore (them)'; *ते देखे दोउ भ्राता*, 'they beheld the two brothers.'

d. The Sanskrit forms of the relative and correlative pronouns, are occasionally used in the *Rámáyana*, thus, *निरखति तद्वानन सादर ये*, 'who behold thy face with reverence'; *पश्यन्ति यं योगी*, 'whom ascetic saints behold'.

227. The most common form of the first Interrogative pronoun, *कौन*, in the *Rámáyana*, is *कवन*. To this, *ह* is sometimes added, as in the following, before a fem. noun, *कवनि वस्तु अदि प्रिय मोहि लागी*, 'what thing has been so dear to me?'. The Braj *को* is also occasionally used, as *खेच अगणित को गने*, 'who can enumerate (their) countless disguises?'

a. In the obl. sing. the regular forms, *किहि*, *कोहि*, are preferred to others when the pronoun is used substantively, as *कोहि सन करहिं बिरोध* 'with whom do they cherish enmity?'. The medial *ह* is sometimes dropped, as, *धनुष कोह तोरा*, 'who broke the bow?'. But when the pronoun is used adjectively, the nom. more commonly remains unchanged, as *मिते कवन बिधि जाला*, 'in what way may I obtain the maiden?'; or the nom. form in *ह* may be used; as, *करनि कवनि विधि जाह*, 'in what way can (all the wonders) be recounted?'. A third obl. sing. form, *कवने*, also occurs; thus, *भगतहीन सुख कवने काजा*, 'of what use is pleasure to one destitute of religion?'. This may be contracted to *कौने*, as *आवे कौने काज*, 'of what use can it be?'. The Braj obl. sing., *काहि*, is also found in the *Rámáyana*, as *सखय काहि*, 'whom wouldst thou serve?'. The plur. forms, nom. *कवन*, obl. *किन्ह*, *किन्होई*, etc., call for no special remark or illustration.

228. For the second Interrogative, *क्या*, when used substantively, *काह* (*काहा*) is the usual substitute in the *Rámáyana*. The Braj forms, *का* and *काहा*, also occur. *काहा* is also found in the obl. sing.; as *दुखन काहा*, 'for what fault?'. *कि* or *किं* is used for *क्या* as a mere sign of interrogation; thus, *होहि निरामिष कबहुं कि कारा*, 'will a crow ever live without meat?'

229. For the first Indefinite pronoun, कोई, कोउ, कवनिर, कौनो and कवनर are the common substitutes in the *Rāmāyaṇ*. Thus, कवनिर सिद्ध कि बिनु विश्वास, 'was there ever any saint without faith?'. I should suppose a nom. कवनिरु or कवनरु must exist, but have not noticed it. The इ of इ is however certainly preserved in the obl. form, कवनेरु, for कवनेर, which is also used, as in कवनेरु काल, 'at any time'. Besides the above nom. forms, कोहू and कोहि also occur, as in the following; अनुचित कहव न पंडित कोही, 'no wise man will call it wrong'; जानि न पाव जात यह कोहू, 'let no one know this thing'. We also find कोऊ and कोयी.

a. In the obl. sing. a variety of forms exist. कवनिरु occurs in the following; कवनिरु भंति बोध नाईं आया, 'in no way did he comprehend'. काहु. (in the dat. and acc. काहुहि,) is also used; as काहुहि दोष अनि देहू, 'do not impute blame to any one'. In the following we have कोई; कहि न जात बिधि कोई, 'it cannot in any way be told'; इ is lengthened *metri gratiā*. An obl. plur. form, काहुन, exists; thus पान सब काहुन पावे, 'every one received *pān*'.

230. The second Indefinite pronoun, कहु, is used in old Pūrbī poetry, but कहु is preferred, often in the augmented Prakritic form, कहुक. It is always indeclinable, as in standard Hindī. Thus, राम कहुक दिन जास करहंगे आह, '(after) some days *Rām* will come and dwell (here)'.

231. The Reflexive pronoun commonly appears in old Pūrbī as आपु or आपुन; as आपुन होह न सोह, '(but) that same himself is not'; नरस आपु चढ़ेर, 'the lord of men himself mounted'. The genitive of the reflexive in the same dialect is आपन, as in the following, where आपन 'one's own', is contrasted with पर, 'another's'; आपन पर कहु सुनै न कोई, 'no one heard his own (or) another's (voice)'. The fem. form is आपनि, as आपनि दिस, 'toward myself'. The penultimate vowel is sometimes lengthened *metri gratiā*, thus, आपाना, आपानि.

a. Frequently, in the *Rāmāyaṇ* and other poetry, the Sanskrit indeclinable reflexive pronoun, स्वयं, is substituted for आप. Thus, दहन पावक हरि स्वयं, '*Hari*, himself a consuming fire'. Similarly, for the possessive, आपन, the Sanskrit inseparable possessive particle, स्व, is often prefixed to a word; as स्वकर काटि सीस, 'cutting off (his) head with his own hand'.

232. For आप का, the gen. of the Honorific pronoun, आप, the usual substitute in old Pūrbī poetry is राडर; as भरत कि राडर पूत न होही, 'is not *Bharat* your majesty's son?'.

233. The remaining colloquial dialects call for little remark.

Observe, that in the Bhojpúri and Riwáí dialects the medial **र** is always pronounced short, thus, जेन, *jěn*, केन्ह, *kěnh*, etc.

a. In the modern eastern colloquial dialects, as, *e.g.*, the Avadhí and Bhojpúri, the word सब, uninflected, is commonly added to the base of the obl. plur., instead of लोग, whenever a true plural is intended. Thus, Bh., हम सब में = H. H., हम लोगों में; A., तुम सब कर = H. H., तुम लोगों का, etc.

b. In some districts in the east, the final consonant **क**, of मुक and तुक, is changed by the rustics to **ख**, giving such forms as मुखे, तुखे, मुख से, तुख को. etc.

c. In the Bhojpúri dialect, the longer plural forms, as बनकरा से, बनकरा के, etc., are used in preference to the shorter forms, when emphasis is intended. To the forms given in the tables, Mr. Beames adds तोरा and तोहरा, for तुहरा (तुम्हारा), and, in Sháhábád, मोह से, for हमरा से (मुक से). For the plur. of केहू (=कोई), कितेक is commonly employed; as कितेक घर जलत जा, 'some houses are burning'.

234. The Honorific pronoun, आप, is in use throughout the Ganges valley, and, so far as I have noticed, is declined as in the standard dialect, except, of course, that the postpositions peculiar to each locality are appended to the stem. But, in the dialect of Riwá, the nom. sing. is अपना. This is inflected to **र**, as in अपने कोर = H. H., आप का; but sometimes the inflection is neglected, as in अपना पर = H. H. आप पर.

a. Further east, as in Bhojpúr, and elsewhere, the word दौरा or दररा, plur. दररन्ह, is the substitute for the honorific pronoun आप. It follows the declension of substantives. Instead of दररा, रवाँ is also sometimes heard.

b. In the Panjáb and the Himalayas the common people are not so particular about using the honorific pronoun, and frequently address their superiors with *tum*, when no disrespect is intended. Indeed, so far as the writer's observation has gone, *áp* is rarely heard from the mountaineers of the Himalayas, except from individuals who may have mingled much with the people of the plains. So also the singular, *tú*, is freely used among the same people, when in the Ganges valley we would only hear the plural, *tum*.

235. In the following paradigms, the inflected form of the genitives is not given, but may be readily learned from the rules for the dialectic inflection of adjectives and substantive genitives.

N.B. For the plural, the word लोग, or, in the eastern dialects, सब, may be added to the nom. and then declined throughout.

236. Observe, that whenever, in the above tables, we have a final short vowel, in poetry this vowel may, *metri gratiâ*, be optionally lengthened, so that we may have, *e.g.*, such forms as ओही, केही, काहू, for ओहि, केहि, काहु.

237. Observe further that *Anuscâr* is freely inserted or omitted in all the above pronouns, both in the terminations and, less frequently, in the pronominal base. Thus, *e.g.*, we have जौन, कौनो, केहिं, यां, for जौन, कौनो, केहि, या, etc., etc. It has not been thought necessary to give all such trifling variations in detail.

238. Occasionally, for the acc. postposition, को, the postposition तर्हे, (also written तारहे, तारिं, तारि and तारिी,) is used in construction with the genitive. Thus we find मेरे तर्हे, उस के तर्हे, for the acc., मुझ को, उस को. तारिं is also sometimes added, like को, directly to the inflected base. Thus in the Mārwarī play of *Hira* and *Ranjā*, we have देंगे भेद. . . . मुझ तारिं, '(they) will give thee the secret'.

a. The postpositions में and पर are occasionally found, even in standard Hindī, in construction with the genitive of the pronouns, thus मेरे में, तेरे पर, ता के पर, etc.*

239. In the gen. sing. of the 1st and 2nd pers. pronouns, besides the forms given in the tables, the Mairs use म्हेको and थैको.† Also observe, that in both *colloquial* Mārwarī and Mewārī, जो (masc.) and या or या (fem.) are uniformly employed for यह, 'this', and वो (masc.) and वा (fem.) for वह, 'that'. The distinction of gender is preserved in the nom. sing. only. Of the former pronoun, the regular obl. sing. is हैं in both these dialects. In the colloquial of Mārwar and Mewar the relative is very commonly used for the correlative pronoun. ‡

240. To the forms given in the above table, may be added the following; some of which I am unable to assign to any specific time or locality. Many of these are no doubt to be regarded as mere variations in spelling.

* Compare the Mārwarī idiom noticed in § 144.

† For the pronunciation of the first diphthong, जौ, in these forms, see § 25.

‡ The student will note the difference here indicated between the colloquial of Mārwar and the Mārwarī of the plays. (§ 216.)

a. **हूँ**, = **मैं**, 'I', is evidently a shortened form of the **Mārwarī हूँ**.^{*} An abbreviated form, **सुह**, for the obl. sing., **मेहि**, is sometimes used by Chand. **हमन** very rarely occurs as a nom. plur. for **हम** or **हम लोग**. Chand makes the obl. plur. of the 1st and 2nd personal pronouns **हमहि** and **तुमहि**. But **हम** and **तुम** with the postpositions, are also employed.

b. **तैं** and **तैं** are sometimes substituted for **तैं** or **तू**, 'thou'. In western Hindī, I have met with a gen. sing. of this pronoun, **तैंदा**, for **तेरा**; as, e.g., **पकड़े मुगलाबी तैंदा हाथ**, 'let the wife of the Mogul take thy hand'. A Prakritic gen. sing., **तुच**, (for Sk. **तव**,) is now and then used in archaic Hindī.

c. In the nom. sing. of the proximate demonstrative **यह**, the following variant forms occur, viz. :— **योह**, **येह**, **जिह**, **हँह**, **हँहु**, **हँहि**, **हँही**, **रह**. Of these, the last three appear, in some cases, to be merely emphatic forms. In the east, **य** and **ये** are also heard. In the obl. plur., we find **हँलि** and **हँन्ह**.

d. In the declension of the remote demonstrative, **वह**, **कँह** occurs in the nom. sing., and, in the obl. sing., **वै** is sometimes found for **वा**, and **वाहु**, for **वाहि**. For the obl. sing., **उस**, rustic Mohammedans sometimes substitute **वुस**. It occurs also in the following from the **Mār. Play of Gopī Chand**; **धरो तुसी के ध्यान**, 'fix (your) thoughts on him'. In the obl. plur., **उने**, **तुने** and **उनवों** are found for the dat., **उन्हें**; and **उने**, in the case of the agent, for **उन ने**.

e. Variant forms of the correlative pronoun are, in the nom. sing., **सोव**, **सोय** and **सैय**, for **सो**. The latter two are emphatic forms. In the obl. sing., **ति** and **तिहु** occur, for **तिहि**; I have also met with a gen. sing., **तासनै**, = **तिस का**, which evidently belongs to the S. W. **ता** alone is used as gen. sing. in the following; **कहा नाम ता चाहि**, 'what is his name?'. (*P. S. Ch. IX.*) A nom. plur. **से**, for H. H., **सो**, is used colloquially between Allahabad and Benares. **जिनलि** is found for the

^{*} **हूँ** is said by Prof. Eastwick, (*Vocabulary to Prem Sāgar, sub voc.*), to be used in the obl. sing. with the postposition **कै**, in the following Arrdh Chaurpái; **क्यों हूँ कै पति रही हमारी**. But **हूँ**, in this place, is in fact the Braj emphatic particle, = **हो**; and **कै** is a Braj form of the conjunctive participle, **कर** (from the verb **करना**), which is in High Hindī added directly to **क्यों**, making **क्योंकर**. We therefore render,— 'how (then) remained my honor?' *Krishna to Buleminí, P. S.—Ch. LXI.*

obl. plur., जिन्हें, of the relative. तिने. for तिन्हें, and तान. for the obl. plur., तिन, of the correlative, also occur in literary Hindi.

f. For the nom. sing. of the interrogative, कौन, we find in the 'Chrestomathie' of Prof. De Tassy, कौनु, कौने and कौनें. An obl. sing. and plur., काय, for किस. is found in western Hindi. कोहय and काउ occur, for the indefinite, कोई, and कहुय, कहि and कहु, for कुछ. कहि and कहु belong to the west. For the Braj interrogative, कहा, = क्या, we sometimes have कहे, and in the obl. sing., काहे, for काहे.

g. As the nom. sing. of the reflexive pronoun, आप, I have met with आपे. With this same pronoun, is evidently to be connected a Mār. nom. plur. form, आपां. In the only place, however, where I have met with it, हम would have been used in standard Hindi. In the obl. forms of this pronoun, u is often substituted for a after p, as, e.g., in आपुस, obl. plur., for आपस.

241. In the translation of the N. T. into Bhagelkhandi Hindi,* the following peculiar pronominal forms occur. The nom. plur. of the 1st personal pronoun is हमारे, and the obl. plur., हमनु. Of the 2nd personal pronoun, the nom. plur. is तिहारे, and the obl. plur., तिहरिनु. ये and यहै are both found in both the nom. and obl. plur. of the proximate demonstrative. यहै also occurs as nom. sing. The plural of this and other pronouns, is sometimes formed with सब, 'all', as in other eastern dialects; thus, ये सबरेनु तैं. H.H., हन लोगों से. The nom. plur. of the remote demonstrative, वहे (वह), is वे, and the obl. plur., always वाहुन. The relative and correlative make the obl. plur., जिननु, तिननु. The interrogative is कौनु; the nom. and obl. sing. are alike. The remaining pronominal forms correspond closely to the Braj. All the obl. forms above given, are used with the postpositions, which for the most part are the same as in Braj. But में is used for नैं.

PRONOMINAL ADJECTIVES.

242. Besides the above pronouns many pronominal adjectives occur. They may nearly all be used either as adjectives or as pronouns. Two series, the one expressive of quantity, the other of kind, are formed from the five pronominal elements noted in §191. When used substan-

* Baptist Mission Press, Serampore, 1821.

tively, they all follow, in standard Hindí, the first variety of masculine declension; when used adjectively, they follow the laws for the inflection of Tadbhava adjectives in ऋ, and are thus inflected to र, masc., and ई, fem. The following tables exhibit, first the standard forms, and then the dialectic forms of each series :—

TABLE X : PRONOMINAL ADJECTIVES.		
Pron. Base.	ADJECTIVES OF QUANTITY.	ADJECTIVES OF KIND.
इ य	इतना <i>itná,</i> इत्ता <i>ittá,</i>	'this much'. ऐसा <i>aisá,</i> 'such', 'like this'.
उ व	उतना <i>utná,</i> उत्ता <i>uttá,</i>	
जि	जितना <i>jitná,</i> जित्ता <i>jittá,</i>	'as much'. जैसा <i>jaisá,</i> 'like which', 'as'.
ति	तितना <i>titná,</i> तित्ता <i>tittá,</i>	
कि क	कितना <i>kitná,</i> कित्ता <i>kittá,</i>	'how much?'. कैसा <i>kaisá,</i> 'like what?', 'how?'.

243. Besides the forms given in Table XI, the following additional modifications of some of these pronominals occur, viz. :— for उतना, जितना, जेतना, दुतना; for कित्ता, कित, कित्ता, कौत्ता, कित्ते; and for जित्ता, जित्ता. The following forms also are occasionally used in literature, viz. :— जै, तै, कै. They are respectively equivalent to जितना, तितना, कितना.

a. The Sanskrit forms, ईदृश. एतादृश, = ऐसा, यादृश, = जैसा, तादृश, = तैसा, and कीदृश, = कैसा, are occasionally used in poetry. For ईदृश and कीदृश we also find एदृश and कादृश.

TABLE XI: DIALECTIC FORMS

	<i>H. Hindí.</i>	<i>Kanaují.</i>	<i>Braj.</i>	<i>Márwáří.</i>	<i>Mewáří.</i>

certainty to any particular time or locality; but, from analogy, they appear

244. Besides the above, the following words also are used as pronominal adjectives. Those which terminate in चा follow the declension of Tadbhava nouns or adjectives inflected to र. The others, when used substantively, are declined like the second variety of masc. nouns; when used adjectively, they are indeclinable.

एक	<i>ek,</i>	'one'.	और	<i>aur,</i>	'other', 'more'.
दूसरा	<i>dúsrá,</i>	'another', 'the other'.	बहुत	<i>bahut,</i>	'much', 'many'.
दोनों	<i>donon,</i>	'both'.	कई	<i>kaí,</i>	} 'several', 'how many?'
सारा	<i>sára,</i>	'all', 'the whole'.	को	<i>kai,</i>	
सब	<i>sab,</i>	'all', 'the whole'.	निज	<i>nij,</i>	'self', 'own'.
हर	<i>har,</i>	'every'.	परार्थ	<i>paráí,</i>	'another person'.

245. एक *ek*, strictly speaking, is a cardinal numeral, and दूसरा *dúsrá*, an ordinal. एक, 'one', when used pronominally, is usually followed by दूसरा, 'the other', in the succeeding clause; as एक हँसता दूसरा रोता था '*ek hanstá, dúsrá rotá thá*, 'one was laughing, the other was crying'.

a. Sometimes एक itself follows in the second clause, when the first एक should be rendered 'one', the second, 'another'. Thus, एक यह एक वह कहता था '*ek yah, ek wah kahtá thá*, 'one was saying this, another that'.

b. When दूसरा follows एक in the same clause, the two have a reciprocal force; as वे एक दूसरे को मारते हैं '*ve ek dústre ko márté hain*, 'they are beating one another'. एक is indeclinable in the plural.

246. दोनों *donon*, 'both', is declinable in the plur. only, thus Nom. दोनों *donon*, Acc. दोनों को *donon ko*, etc.

247. सब *sab*, 'all', 'every', commonly aspirates the final स in the oblique plural; thus, Acc. सभी को *sabhon ko*, Gen. सभी का *sabhon ká*, etc. But सभी, also, rarely occurs.

a. When used in the singular, as सब को *sab ko*, 'to all', it denotes 'all' considered as a unity, 'the whole'; in the plural, it represents 'all' as a plurality, 'every', 'every one'.

248. The Persian adjective हर *har*, 'every', though not very common in classic Hindí, is found even in the *Prem Ságar*, and is freely used in the colloquial. It may therefore be fairly regarded as belonging to the language. It is never used substantively. Compounded with एक *ek*, it means 'every one' or 'every single', and is used either as a substantive or adjective, thus, हर एक आया *har ek áyá*, 'every one came'; हर एक घर *har ek ghar*, 'every single house'.

249. और *aur*, when used substantively, and followed by no other pronominal in the next clause, always signifies 'more'; as मुझे और दो *mujhe aur do*, 'give me more'. But when used adjectively, it may mean either 'more' or 'another', as the context may determine. Thus मुझे और अनाज दो *mujhe aur anáj do*, 'give me more grain'; but यह और बात है *yah aur bát hai*, 'this is another matter'.

a. When और is repeated in two successive clauses, the first is to be rendered 'one', and the second, 'another'. Thus यह बात और है वह और है *yah bát aur hai wah aur hai*, 'this is one thing, that is another'.

250. Besides बहुत, 'much', we meet the intensive forms, बहुतेरा *bahuterá*, and बहुत सा *bahut sá*, 'very much', 'very many'.

a. Colloquially, सारा is also added to बहुत, 'many', with an intensive force; thus बहुत सारा is equivalent to the colloquial English idiom, 'a great deal'. This use of सारा is only colloquial. In Panjábí it is employed much more extensively.

251. कई *kai* or कै *kai* as an adjective means 'several'; when used as a pronoun, it must be rendered 'how many?'. It cannot take the postpositions. Thus, कई पुरुष आए *kai purush áe*, 'several men came'; कै आए *kai áe*, 'how many came?'. Where in English 'several' has a pronominal force, it must be rendered in Hindí by कई एक *kai ek* or

कितने एक *kitne ek*; as कई एक हैं *kaí ek hain*, 'there are several'. But कई हैं *kaí hain*, would be interrogative,—'how many are there?'. कई एक *kaí ek*, and कितने एक *kitne ek*, however, may also be used adjectively in the same sense; as कितने एक पेड़ हैं *kitne ek per hain*, 'there are several trees'.

a. The pronominal adjective कितने *kitne* is also used in the sense of 'some', 'several', both substantively and adjectively. Thus, वहाँ कितने भाट भी आए *wahán kitne bhát bhí áe*, 'several bards also came'; कितनों का मत है *kitnon ká mat hai*, 'it is the opinion of some'.

252. निज *nij*, 'own', may be used as a pronoun, the person referred to being determined by the context; as निज का घर है *nij ká ghar hai*, 'it is (my, his, etc.) own house', निज बुद्धि भरोस मोहि नाही *nij buddhi bharosa mohi náhi*, 'I have no confidence in my own wisdom'. Or it may be added to possessive genitives of both nouns and pronouns, in the sense of the English 'own', as वह राजा का निज पुत्र है *wah rájá ká nij putra hai*, 'he is the king's own son'; यह मेरी निज पुस्तक है *yah merí nij pustak hai*, 'this is my own book'; वह अपने निज घर गया *wah apne nij ghar gayá*, 'he went to his own house'.

253. पराई *parái*, 'another's', is properly a possessive adjective. It may be used either with or without a noun; thus, यह पराई का है *yah parái ká hai*, 'this is another's'; पराई स्त्री *parái strí*, 'another's wife'.

254. The words सकल *sakal* (Sk. स+कल), and समस्त *samast* both signify 'all'. They are rarely, if ever, used as nouns.

255. The following dialectic variations of the above pronominals occur, *vis.*: for एक, एक and एक; for दूसरा, Br. दूसरो, K. दूसरो, Old Púr. दूसर, दूख; for दोनों, Br. दोनों, M. दान्दुं, Old Púr. दुहुं, दूनौं. दुधौं; for सारा, Br. सारो, K. सारो; for सब, Br. सबै, सबरै, Old.Púr. सबरि; for और, Old Púr. अवर; for बहुत, Br. बहौत, Old Púr. बहुतेक. बहुत; in Garhwál मिंडो, and in Márwár जोत, जोदी, जोला, जोहोत, and मोकलो are the substitutes for बहुत. For कई, Már. has कोई. For सकल, Br. gives सिगौ, and the Rámáyan सगरे (nom. plur.). For कितने एक, the Márwáří has कित्तीक.

256. The following pronouns are Sanskrit. The most of them, as compared with the foregoing, are of rare occurrence in the colloquial, but are more frequent in literature, especially in poetry.

अन्य <i>anya</i> ,	'other'.	बहु <i>bahu</i> ,	}	'much'.
अपर <i>apar</i> ,	'another'.	भूरि <i>bhūri</i> ,		
अमुक <i>amuk</i> ,	'a certain one'.	युग <i>yug</i> ,	}	'both'.
उभय <i>ubhaya</i> ,	'both'.	युगल <i>yugal</i> ,		
किमपि <i>kimapi</i> ,	'any'.	युग्म <i>yugma</i> ,	}	'all'.
पर <i>par</i> ,	'another', 'other'.	सर्वे <i>sarv</i> ,		
प्रत्येक <i>pratyek</i> ,	'each'.			

257. अन्य, as also the more common corrupted form, आन, is 'another', in the sense of 'a different one', like the Greek *heteros*; but अपर is 'another', numerically, like the Greek *allos*. Thus, अन्य देश गया, 'he went to another country'; नहीं आन उपाय, 'there is no other expedient'; but अपर हेतु सुनु, 'hear another reason!' In many words पर not only denotes 'another', as पर दोष, 'another's fault', but, especially in compounds, suggests that other as distant: as, e.g., परदेश, 'a foreign country'; परलोक, 'the other world'.

258. The related words, युग, युगल, युग्म, 'both', 'the two', strictly speaking, are all nouns, meaning 'a pair'; but they are practically pronominal adjectives, as will appear from the following examples: युग भूपति, 'the two kings'; युगल नयन जलधारा बही, 'from both eyes a stream of water flowed'; स्वयंकि युग्म जोरि के, 'joining my two hands'. Examples of the use of the other Sanskrit pronominals are the following: उभय अपार उदधि, 'both a boundless ocean'; किमपि प्रयोजन नाही, 'there is not any need'; अमुक कहता है, 'a certain person says'; प्रत्येक दिन, 'every day'.

259. प्रति, (indeclinable,) is occasionally used as a pronominal adjective; thus, प्रति अवतार कथा प्रसु कोरी, 'the story of each incarnation of the Lord'. बहु and भूरि, 'much', are both equivalent to बहुत, and, like most of these Sanskrit pronominals, are chiefly used in poetry.

COMPOUND PRONOUNS.

260. The relative pronoun may be compounded with the correlative or the indefinite pronouns. Each member is then inflected, but the postposition is added to the last only.

Thus, with *जो*, we have *जिस तिस का* *jis tis ká*, 'whosoever'; with *कोई*, *जो कोई* *jo koí*, 'whoever'; *जिस किसी को* *jis kisí ko*, 'whomever'; with *कुछ*, *जो कुछ* *jo kuchh*, 'whatever'.

a. In the *Rámáyana* a similar Sanskrit compound occurs, in the phrase, *जेन केन विधि*, 'in whatever way', where *जेन केन*, (for *येन केन*,) is in the instr. sing.

261. Other compounds are formed with *और* *aur*, 'other'; as *और कुछ* *aur kuchh*, 'something else'; *और कोई* *aur koí*, 'some one else'; *और कौन* *aur kaun*, 'who else?'. *और क्या* *aur kyá*, 'what else?', is colloquially used as a reply of strong affirmation.*

a. Sometimes *और* occupies the second place, but the compound has then a different meaning; as *कोई और* *koí aur*, 'some other'; *कुछ और* *kuchh aur*, 'some more.'

b. The pronominal, *अन्य*, 'other', is compounded with itself in the form *अन्योन्य* (Sk. *अन्योन्य*), 'each other', 'mutual'; but this is rare in Hindi. The two are occasionally written separately, thus; *अन्यो अन्य प्रीति तै*, 'with mutual love'.

262. The particle *सा* *sá*, (infl. *से* *se*, *सी* *sí*,) may be added to the nom. form of *कौन*, thus; *कौन सा* *kaun sá*, *lit.*, 'what like?'; *वह कौन सा पेड़ है* *wah kaun sá per hai*, 'what tree is that?', *i.e.*, 'what kind of a tree?'; but *वह कौन साहब है* *wah kaun sáhib hai*, 'what gentleman is that?'

a. The same affix is added, colloquially, in the east at least, to the relative, *जौन*, and correlative, *तौन*, making *जौन सा*, *तौन सा*; and in the Doáb to the demonstratives, *यह* and *वह*, making *यह सा*, *वह सा*. But I have never met these forms in literature.

b. In old eastern poetry, however, the equivalent affix *सम* is added to the inflected base of the demonstratives, thus; *एन सम*, *एन्ह सम*, 'like this'; *एन सम*, *एन्ह सम*, 'like that', or 'like him'.

c. For *कौन सा*, the Mewári has *खीयो*, fem., *खी*, as in the following; *खीये मनव घां रे कीयो*, = *कौन से मनुष्य ने तुम को कहा*, 'what man told you?'

263. The indefinite pronouns are also compounded with

* In Garhwál, *aur* alone is used, with a peculiar intonation, in the same sense of a strong affirmative.

सब *sab*; as सब कोई *sab koī*, 'every one', सब कुछ *sab kuchh*, 'everything'. Before कोई, हर *har* may be used instead of सब, in the same sense.

264. A peculiar indefinite is formed by repeating the indefinite pronoun with the negative particle, न, interposed; as कोई न कोई *koī na koī*, 'some one or other'; कुछ न कुछ *kuchh na kuchh*, 'some thing or other'. In the former case, both members are inflected in the oblique cases, but the post-position is added only to the second; as किसी न किसी का खेत *kisī na kisī kā khet*, 'the field of some one or other'.

265. कुछ is idiomatically added to various pronouns and pronominals to give them an indefinite sense; it is then often scarcely capable of translation. Thus, हम क्या कुछ बेंगे, 'what we shall be'; बहुत कुछ, 'a great deal'. Similar are यह कुछ, कितना कुछ, etc.

266. The following pronominals belong rather to Urdú than to Hindí, but as they will be found in some modern Hindí books, they are enumerated here.

बाज بعض,)	'some'.	कुलانا كُلاَنَا,	'a certain one'.
बाजे بعضے,)		कुल كُؤَل,	'the whole'.
गैर غیر,	'other', 'different'.	खंद چند,	'many', 'several'.

267. Of these, all are Arabic, except खंद, which is Persian. गैर is sometimes used as a negative prefix, especially in the compound, गैर हाजिर (غیر حاضر), 'absent', 'not present'. कुलाना is always pronounced *fuláná*. Although it belongs rather to Urdú than to Hindí, still it is often heard from Hindí speaking people, especially in some parts of Oude, where, in a dialectic form, कुलनवा, it is often used, instead of the remote demonstrative, for a third personal pronoun.

Origin of the Pronominal forms.

268. It is impossible, within the limits of the present work, to discuss in every detail, all the very numerous variations of the Hindí pronouns. We can only briefly indicate the probable origin of the more common forms. In the nom. sing., मैं or मे, of the 1st personal pronoun, we probably have the Sk.

instr. sing., *mayá*, Prák. *mai*, transferred to the nom. The *ne*, therefore, which is added to *mai*, in the case of the ag., in High Hindí, is really superfluous, and in Márwáří and the Old Púrbí, *mai*, alone and properly, denotes that case. The same remarks, *mutatis mutandis*, apply to *tai*, the Braj nom. sing. of the 2nd personal pronoun.

a. Besides the 1st pers. nom. sing., *mai*, from a labial theme, the Braj presents a form, *haus* or *hos*, which has arisen from the corresponding Sk. *aham*, through Prák. forms, *ahamam*, *hamam*, *haam* or *haum*. In the Már. *hús* or *hus*, we have the same word, with the common reduction of the diphthong, (§75.) The corresponding Me. *mhús*, I would attribute to the theme *sma*, which appears in the Sk. base, *asmad*, and is also the base of the Sk. plur. declension of this pronoun. It presupposes a Prák. form, *asmakam*, after the analogy of the Prák. *tumakam*, for Sk. *tvam*, H. *tú*. This theme, *sma*, in Prákrit, regularly became *mha* (§97); so that from *asmakam*, *k* being rejected, we would have *amhaam*, and thence, as above, *mhaus*, *mhus*. With the same theme, *sma*, I would connect the Bh. nom. sing., *ham*, *m* and *h* having been transposed and *a* inserted between them.

269. The nom. sing., *tú*, of the 2nd person, has arisen from the Sk. nom. sing., *tvam*. The final nasal is preserved in the Már. and Old Púrbí, *tús* or *tus*. But I am inclined to regard the *tú* in *tú ne*, ag., as a gen. from the Sk. *tava*, through the Prák. *tua*. The Av. and R. nom. sing., *tayas*, points to the Sk. inst. sing., *tvayá*, as its original. An analogous derivation may be suggested for the R. 1st pers. sing., *mayas*.

a. The Bh. nom. sing., *tush*, is a weakened form of *tumh*, for *tushma*, the base of the plur. in standard Hindí, where the theme *tu* has received, like the pronominal themes, *a* and *yu*, in Sanskrit, the increment *sma*. In the Me. and Már., *thús*, we have apparently a transfer of the aspirate of *tumh* from the end to the beginning of the syllable, as in §97.

270. The obl. sing. forms, *mujh*, *tujh*, have their immediate origin in the Prák. genitives sing., *majjha*, *tujjha*, for *mah*, *tuh*. Prof. Lassen (*Inst. Ling. Prac.* §50) gives an apposite example of this change in the Prák. root, *lijjh*, for Sk. *lih*. The form *mah* occurs in the *Rámáyana*, and must be referred to a Prák. gen. sing., *masya* (?) for Sk. *mama*; and, by analogy, *tuh*, to a Prák. gen., *tusya* (?) for Sk. *tava*, formed after the analogy of the other Sanskrit pronominal genitives.

a. Braj, Kanaují, Avudhí and some other dialects present in the personal pronouns, the obl. sing. themes, *mo*, *to*. These also are true genitives, and are so used by Chand. (*Vid.* §224, a.) Their immediate original is to be found in the Prák. genitives sing., *mahu* (and *tahu* ?), which again, through the common change of *s* to *h*, may be compared with the Br. pron. genitives, *jásu*, *tásu*. In this *su* Prof. Lassen judges that we have the Sk. possessive, *sva* (*Inst. Ling. Prac.* §175, 6.) The R. obl. sing. themes, *mvá*, *tvá*, will be considered in §283. The analogy of the Braj leads us to ascribe a similar origin to the Me. obl. sing.

themes, *mho, tho*, from Prák. bases, *asmaka, tusmaka*, to which, as above suggested, we may suppose that the possessive *sva*, (Prák. *su, hu*,) was originally added.

271. In the Máf. forms, 1st pers., *mhaiṣ*, 2nd pers., *taiṣ* or *thaiṣ*, we have a true instr. sing., with which the abl. postposition, *súṣ*, must be regarded as in grammatical construction, as would be its original, *sam*, in Sanskrit. I should suppose, however, that the same forms in the loc., *mhaiṣ máhai, thaiṣ upari*, etc., must be regarded as accusatives, for I have found no instance of the Sk. *madhye* and *upari* in construction with the instr. case, but only with the gen. or acc. In the later Prákrit, the pronominal termination *aiṣ* is found in the acc., instr. and loc. Thus the analogous Prákrit forms, *taiṣ, aiṣ*, are either acc., instr. or loc. After the same analogy, probably, may be explained the G. and Ku. obl. forms, *maiṣ, meṣ, twai*, as Prákrit instr. or acc. sing. forms in grammatical construction with the postpositions.

272. In the genitive *mhárau*, the suffix may have been originally added, as sometimes in Prákrit, to the base itself, *mha*; in which case, the long *á* has arisen from the elision of the *k* of the original *karau* (*karakaḥ*), the earlier form being, doubtless, *mha^hkarao*, whence *mha^harao, mhárau*. But in the acc. and dat. forms, *ma nai, mha nai, ta nai, tha nai*, as there is no lengthening of the final vowel of the theme, I infer that the theme here is an abraded case-form, probably the gen. So in the Me. gen., *mhauro*, or *mhaulo*, as also in the eastern gen. *mor*, the original suffix (*karakaḥ* or *kalakaḥ*) was apparently added to the genitive. The same remark may be made of the genitives, *merá, terá*, etc., in which the affix has been added to the Sanskrit genitives, *me, ta*. In the Bh. obl. sing. forms, *hamará, tuhárá*, we have, as in *mo, mujh*, etc., a modern genitive taken as a new theme of the oblique cases. We would have expected, as in other dialects, *hamárá, tuhárá*; the shortening of the vowel is possibly to be explained by reference to the accent (?). The *h* of *tuhárá*, as in all the plur. forms of the pers. pronouns, represents the *s* of *sma*; by which is formed from *tu*, the increased base, *tusma*.

a. The remaining sing. forms, *mohi, tohi*, etc., of the personal pronouns, will be best considered when we shall deal with the analogous forms, *jáhi, láhi*, etc., of the remaining pronouns.

273. Most of the dialects present *ham*, as the nom. plur. of the 1st personal pronoun. This has arisen, by transposition of the consonants and loss of the plur. termination, from the regular Prák. nom. plur., *mhe*, which is still the nom. plur. in Máf. This Prák. nom., *mhe* (*amhe*), evidently stands for an earlier form, *asme*, for the regular Sk. nom. plur., *vayam*, in which the theme, *ama*, of the Sk. obl. plur., *asmán, asmábhīḥ*, etc., was assumed also into the nom., and the plur. termination, *i*, added after the analogy of all the other pronouns; so that *asme* (= *asma + i*) corresponds precisely to the Sk. nominatives plur., *te, ime, ye*, etc. In the B. nom. plur., *hamh*, I suspect that the *h* has been ignorantly added to make the form correspond to the 2nd pers. nom. plur., *tumh*, of the same dialect. The Me. nom. plur., *mhaiṣ*, as

I conjecture, stands for the acc. plur., *amhāis*, of the western Prākṛit, which has been assumed into the nom., after the manner of the English objective, in the vulgar phrase, 'it is me'.

274. The most common form of the nom. plur. of the 2nd person, is *tum*. For this, in archaic Hindī, we have the form *tumh*, (also *tumah*,) which is but one step removed from the Prāk. nom. plur., *tumhe*, for the Sk. *yūyam*. The sing. theme, *tu* (*tva*), increased by the pronominal element, *ma*, was for the sake of regularity, substituted for the increased theme, *yushma*, of the Sk. plur., and, as in the case of the 1st pers., *asme* (*amhe*), a nom. plur., *tushma*, was also formed from the theme of the obl. cases, after the analogy of the other pronouns, making *tushme*. It would therefore appear that besides the classic Sk. irregular plur., *yuyam*, *yushmán*, *yushmābhīh*, etc., a more regular plural, *tumme*, *tushmán*, etc., was also formed from the base of the sing.

275. In the Mār. nom. plur., *the*, the aspirate of *tumh* has been transferred to the beginning of the previous syllable, (giving *thume*?). The nasal thus left alone, has been weakened to *Anusvár*, and then lost, and the labial has disappeared before the diphthong, as in the sing., *tain*, for *twayá*, etc. In the Me. *thain*, we have probably an acc. transferred to the nom., as in the 1st pers. *mhair*, so that *thain* stands for the Prāk. acc. plur., *tumhāis*.

276. The acc. and dat. forms, *hameṅ*, *tumheṅ*, etc., of the personal pronouns, have arisen immediately from the Prāk. accusatives plur., *amhāis*, *tumhāis*. The hiatus points to the loss of an *h*, so that the forms in question really stand for *amhahis*, (*hamahis*,) and *tumhahis*;—Prākṛit forms which occur frequently even in archaic Hindī. This *hiṅ* I take to be identical with the same termination in the acc. and dat. sing. of nouns in old Hindī, already noticed in §155, b.; i.e., it is probably identical with the Sk. loc. sing. termination, *smiṅ*.

277. Most of the dialects present a longer and shorter theme in the obl. plur.; as, e.g., *ham* or *hamoṅ*, *tum* or *tumhoṅ*, etc. All these themes in all their varieties were originally genitives plur. The longer forms, refer us, perhaps, to the increased Prākṛit themes, *asmaka*, *tushmaka*; the shorter forms, to the simple themes, *asma*, *tushma*. *Ham* and *tum* or *tumh* are both used as genitives in old Hindī (§224, b.), as also are the equivalent *amha*, *tumha*, in the later Prākṛit, where the gen. term., *āṇam*, of the earlier Prāk. has quite disappeared. The longer forms, *hamoṅ*, *hamani*, *tumhoṅ*, *tumani*, *tuhani*, are to be explained by reference to the Prāk. gen. plurals, *amhāṇam*, *tumhāṇam*, which were formed on the model of the gen. plur. of the 1st decl. of Sk. masc. nouns. The terminations, *oṅ*, *ani*, etc., have therefore arisen in the same way as the same terminations in the declension of substantives. (§157.) In the short *u*, of the G. *tumuoṅ*, *hamuoṅ*, we have a still further reduction of *o* to *u*. (§75.)

278. In the Mār. and Mewārī, the Prāk. gen. plur. term. *āṇam*, for Sk. *āṇam*, has become *āṅ*, as in the substantive declension, giving *mhāṅ*, *thāṅ*, for *amhāṇam*, *tumhāṇam*. The inserted *y* in the longer Mewārī forms, *mhāṅyāṅ*, *thāṅyāṅ*,

distinctly points, as in substantive declension, to the elision of the Prák. suffix, *k*, which, according to Prof. Lassen, was sometimes added to these pronominal bases; so that these longer forms represent Prák. genitives, *amháknám*, *tumháknám*. The nasal before *y* must be regarded as inorganic and unessential. On the origin of the still longer forms, *mháñvaráñ*, *tháñvaráñ*, I have no light. Bhagelkhandí presents a modern gen. form, *tiháñre*, as nom. plur. Apparently some such word as *log* is to be understood.

279. The genitives plur., *hamárá*, *tumhárá*, have arisen from the combination of the Prák. *karakah* with the bases *amha* and *tumha*, giving, *amha karako*, *tumha karako*, from both of which, *k* having been elided, the forms *amhaarao*, *tumhaarao*, must have arisen; whence, by *sandhi*, and the usual transposition of *m* and *h* in the 1st person, we have, first the Braj *hamárau*, *tumhárau*, then the K. *hamáro*, *tumháro*, whence, finally, the standard forms, *hamárá*, *tumhárá*. N. B. Dr. Hoernle in the 'Essays' previously referred to, in confirmation of this theory, cites from the *Mrichchhakati*, a passage containing the form *amhakekake* (for *amhakerake*). In the case of the shorter forms, *hamár*, *tumháár*, analogy leads us to believe that the suffix was first added to the base, not in its increased form, *karakah*, but in the simple form, *karah*.

a. If, in the Márwáí and Mewáí forms, *mháñro*, *tháñro*, *mháñlo*, *tháñlo*, the *Anusvár* be organic, it follows, that, in this case, the affix was pleonastically added, not to the base, as in the above forms, but to the gen., so that the original of these Rájputáná forms must have been *amháñam karako*, *amháñam kalako*, etc. Otherwise they must be explained like the regular forms.

280. The various forms of the nom. sing. of the prox. demonstrative, which contain *h*, viz., *yah*, *yih*, *yihu*, *ih*, *eh*, *ehu*, *he*, have probably all arisen from the Sk. *eshaḥ*. The final *u* of *yihu*, *yehu*, *ehu*, as in the case of nouns (§75), represents the Prák. *o* for the final *aḥ* of *eshaḥ*. Prof. Lassen gives a form, *ehe*, which looks like the original of the Bh. *he*. It appears to presuppose a nom. plur., *eshe*, from the stem *esh*. The loss of the final aspirate from *eh* and *eh*, has left the forms *e*, *é*. The remaining forms, *yo*, *yá*, *yon*, mas. *o*, fem. *á*, I would connect with the base *im*, which, although having a defective declension in Sanskrit, was fully declined in Prákrit. *Yo* and *yá*, have apparently arisen from the Prák. nom. masc. sing., *imo*, which, by the elision of *m*, yields *io*, whence *yo* and *ya*. The final nasal of *yon*, points to the Prákrit neut., *imam*, whence, *iam*, *yon*. The Me. *o*, fem., *á*, must, similarly, be ascribed to *imo*, fem. *imá*.

281. The perfect analogy between the two demonstrative pronouns seems to justify the hypothesis, that, as in the case of the prox. demonstrative we have a variety of forms from *eshaḥ* (*esho*) and *imaḥ* (*imo*), all resting ultimately upon the pronominal base *i*; so there must have been in the ancient vulgar speech, analogous pronouns, *oshaḥ*, *umaḥ*, resting on the pronominal base *u*, from which, precisely as above, we must derive the various nom. forms of the remote demonstrative, *wah*. But, although the existence of this base is

abundantly attested by such Sanskrit prepositions as *ut*, *upa*, *upari*, etc., yet I have met no instance of a declension resting on this labial, either in Sanskrit or the Prákrit dialects. But it is quite possible that further investigation of these dialects may furnish such examples, and verify the above hypothesis.

282. The next three pronouns, *jo*, *so* and *kaun*, are so closely analogous that we may consider them all together. Each of them presents two general forms in the nom. sing ; the one form terminating in a vowel, *e*, *o* or *u*, the other, in *n*. We first consider the group in *o*. It has been hitherto assumed that the pronouns *jo*, *so* and *ko*, are derived immediately from the Sk. *yaḥ*, *saḥ* and *kaḥ*. But it is to be noticed that we have no proven instance of the preservation of this Prákrit termination, *o*, in modern Hindí, in any monosyllable, except under the influence of a preceding consonant, commonly *k*, appended to the Sanskrit base. It is therefore more reasonable to postulate, as the original of these three forms, Prákritic bases, formed by the addition of this *k*. (§79.) Now in the archaic Hindí spoken in Mewár and Márwárí, we find precisely the increased form required by this hypothesis, in the relative pronoun *jako*, or *jiko*. From this latter form, again, by elision, and consequent hardening of *i* to *y* before *o*, we have another Márwárí form, *jyo*, of this same pronoun. This last form, thus derived, or a form *jao*, from the other base, I therefore regard as the immediate original of the common Hindí *jo*; and by analogy would suppose that similar forms, *sako* or *siko*, *kaoko* or *kiko*, must have existed, or may exist still, as the originals of *so* and *ko*. Although I can adduce no example of these forms, their actual existence is, I think, intimated in the R. obl. forms of the pronouns, *jyá*, *tyá*, and *kryá*, which are precisely analogous to the Már. *jyo*, and may be held to presuppose as their originals, the bases *jid*, *jiká*, *tid*, *tiká*, and *kid*, *kiká*.

283. We are now, in the light of these phenomena, prepared, I think, to interpret the R. obl. sing. forms of the personal pronouns, *mvá*, *tvá*, etc. which, we have hitherto purposely passed by. Analogy evidently leads us to suppose, that, as the suffix *k* was, in Prákrit, added to the other themes, *asma*, *tushma*, of these same pronouns, so it may have been added also to the shorter themes. *ma* (*mu*) and *tu*, giving the increased bases, *muka*, *tuka*; of which the original genitives would have been *mukasya*, *tukasya*, whence, according to the uniform laws of Prákrit speech, would come first, *mudha*, *tuáha*, then, *muáa*, *tudá*, and by the usual hardening of the semivowel and *sandhi* of the final vowels, *mvá*, *tvá*.

284. From this digression we now return to consider the three pronouns under discussion. Besides the forms *jo*, *so*, *ko*, several dialects exhibit *je* or *jai*, *se*, *le* or *kai*, in the nom. sing. The analogies of the language lead us to infer that, probably, these have arisen from the euphonic insertion of *y* in the place of the lost *k*, giving, therefore, from the above themes, first *jayo*, *sayo*, *kayo*, and then, *o* having been at last reduced to *a*, as in all Tatsama nouns, *jaya*, *saya*, *kaya*, whence the forms in question immediately arise. (§77, b.) An

incidental corroboration of this theory is afforded by the archaic eastern form, *kayaw*, of the indefinite pronoun. The base of the indefinite pronoun is always identical with that of the interrogative; and in this instance exhibits the very form postulated as the original of *ke* or *kai*. For the Sanskrit bases, *ja*, *ta*, *ka*, the Prákrit substitutes *ji*, *ti*, *ki*. From *ki* might be formed a theme *kiko*, whence, as above, would proceed the forms, *kiyo*, *kiya*, and thus, finally, the G. interrogative, *kí*.

a. The archaic forms, *ju* and *su*, found in the *Rámáyana* and other Hindí poetry, I would derive immediately from the Sk. *yaḥ* and *saḥ* through the Prákrit. *yo*, *so*. We have already noted, (§§75,154,) the existence of this final *u*, as the last remnant of the Sk. nom. masc. case-ending, in Tatsama nouns in old Hindí, and it needs no further illustration.

285. As to the remaining nom. forms, *jaun*, *taun*, *kaun*, the interrogative will lead us to the explanation of the rest. To the interrogative *ko*, the word *punar* was, in Prákrit, pleonastically added, giving for *ko*, *ko punar*. The final *r* being elided (§78), and *p* weakened to *v* (§82), we have the eastern form, *kavan*, and thence, by a simple process, its equivalents, *kaun*, *káun*, *kuṇ* and *kaṇ*. This derivation being established, we are naturally led to the conclusion, that *jaun* and *taun* must also have had their origin from similar Prákrit forms, as *jo punar* and *to punar*; but we are as yet unable to demonstrate their existence. The analogies already exhibited seem to justify us in assuming, as the original of the R. forms, *jaúnayana*, *taúnayana*, *jaúnai*, *taúnai*, increased Prákrit forms, *jo punaraka*, *to punaraka*.

286. The analogy between the obl. forms of the demonstrative, relative, correlative and interrogative pronouns is so close that the explication of the forms of any one of these pronouns will apply, with the change of the theme, to all the others. As in the case of the personal pronouns, most if not all of these obl. forms, sing. or plur., are in fact true genitives. Thus for the Sk. gen. sing., *yasya* = *jis ká*, the Prákrit exhibits *jassa* or *jissa*, whence, by the loss of the last syllable, the modern *jis*. Similarly, *tis* stands for the Prákrit *tissa*, Sk. *tasya*; *kis* = Prákrit *kissa*, Sk. *kasya*; and, by analogy, *is* presupposes a Prákrit form, *issa*, for Sk. *asya*; and *us*, *ussa* for *usya* (P). Again, by the common change of *s* to *h*, and lengthening of the penultimate vowel in compensation for the loss of the conjunct, from the Sk. *yasya*, Prákrit *jassa*, we derive the forms, *jáha*, *jáa*, whence the Braj obl. form, *já*. Similarly, *tá* and *ká* may be derived from the Sk. *tasya*, *kasya*, through intermediate forms, *táha*, *káha*; while *yá* presupposes the forms, *imasya*, *idha*, *yáa*; and *wá*, *umasya*, *udha*, *wáa*.

a. Sometimes *ya* final in a conjunct with a sibilant becomes *i*, as in *avasi* for Sk. *avashya* (§97, b.); thus, once more, from *yasya*, *tasya*, *kasya*, have proceeded the forms *jáhi*, *táhi*, *káhi*; and from the Prákrit themes, *ji*, *ti* and *ki*, *jihi*, *tihhi*, *kihi*, or *jehi*, *tehi*, *kehi*, for original forms, *yisya*, *tisya*, *kisya*. By the elision of *h*, from *ehi*, *jahi*, *tahi*, etc., we have the G. *ëi*, *jái*, *tái*, etc., and by subsequent *sandhi*,

also the Ku. *e* or *ye*, *jai*, *tai*, etc., The Av. *e*, *je*, etc., are probably identical in origin with these Himalayan genitives. In the R. *gyá*, *gyáhi*, etc., we again have the same genitives. The *y* has probably arisen from the elision of *k* from the increased theme, *jika*, still existent in Mārwarī, so that *gyá* and *gyáhi* stand for *jikasya*, and so on.

b. In the Braj genitives, *jásu* and *tásu*, we have the same termination as in the gen. of nouns in the Apabhrañsic Prākṛit, as, e.g., in *vachchhasu* = *bachche hā*. (Vid. *Lass. Inst. Ling. Prac.* §175,6.)

c. In the Bh. obl. sing., *jikar*, etc., the Prāk. *karakaḥ* was apparently added to the theme for a new genitive, which, as in other dialects, became a new secondary base for the obl. sing. throughout.

287. If the above derivations be correct we are now prepared to understand the dat. and acc. sing. forms of the personal pronouns, *mohi*, *tohi*, *mujhe*, *tujhe*, which we have hitherto passed by. In the final *hi* of *mohi*, *tohi*, we are led to recognize, as in the other pronouns, the Sk. gen. term., *śya*, here added, however, not as in the other pronouns to the primary base of the pronoun, but to the secondary bases, *mo*, *to*. Similarly we are to regard the forms *mujhe* and *tujhe* as having arisen from earlier forms, *mujhahi*, *mujhahi*, by the elision of *h* and consequent *sandhi* of the concurrent vowels. These secondary bases, *mo*, *mujh*, *to*, *tujh*, have already been shown to be Prākṛitic genitives, so that all the forms under discussion really contain a gen. termination twice repeated. It may be remarked in regard to the use of these forms as datives, that in many Prākṛit dialects, the dative was already lost, and its place was often supplied by the genitive. And from the dative, as the case of the indirect object, it is but a step to the accusative, as the case of the direct object.

288. The Mār. and Me. obl. sing. forms in *ṛ*, *ṛi*, or *ṛ*, present some difficulty. Possibly we may identify them with the Prāk. instr. sing. of these same pronouns, which terminates in *ṛá*, fem., *e*; but this has little support from analogy, nor have I met with any such intermediate forms as might throw light upon the case.

289. The nom. plur. forms of the five pronouns under discussion may apparently be reduced to two heads, viz., those which correspond with the sing., and those which assume a special plur. termination. In the case of such forms as *wuh*, *yih*, *jo*, *so*, *kaun*, etc., the sing. form has evidently been assumed into the plural. The original model of most of the other forms is to be found in the Mār. *jakai*, whence by elision of *k* and *sandhi* of the vowels we have *jai*. Similar are the other forms in question. The final *e* or *ai* may be identified with the same terminations in the Sk. nom. plur. of these same pronouns, where it has resulted from the *sandhi* of the final radical *a* with the *i* which is the affix of the nom. plur. The analogy of *tumh* for *tumhe* leads us to suppose such a form as *jenhe* or *jinhe*, as the original of the R. nom. plur., *jenh*. The analogy is strengthened by the Bh. nom. plur., *jihē*. The same remark applies, *mutatis mutandis*, to the other pronouns.

290. The bases of the obl. plur. of these pronouns present four forms; *vis*, 1st, the simple radical, as, e.g., in the standard forms, *un*, *in*, *jin*, etc.; 2nd, a form in *n* (*n*), as in the Már. forms, *unán*, *inán*, *janán*, etc.; 3rd, an increased form in *n̄h*, as in the longer plur. forms, *jin̄hoy*, *tin̄hoy*, of the standard dialect; 4th, another increased form, in *k*, as in the Már., *jakán*, *tikán*, etc. Of these forms the 1st requires no comment. In the second form in *n*, we have the gen. plur., as in the Braj plur. in *n*. (§175.) The fourth form in *k* has been already explained. The remaining base in *n̄h* presents a difficulty which we cannot certainly resolve. We may suppose, in the absence of any analogous forms which might explain the bases in question, that possibly *h* may have been ignorantly added to the bases, *un*, *jin*, *tin*, etc., after the analogy of *am̄h* and *tum̄h*, of the personal pronouns. Further than this we have no conjecture to offer.

291. The various terminations of the several dialects in the obl. plur., are of course identical in their origin with the same terminations in the substantives and personal pronouns; i.e., they are simply various modifications of the Sk. gen. plur. term., *ám* or *ánám*. The dat. and acc. forms, *jin̄hey*, *tin̄hey*, come immediately from the archaic forms, *jin̄hahis*, *tin̄hahis*, and therefore justify the hypothesis of corresponding forms in the other pronouns of the series. This *his*, in the dat. and acc. plur., may very possibly be identified with the termination *sis*, of the Prák. gen. plur. forms, *jesis*, *tesis*, etc., in which case these forms would present a perfect analogy with the corresponding dat. sing. forms. (But see §276.)

292. The various modifications of the indefinite pronoun, *koí*, have arisen from the combination of the interrogative in one or another of its various forms, with the Sk. affix, *api*. Thus, *koí* or *koi* stands for the Sk. *ko'pi*. In *koú* and *kou*, the *i* has disappeared, and the *p* has been softened to the cognate vowel. In *kaunau* and *kaño*, the affix *api* has been originally added to the compound form, thus, *ko punar api*, and *api* has been reduced to *au* or *o*. The obl. sing. forms are to be similarly explicated. Thus, from the base *ki*, for Sk. *ka*, come *kis* and *kisú*, both for *kisyápi*, (*kisyaaapi*) for the Sk. gen. sing., *kasyápi*; and with the change of *s* to *h*, from the base *ka*, we have *káhú* = *kasyápi*. The forms *kehi* and *kehu* probably stand for *kíhi*, *kíhu*, or *kahi*, *kahu*, still other corruptions of the genitive in question; and from these or similar forms in *h*, proceed the Av. *keú* and the G. *kaí*, K. *kai*. Several of these forms in *h* are found in the nom., but they must be regarded as genitives transferred by the ignorant to that case. The R. form, *kaunho*, I have met but once, and suspect that we have here but an orthographic variation of *kauno*.

293. In the Púrbí interrogative, *káh*, for *kasya*, we have again a genitive taken as a nom., and as the base of a new declension. This secondary theme, according to Prof. Lassen, (*Inst. Ling. Prac.* §106,5.) was already declined in Prákrit. All the analogies of the language lead us to regard the longer form, *kahá*, having proceeded from a theme *káhaka*, derived from *káh* by the addi-

tion of the Prákritic *k*, as, e.g., in *kachchhuk* for *kuchh*. This *k* being elided, and the long *á* shortened before the heavy termination, we have by *sandhi* the Braj *kahá*. The shorter form, *ká*, was evidently derived from *káha* by the elision of *h*. The regular form, *kyá*, for *kiá*, presupposes a base *kihá* from the theme *ki*. Granting that *kahá* stands for a secondary base, *káhaka*, it is plain that in the obl. sing. *káhe*, we have a secondary genitive from this base, after the analogy of Tadbhava nouns in *á*, so that *káhe* presupposes a Prák. gen. *káhádha*, whence, as in nouns, *káháya*, *káhe*.

294. The Máṛ. and Me. *kaṭṭ*, *káṭṭ*, etc., appear to be derived from an increased Prákritic neuter form, *kakim*, for the Sk. *kim*. The final *Anusvár* therefore represents the Sk. neut. term., *m*. The first *Anusvár* of *káṭṭ*, is, I suspect, merely inorganic. The obl. sing., *khd*, is connected with the secondary themes, *káh*, (*káhaka*.) so common in other dialects. The aspirate has been transferred from the second to the first syllable; the final *á* instead of *e*, represents the Prák. gen. term., *ádha*, after the analogy of the obl. sing. of substantives in the same dialect.

295. *Kuchh*, *kachhu*, *kichhu*, are all corruptions of the corresponding Sk. *kashchit*. *Kachhuk*, has been already noticed. (§105, *h*.) The corresponding Máṛ. and Me. forms are to be connected with the Sk. neut. of the same pronoun combined with the suffix *api*, viz., *kimapi*, through a similar form, *kamapi*, whence, *m* having become *Anusvár*, and *p* being elided, *káṭṭ*, or *káṭṭṭ* remains. The final *ṭ* has, I judge, been added through a popular misapprehension confounding this word with the interrogative *kaṭṭ*.

296. Of the pronominal series derived from the five pronominal elements, (Tables X & XI,) those expressing quantity are all to be connected with the corresponding Sanskrit series, *iyat*, *kiyat*, etc., or rather with their Prákrit equivalents, viz., *ettid*, *kettid*, etc. This hiatus marks the place of a *k*, originally added to these Sanskrit forms, which is still preserved in several dialects noted in Table XI, as, e.g., Bh. *atek*, *jatek*, G. *etaká*, *tataká*, etc. From forms similar to the above Prákrit pronominals have immediately proceeded the H. H. *itá*, *jitá*, etc. The peculiar R. forms, *jyáṭik*, *tyattán*, etc., have evidently been formed from the secondary bases, *jika*, *tika*, etc., like the similar forms in the Riwáí pronouns. Of the *n*, *r* and *r*, which appear in many dialects in the termination of these pronominals, as, e.g., *kitná*, Me. *kataro*, *kataro*, R. *kyattán*, etc., I have no explanation to offer. It may be noted here that in Riwáí and Bhojpúr, *n* is added also to the pronominal series denoting likeness, as, e.g., *jaisan*, *taisan*, etc. The final *no* of this second series in the G. *vano*, *jano*, etc., has probably the same origin. Similarly, in Mewáí *ro* is the affix both in the first and the second series; cf. *kataro*=*kitná*, and *kairo*=*kaisá*.

a. The dialectic forms, *jai*, *tai*, *kai*,= *jitná*, etc., are derived from the Sanskrit series, *yati*, *tati*, *kati*.

297. The various forms of the pronominal series expressive of likeness, as, e.g., *jaisá*, *jas*, *jaisan*, are all to be connected with the Sk. series formed with

the affix *drish*, viz., *yádrish*, etc. In the Mewárf and Garhwálf dialects the absence of the characteristic *s*, is to be explained by the custom in those dialects of changing *s* to *h* and then dropping it entirely. (§§103, 104.)

298. The reflexive pronoun, *áp*, is derived from the Sk. *átman*, which is used in the same sense. The obl. forms, *apná*, *apne*, point to a Prák. form, *átmanaka*, with an adjective sense. The derivation of the obl. plur. form, *apas*, is uncertain.

299. The honorific pronoun, *áp*, is also derived from *átman*, through the intermediate dialectic forms, *apun* and *ápu*. The dialectic honorific pronoun *raur*, or *raurau*, etc., is to be regarded as a gen. formed from the noun, *ráu*, with the affix *rá*. This *ráu* is derived from *rájah*, a form which the base *rájun* assumes in Sk. at the end of compounds; *j* being elided, and *ah* changed to *a*, *ráo* remains, whence *ráu*. (§§69, c., 75, 78.)

CHAPTER VIII.

OF THE VERB.

300. The Hindí verb is very simple. There is but one conjugation, and all verbs whatever, both in the standard dialect, and in the local dialects, take the regular terminations belonging to the several tenses.

a. Seven verbs only in the standard dialect, present an irregularity in the Respectful form of the Imperative, and in the Perfect Participle and the tenses formed with it. But this irregularity consists only in the substitution of another root, slightly different from that which appears in the other tenses, and will give no trouble. To this root the regular terminations are appended.

301. The Hindí verb is affected by the distinctions of voice, mood, tense, gender, number and person. The voices are two, Active and Passive. The moods, properly speaking, are four only, Indicative, Subjunctive, Imperative and Infinitive. The Infinitive simply expresses the abstract and unrestricted verbal idea; it is indeed, strictly speaking, a Gerund or Verbal noun. The participles are

three, *viz.*, Imperfect, Perfect, and Conjunctive.* From every verb may also be formed a Noun of Agency.

a. The Imperfect and Perfect participles are sometimes termed 'Adjective participles'. The Conjunctive participle is peculiarly characteristic of the Indian languages: its functions will be explained in due order.

302. Reckoning the Imperative as a variety of the Future, we have, in Hindí, fifteen tenses. Three of these tenses are formed by inflection of the verbal root; the remaining twelve are all formed, in the standard dialect, by means of the participles, combined, in all the tenses but two, with an auxiliary verb.

303. The distinction of Number is made by inflection in all the tenses. The distinction of Gender is expressed in all the tenses, except the Contingent Future and the Imperative. As in the noun and adjective, क् is everywhere the sign of the masc. sing.; क् of the masc. plur.; क् of the fem. sing.; क् or, rarely, क्, of the fem. plur. The distinction of person is marked by inflection in the three tenses of the future, *viz.*: the Contingent, the Absolute Future and the Imperative. In the Indefinite, Past, and Negative Contingent tenses, both Perfect and Imperfect, the distinction of person is not expressed; in the remaining tenses, the person is indicated by the auxiliary.

a. In none of the tenses, however, is the scheme of personal endings complete. Except in the Imperative, which has a separate form for the 2nd sing., the same terminations everywhere denote both the 2nd and 3rd person sing., and, in the plural, the 1st and 3rd person also have the same terminations.

* The appropriateness of this nomenclature, of necessity, cannot be shown, until we come to examine the use of these participles. We can, in this place, only express our conviction that the terms 'present' and 'past', commonly applied to these participles, are not philosophically accurate. These participles, with their dependent tenses, represent action in different stages of *progress*, not necessarily at different points of time. Since the above was written, I have noticed that Mr. Platt in his excellent Hindustání Grammar has adopted for the adjective participles these same terms, 'perfect' and 'imperfect'. He has failed, however, to carry out an analogous nomenclature in the tenses.

304. The above remarks are to be understood as applying without restriction to the standard dialect only. The peculiarities of the dialectic conjugations will be noticed in detail below. We first proceed to explain the formation of the various parts of the verb in standard Hindí.

305. In the standard dialect the *Infinitive* of all verbs terminates in ना. Under this form the verb will always be found in the dictionary; as, *e.g.*, बोलना, 'to speak'; जाना, 'to go', *etc.*

a. The infinitive is used as a *Gerund* or verbal noun, denoting abstractly the action or state signified by the verb. As thus employed it is inflected to ए throughout the obl. sing., and takes the usual postpositions after the manner of Tadbhava masc. nouns in का. It is never used in the plural. Thus we have, *e.g.*, लड़ना, 'to fight', 'fighting'; Gen., लड़ने का, 'of fighting'; Loc., लड़ने में, 'in fighting', *etc.*

306. Rejecting the final ना of the infinitive, we obtain the *Root* of the verb, from which, except in the case of seven verbs to be hereafter noted, all the parts of the verb may be derived in a regular and orderly manner. Thus, *e.g.*, the root of चलना is चल; of गिरना, गिर; of कटना, कट, *etc.*

N. B. The root of the verb, in standard Hindí, is always identical in form with the 2nd pers. sing. of the Imperative.

307. The roots of verbs may be conveniently distinguished as *close* and *open*. By a *close* root is denoted a root terminating in a consonant; by an *open* root, a root terminating in a vowel. Verbs which have *open* roots, are often termed *pure* verbs, and those which have *close* roots, *mixed* verbs. Thus जा, कुला and खो, the roots of the verbs जाना, कुलाना and खोना, are *open* roots, and their verbs *pure* verbs; but चल, मार and पढ़, the roots of चलना, मारना and पढ़ना are *close* roots, and their verbs, *mixed* verbs.

308. From the root of the verb, the Imperfect and Perfect participles in standard Hindí are respectively derived as follows:—

(1) The *Imperfect* participle is formed by adding to the root the syllable ता.

(2) The *Perfect* participle is formed by adding to the root the syllable **आ**.

The following table will illustrate :—

<i>Verb.</i>	<i>Root.</i>	<i>Imperfect Part.</i>	<i>Perfect Part.</i>
बोलना, 'to speak'.	बोल.	बोलता, 'speaking'.	बोला, 'spoken'.
डरना, 'to fear'.	डर.	डरता, 'fearing'.	डरा, 'feared'.
मिलना, 'to meet'.	मिल.	मिलता, 'meeting'.	मिला, 'met'.
मारना, 'to strike'.	मार.	मारता, 'striking'.	मारा, 'struck'.

309. Observe, that before the termination **आ** of the perfect participle,

(1) **य** is inserted after all roots ending in **आ**, **ई** or **ओ** :

(2) If the root end in the long **ई**, this vowel is shortened.

Examples are ;—

<i>Verb.</i>	<i>Root.</i>	<i>Imperfect Part.</i>	<i>Perfect Part.</i>
लाना, 'to bring'.	ला.	लाता, 'bringing'.	लाया, 'brought'.
पीना, 'to drink'.	पी.	पीता, 'drinking'.	पिया, 'drank'.
बोना, 'to sow'.	बो.	बोता, 'sowing'.	बोया, 'sown'.

310. The participial terminations, **ता** and **आ**, are inflected to **र** (masc.) and **ई** (fem.) according to the rules for the inflection of Tadbhava adjectives. (§163.) The fem. plur. is sometimes inflected to **ईं**, or, rarely, to **इयां**.

a. Verbs which insert **य** before **आ** in the perfect participle, optionally insert **य** before the inflection **र**, and occasionally before **ई**. But if the root of the verb in the perfect participle terminate in **र** or **ई**, the **ई** of the fem. termination sometimes combines with this radical vowel, by §40. Thus we have, *e.g.*, from पीना, 'to drink', (perf. part. masc., पिया,) the perf. part. fem., पी, for पिई. Examples of these inflected participles are as follows :—

	<i>Nom. masc.</i>	<i>Obl. masc.</i>	<i>Fem. sing.</i>	<i>Fem. plur.</i>
From डालना, 'to throw'.	डालता.	डालते.	डालती.	डालतीं.
" " " "	डाला.	डाले.	डाली.	डालीं.
" सोना, 'to sleep'.	सोता.	सोते.	सोती.	सोतीं.

From सोना, 'to sleep'.	सोया.	सोर or सोये.	सोई.	सोईं.
„ देना, 'to give'.	दिया.	दिये.	दी.	दीं.
„ करना, 'to do'.	किया.	किये.	की.	कीं.

b. Observe, that in dissyllabic roots with a short vowel in the first syllable, and short *a* in the second, this *a* very commonly, though not invariably, becomes silent before all terminations beginning with a vowel. Thus from निकलना, 'to come out', we have the perf. part., निकला. commonly pronounced *niklá*. Similarly, in the contingent future, the 3rd sing., समझे, and the 2nd plur., समझो, from समझना *samajh-ná*, are respectively pronounced *samjhe* and *samjho*. But this rule is not to be applied in reading poetry. (*Vid.* §10, c. e.)

311. In the following seven common verbs, the perfect participle is formed from a root different from the root of the infinitive, *viz* :—

होना, 'to be'.	<i>Perf. Part.</i>	हुआ.	<i>Root.</i>	हू.
मरना, 'to die'.	„ „	सुआ.	„	मू.
करना, 'to do'.	„ „	किया.	„	की.
देना, 'to give'.	„ „	दिया.	„	दी.
लेना, 'to take'.	„ „	लिया.	„	ली.
जाना, 'to go'.	„ „	गया.	„	ग.
ठानना, 'to determine'.	„ „	ठया.	„	ठ.

a. Of the above, करना, मरना and जाना also form their perfect participles regularly from the root of the infinitive; thus, करा, मरा, जाया. जाया, however, is only used in the Frequentative form of the verb; and करा and मरा belong rather to Kanaují and other local dialects than to standard Hindí.

312. When the perfect and imperfect participles are used as adjectives, the perf. part., हुआ, of the verb होना, 'to be', inflected, if necessary, to agree with the participle and noun qualified, is very often added. The participle हुआ, in this idiom, is strictly pleonastic and cannot be translated.

Examples are,— बोया हुआ गेहूँ, 'sown wheat'; दौड़ते हुए घोड़े, 'running horses'; गाती हुई लड़की, 'a singing girl'.

313. The *Conjunctive* participle consists either of the root alone, or adds to the root the syllable कर or के. The following are examples :—

<i>Verb.</i>	<i>Root.</i>	<i>Conjunctive Participle.</i>
करना.	कर.	कर, कर के, or कर कर, 'doing', 'having done'.
हंसना.	हंस.	हंस, हंस के, or हंस कर, 'laughing', 'having laughed'.
जाना.	जा.	जा, जा के, or जा कर, 'going', 'having gone'.
सीना.	सी.	सी, सी के, or सी कर, 'sewing', 'having sewed'.

a. Sometimes either कर or के is repeated after कर; thus, चल कर के or चल कर कर, 'having walked'; गा कर के or गा कर कर, 'having sung'. But this is colloquial and scarcely elegant.

314. The verbal *Noun of agency* is formed by adding to the inflected infinitive, the affix वाला or द्वारा. Thus, to illustrate :—

<i>Infinitive.</i>	<i>Noun of Agency.</i>	
गाना, 'to sing'.	गानेवाला or गानेद्वारा,	'a singer'.
दौड़ना, 'to run'.	दौड़नेवाला or दौड़नेद्वारा,	'a runner'.
बोना, 'to sow'.	बोनेवाला or बोनेद्वारा,	'a sower'.

a. Of these two suffixes, वाला is everywhere used; द्वारा is more common in the east than in the west. These nouns are declined in the masc., like छोड़ा (p. 76); and in the fem., like पोखी (p. 77). The final *á* of these affixes, especially of द्वारा, is occasionally shortened; but this again is an eastern usage.

315. The fifteen tenses of the standard dialect may be distributed into three groups. The first group will include such tenses as are formed immediately from the *Root*, by means of certain terminations; the second group, such tenses as are formed by means of the *Imperfect Participle*; the third group, such tenses as are formed by means of the *Perfect Participle*. As thus distributed, the tenses stand as follows :—

GROUP I.

TENSES FROM THE ROOT.

1. Contingent Future. 2. Absolute Future. 3. Imperative (Future).

GROUP II.

GROUP III.

TENSES FROM THE IMPERFECT PARTICIPLE.

TENSES FROM THE PERFECT PARTICIPLE.

- | | |
|-----------------------------------|---------------------------------|
| 1. Indefinite Imperfect. | 1. Indefinite Perfect. |
| 2. Present Imperfect. | 2. Present Perfect. |
| 3. Past Imperfect. | 3. Past Perfect. |
| 4. Contingent Imperfect. | 4. Contingent Perfect. |
| 5. Presumptive Imperfect. | 5. Presumptive Perfect. |
| 6. Negative Contingent Imperfect. | 6. Negative Contingent Perfect. |

316. The above arrangement and nomenclature differs somewhat from any given in other Hindi or Hindustáni grammars; but it is believed to rest on sound philosophical principles, and to give a more precise expression to the distinctive characteristics and mutual relations of the several tenses. Not only do these several groups have an outward individual character, in respect of their derivation respectively from three different parts of the verb, but one distinctive radical conception will be found to underlie all the tenses of each group, with which all their various usages may be connected. Every action or state, whether actual or contingent, may be conceived of under three different aspects, relatively to its own progress, *i.e.*, (1) as not yet begun; (2) as begun, but not completed; or (3) as completed. It is believed that these are the essential ideas which severally pervade these three groups of tenses. In *Group I*, all three tenses represent the action as *not begun*, *i.e.*, as future. The *Absolute Future* represents this futurity as a reality; the *Contingent Future* and *Imperative*, represent it as a possibility. The *Contingent Future* represents the futurity as contingent, in a general way, whether desired or not; the *Imperative* represents it as an object of desire or will. The tenses of *Group II*, represent the action of the verb, under various phases, as *imperfect*, *i.e.*, as not yet completed; the tenses of *Group III*, represent it, in different aspects, as *perfect* or completed.

317. The three tenses of the Future, in *Group I*, are formed by adding certain terminations to the root, as follows:—

(1) The Contingent Future is formed by adding to the root the terminations given in the following table.

TERMINATIONS OF THE CONTINGENT FUTURE.

<i>Sing.</i>	1. ई.	2. ए.	3. ए.
<i>Plur.</i>	1. ई.	2. ओ.	3. ई.

(2) The terminations of the Imperative are identical with the above, except in the 2nd sing., in which no affix whatever is added to the root.

a. In the place of the above affixes for the 2nd and 3rd plur., other terminations are added to the root to form what is commonly known as the *Respectful Imperative*. These terminations are as follows :— 2nd plur., ह्ये; 3rd plur., ह्ये, or, more rarely, ह्येगा. Of these, the form ह्ये is commonly used with the plur. of the 2nd pers. pronoun, तुम; that in ह्ये or ह्येगा with the honorific pronoun, आप, or some equivalent word.

b. Verbs of which the root ends in ई or ए insert च before the above affixes. In this case the radical ए is changed to ई.

Thus लेना, 'to take', makes the resp. imper., लीञ्चिये, लीञ्चिये; देना, 'to give', resp. imper., दीञ्चिये, दीञ्चिये; सीना, 'to sew'; resp. imper., सीञ्चिये, सीञ्चिये; पीना, 'to drink'; resp. imper., पीञ्चिये, पीञ्चिये or पीञ्चियेगा, etc.

c. To the verbs included under *b* may be added three verbs from the list in §311, which irregularly form the respectful imperative from the root of the perfect participle; viz., करना, 'to do', मरना, 'to die', and होना, 'to be', of which the respectful forms of the imperative are, कीञ्चिये, कीञ्चिये; मूञ्चिये, मूञ्चिये; झूञ्चिये, झूञ्चिये.

d. Observe that ह्ये and ह्ये, after च in these respectful forms, are very often contracted to चो and ए; giving, instead of the above, दीञ्चो, कीञ्चो, पीञ्चो, etc.

(3) The Absolute Future is formed from the Contingent Future, by adding to each person of that tense, in the sing., ग, masc., or गी, fem.; and in the plur. गे, masc., or गीं, fem. The full terminations, therefore, as added to the root are as follows :—

TERMINATIONS OF THE ABSOLUTE FUTURE.

<i>Sing.</i>	1. चंगा, fem. चंगी.	2. रगा, fem. रगी.	3. रगा, fem. रगी.
<i>Plur.</i>	1. रंगे, fem. रंगीं.	2. चोगे, fem. चोगीं.	3. रंगे, fem. रंगीं.

318. In the 2nd and 3rd sing. and the 1st and 3rd plur., **व** is very often substituted for **र** after open roots (§307), in all three tenses of the future. In this case the *Anusvár* in the plural is added, not to the initial **र** of the termination, but to the final vowel of the root. Thus, **होना**, 'to be', makes the 2nd and 3rd sing. in these tenses **होए** or **होय**; **होएगा** or **होयगा**; and the 1st and 3rd plur., **होएंगे** or **होय**, **होएंगे** or **होयंगे**.

319. After roots ending in **आ**, **ई**, **ए** or **ओ**, **व** is optionally inserted before **र** and **रं** in the tenses of the Future. Thus, for **ब्रताए**, **पीए**, **होए**, we very commonly hear **ब्रतावे**, **पीवे**, **होवे**.

a. But in the case of roots ending in **र**, educated moderns very often reject that vowel before all the terminations of the three tenses of the future.

Thus, from **देना**, 'to give', we may have in the Contingent Future, 1st sing., **दूं**, for **देऊं**; 3rd sing., **दे**, for **देवे**; 2nd plur., **दे**, for **देओ**. Similarly, from **लेना**, 'to take', we have, in the Absolute Future, 1st sing., **लूंगा**, 1st plur., **लेंगे**, etc., etc.

320. Before proceeding to explain the formation of the remaining tenses of the verb, it will be necessary, as a preliminary, to exhibit certain tenses of the auxiliary verb **होना**, 'to be', or 'become'. Besides the regular tenses common to all verbs, two other tenses, *viz.*, a Present and an Indefinite Past, are usually, though inaccurately, assigned to this verb. These must be considered first in order.* They express simple existence, and answer, respectively, to the English 'am' and 'was'. These tenses are conjugated in the standard dialect as follows:—

PRESENT.	
SINGULAR.	PLURAL.
मैं हूँ, 'I am'.	हम हैं, 'we are'.
तू है, 'thou art'.	तुम हो, 'you are'.
वह है, 'he is'.	वे हैं, 'they are'.

*Though conveniently treated here, it should be understood that, in reality, they have no organic connexion with the verb *hond*, which is derived throughout from the Sanskrit *bhū*; while the various forms of these two tenses are derived from *as* and other radicals.

PAST.

SINGULAR.		PLURAL.
मैं था,	'I was'.	हम थे, 'we were'.
तू था,	'thou wast'.	तुम थे, 'you were'.
वह था, 'he, she or it was'.		वे थे, 'they were'.
<i>Fem.</i> मैं थी, etc.		<i>Fem.</i> हम थीं, etc.

321. We add the three future tenses of the verb
होना, 'to be' or 'become'.

CONTINGENT FUTURE.

SINGULAR.		PLURAL.
मैं होऊँ or होँ,	'I may be'.	हम होएँ, होवें, होयँ or होँ, 'we may be'.
तू होए, होवे, होय or हो,	'thou mayst be'.	तुम होओ or हो, 'you may be'.
वह होए, होवे, होय or हो,	'he may be'.	वे होएँ, होवे, होयँ or होँ, 'they may be'.

ABSOLUTE FUTURE.

SINGULAR.		PLURAL.
मैं होऊँगा or हूँगा,	'I shall be'.	हम होएँगे, होवेंगे, होयँगे or होँगे, 'we shall be'.
तू होएगा, होवेगा, होयगा or होगा,		तुम होओगे or होगे, 'you will be'.
		'thou wilt be'.
वह होएगा, होवेगा, होयगा or होगा,		वे होएँगे, होवेंगे, होयँगे or होँगे, 'they will be'.
		'he will be'.
<i>Fem.</i> मैं होऊँगी, तू होएगी, etc.		<i>Fem.</i> हम होएँगीं, तुम होगीं, etc.

IMPERATIVE.

2nd sing. तू हो. The rest like the Contingent Future.
RESPECTFUL IMPERATIVE, हूजियो or हूजे, हूजिये or हूजे, हूजियेगा,
'be pleased to be'.

322. We are now prepared to explain the formation of the tenses of the Imperfect and Perfect participles, as enumerated in Groups I and II. Inasmuch as between each of the six tenses in each group, taken in pairs, there will be found the closest analogy, we may most conveniently treat the tenses of both participles together. The verb आना, 'to come', is taken as an illustration.

323. The *Indefinite Imperfect* represents an action simply as *incomplete*, without reference to any particular time, and may thus refer either to the past, present, or future; the *Indefinite Perfect* represents the action as *complete*, but also with no definite reference to time. These agree in grammatical form, as consisting simply of the Participle without any auxiliary; e.g., मैं आता, 'I come', 'I would come'; मैं आया, 'I came'.

a. The Indefinite Imperfect has no one precise equivalent in English, which might of itself express all its various uses. It is most commonly employed as a past contingent, as, e.g., *jo tum sach bolte*, 'had you spoken the truth'.

324. The second pair consists of the *Present Imperfect* and *Present Perfect*. These both agree in referring the action to the present time; the former represents the action as *unfinished* at the present time; the latter as *finished* at the present time. As thus both referring to the present, they are both formed by adding to the participles, the Present of the auxiliary substantive verb; e.g., मैं आता हूँ, 'I come' or 'am coming'; मैं आया हूँ, 'I have come'.

325. The third pair consists of the *Past Imperfect* and *Past Perfect*. The former represents the action of the verb as *in progress* at some past time; the latter as *completed* at some past time. The agreement in time is represented by the Past tense of the auxiliary substantive verb; e.g., मैं आता था, 'I was coming'; मैं आया था, 'I had come'.

326. The fourth pair consists of the *Contingent Imperfect* and the *Contingent Perfect*. These tenses again differ in that we have, in the former, the action *in progress*; in the latter, the action *completed*. But both alike represent the action merely as a *possibility*. The characteristic auxiliary is the Contingent Future of the substantive verb; e.g., मैं आता होऊँ, 'I may be coming'; मैं आया होऊँ, 'I may have come'.

327. The fifth pair embraces the *Presumptive Imperfect* and the *Presumptive Perfect*. These exhibit the same contrast of *incompleteness* and *completion*, and agree in representing the action, under these two phases, as a *probability*. The auxiliary common to both is the Absolute Future of the substantive verb; the Future tense indicating the positive presumption of the occurrence of the action; *e.g.*, वह आता होगा, 'he must be coming'; वह आया होगा, 'he must have come'.

328. In the sixth Group we have two tenses which we have called the *Negative Contingent Imperfect*, and *Negative Contingent Perfect*. These are formed by adding to the two participles of the verb, the Indefinite Imperfect of the substantive verb; as, *e.g.*, जो तुम आते होते, 'had you been coming'; जो मैं न आया होता तो उन का पाप न होता, 'if I had not come, they had not had sin'.

a. Grammarians have found much difficulty in defining the precise scope of these infrequent tenses, or assigning them a name. In truth, the former of the two, especially, is so very rarely met, that it is difficult to gather examples enough to form the basis of a judgment. While by no means confident that the name chosen is the best possible, it is so far expressive of the usage of these tenses that they alone are never found except in conditional clauses implying the negation of the condition. It is indeed true that negative conditional clauses are also often and more commonly expressed by the Indefinite tenses, perfect and imperfect; but this is not, by any means, in the Indefinite tenses, as in these, their exclusive function.

b. The last three pairs of tenses have usually been arranged by themselves, as the 'six uncommon tenses'. But apart from the fact, that some, at least, of these tenses are by no means uncommon, it scarcely seems philosophical, thus to set off certain tenses in a class by themselves, on the sole ground of their comparatively infrequent occurrence. They are accordingly made to take their proper place under the tenses of the participles.

329. In addition to the above verbal forms, grammarians have usually enumerated a so-called '*Adverbial participle*', which is formed by adding the emphatic particle, ही, to the obl. form of the imperfect participle; as, *e.g.*, from जाना, जाते ही, 'immediately upon going'. But as this is not in truth an additional formation from the verb, but merely a special grammatical construction of the Imperfect par-

ticiples, there seems to be no sufficient reason for giving it a separate place in the paradigm of the verb. The same idiom, indeed, occurs, though much more rarely, with the perfect participle also ; as, *e.g.*, उस के गर ही, 'immediately upon his having gone'.

330. The three tenses of the future of the verb होना, 'to be', have already been exhibited. We now add six tenses of the participles ; the remaining six, with the exception of the Contingent Perfect, are much less frequent.

a. Observe, that in all the compound tenses of the Imperfect participle, and in the Indefinite perfect, this verb has the signification, not of 'being' but 'becoming'. In the other tenses, it may have either sense, but the compound verb हो जाना, is to be preferred in the sense of 'becoming'.

IMPERFECT PARTICIPLE,	होता,	'becoming'.
PERFECT PARTICIPLE,	हुआ,	'been'. [ing become'.
CONJUNCTIVE PARTICIPLE,	हो, होकर, होके, होकरके,	'having been' or 'hav-
NOUN OF AGENCY,	होनेवाला or होनेद्वारा,	'that which is to be'.

INDEFINITE IMPERFECT.

SINGULAR.		PLURAL.	
मैं होता,	'I would be',* etc.	हम होते,	'we would be', etc.
तू होता,	'thou wouldst be', etc.	तुम होते,	'you would be', etc.
वह होता,	'he' or 'it would be'.	वे होते,	'they would be', etc.

PRESENT IMPERFECT.

SINGULAR.		PLURAL.	
मैं होता हूँ,	'I am becoming'.	हम होते हैं,	'we are becoming'.
तू होता है,	'thou art becoming'.	तुम होते हो,	'you are becoming'.
वह होता है,	'he, it is becoming'.	वे होते हैं,	'they are becoming'.

PAST IMPERFECT.

SINGULAR.		PLURAL.	
मैं होता था,	'I was becoming'.	हम होते थे,	'we were becoming'.
तू होता था,	'thou wast becoming'.	तुम होते थे,	'you were becoming'.
वह होता था,	'he was becoming'.	वे होते थे,	'they were becoming'.

* This is only one of many possible renderings of this tense. *Vid.* §323.

INDEFINITE PERFECT.

SINGULAR.		PLURAL.	
मैं हुआ,	'I became'.	हम हुए,	'we became'.
तू हुआ,	'thou becamest'.	तुम हुए,	'you became'.
वह हुआ,	'he became'.	वे हुए,	'they became'.

PRESENT PERFECT.

SINGULAR.		PLURAL.	
मैं हुआ हूँ,	'I have been' or 'become'.	हम हुए हैं,	'we have been' or 'become'.
तू हुआ है,	'thou hast been' or 'become'.	तुम हुए हो,	'you have been' or 'become'.
वह हुआ है,	'he has been' or 'become'.	वे हुए हैं,	'they have been' or 'become'.

PAST PERFECT.

SINGULAR.		PLURAL.	
मैं हुआ था,	'I had been' or 'become'.	हम हुए थे,	'we had been' or 'become'.
तू हुआ था,	'thou hadst been' or 'become'.	तुम हुए थे,	'you had been' or 'become'.
वह हुआ था,	'he had been' or 'become'.	वे हुए थे,	'they had been' or 'become'.

a. Observe, that by changing था final to है for the singular, and थे final to हैं for the plural, the above will be transformed into the feminine conjugation. In the compound forms of the verb, however, *Anuvár* in the plural is commonly added to the second member only. Thus we say, हम होती थीं, not होती थीं; similarly, हुई हैं, etc. These remarks apply to all verbs whatever.

b. हुआ is commonly Romanized, *húá*, but this is incorrect; in the *Nágarí*, the first syllable is always short.

331. From what has been said, it will be evident that the conjugation of the Hindí verb, as respects terminations is perfectly regular. In standard Hindí and in all the western dialects, however, there is a peculiar idiom in the construction of the tenses of the *Perfect Participle* in *Transitive* verbs, which demands especial notice. The following rules should therefore be carefully studied.

332. In the use of all the tenses of the *Perfect Partici-*

ple of Transitive verbs, the case of the *Agent* must be substituted for the nominative of the subject. Two constructions are then admissible, *viz.* :—

(1) That which, in English idiom, is the object of the action, may be put in the nominative case, with which the verb is inflected to agree in gender and number.

(2) That which, in English idiom, is the object of the action, may be put in the dative, and the verb, irrespective of the gender or number of either the subject or object, is then put in the masc. sing.

These two may be termed, respectively, the *Passive* and *Impersonal* constructions.

Thus, with the Present Perfect of देखना, 'to see', we have, instead of the English construction, either, *e.g.*, मैं ने वह गाड़ी देखी, 'I saw that carriage'; or मैं ने उस लड़की को देखा, 'I saw that girl'. In the former case the real nominative to the verb is गाड़ी, with which therefore the verb agrees in the 3rd fem. sing. In the second, there is no nominative expressed; that which in English is the nominative of the verb, appears here in the dative, and the verb is used impersonally in the 3rd masc. sing.

N. B. The beginner should carefully observe, (1) that this construction is used with *transitive* verbs *only*; and (2) with such verbs, *only* in the tenses of the *perfect* participle. Thus, although we must say, उस ने अपने भाई को मारा, 'he beat his brother', we must use the *active* construction with the same verb in the tenses of the *imperfect* participle, even when referring to past time. Thus we say, *e.g.*, वह अपने भाई को मारता था, 'he was beating his brother'; not उस ने मारता था, which would be nonsense.

333. It is to be noted that all Hindî perfect participles are in fact corrupted forms of the Sk. perfect passive participle, and the idiom under consideration has its origin and explanation in the Sanskrit construction of such participles, according to which, under the above conditions, the passive participle is made to agree in gender and number with that which in English idiom is the object of the verb, and the logical subject is put in the instrumental case. Thus, to illustrate, the English phrase 'he said', may be rendered in Sanskrit, तेन कथितं, *lit.*, 'by him said', Hindî, उस ने कहा. Similarly, the Sanskrit तेन मूषिकयावको दृष्टः, 'he saw a young mouse', becomes in Hindî, उस न मूसे का बच्चा देखा.

334. The following common verbs, *viz.*, **बकना**, 'to talk idly', **बोलना**, 'to speak', **भूलना**, 'to forget', **लड़ना**, 'to fight', and **लाना**, 'to bring', although transitive in sense, taking an object after them, are exceptions to the above rule, and are never construed with the case of the agent.

a. The perfect tenses of **समझना**, 'to understand', are also sometimes construed with the nominative of the subject; but it is considered better to use the case of the agent.

335. Observe, that in the pronunciation of all primitive or causal verbs with monosyllabic roots, the accent everywhere remains upon the radical syllable. But in causal verbs formed by adding a syllable, as **आ**, **ला**, **आल**, **वा**, etc., to the root of the primitive, the accent rests throughout upon this causal affix. In the following examples, the accent is indicated by the italic letters: *karúngá*, *karáúngá*; *kahá*, *kahlá*, *baná*, *baná*, etc. Many words identical in form, but different in meaning, are thus distinguished only by the accent; thus *parhá*, is 3rd sing., indef. perf., from *parhná*, '(he) read'; but *parhá*, with the accent on the second syllable is 2nd sing. imp. from *parháná*, 'cause thou (him) to read'. Similarly, *suná*, is 'heard'; but '*suná*', 'tell thou', etc. etc. In no case, however, must the accent be exaggerated.

336. The following tables exhibit the conjugation of three verbs. Table XII illustrates the conjugation of a regular intransitive verb, with a consonant final in the root; Table XIII, that of an intransitive verb with a vowel final in the root. Table XIV exhibits the conjugation of the transitive verb **करना**, 'to do'. So slight are the differences in the conjugation of pure and mixed verbs, that it has not been thought necessary to give more than one paradigm of a regular verb. On the other hand, as will appear, the slightly irregular verbs, **जाना** and **करना**, in various combinations are so very common that it has seemed desirable to exhibit their conjugation in full. Exactly like **करना**, perf. part., **किया**, are also conjugated the transitive verbs, **देना**, 'to give', perf. part., **दिया**, and **लेना**, 'to take', perf. part., **लिया**. All regular pure verbs as, *e.g.*, **दिखाना**, 'to shew', perf. part., **दिखाया**, are conjugated exactly as **जाना**, except that the root of the infinitives is preserved throughout.

TABLE XII: CONJUGATION OF AN INTRANSITIVE VERB, (*Close Root*;) गिरना, 'to fall'.

INFINITIVE OF GERUND;	गिरना, 'to fall', falling', Gen., गिरने का, 'of falling', etc.
IMPERFECT PARTICIPLE;	गिरता, 'falling'; Adjective form, गिरता हुआ.
PERFECT PARTICIPLE;	गिरा, 'fallen'; Adjective form, गिरा हुआ.
CONJUNCTIVE PARTICIPLE;	गिर, गिरके, गिरकर, गिरखरके, or गिरकरकर, 'having fallen'.
NOUN OF AGENCY;	गिरनेवाला or गिरनेवारा, 'one who falls', 'a fall-er'.

TENSES OF THE FUTURE. (*From the Root.*)

	SINGULAR.			PLURAL.		
CONTINGENT FUTURE; 'I may fall', etc.	1. में गिरूँ.	2. तू गिरे.	3. वह गिरे.	1. हम गिरें.	2. तुम गिरो.	3. वे गिरें.
ABSOLUTE FUTURE; 'I shall fall', etc.	1. में गिरूँगा.*	2. तू गिरोगा.	3. वह गिरोगा.	1. हम गिरेंगे.	2. तुम गिरोगे.	3. वे गिरेंगे.
IMPERATIVE;	1. में गिर.	2. तू गिर.	3. वह गिरे.	1. हम गिरें.	2. तुम गिरो.	3. वे गिरें.
Do. RESPECTFUL FORMS; 'be pleased to fall' etc.	2. तुम गिरियो.	3. आप गिरियो

* For the fem., inflect **गा** to **ई** in the sing., and **र** to **ईं** in the plural.

TABLE XII, *Continued*: TENSES OF THE IMPERFECT PARTICIPLE.*

	SINGULAR.			PLURAL.		
INDEF. IMP. 'I would fall', 'I fall', etc.	1. मैं गिरता.	2. तू गिरता.	3. वह गिरता.	1. हम गिरते.	2. तुम गिरते.	3. वे गिरते.
PRES. IMP. 'I fall', 'am falling', etc.	1. गिरता हूँ.	2. गिरता है.	3. गिरता है.	1. गिरते हैं.	2. गिरते हो.	3. गिरते हैं.
PAST IMP. 'I was falling', etc.	1. गिरता था.	2. गिरता था.	3. गिरता था.	1. गिरते थे.	2. गिरते थे.	3. गिरते थे.
CONT. IMP. 'I may be falling', etc.	1. गिरता होसकत‡.	2. गिरता हो.	3. गिरता हो.	1. गिरते हो.	2. गिरते हो.	3. गिरते हो.
PREMUM. IMP. 'I must be falling', etc.	1. गिरना पडना‡.	2. गिरना पडता.	3. गिरना पडता.	1. गिरने पडते.	2. गिरने पडते.	3. गिरने पडते.
NEG. CONT. IMP. 'Were I falling', etc.	1. गिरता होता.	2. गिरता होता.	3. गिरता होता.	1. गिरते होते.	2. गिरते होते.	3. गिरते होते.

† For the forms of the auxiliaries given in these tables, any of the alternative forms given in §321 may be substituted at pleasure.

TABLE XII, Completed. TENSES OF THE PERFECT PARTICIPLE.*

	SINGULAR.			PLURAL.		
INDEF. PERF. 'I fall', etc.	1. भें गिरा.	2. तू गिरा.	3. उह गिरा.	1. हम गिरे.	2. तुम गिरे.	3. वे गिरे.
PRES. PERF. 'I have fallen', etc.	1. ,, गिरा हूँ.	2. ,, गिरा है.	3. ,, गिरा है.	1. ,, गिरे हैं.	2. ,, गिरे हो.	3. ,, गिरे हैं.
PAST PERF. 'I had fallen', etc.	1. ,, गिरा था.	2. ,, गिरा था.	3. ,, गिरा था.	1. ,, गिरे थे.	2. ,, गिरे थे.	3. ,, गिरे थे.
CONT. PERF. 'I may have fallen', etc.	1. ,, गिरा होचं.	2. ,, गिरा हो.	3. ,, गिरा हो.	1. ,, गिरे हो.	2. ,, गिरे होचो.	3. ,, गिरे हो.
PRESUM. PERF. 'I must have fallen', etc.	1. ,, गिरा हुंवा.	2. ,, गिरा हुंवा.	3. ,, गिरा हुंवा.	1. ,, गिरे होतो.	2. ,, गिरे होतो.	3. ,, गिरे होतो.
NEG. CONT. PERF. 'Had I fallen', etc.	1. ,, गिरा होला.	2. ,, गिरा होला.	3. ,, गिरा होला.	1. ,, गिरे होले.	2. ,, गिरे होले.	3. ,, गिरे होले.

* For the fem., inflect final आ to ई in the sing., and ए to ऐ in the plur., both in the participles and auxiliary throughout. But see §380 a.

TABLE XIII: CONJUGATION OF AN INTRANSITIVE VERB, (*Open Root*;) जात, 'to go'.

INFINITIVE OF GERUND;	जाना, 'to go', 'going'; Gen., जाने का, 'of going', etc.
IMPERFECT PARTICIPLE;	जाता, 'going'; Adjective form, जाता हुआ.
PERFECT PARTICIPLE;	गया, 'gone'; Adjective form, गया हुआ.
CONJUNCTIVE PARTICIPLE;	जा, जाकर, जाके, जाकरके or जाकरकर, 'having gone'.
NOUN OF AGENCY;	जानेवाला or जानेवाली, 'one who goes', 'a goer'.

TENSES OF THE FUTURE. (*From the Root.*)

	SINGULAR.			PLURAL.		
CONT. FUT.; 'I may go', etc.	1. में जाऊँ.	2. तू जाय.	3. वह जाय.	1. हम जायें.	2. तुम जाओ.	3. वे जायें.
ABS. FUT.; 'I shall go', etc.	1. जाऊँगा.*	2. जायेंगा.	3. जायेंगा.	1. जायेंगे.	2. जाओगे.	3. जायेंगे.
IMPERATIVE; 'let me go', etc.	1. जाऊँ.	2. जा.	3. जायें.	1. जायें.	2. जाओ.	3. जायें.
Do. RESP. FORMS. 'be pleased to go', etc.	2. जाइयो.	3. जायें जाइयो.

* For the fem., inflect जा to जाँ in the sing., and जा to जाँ in the plur., throughout the absolute future.

TABLE XIII, Continued: TENSES OF THE IMPERFECT PARTICIPLE.*

	SINGULAR.			PLURAL.		
INDEF. IMP. 'I would go', 'I go', etc.	1. में जाता.	2. तू जाता.	3. वह जाता.	1. हम जाते.	2. तुम जाते.	3. वे जाते.
PRES. IMP. 'I go', 'am going', etc.	1. ,, जाता हूँ.	2. ,, जाता है.	3. ,, जाता है.	1. ,, जाते हैं.	2. ,, जाते हो.	3. ,, जाते हैं.
८३ PAST IMP. 'I was going', etc.	1. ,, जाता था.	2. ,, जाता था.	3. ,, जाता था.	1. ,, जाते थे.	2. ,, जाते थे.	3. ,, जाते थे.
CONT. IMP. 'I may be going', etc.	1. ,, जाता होऊँ.	2. ,, जाता होय.	3. ,, जाता होय.	1. ,, जाते होय.	2. ,, जाते होयो.	3. ,, जाते होय.
PRESUM. IMP. 'I must be going', etc.	1. ,, जाता होऊँगा.	2. ,, जाता होयगा.	3. ,, जाता होयगा.	1. ,, जाते होयगे.	2. ,, जाते होयगे.	3. ,, जाते होयगे.
NEG. CONT. IMP. 'Were I going', etc.	1. ,, जाता होता.	2. ,, जाता होता.	3. ,, जाता होता.	1. ,, जाते होते.	2. ,, जाते होते.	3. ,, जाते होते.

VERBS.

* Inflect आ final to है and ए to हैं for the feminine throughout these tenses.

TABLE XIII, Completed: TENSES OF THE PERFECT PARTICIPLE;* (गया for जाया, Vid. §311.)

	SINGULAR.			PLURAL.		
INDEF. PERF. 'I went', etc.	1. मैं गया.	2. तू गया.	3. वह गया.	1. हम गये †	2. तुम गये.	3. वे गये.
PRES. PERF. 'I have gone', etc.	1. ,, गया हूँ.	2. ,, गया है.	3. ,, गया है.	1. ,, गये हैं.	2. ,, गये हो.	3. ,, गये हैं.
PAST PERF. 'I had gone', etc.	1. ,, गया था.	2. ,, गया था.	3. ,, गया था.	1. ,, गये थे.	2. ,, गये थे.	3. ,, गये थे.
CONT. PERF. 'I may have gone', etc.	1. ,, गया होकं.	2. ,, गया होय.	3. ,, गया होय.	1. ,, गये होय.	2. ,, गये होयो.	3. ,, गये होय.
PRESUM. PERF. 'I must have gone', etc.	1. ,, गया होकंजा.	2. ,, गया होयजा.	3. ,, गया होयजा.	1. ,, गये होयजे.	2. ,, गये होयजे.	3. ,, गये होयजे.
NEG. CONT. PERF. 'Had I gone', etc.	1. ,, गया होता.	2. ,, गया होता.	3. ,, गया होता.	1. ,, गये होते.	2. ,, गये होते.	3. ,, गये होते.

* Inflect everywhere या final to हूँ and थ to हैं for the feminine. † Also गये throughout these plurals.

TABLE XIV : CONJUGATION OF THE TRANSITIVE VERB, (*Close Root,*) करना, 'to do'.

INFINITIVE OF GERUND;	करना, 'to do', 'doing';	Gen., करने का, 'of doing', etc.
IMPERFECT PARTICIPLE;	करता, 'doing';	Adjective form, करता हुआ.
PERFECT PARTICIPLE;	किया, 'done';	Adjective form, किया हुआ.
CONJUNCTIVE PARTICIPLE;	कर or करके,	'having done'.
NOUN OF AGENCY;	करनेवाला or करनेवाला,	'a doer'.

TENSES OF THE FUTURE. (*From the Root.*)

	SINGULAR.			PLURAL.		
CONTINGENT FUTURE; 'I may do', etc.	1. में करूँ.	2. तू करे.	3. वह करे.	1. हम करें.	2. तुम करो.	3. वे करें.
ABSOLUTE FUTURE; 'I shall do', etc.	1. ,, करूँगा.	2. ,, करेगा.	3. ,, करेगा.	1. ,, करेंगे.	2. ,, करेंगे.	3. ,, करेंगे.
IMPERATIVE;	1. ,, कर.	2. ,, कर.	3. ,, करे.	1. ,, करें.	2. ,, करो.	3. ,, करें.
Do. RESPECTFUL FORMS;	2. ,, (को)कियो.	3. (को)कियो.
					2. ,, (को)जो.	

TABLE XIV, *Continued*: TENSES OF THE IMPERFECT PARTICIPLE.

	SINGULAR.			PLURAL.		
INDEF. IMP. 'I would do', 'I do', etc. 1. मैं करता.	2. तू करता.	3. वह करता.	1. हम करते.	2. तुम करते.	3. वे करते.	
PRES. IMP. 'I do', 'am doing', etc. 1. करता हूँ.	2. करता है.	3. करता है.	1. करते हैं.	2. करते हो.	3. करते हैं.	
PAST IMP. 'I was doing', etc. 1. करता था.	2. करता था.	3. करता था.	1. करते थे.	2. करते थे.	3. करते थे.	
CONT. IMP. 'I may be doing', etc. 1. करता होकं.	2. करता होवे.	3. करता होवे.	1. करते होवें.	2. करते होओ.	3. करते होवें.	
PRESUM. IMP. 'I must be doing', etc. 1. करता होख्या.	2. करता होख्या.	3. करता होख्या.	1. करते होख्यो.	2. करते होओ.	3. करते होख्यो.	
NEG. CONT. IMP. 'Were I doing', etc. 1. करता होता.	2. करता होता.	3. करता होता.	1. करते होते.	2. करते होते.	3. करते होते.	

TABLE XIV, Completed: TENSES OF THE PERFECT PARTICIPLE; (किया for कर्त्त.)

	SINGULAR.	PLURAL.
IND. PERF. 'I did', etc.	मैं, तू ने, or उस ने किया, की, किये or कीं.*	वमने, तुमने, or उन्हीं ने किया, की, किये or कीं.
PRES. PERF. 'I have done', etc.	" " किया है, की है, किये हैं or की हैं.	" " " किया है, की है, किये हैं or की हैं.
PAST PERF. 'I had done', etc.	" " किया था, की थी, किये थे or की थीं.	" " " किया था, की थी, किये थे, की थीं.
CON. PERF. 'I may have done', etc.	" " किया हो, की हो, किये हों or की हों.	" " " किया हो, की हो, किये हों, की हों.
PRESUM. PERF. 'I must have [done', etc.	" " किया होगा, की होगी, किये होंगे or की होंगी.	" " " किया होगा, की होगी, किये होंगे, की होंगी.
NEG. CONT. PERF. 'Had I [done', etc.	" " किया होता, की होती, किये होते or की होतीं.	" " " किया होता, की होती, किये होते, की होतीं.

VERBS.

* For the rules as to the construction of these perfect tenses, see § 352.

OF THE PASSIVE VOICE.

337. The *Passive Voice* is much less used in Hindí than in English. Its place is largely taken by neuter verbs. It is to be remembered, however, that the construction of the past tenses of transitive verbs with ने is, in reality, a passive construction. Still in certain cases, which will be duly noticed in the chapter on syntax, the Hindí verb admits of a *Passive Voice*.

338. Any verb may be conjugated passively by adding to its Perfect participle the verb जाना, 'to go', which verb is then conjugated after the manner exhibited in Table XIII. The participle is inflected to agree with the subject; जा final becoming र, for the masc. plur., and ई, for the fem., sing. or plur.

Thus from the verb मारना, 'to strike', we have the passive मारा जाना, 'to be struck'; from देना, 'to give', pass., दिया जाना, 'to be given'; from दिखाना, 'to shew', pass., दिखाया जाना, 'to be shown'. Other examples are as follows, वह पत्र लिखा गया, 'that letter was written'; कोई स्त्री मारी जाती थी, 'some woman was being beaten'; वे नहीं देखे जाते हैं, 'they are not seen'; i.e., 'they are invisible'.

a. Sometimes even neuter verbs are conjugated passively; as, e.g., from आना, 'to come', pass., आया जाना. But this idiom is scarcely transferable to English.

339. As the passive conjugation presents no difficulties whatever, it will be quite sufficient to present a mere synopsis of the more common tenses. We take, as an example, the verb लिखना, 'to write', perf. part., लिखा.

Synopsis of the passive Conjugation of लिखना.

Infinitive;	लिखा जाना,	'to be written'.
Conjunctive Participle;	लिखा जाकर,	'having been written'.
Contingent Future, 3rd sing.;	लिखा जाय,	'it may be written'.
Absolute Future;	लिखा जायगा,	'it will be written'.
Imperative;	लिखा जाय,	'let it be written'.

Indefinite Imperfect, 3rd sing.;		लिखा जाता, 'it is, or would be, written'.
Present Imperfect,	„ „	लिखा जाता है, 'it is being written'.
Past Imperfect,	„ „	लिखा जाता था, 'it was being written'.
Indefinite Perfect,	„ „	लिखा गया, 'it was written'.
Present Perfect,	„ „	लिखा गया है, 'it has been written'.
Past Perfect,	„ „	लिखा गया था, 'it had been written'.

a. The remaining tenses are extremely rare ; if, indeed, many of them ever occur at all. In general, the student will need to guard against the too free use of any of these passive forms.

CAUSAL VERBS.

340. From every primitive verb in Hindí, may be derived a Causal and a Second causal verb. The first causal expresses *immediate* causation, and the second causal, the *mediate* causation of the act or state of the primitive. Thus from the primitive बनना, 'to be made', we have the causal, बनाना, 'to make', and the second causal, बनवाना, 'to cause (another person) to make'.

a. If the primitive be a neuter verb, it is plain that the 1st causal will be the corresponding active verb. It is thus evident that the causal may often be translated into English by a single verb having no etymological connexion with the word which properly translates the primitive. Illustrations will be found below.

341. The rules for the formation of causal verbs are as follows :—

(1) Add to the root of the primitive, जा for the causal, वा for the second causal. The usual infinitive termination, ना, added to the root thus modified, will give the infinitive of the causal or second causal in question. Thus from जलना, 'to burn', we have the root जल; whence we derive, as above, the root of the causal, जला, and of the second causal, जलवा; from which again, we have the causal infinitives, जलाना, 'to set on fire', and जलवाना, 'to cause to set on fire'. Similar are the following examples :—

<i>Primitive.</i>	<i>Causal.</i>	<i>Second Causal.</i>
उठना, 'to rise'.	उठाना, 'to raise'.	उठवाना, 'to cause to raise'.
छिपना, 'to be hid- den'.	छिपाना, 'to hide'.	छिपवाना, 'to cause to hide'.
पकना, 'to be ripe', 'cooked'.	पकाना, 'to cook'.	पकवाना, 'to cause to cook'.
मिलना, 'to meet'.	मिलाना, 'to cause to meet', to mix'.	मिलवाना, 'to cause to mix'.
सुनना, 'to hear'.	सुनाना, 'to tell'.	सुनवाना, 'to cause to tell'.

a. A short *a* in the second syllable of dissyllabic roots which have a short vowel in the first syllable, usually becomes silent in the causal. But before the affix of the second causal, the *a* is pronounced. Examples are,—

<i>Primitive.</i>	<i>Causal.</i>	<i>Second Causal.</i>
चमकना <i>chamakná</i> , 'to shine'.	चमकाना, pron. <i>chamkáná</i> .	चमकवाना <i>chamakwáná</i> .
पिघलना <i>pighalná</i> , 'to melt' <i>intr.</i>	पिघलाना, ,, <i>pighláná</i> .	पिघलवाना <i>pighalwáná</i> .
भटकना <i>bhatakná</i> , 'to wander'.	भटकाना, ,, <i>bhaṭkáná</i> .	भटकवाना <i>bhaṭakwáná</i> .
समझना <i>samajhná</i> , 'to understand'.	समझाना, ,, <i>samjhnáná</i> .	समझवाना <i>samajhwáná</i> .
पकड़ना <i>pakarṇá</i> , 'to seize'.	पकड़ाना, ,, <i>pakṛáná</i> .	पकड़वाना <i>pakarṇwáná</i> .
परखना <i>parakhná</i> , 'to be tried'.	परखाना, ,, <i>parkháná</i> .	परखवाना <i>parakhwáná</i> .

b. Monosyllabic roots containing a long vowel shorten that vowel before the causal and second causal affixes. Open roots then insert *ल* between the shortened vowel and the causal affixes.

N. B. In the application of this rule, observe, that *a* is the short substitute for आ; इ, for ई, ए, ऐ, and occasionally for आ; उ, for ऊ, औ, and औ, in the primitive.

Under this head, the following are examples of close roots:—

<i>Primitive.</i>	<i>Causal.</i>	<i>Second Causal.</i>
घूमना, 'to go around'.	घुमाना, 'to turn around'.	घुमवाना.
जागना, 'to waken'.	जागाना, 'to awaken'.	जागवाना.
जीतना, 'to conquer'.	जिताना, 'to cause to conquer'.	जितवाना.

The following are examples of open roots :—

खाना, 'to eat'. खिलाणा, 'to feed'. खिलावणा, 'to cause to feed'.
 पीना, 'to drink'. पिलाणा, 'to give to drink'. पिलावणा, 'to cause to give
 drink'.
 सोना, 'to sleep'. सुलाना, 'to put to sleep'. सुलवणा, 'to cause to put
 to sleep'.

a. Verbs of this class with monosyllabic roots enclosing रे or औ, commonly retain the long vowel, and form their causals according to (1); as, *e.g.*,

पैरना, 'to swim'. पैराना, 'to cause to swim'. 2nd Causal, पैरवणा.
 दौड़ना, 'to run'. दौड़ाना, 'to cause to run'. ,, ,, दौड़वणा.

b. But बैठना, 'to sit', makes the 1st causal, बैठाना or बिठाना, 'to seat'. It also often follows the example of open roots, and admits an स before the causal affix, making बिठलाना. Similarly कहना, 'to say', सीखना, 'to learn', and देखना, 'to see', make their causals either कहाना, सिखाना and दिखाना, or कहलाना, सिखलाना and दिखलाना. कहाना and कहलाना are peculiar in having a passive sense, *viz.*, 'to be called', 'to be named'.

(2) Many primitive neuter verbs having a monosyllabic root enclosing a short vowel, form the 1st causal by simply lengthening that vowel. The 2nd causal is formed in the usual way. Thus, *e.g.* :—

कटना, 'to be cut'. काटना, 'to cut'. कटवणा, 'to cause to cut'.
 बंधना, 'to be fastened'. बांधना, 'to fasten'. बांधवणा, 'to cause to fasten'.
 लदना, 'to be loaded'. लादना, 'to load'. लदवणा, 'to cause to load'.
 खिंचना, 'to be pulled'. खींचना, 'to pull'. खिंचवणा, 'to cause to pull'.

a. Sometimes in such words, instead of the cognate long vowel, the *gun* or *vriddhi* of the primitive vowel is the substitute, as in the following :—

खुलना, 'to be open'. खोलना, 'to open'. खुलवणा, 'to cause to open'.
 घुलना, 'to be dissolved'. घोलना, 'to dissolve'. घुलवणा, 'to cause to dissolve'.
 खिंचना, 'to be pulled'. खींचना, 'to pull'. खिंचवणा, 'to cause to pull'.

b. निकलना, 'to come out', make its 1st causal, निकालना, after the analogy of the above.

c. A few primitive roots ending in ट, change this ट to the cognate ड in the causals. Some of these present other irregularities. The most common are the following :—

कूटना, 'to be separated'.	छोड़ना, 'to leave'.	कुड़ाना, 'to liberate'.	
टूटना, 'to break', <i>intr.</i>	तोड़ना, 'to break', <i>tr.</i>	तोड़वाना, } 'to cause to break'.	}
फटना, 'to tear', ,,	फाड़ना, 'to tear', ,,	फाड़वाना, } 'to cause to tear'.	
फूटना, 'to burst', ,,	फोड़ना, 'to burst', ,,	फुड़वाना, } 'to cause to burst'.	

d. बिकना, 'to be sold', changes the final guttural of the root to the corresponding palatal, in the 1st causal only, making बेचना, 'to sell'. रहना, 'to remain', changes ड to the hard guttural aspirate, रख, making रखना, 'to keep'.

e. Two verbs, *viz.*, डूबना, 'to be immersed', and भोगना, 'to be wet', make their 1st causals, respectively, डुबाना, and भिगाना. Sometimes, however, they assume the regular causal affixes.

f. निबड़ना, 'to be ended', makes the 1st causal निबड़ाइना or निबेड़ना, 'to finish'. The verb बैठना, mentioned at (1) b., makes yet another form, बैठालना; and, similarly, घेठना, 'to enter', makes घेठालना. लेना, 'to take', makes लिवाना.

342. Of some verbs the neuters have become obsolete in High Hindí, though still in use in some dialects. Thus, *e.g.*, the neuter of जोड़ना, 'to join', जुड़ना, is not very common in standard Hindí, but in the *Rámáyana*, under the form जुवन, it is the common substitute for the H. H. मिलना, 'to meet' or 'find'. Similarly the common word देखना, 'to see', is the causal of the dialectic K. दीखना, 'to appear'. On the other hand, a few neuters are commonly used in High Hindí, of which the causal forms are rarely heard. A common example is पड़ना, 'to fall', the causal of which, पाड़ना (पारन), frequently occurs in the *Rámáyana*, but is very rare in standard Hindí.

343. Many verbs form their causals both according to rules (1) and (2). Usually with such difference in form, there is also a difference in signification, and often one form is dialectic. A good illustration is found in the verb दखना, 'to be pressed', which makes one causal, दखाना, 'to press down', and another, दाखना, having the special meaning, 'to shampoo'. So also, from मिलना, 'to meet', the standard dialect makes the causal, मिलाना, 'to mix'; but the Mārwarí, following

the second rule, makes the causal, भेजना, 'to send'. बुलाना, 'to call', is commonly reckoned a causal from बोलना, 'to speak'; but बोलन is invariably used in the *Rámáyan* instead of बुलाना, in the same sense.

344. We may note in conclusion the existence of a class of causal verbs derived from abstract nouns, which denote the causation of that which is expressed by the noun. Thus, from रिस, 'anger', comes रिसयाना, 'to be angry'; from तेवर, 'vertigo', तेवराना, 'to be giddy'. Under this head also come a number of onomatopoeitic words; as, e.g., छनछनाना, 'to simmer', 'to ohink', i.e., 'to make the sound *chhan-chhan*'; क्विचमिचाना, 'to twitter as a bird', etc.

OF COMPOUND VERBS.*

345. These have been commonly enumerated as of twelve varieties, *viz.*, Intensives, Potentials, Completives, Frequentatives, Desideratives, Continuatives, Statisticals, Inceptives, Permissives, Acquisitives, Reiteratives and Nominals.

a. Of these, however, no more than the first five can properly be called compound verbs. In all the other combinations, (except perhaps some Nominals,) a Participle, Infinitive or Noun, is in grammatical construction with the verb which it precedes, so that their explanation properly belongs to Syntax. As, however, all these idioms have usually been explained at this point, and as acquaintance with them will greatly facilitate the understanding of many illustrations used in the Syntax, we give the subject a place in this section.

346. The five varieties of true Compound Verbs may be divided into two classes, as follows:—

COMPOUND VERBS.

CLASS I.	CLASS II.
<i>Formed with the Root.</i>	<i>Formed with the Perf. Part.</i>
1. Intensives.	1. Frequentatives.
2. Potentials.	2. Desideratives.
3. Completives.	

* This section would perhaps have been more naturally deferred to the chapter on Derivative and Compound words; but considering the necessities of beginners, it has been thought well to follow the practice of other Urdú and Hindí grammarians, and treat the subject in immediate connexion with Verbs.

Class I. Compounds formed with the Root.

347. *Intensive* compounds intensify or otherwise modify the meaning of the verb whose root stands first in the compound. They are formed by adding to a verbal root one of certain other verbs, which latter verb in conjunction with the root is then conjugated as usual. This second conjugated member does not, however, retain its separate character and significance; but only modifies, in accordance with the general idea which it embodies, the meaning of the unconjugated root to which it is annexed.

Examples are the following:—

फेंकना,	'to throw'.	फेंक देना,	'to throw away'.
तोड़ना,	'to break'.	तोड़ डालना,	'to break to pieces'.
काटना,	'to cut'.	काट डालना,	'to cut off'. [succeed'.
बनना,	'to be made'.	बन आना,	'to be quite made, to
गिरना,	'to fall'.	गिर पड़ना,	'to fall down'.
गिराना,	'to cause to fall'.	गिरा देना,	'to throw down'.
जानना,	'to know'.	जान पड़ना,	'to be found out', 'ap-
खाना,	'to eat'.	खा जाना,	'to eat up'. [pear'.
होना,	'to be'.	हो जाना,	'to become'.
पीना,	'to drink'.	पी लेना,	'to drink down'.
लेना,	'to take'.	ले लेना,	'to take away'.
बैठना,	'to sit'.	बैठ रहना,	'to sit still'.
देखना,	'to see'.	देख रहना,	'to look on, 'to gaze'.
बोलना,	'to speak'.	बोल उठना,	'to speak up'.

a. Causals very often take *ब* after *आ* in these compounds, as *ब्रतार्य देना*, *दिखार्य देना*, *खार्य लेना*, etc. This is the uniform practice in many dialects.

348. The above list comprises about all the verbs which are combined with the roots of other verbs to form Intensive Compounds. It is evident that, in most cases, the modification of the meaning of the verb may be expressed in English by a preposition adverbially used with the verb. It may be difficult to find a term which shall exactly express the idea added by the secondary verb in every case, but the following is an approximation.

देना, Intensity.	डालना, Violence.
जाना, Reflexion (?).	पड़ना, Chance, accident.
जाना, Finality, completeness.	लेना, Reflexion, appropriation.
उठना, Suddenness.	रहना, Continuance.

a. Of the above eight verbs, it may be further observed that देना and डालना can only be used with Transitive verbs; जाना and उठना, with Intransitives only; the remainder with either Transitives or Intransitives.

b. It may also be noted that देना is the compound which is most frequently used with causal verbs; as ज्ञाता देना, 'to show'; समझा देना, 'to explain'; निकाल देना, 'to take out'. But with a few causals it is never used; thus, from बुलाना, 'to call', we never have बुला देना, but always बुला लेना, 'to call here', *i.e.*, 'to one's self'.

c. जाना is the verb which is most commonly found compounded with Intransitives; as टूट जाना, 'to be broken'; मिल जाना, 'to meet', 'to unite'; पहुंच जाना, 'to arrive'; but it is also used with Transitives, as खा जाना, 'to eat up'; कह जाना, 'to tell'.

d. Compounds with रहना are common, but for the most part are used in the tenses of the perfect participle. In the tenses of the imperfect participle and the imperative, they are much more rare. As above remarked, these compounds exhibit the action of the verb emphatically as continuing or permanent. Thus, दोनों लड़के खेल रहे थे, 'the two children were engaged in playing'; बैठ रहो, 'sit still'.

e. लेना, when compounded with a verbal root, represents the action of the verb as terminating with, upon, near, or to the advantage of the agent. In many cases, therefore, this compound is equivalent to the Middle Voice in Greek. Thus, बुलाना, is 'to call', in general; but बुला लेना, is 'to call to one's self'; रखना, 'to place'; रख लेना, 'to lay by'; *i.e.*, for one's self. लेना, in compounds, thus stands in absolute contrast with देना, emphasizing the action as terminating upon, or to the advantage of one's self; while देना represents it emphatically as terminating upon or to the advantage of another. Compare, *e.g.*, समझ लेना, 'to understand', *i.e.*, for one's self; and समझा देना, 'to cause another to understand'. जाना approaches to a reflexive sense, but is of much less extensive application than लेना.

f. पड़ना, although used with both transitive and intransitive verbs, cannot be combined with causals. The idea of 'causation' necessarily

excludes that of 'chance'. Thus while we can say, देख पड़ा, 'it appeared', we cannot say दिखा पड़ा.

g. In many cases, the same root may be compounded with different secondary verbs. A few such examples may further elucidate this matter. Thus, from खाना, 'to eat', we have खा जाना, 'to eat up'; खा लेना, 'to eat down'; खा रहना, 'to be engaged in eating'. Similarly from मारना, 'to strike', we have both मार देना, 'to beat', and मार डालना, 'to strike down', 'to kill'.

349. While the modification of the first verb by the secondary member, may often be expressed in English either by the addition of certain particles, or by the use of another verb from that used to represent the simple Hindi verb, in many cases, again, it will be found quite impossible to express in English the slight distinction between the simple and compound verb. Indeed it is to be remarked, that compounds in which देना is the last member, even in Hindi, are often scarcely to be distinguished in meaning from the simple verb. Thus such forms as समझाना and समझा देना, दिखाना and दिखा देना, etc., are often used interchangeably, with no apparent intention of greater emphasis in the one case than in the other. But where a distinction is intended it is undoubtedly that indicated above. The compound form is much more common colloquially.

350. Occasionally in prose and in the colloquial, a particle, especially a negative, is interposed between the root and the secondary verb; thus, कुछ देख नहीं पड़ता है, 'nothing appears'; टूट तो गया, '(it) is indeed broken'. Also, rarely, in the colloquial, the root is made to follow the secondary; thus, चढ़ गया है भाग, 'he has fled away'. This inversion is never found in prose, but like the previous idiom, is not unusual in poetry.*

351. The learner must not confound with the above Compound verbs, a common idiom in which the leading verb is immediately preceded by the conjunctive participle of another verb, taken in that form which is identical with the root. Although this combination is identical in appearance with the above forms, it is, in reality, a different thing, as the final verb in this idiom retains its individuality and separate signification. Examples of this idiom are, उस गाँव को देख आओ, *lit.*, 'having seen that village, come', or, in English idiom, 'go and see that village'; मैं माली के घर हो आया हूँ, *lit.*, 'having been at the gardener's house, I have come'; *i.e.*, 'I have come by way of the gardener's house'.

* For other examples, see the section on dialectic conjugation.

a. ले आना may be explained either on this principle, as 'having taken, come', or as a compound, 'to bring'. Similar are कह सुनाना, 'to announce', आ मिलना, 'to come and meet', etc., etc.

352. A number of *quasi* compounds occur in which चढ़, the root of चढ़ना, 'to ascend', is the first member, and a verb of motion the second. But in these the leading idea is in the second member, to which चढ़ adds the idea of 'hostility'. Examples are, चढ़ धाना, 'to run up hostilely'; चढ़ आना, 'to attack'; चढ़ दौड़ना, 'to rush up hostilely'. Thus, e.g., वह सब कटक से चढ़ घाया, 'he hastened up with all (his) army'; एक और भी काशी का राजा चढ़ दौड़ा, 'one more also, the king of Kāshī, made an assault'.

353. *Potentials* are formed by adding to the root of any verb, the verb सकना, 'to be able', which may then be conjugated throughout. This compound denotes *ability* to do the action expressed by the primary member. It thus often takes the place of the potential mood in English.

The following are examples:—बोल सकना, 'to be able to speak'; वह दौड़ सकता है, 'he can run'; मैं जा सकूंगा, 'I shall be able to go'; वे आ सकते, 'they may be able to come'.

a. Sometimes, instead of forming a compound, the verb सकना takes the verb which it modifies in the oblique form of the infinitive; thus, मैं नहीं जाने सकता हूँ, 'I am not able to go'.

354. *Completives* are formed by adding to the root of a verb, the verb चुकना, which may then be conjugated in all its parts. The imperfect participle, चुकता, is rare. This compound denotes the *completion* of the act denoted by the primary member of the compound. It is never identical in sense with the perfect participle, but denotes the completeness of the action in a more emphatic manner. Thus, e.g., उस ने खाया, 'he ate', but वह खा चुका, 'he has done eating'.

a. Very often the force of चुकना will be expressed in English by the word 'already'; as वह तो जा चुका है, 'he is indeed already gone'. When in the absolute future, this compound often nearly corresponds to the English future perfect; जब वह खा चुकेगा, 'when he shall have eaten'.

*Class II.—Compounds formed with the Perfect
Participle.**

355. *Frequentatives* are formed by affixing to the masc. sing. of the perfect participle of any verb, the verb करना, which may then be used in any tense; the participle, however, remains unchanged throughout. These denote the *habitual* or *repeated* performance of the action expressed by the first member of the compound; thus, पढ़ा करना, 'to read often'; आया करो, 'come often'; वह कहा करता है, 'he is in the habit of saying'.

a. Thus whenever the adverb 'always' denotes, not duration, but repeated or customary action, it must be expressed in Hindí by using the verb which it qualifies, in the frequentative form. For example, the phrase, 'he always bathes in the morning', must be rendered into Hindí, वह सड़के स्नान किया करता है. But, on the contrary, 'we shall be always happy', is in Hindí, हम सदा आनन्द में रहेंगे. Other examples are, मैं शास्त्र को पढ़ा करता हूँ, 'I am in the habit of reading the Shástra'; तुम मेरी बातें माना करो, 'always obey my words'; तुम क्यों ऐसा किया करते हो, 'why do you always do so?'

356. *Desideratives* are formed, like *Frequentatives*, with an unchanging perfect participle*, in the masc. sing., substituting the verb चाहना for करना as the second and conjugated member. These denote, primarily, *desire to do*

* Although I have followed usage in speaking of these compounds as formed with the perfect participle, it is, I think, doubtful whether this statement is accurate. I am rather inclined to believe that we have in these combinations, not a perfect participle, but a *gerund* in *á*, equivalent to the common gerund or infinitive in *ná*. This form of the gerund certainly occurs in Bangálí, where we have, e.g., *chalan*—H. H. *chalná*, *chalibá*—Braj. *chalivau*, and *chalá*, as three equivalent and alternative forms. Moreover, this gerund in its inflected form in *ai*, is constantly used in eastern Hindí in these very compounds. Thus the H. H. *chalne lagá*, is in E. Hindí, *chalai lagá*. There is, therefore, good reason to believe that *chalá* and *chalai* in these compounds are true gerundial forms, exactly equivalent, respectively, to *chalná* and *chalne*, and that the common account of these compounds which we have provisionally followed is not grammatically correct.

the action expressed by the participial member; secondarily, the *immediate futuration* of that action. It can only be known from the context which of these may be intended in any particular case, but there is not often ambiguity. Thus, वह बोला चाहता है, 'he wishes to speak', or 'is about to speak'; घड़ी बजा चाहती थी, 'the clock was about to strike'.

a. Sometimes the first verb may be in the inflected Infin., as वह जाने चाहता है, 'he wishes to go'. In this case the Infinitive is to be regarded as in grammatical construction with चाहना, and the combination is in no true sense a compound.

b. The Desiderative compound, in the respectful form with चाहिये, is idiomatically used to express obligation or duty; as इस पुस्तक को पढ़ा चाहिये, '(one) ought to read this book'; or, with a noun or pronoun expressed, तुम्हें वहाँ जाना चाहिये, 'you ought to go there'. The construction of this idiom will be explained in the Syntax. In this combination, the direct form of the infinitive is very commonly substituted for the verbal form in जा. Thus we may say, वहाँ जाना चाहिये, '(one) ought to go there'.

c. Observe, that when चाहना and करना are thus compounded with जाना, 'to go', जाया is used instead of गया. Thus, वह जाया करता है, 'he often goes'; वह जाया चाहता है, 'he wishes', or 'is about to go'. So also, in the forms derived from मरना, 'to die', मरा, and not मुझा, is used in combination with the above verbs; thus, वह मरा चाहता है, 'he is about to die'.

357. We have next to consider the other combinations referred to in §345, a. These have been commonly enumerated as *Continuatives*, *Statics*, *Inceptives*, *Permissives*, *Acquisitives* and *Nominals*. Of these, the first two are combinations of certain verbs with an Imperfect Participle; Inceptives, Permissives and Acquisitives, are combinations of certain verbs with Infinitives; Nominals are combinations of certain verbs with Nouns or Adjectives.

358. Those combinations have been called *Continuatives*

in which the imperfect participle of any verb is connected with the verbs जाना, 'to go', or रहना, 'to remain'. The participle, which is really a predicative adjunct of the subject, agrees with it in gender and number.

a. Although combinations with जाना and रहना have always been thus grouped together under this head, they cannot be interchangeably used, but should rather be separately classified. The combinations with जाना might be more accurately termed *Progressives*. The action of the participle is thus exhibited as steadily progressing or advancing. Thus we may say; वह लिखता जाता है, 'he is going on writing'; वे लड़कियाँ पढ़ती जाती थीं, 'those girls were going on reading'; पानी बहता जाता है, 'the water keeps flowing away'.

b. The analogous combinations with रहना are correctly termed *Continuatives*. They denote the continuance of an incomplete action; as, वह गाती रहती है, 'she continues singing'; तुम क्यों हँसते रहते हो, 'why do you keep laughing?'; नदी की धार बहती रहती है, 'the stream of the river keeps flowing on'.

c. It will be instructive to compare these forms with others closely similar. Thus वह पढ़ता है is simply 'he is reading'; वह पढ़ रहा है is 'he is engaged in reading'; वह पढ़ता रहता है is 'he continues reading'. बहता जाना is 'to flow away, from the speaker; बहता रहना is 'to flow on', continually, as it were, before the speaker.

d. जाता रहना very commonly means 'to die'; thus, मेरा पिता जाता रहा है, would be, in English idiom, 'my father has passed away'. It is also used of things, as सब कुछ जाता रहा, 'every thing is gone'.

359. Closely analogous to the above is a common combination in which the perfect instead of the imperfect participle takes the first place, and a verb of motion the second place; as भागा जाना, 'to flee away'; चला जाना, 'to go away'; चला आना, 'to come along', etc. As in the case of the above combinations of the imperfect participle, the perfect participle agrees with the subject of the verb in gender and number; as लौड़ी चली जाती थी, 'the girl was going along'.

a. It is perhaps impossible in all cases to give in English idiom the force of this combination. But it will be found to lie in the distinctive idea of the perfect participle; i.e., the subject is represented as having *completely* come into a certain state, in which state it is then represented as remaining or moving. Thus, in the phrase, एक बाघ पड़ा फिरता था, the compound, (from पड़ना, 'to fall', and फिरना, 'to move around',) represents the lion as first 'crouched', and then in this state moving around; hence we render, 'a lion was prowling about'.

360. The verbal combinations which are called *Stati-cals* denote motion in the state of doing any thing. They are formed by combining a verb of motion with an imperfect participle in the inflected masc. sing. The participle suffers no change for gender and number. Thus, वह रोते हुए आता है, 'he comes weeping'; एक स्त्री गाने आती थी, 'a woman was coming singing'.

361. Of the combinations of verbs with the Infinitive, above enumerated, we notice,—

(1) *Inceptives*. These consist of an inflected infinitive in construction with the verb लगाना, and denote, primarily, the action of the infinitive as *beginning*. They are also used, when that action is *interrupted*. In this way is to be explained the common use of the phrase, कहने लगा, *lit.*, 'he began to say', in the narration of conversation. Examples of these compounds are abundant, as मारने लगाना, 'to begin to beat'; खाने लगा, 'he began to eat', etc., etc.

(2) *Permissives* are formed by combining with an inflected infinitive the verb देना, 'to give', and express *permission* to do the act denoted by the infinitive. Thus, मुझे जाने दो, 'let me go'; मुझे बोलने दीजिये, 'have the goodness to allow me to speak'; उस ने उस को खाने दिया, 'he allowed him to eat', etc.

(3) *Acquisitives* are the exact converse of the preceding, and are formed in the same way, substituting पाना, 'to get', for देना. Thus, तुम वहाँ जाने नहीं पाओगे, 'you will not obtain permission to go there'; मैं बैठने नहीं पाया, 'I was not allowed to

sit'. Observe, in this idiom with **चाया**, as in the frequentative compound with **किया**, the case of the agent is *never used*.

362. These combinations of verbs with the infinitive, as has been observed, are not to be regarded as true compounds. The inflected infinitive is simply governed by the verb, in the same manner that a noun would be in the same place. Thus not only the verbs **लगाना**, **देना** and **पाना**, but other verbs may be combined with infinitives in a similar way, as, *e.g.*, in such forms as **जाने मांगना**, 'to ask leave to go'; **देने चाहना**, 'to wish to give'; **मैं नहीं जाने सकता**, for **मैं नहीं जा सकता**, 'I cannot go', etc.

363. With regard to all the above Compound verbs, as well as these other various combinations, it is to be remarked, that when several roots, infinitives, or participles, thus succeed one another in the same construction, the finite verb is written only with the last. Thus, **जब वे सब कुछ खा पी गए**, 'when they had eaten and drank everything up'; **मैं न पढ़ न लिख सकता हूँ**, 'I am able neither to read nor to write'; **वह आया जाया करता था**, 'he was in the habit of coming and going'; **वे गा पढ़ चुके हैं**, 'they have done singing and reading'; **मैं पढ़ा और लिखा भी चाहता हूँ**, 'I wish both to read and to write'; **वह नाचता गाता कला जाता था**, 'he was going along dancing and singing'; **वह मुझे जाने जाने देगा**, 'he will allow me to come and go'.

364. *Reiteratives* scarcely need a special mention. In these, two verbs of the same or similar meaning, and often similar in sound, are conjugated together in the tenses of the participles, and in the conjunctive participle; as, *e.g.*, **बिना समझार झुझार**, 'without having explained'; **देख भाल कर**, 'having seen', etc. The latter word adds little or nothing to the former; but, in accordance with the taste of the Hindoos for rhyme in sense or sound, is added simply to please the ear.

365. Those have been called *Nominal* compounds in which a substantive or adjective is so united with a verb as that the two express but one idea. These are especially common with the verbs **होना**, 'to be', and **करना**, 'to do', or 'make'. Very commonly they are to be translated into English by one word. Examples are, **खड़ा होना**, 'to stand'; **खड़ा करना**, 'to stand' (*trans.*); **प्राप्त करना**, 'to obtain'; **समाप्त होना**, 'to be complete'; **मोल लेना**, 'to buy'.

a. Very often when especial respect is intended, or when, as, *e.g.*,

in poetry, a lofty diction is desired, a Sanskrit noun or participle, in composition with करना, होना, पाना, or some other Hindí verb, is preferred to the more vulgar word. Often the difference in signification may be expressed by the use of different words in English. Examples are, दर्शन करना, 'to behold', for देखना, 'to see'; भोजन करना, for खाना, 'to eat'; गमन or गवन करना, 'to go', for जाना; प्रस्थान करना or प्रस्थित होना, 'to depart', for चला जाना, etc., etc. This matter is deserving of especial attention by the student both in conversation and in composition.

DIALECTIC CONJUGATION OF VERBS.

366. As a preliminary to the consideration of dialectic conjugation, it will be expedient to exhibit the various dialectic forms and substitutions for the present and past tenses of the auxiliary substantive verb, answering respectively to the standard Hindí, हूँ and था, etc. It is thought unnecessary to exhibit the variations for gender which occur in the past tense, as they are identical with those which occur in the same dialects in nouns and adjectives of the same termination. Nor has it been thought necessary to repeat the pronoun in each dialect. This the student can easily supply for himself from the pronominal tables.

367. The various Kanauji forms of the present in गा or गो, etc., are colloquial throughout the central Doáb, but the standard forms are no less common. Panjábí has analogous forms also in the pres. 1st sing., होगा, 'I am', and 2nd plur., होगो, 'you are'.

368. The Braj forms in Table XVI will be found on almost every page of the *Rájñiti* and similar books. In the present they differ but slightly from the standard forms, and in the 1st sing. and 2nd plur. only. Thus, हौं लक्ष्मी हौं, 'I am *Lakṣmī*'; तुम को हौं, 'who are you?'. आहि is used as 2nd plur. in one passage only in the *Prem Ságar*, viz., तुम दोऊ मेरी कला सु आहि, 'you two who are parts of me'. But I suspect that this is used simply *metri gratiá*. Of the Braj forms of the past, the following are examples of the use of हो (fem. हो); तहाँ सुदर्शन नाम राजा हो, 'in that place was a king named *Sudarshan*'; ताकी पार्वती नाम पत्नी हो, 'he had a wife named *Párvatī*'. This form of this Braj past tense is the more common in books; but हुतो also occasion-

ally occurs,* as in the following; मेरो मुख जैसा हुतो तैसा हो देखिदे, 'thou shalt see my face just as it was'; हुती घर मांग रानी, 'in the house was the queen'. Closely connected is the Bhag. हयो and K. हता.

369. Of the two Rájputána forms of these two tenses, the present, हूँ, etc., and past, हो, etc., are used throughout Mewár and Márwár; and east of Mewár, through Kotáh, Bundá, Jaipúr, etc., the forms with ह are used. But in literature and correspondence, it is said that हूँ, हो, etc., are used much more extensively. Thus the forms in ह constantly occur in the 'Plays', as in the following examples:— हुं हुं बागयो, 'I am a shopkeeper'; म्हे कौं कित्या अजाब, (plur. for sing.) 'how am I ignorant?'; नाम हमारा लोटनो है, 'my name is *Lotno*'; तू है राजकुमार, 'thou art a prince'; etc., etc.

a. It may be remarked here that the Márwáí forms of these and other verbs are often disguised by the addition of various unmeaning letters and syllables, such as क, ज, स, सन, etc. Thus in the 'Plays' we find जोई होस, 'you are that same', where होस is for हो = H. H. हो. These letters are added, indeed, not only to verbs, but to all other parts of speech.†

370. The Garhwáí forms given in Table XVI are those which prevail in and about Tíri, the capital of native Garhwál, and are commonly understood (though not exclusively used) throughout that province. The form लो is used for the present in some villages of Garhwál, both alone and as an auxiliary. Thus I have heard, कोई लो = H. H. कोई है; तुहन औदा ला = H. H. तुम आते हो, 'are you coming?', etc., etc. The longer ह forms given in the pres. plur. belong east of Tíri.

371. In the *Rámáyan*, as in poetry generally, the copula is very freely omitted, both in the present and the past tense. When the copula is necessary, in the past tense the indef. perf., भयच, of the verb होन, 'to be', is often thus used. But occasionally in the *Rámáyan*, as regularly in all the modern eastern dialects, the indef. perf. of the verb रहना, 'to remain', is used both as a copula and as an auxiliary, instead of the H. H. चा. Thus we read in the *Rámáyan*, जो कहु उचित रहा सो कीन्हा, '(*Brahmá*) has done whatever was proper'; सती नाम तब रह तुम्हारा, 'then your name was *Satí*'.

372. With the Avadhí and old Púrbi forms of the present may be compared the almost identical Maráthí conjugation, viz., Sing., आईं, आईंस, आइ; Plur., आइं, आइं, अहेत. The common negative, नहीं, Br. नाहि, has arisen from the combination of the negative. न, with the 3rd sing., आहि, of the subst. verb.

* This word is erroneously explained in Prof. Eastwick's *Prem Ságar*, p. 194, as a Braj form of the imperfect participle, होता. † Vid. Ch. X, last section.

373. In the region west of Bhojpúr, **जे**, is used for **है**, 'is'. The indeclinable **जा** is not confined to Bhojpúr, but is used for all persons in both numbers as far west as Allahabad. Thus, **ऊ आगत जा**, 'he is coming'; **तुम कोहि को गोहरावल जा** 'whom are you calling?'. According to Mr. Beames, the Bhojpúri declinable forms, **खारी**, **खार** (*bára*), **खारन**, are used in questions and replies, but not commonly in narrative, when the other forms given are preferred. The dialectic paradigms of these two tenses will be found on the next two pages.

Of Conjugation in the Braj and other Western dialects.

374. It will be convenient to treat of the various dialectic conjugations according to their mutual affinities. These conjugations may thus be grouped in respect of their common resemblances, as western or eastern. We begin with conjugation in the western dialects, and first of all, as most important, with the Braj.

375. The tense system in Braj corresponds essentially with that in High Hindí. For final **आ** and **ए**, the Braj characteristically exhibits **ओ** and **ऐ**. (§101.) Thus, *e.g.*, for **करे**, we have **करै**; for **चलेगा**, **चलेओ**; for **कहा**, **कह्यौ**, etc. **ऊँ**, in the first sing., and **ओँ** in the 2nd plur., of the future tenses are also *vridhdied* to **ओ**; as, *e.g.*, in **गिरै**, **मारीगौ**, **कहौ**, for H. H. **गिरं**, **मरंगी** and **कहे**. But **ऊँ** occasionally becomes **ओँ**; or after a vowel is retained. **व** is commonly inserted after roots ending in **आ**, **ई** or **ओ**, not only, as in High Hindí, before **ए**, but also before **ओ**, occasionally before **आ**, and regularly before all terminations beginning with a consonant. Thus, *e.g.*, we have **लावो**, **आवनौ**, **पावतु हुवो**, **मुवो**, for H. H. **लाओ**, **आना**, **पाता**, **हुआ**, **मुआ**. Similarly, **व** is inserted after roots in **ऊ**; as, *e.g.*, **कौन कुवैगो**, 'who will touch (it)?'.

376. The Braj infinitive or gerund has two forms, the one in **नै** or **नौ**, the other in **वै** or **वौ**. Before the latter termination, **व** is often inserted. This latter form is especially common in the obl. sing. For the common inflection, **ए**, of the infinitive, the Braj, after **न** has not only **ऐ**, but **वै**, which, again, is often dropped, leaving **न** as the final letter. To illustrate, for H. H. **करना**, Braj has **करनौ** or **करनै**, **करवौ** or **करिवै**; inflected forms, **करने**, **करनि** or **करन**, and **करवै** or **करिवै**. The vowel of union, **व**, after **आ** is often hardened to **य**, as in **मिलायवै**, =H. H. **मिलाना**. But still more commonly it combines with the preceding **आ**, forming **ऐ**, whence such common Braj forms, as, *e.g.*,

TABLE XV: DIALECTIC CONJUGATION
PRESENT TENSE,

		<i>H. Hindi.</i>	<i>Kanaujī.</i>	<i>Braj.</i>	<i>W. Rāj.</i>	<i>E. Rāj.</i>	<i>Garhwālī.</i>
PRESENT.	SINGULAR.	मैं हूँ.	हूँ.	हूँ.	हूँ.	हूँ.	हैं. लो.

† These shorter forms are preferred to the longer, when the verb is used an auxiliary throughout the sing. and plur.; *bhā* belongs to Sháhábád. || Pronounced *rahila*.

देवे को for आवे को, H. H. आने का, 'of coming'; बतैवै, for बतवावै or बतवावै, = H. H. बताना, 'to show'; देन or देंनै, for देना, 'to give', etc., etc. But before नै, after आ, अ is more commonly found instead of इ, as in चुरावनेनै, 'to steal', for H. H. चुराना. Further examples are, सदा काहु सै रहिवै नाहि, 'there is no remaining always with any one'; तुम मेरे पुत्रनि को पंडित करिवे जोग है, 'you are competent to make my sons wise men'; राजा कहनि लाग्यो, 'the king began to say'; तुम सै कहन को आयो है, 'I have come to tell you'.

377. Instead of the H. H. terminations ता and आ (या) of the Imperf. and Perf. participles, the Braj has तु and यो. Before तु, roots in आ sometimes take इय or य instead of अ, as, e.g., in बैठावतु for बैठावतु, 'seating', पायतु, 'finding'. The य which in High Hindî is inserted in the perf. part. only after open roots, is always inserted in Braj before औ after all roots whatever. Examples of these participles are होतु, चलतु, मार्यो, बतयो, for H. H. होता, चलता, मारा, बतया.

a. The final उ of the imperf. part. is occasionally dropped even in the sing., and often in the plur. इ is substituted for उ in the fem. Sometimes for the imperf. part. forms in तु or त, longer forms in तै or तौ, plur. तै, occur; as, e.g., होतौ, मारतौ, for होता, मारता.

378. The Conjunctive part. is formed by the affixes के or कै, कर or करि; but, much more commonly than in the standard dialect, the root alone or with the affix च is used as the conj. part. If the root end in a vowel, य is very commonly written instead of च, but the pronunciation is not perceptibly different. Even when कर or कै is added, this च or य is often retained after the root. Examples are, from मारनै,—मारि, मारिकै, मारिकरि; from आवनै,—आय, आयकै, etc.

379. The Braj Noun of agency agrees, in general, with the standard form; except that for आ final, as usual, we find औ; and the suffix वालो or वारो is added to one of the dialectic inflected forms of the infinitive. Thus, e.g., from करनै, come the various forms of the noun of agency, करनेवालो, करनवालो, करिवेहारो, etc.

380. The usual Braj terminations of the Cont. Fut., are, Sing. (1) औ, औं, ऊं; (2) ऐ; (3) ऐ; Plur. (1) ऐं; (2) औं; (3) ऐं. Besides these we also have in the Sing. (2, 3,) हि; Plur. (1, 3,) हिं, (2) हु. Both forms are common in the Prem Sāgar. In the 1st sing., ऊं or उं is used after vowels. I have also found in the 2nd plur., अ for औ, as जाअ, 'you may go'. हि and हिं often appear, *metri gratiā*, as हो and होँ.

381. In the Absol. Fut. the Braj exhibits two classes of terminations. The 1st variety of the future is formed precisely as in the standard dialect by adding गौ (H. H. गा), duly inflected, to the several persons of the cont. fut. Thus, e.g., we have from करनी, *Sing.* (1) करौगी, (2, 3) करेगा; *Plur.* (1, 3) करेंगे, (2) करोगी. This affix गौ is also added to the longer terminations above noted, as, e.g., in the plur. (1) देखेंगे, for H. H. देखेंगे; (2) पावहुंगे, for H. H. पावोगे; जावगे = H. H. जावोगे. The short penultimate vowel is often lengthened *metri gratiâ*, as, e.g., देखी. The 2nd variety of the Braj future is formed by adding to the root the following terminations, व being regularly employed as a vowel of union:—*Sing.* (1) हें; (2, 3) हे; *Plur.* (1, 3) हें; (2) हे. For हें, we occasionally have हें, हुं or हुं, and for हे, हो.

a. Observe that, as in the infinitive so in the future, after roots ending in आ, व either becomes अ, or more commonly combines with आ to form ऐ. Thus arise, e.g., such forms as मिलावहीं, जतावहीं, = H. H. मिलावंगा, जतावोगा; and देखे, 'he will come'; जैवै, 'you will go', for जाववै, जाववोगे = H. H. जावोगा, जावोगे.

b. More rarely this व combines also with the *a* inherent in the final consonant of a close root; giving, e.g., such forms as करवहीं (= कर + व + हें) for करिवहीं (H. H. करवंगा); कुनेवै, मारवें for कुनिवै, मारिवै, (H. H. कुनेगो, मारंगे).

c. The following passages illustrate these future forms:—देसे सुंदरी स्वावहीं, 'so will I bring a beautiful woman'; जख हुं या कौ मारिवहीं, 'I will kill this (snake) immediately'; हम सों को करिवै सगार्ह, 'who will form an alliance with us?' जखवा ऋतु जोते घर जैवै, 'when the rains are over you shall go home'; हम सबे भूखीं मरिवें, 'we shall all starve to death'; या सों तुम्ह कौसे खेर करिवै, 'with this (snake) how will you be at enmity'; सरग निवास करिवें, 'they shall dwell in heaven'.

Rem. 1. In some Braj books printed under English supervision, these terminations हें, हे, etc., will be found separated from the preceding root. This seems to have arisen from a confusion of these terminations with the substantive verb. Similarly the terminations हि and हु of the cont. fut. are often printed separate from the root, having apparently been confounded with the emphatic particle. This not infrequent printer's error should be noted.

Rem. 2. Observe that there is no difference of signification whatever, between the two forms of the Braj future here given. They both alike express the absolute and unconditioned futurity of the action.

382. The Imperative, as in the standard dialect, agrees in form

with the cont. fut., except in the 2nd pers. sing. where the root only is used. But a form in हि is frequently used in poetry and archaic prose instead of the root, as या में यत्न न करहि, 'do not labor in this'; चिन्ता मति करहि, 'do not be anxious'.

a. The Respectful forms commonly agree with those in High Hindî, except that, as usual, र and जो final become रे and जो. य is occasionally doubled; thus पीछे मारिय्यो, 'afterwards kill (me)'. Occasionally च is substituted for य in these forms, and च before य or ज is sometimes lengthened. Examples are, सोकु झड़िये, 'abandon grief'; या को बंधु चाखीये, 'regard him as a brother'; ये को मारि खाईये, 'kill and eat this'.

383. The tenses of the participles are all formed as in standard Hindî by combining the participles with certain tenses of the substantive verb; i.e., for the Present tenses, हैं, etc., for the Past, हो, for the Presumptive, होलंगी or छेई, etc. Examples are, सर्प कहितु है, 'the snake speaks'; तू काहे तै रोवत है, 'why art thou crying?'; वह या को गोद में बैठावतु है, 'he is seating him in (his) lap'; काल निकट आवतु है, 'death comes near'; मैं ढेर नाहि पावतु, 'I do not find a place'; रानी रोवति हो, 'the queen was crying'; मैं आवीं हौं, 'I have come'; वह आवी होय, 'he may have come'; कहु दूर तैं चल्यो हो, 'he had walked for some distance', etc., etc.

384. The passive construction of the Perfect tenses of transitives with the case of the agent, is regularly employed in Braj as in standard Hindî. But it should be noticed that while नैं is often used with the case of the agent, it is also often omitted, both in poetry, and, more rarely, in prose; and the noun or pronoun is used in its oblique form, where such a form exists. Thus, उन एक नगर छायो, 'he settled a city'; काग सबद कीयो, 'the crow cawed'. In a French Braj translation of the *Hitopades*,* a special inflection of the substantive in this construction occurs, as, e.g., सुसे कहि, 'the hare said', † where सुसे is the inflected case of the agent, from सुसा.

385. A number of common verbs assume peculiar forms in Braj which may be well noted here.

(1) The root of the substantive verb, होनै, 'to be', in the 2nd form of the absol. fut., the infinitive in हो, and the conjunctive participle, becomes हु. Thus, the absol. fut. becomes हूँ, हूँ, etc.;

* Vid. Prof. De Tassy's '*Chrestomathie*', Paris, 1849.

† This is evidently identical with the Mārvarî agent case termination. Vid. §132, a.

the infin. **देवो**, and the conj. part. **दे देके**, etc. In the perf. part. and all its tenses, **भयो**, (masc. infl. **भये** or **भर**, fem. **भयी**, or **भर**), is the common substitute for **हुआ**. The same form with only the change of **ओ** to **ओ** is universally employed in Kanauji, where it is even shortened to **भयो** or **भो**. In one place in a Braj work I have noted a perf. **हूत**, (Sk. भूत.) 'was', for H. H. **हुआ**. In another place occurs **हुगे**, 2nd plur. fut., for **होगे**.

(2) In the verbs **देनी**, 'to give', and **लेनी**, 'to take', the Sanskrit roots **दा** and **ला** are substituted for **दे** and **ले** in the 2nd form of the future, the infin. in **वो**, and in the perf. part. In the participle the final **आ** is shortened to **अ**. In the future and infinitive the radical **आ** combining with the union vowel **इ**, gives **रे**. Thus, the Braj forms of the above tenses of these verbs are as follows: inf. **देवो**, **लेवो**, obl. form, **देवे**, **लेवे**; fut. **देहीं**, **लेहीं**, etc.; perf. part. **दयो**, **लयो**, obl. forms, **दये** or **दर**, **लये** or **लर**, etc. Thus, e.g., we read, **ता में तें कहु तुम को दें**, 'we will give some of that to you'. Similar forms occur in Kanauji. Sometimes the vowel of union is omitted in the fut. of these verbs, and the root of the tense becomes **द** and **ल**. Thus, e.g., **सब सुख संपति लें**, 'they will take all joy and wealth away'. Similarly **ठाननी**, 'to appoint', makes the perf. part., **ठयो**, fem. **ठर**, as in the following, **विद्याता नें यह ठर**, '*Brahmá* has appointed this'. In one place in the *Prem Ságar* (Ch. I), we find a fut. 1st sing., **दूँ**, for **देहीं**, H. H. **दूंगा**, from **देना**, 'to give'; thus, **में उस को दूँ आप**, 'I will curse him'.

a. In a Braj commentary on the *Bhakt Málá*, I have found, in a compound form, an imperative 2nd plur., **दो**, from **देनी**, for **देहु** or **देओ**, = H. H. **दो**; thus, **यह सुता तिन को जिबाहि दो**, 'give this daughter in marriage to him'. The form has evidently arisen by *sandhi* from **दियो**, from the root **दि** for **दे**.

(3) The verb **करनी**, 'to do' or 'make', in Braj often forms its perf. part. regularly as **कयो**, instead of **कियो**, which also occurs. Similarly the Kanauji makes **करो**, for H. H. **किया**. In the fut. of this verb, besides the more common and regular forms, **करिहीं**, **करिहे**, etc., the Braj also has **कीहीं**, **कीहे**, etc., (for **काहहीं**, etc.) from the root **का**, one of the Prakrit substitutes for **कृ**.* Thus, **राज इंद्र को कीहीं**, 'I will sway Indra's sceptre.'

(4) In the perf. tenses of the three verbs, **देना**, **लेना**, **करना**, we often find, besides the forms already mentioned, the irregular forms

* Vid. Vararuchi, *Prák. Prak.* VIII. 17.

दीन्हो, लीन्हो, कीन्हो. or often, with ह dropped, दीनो, लीनो, कीनो. Thus, पूरव जनम सुकृत कोऊ कीनो । सो विधि यह दरसन फल दीनो,* 'some one in a former birth has practiced virtue, hence *Brahmá* has given this vision as a reward'. From the root की, for कर, we also have a rare infinitive, कीनी.

386. Besides the regular tenses corresponding with those of the standard dialect, the Braj, as also the Kanauj, Old Púrbi, and many other dialects, presents, in addition to the common regular analytic pres. imperf., formed by means of the participle and auxiliary, also a purely inflectional form of the same tense exactly agreeing in form with the contingent future. While not infrequent in prose it is especially common in poetry and proverbial expressions. It is occasionally used even in literary Urdú, in such common expressions, as خدا جانے *Khudá jáne*, 'God knows', etc. Examples of the Braj tense are,—बु पंडित होइ सो दुख सुख न मानै, 'he who is wise regards neither sorrow or joy'; उह सब की संग बुडावहि, 'he abandons the society of all'; पंडित तहां वेद उचरै, 'there Pundits are reciting the Vedas'. This tense is very common in the *Prem Ságar*. Further examples will be found in the Syntax.

a. With this inflected present is combined occasionally, in Braj, the several persons of the pres. of the substantive verb, हूं, है, etc. Thus, e.g., the following forms are found in the *Prem Ságar*:—मैं पहचानू हूं, 'I recognize'; दीये है, 'it appears'; आवैं हैं, 'they come'. Further west, in Mārwar, this becomes the rule. There seems to be no difference in meaning between this and other forms of the present. This idiom is even more common in the colloquial about Kanauj, than in common Braj literature. Thus we often hear, साहिब बुलावैं हैं, 'the *Sáhib* is calling'; हम आवैं हैं, 'I am coming'.

Rem. Misled by the less common occurrence of the present than of the future sense, in modern High Hindí, most grammarians hitherto have stated that the cont. fut. (Aorist of Forbes and others) is sometimes used in the sense of the present. It is, however, more accurate to regard the present as the original, and the future as the secondary meaning of the tense, which in fact is the worn-out remainder of the Sansk. pres. *Parasmai*.

387. Besides the above tenses, yet another is found occasionally in Braj prose and poetry, formed by the combination of the imperfect

* In Prof. Eastwick's edition of the *Prem Ságar*, *Anusvár* is added to the final vowel in this passage.

participle with the indefinite perfect, भयो, of the substantive verb, होनी. The nature of this tense may be best denoted by the term, '*Inceptive Imperfect*'. It indicates the subject as entering upon the action expressed by the verb. Examples are,—पीवत भयो दही, 'he began to drink the sour milk'; सो वे यह बात में खिचरत भयो, 'so he began to think on this matter'. Further illustrations will be given below, in treating of the old Púrbi dialect.

388. The Braj commonly adds आच to the root for the 1st Causal, and follows the standard dialect in adding चा (or चाच) for the 2nd Causal. But a long vowel in the root of the primitive is sometimes retained where High Hindí shortens it.

a. Many verbs which, in standard Hindí, make the causal irregularly in आस or सा, take the regular form in Braj. If the root end in a vowel, च or च is inserted before the causal affix आच. Thus, e.g.,—भूलनी, 'to forget', makes भुलाचनी and मुलाचनी; बोलनी, 'to speak', बोलाचनी and बुलाचनी; खानौ, 'to eat', खाचनी and खिलवाचनी; पीवौ, 'to drink', पियाचनी and पिलवाचनी. आच is very rarely in poetry shortened to च; thus, in the *Prem Ságar* (Ch. LXIII) we have a causative form पुचवै; को पुचवै हिय होस हमारी, 'who will fill the desire of my heart?', where पुचवै is for पुचाचै.

389. The Braj forms its passive with the verb जानौ, 'to go', precisely after the manner of the standard Hindí.

390. Very closely allied to the Braj is the Kanaují conjugation. खौ and ख are preferred to the Braj खौ and खे; च final is dropped from the termination of the imperf. part; च is only inserted before the termination खौ of the perfect tenses of pure verbs. करनौ and मरनौ form the perfect regularly from the root of the infinitive, making करो and मरो for H. H. किया and मुखा. For H. H. हुआ, 'became', K. has भयो or भखौ like the Braj. The remaining details can be learned from the tables.

391. The dialect exhibited in the Bhagelkhandí N. T. (Bapt. Mission Press, Serampore, 1821) is related much more closely to the Braj in its conjugation than to eastern Hindí; and exhibits the peculiar construction of the case of the agent with H. H. transitive verbs, which is characteristic of all western Hindí. The infinitive ends in खौ and the noun of agency in खारौ or खारौ. The future tenses correspond exactly to the Braj, except that ख and खौ are preferred to खे and खौ; as, e.g., in खेहौ, = Br. खेहौ, H. H. जाऊगा, 'I will go'; पेहे, = Br. पेहे, H. H. पाएगा, etc. The imperf. part. ends in तु as in Braj, and the perf. in खौ as in Kanaují. च is however preferred to च before the termi-

nation of the perf. as in E. Hindí. Thus we have, *e.g.*, गयी, दया, for H.H. गवा, 'gone', and दिया, 'given'. भया is regularly used for H. H. हुआ, 'become'. Quite peculiar is the termination कनार्ह in the conjunct. part, which is added to the root like के in H. H. य, however, is inserted before the terminations when the root ends in a vowel; thus we find सुनकनार्ह, जायकनार्ह, = H. H. सुनकर, जाकर. This termination is evidently connected with the Mewáří termination, कने, of the conj. part., to be noticed below.

392. As one general type of conjugation prevails throughout Ráj-pútáná, it will be convenient to treat Mārwarí and Mewáří, etc., together, noting local differences as they occur.

Two general forms of the Infinitive prevail, the one in बो or बूं, the other in बो. Between these there appears to be no difference in meaning, but only in usage. Both forms are heard everywhere, but among the Mairs बो and बूं are much the more common. In W. Ráj-pútáná the final vowel of बो is usually dropped, giving, *e.g.*, बोवब for बोवबो, etc. But देबो and लेबो, retain the final vowel. Both बो and बो are used in an inflected form. बो is regularly inflected to बा, but बो is changed to बै, never to बा, and that only among the Mairs. The dat. postposition र is never used after this inflected infinitive. Elsewhere if any inflected form be required, the obl. form in बा is used. Thus the Mairs would say, करबै को, करबै ऊं, = H. H. करने का, करने से, 'of doing', 'by doing'; but the Mārwarís, करबा को, करबा बूं. So also in the 'Plays' we read, चेलो होना आयो, = H. H. चला होने आया, 'I have come to be a disciple'. But the standard form of the infinitive is also employed, as, in the Play of 'Dúngar Singh', चैला नही रहबे की आस, 'there is no hope of your remaining thus'.

a. The infinitive in बूं is used by the Mairs, in the Frequentative form of the verb only, where standard Hindí employs the perfect participle. Thus for the Frequentative verbs, जाया करना, मारा करना, 'to go often', 'to beat often', the Mairs say, जाबूं करबो, मारबूं करबो. The Mārwarís also use the infinitive in the frequentative verb, but in the other form, saying, *e.g.*, जाबो करबो, मारबो करबो. The infinitive in बुं (बूं) is however, employed in the 'Plays', in the same manner as the other forms; thus, in the 'Play' of 'Bharatrí', मानु कहबुं म्भारे, 'believe my word', *lit.*, 'my saying'. The infinitive in बो is sometimes used adjectively like the Urdú infinitive, and may therefore be inflected to बो to agree with a fem. noun, thus; रोटी पकावबो रे, 'bread must be cooked'; and in an imperative sense in

'*Dāngar Singh*', देर नही करबो, 'make no delay'. But the infinitive in *बो* is never thus employed.*

393. The imperfect participle everywhere in Rājputānā ends in *तो*, and the perfect participle in *यो*. But when the perfect participle is used adjectively, in Mārwar the suffix *दो* is added. Thus, from मखबो, 'to read', the perf. part. adj. is मखयोदो, =H. H. पढ़ा हुआ; from मारबो, 'to beat', मारयोदो, =H. H. मारा हुआ, etc., etc. Before this affix *दो*, *y* of the termination is sometimes dropped, as in कीछोदो, =H. H. किया हुआ. To the imperfect and perfect participles, when used adjectively, is optionally added, either the perf. part., *व्हियो*, of *व्होबो*, 'to be', or *बको*, or *सगो* †; as *म्हें डेराने आक्सो दीठो*, 'I saw the boys coming'; *पांको भोला बकां को बाप मर गियो*, 'their father died in childhood', etc.

a. Before the termination *यो* of the perf. part., *ह* is often inserted in the 'Plays'; *या* is also often written for *यो*. Thus, *सूरज ज्हािया*, 'the sun has risen'; *राज ताकिया*, '(I) have forsaken my kingdom'; *कागद ले हुं आवियो*, 'I have brought a paper (i.e., letter)'.

b. When the participles are used as verbal nouns, or absolutely, *बो* final becomes *बां* in the oblique form. Thus, *मुलक में लियां किंबे*, 'I will take (thee) about the country'. So also, *म्हारो माल मगावतां छड़ी न करसो बेज*, 'he will not make an hour's delay in sending for my property'. But otherwise the oblique form ends in *आ*, sing. *बां*, plur.

c. The various verbal forms are often disguised by meaningless enclitic additions. Thus we find *स्यावताव* for *स्यावता*, =H. H. लाता; *कोदियावन* for *कोदिया*, =H. H. छोड़ा; *देवुर*, for H. H. देर, etc., etc.

394. The Conjunctive participle exhibits several forms. (1) The root alone is used; or (2), *ने* is added to the root; as, e.g., *करने*, *मारने*, =H. H. करके, मारके. Both of these are used throughout Rājputānā. The former often occurs in the 'Plays'. In Mewār, the Conjunctive participle is formed (3) by adding *कने* to the root; as, e.g., in *सुकने*, *मारने*, =H. H. सुनके, मारके; or (4) by adding *कने* to the imperfect participle, as in *बाड़तोकने*, 'having cut', =H. H. काटके. (5) Again, in E. Rājputānā, this participle is formed by adding *इ* to the root. Thus we have *मारइ* =H. H. मारके; *छेइ*, =H. H. होकर; *खाइ*, =H. H. खाकर, etc., etc. This last form occurs in the 'Plays'; as, e.g., *खूबे*

* Prof. De Tassy mentions an infin. in *दो*, as, e.g., *करदो*, for *करना*. This looks like a Western form, and is therefore noted here; but I have no further information about it. † *सगो* is used chiefly in Mewār and Mārwarā.

बैठ् बावसी, '(although) thou wilt eat (it), sitting in a corner'. (6) I have also heard repeatedly from a native of Rájputáná a conjunctive participle formed by the suffix करियाबा or करियाना, as, e.g., सुब्बकरियाबा, =H. H. सुनकर, 'having heard', etc. This is said to be also used in poetry, but I have not met with any example.*

395. The Noun of agency is formed by the suffix वालो, which is added to either form of the inflected infinitive. In this combination the infinitive in जो, inflected to जा, seems to be the more common, but the other form of the infinitive is also used, as in the following; म्हारे माल लूटबावालो, 'the robber of my property'. (Play of *Dúngar Singh*.)

396. The Mārwarí tenses may be distributed in the same three groups as those of the standard dialect; though I doubt whether examples can be adduced of each of the twelve participial tenses. व is inserted before the terminations as in High Hindí, but much more freely. Thus, e.g., it is constantly inserted after a vowel in the cont. fut., 1st sing. and 2nd plur.; as लावुं गंगा जल, 'shall I bring Ganges water?'; वखरज खेवो जाय, 'go and get tidings (of him)'; also before the imperf. part. term., तो; as in होवतो, लावतो, =H. H. होता, लाता: also even after a short vowel in the perf.; as में लिवो फकीरी, 'I had taken up the life of a mendicant'. But in the perf. tenses व is more common. Thus, although we find हुवा in the 'Plays', =H. H. हुआ, हुयो is more frequent, as, e.g., in हुयो मुसाब्बु, 'he became a jogí'. The common colloquial form of this word is डिहयो or ठहोयो.

397. The terminations of the Contingent Future in Mārwarí, Mewarí, etc. are, *Sing.* (1) ई or ऊ; (2, 3) ऐ; *Plur.* (1) आ; (2) ओ; (3) ऐ. A single example will suffice, in addition to those given above; मन आवे छटे उत्तरा, 'we will rest (*lit.*, alight) wherever it may please us', (*lit.*, 'may come into the mind'.)

398. Three forms of the Absolute Future prevail in Rájputáná. Two of these are formed directly from the root by adding the following terminations, *viz.* :—

Terminations of the 1st Future.			Terminations of the 2nd Future.		
<i>Sing.</i> 1. स्यं.	2. सी.	3. सी.	1. हूं.	2. ही.	3. ही.
<i>Plur.</i> 1. स्यां.	2. स्यो.	3. सी.	1. ह्यां.	2. हो.	3. ही.

* I doubt whether the final र in the 5th form of the conj. participle is any thing different from the enclitic र which sometimes, in the 'Plays' at least, is added also to other parts of the verb, as, e.g., in देवुर for देऊ, etc.

सूँ and स्यो are sometimes corrupted to सूँ and सेो. The 3rd form of the future is formed after the analogy of the future in standard Hindí; *i.e.*, by adding a syllable, *vis.*, लो (instead of H. H. गा), to the several forms of the contingent future. Like गा, this लो is inflected for gender and number, and therefore becomes ला in the masc. plur.; ली, fem. sing. and plur. But ला is sometimes used for लो in the masc. sing. Thus the full terminations added to the root are as follows:—*Sing.* (1) ऊँलो; (2, 3) रेलो; *Plur.* (1) आँला; (2) ओला; (3) रेला.

a. These forms appear to be substantially identical in signification, except that the future in लो is said to express a slight degree of dubiety. This future in लो is especially common about Jodhpúr. Further east, in eastern Márwár and Mewár, the 2nd form in हूँ, etc., is chiefly used; while in Bundá, Kotah, along the river Chambal, and northward to Jaipúr, the future in सूँ, etc., is the usual colloquial form. The use of this form of the future, therefore, is territorially co-extensive with that of the substantive verb हूँ, etc. (§369) and, like that, appears to be the common literary form; while the other futures are used in the same districts as the substantive verb हूँ, etc.

b. The following illustrations of the literary future in स are from the 'Plays'. घोडे पावा लासुं. 'afterward I will bring (him) to (your) feet'; पूँसे बैठर बावसी, 'thou wilt eat (it) sitting in a corner'; गोपी चंद का पुतर होवसी. 'there shall be (to thee) a son like Gopí Chand'; सबी मिल चालस्यो. 'we all will go together'; जिस से होस्यो पार, 'by which you shall succeed'. The final *Anustár* in these fut. forms, is often omitted in the text, but I judge it to be a printer's error. The 'Plays' do not, that I have noticed, give any examples of either of the other two futures.

399. The Imperative in the 2nd sing. consists of the root alone; and adds ओ to the root for the 2nd plur. as in High Hindí. When the root ends in a vowel, अ is inserted before ओ; thus, घे डेरा लेवो उठाव, 'take up the tent'; जावो आवे, 'go, mother!'. In a few words, final स in the root is often hardened to य before ओ; thus, ल्यो तरवारं हाथ में, 'take swords in the hand'; रस्ता बता दो, 'point out the way'. Occasionally in the 'Plays', the 2nd sing. terminates in ऊँ; thus, कयो हमारो मानूं, 'mind my word'.

400. In the Respectful forms of the imperative, the 'Plays' exhibit the terminations जो or ज्यो, and जे or ज्ये. These ज forms are added not only to a few verbs, as देना, लेना, etc., as in standard Hindí, but to

all verbs whatever, even when the root terminates in a consonant. The form in **ज्यो** or **जो**, at least, is used even with the sing. of the 2nd pers. pronoun. Examples of these forms occur in the following:—**कागद बाँचत आउज्यो**, 'immediately on reading the paper, come!'; **जे सुबजे खीरदारी**, 'hear ye, chieftains!'; **तू मत जेज लगाजे**, 'make thou no delay'; **पावां ल्याउजे मारे**, 'bring (him) to my feet.

a. In the colloquial, the respectful forms of the imperative are **जे** or **ईजे**, and **जो** or **ईजो**. Thus from **जीमजो**, 'to eat', the respectful forms are **जीमजे** or **जीमीजे**, and **जीमजो** or **जीमीजो**. In the 'Plays', also, **ई** is sometimes inserted before the termination; thus, **जे जेज करीउयो नाहि**, 'make you no delay'.

401. In the tenses of imperfect action, the imperfect participle alone is used, as in standard Hindī, for a past contingent tense, and not unfrequently in the 'Plays', as a present tense; as, e.g., **सिध होव हो नही रवता**, 'he who is perfect, dwells not (here)'.
 402. But the Present imperfect is regularly formed, both in the colloquial and in literature, by adding to the forms already noted in the contingent future, the several persons of the present of the substantive verb, either of the **ह** or the **ह** series. Illustrations are;—**जोगी आलख जगावे हे**, 'a jogī is calling 'Alakh'!'; **तुं क्युं भेजे हे लैर**, 'why dost thou send (me) afterward?'; **बखियां क्युं घालो हो हाथ**, 'why do you lay hands upon the merchant?'; **क्युं घावो हो जैयर**, 'why do you eat poison?'.
 a. The auxiliary is often omitted, especially when several verbs occur in the same construction, in which case the present imperfect has the same form as the contingent future. Thus, in the following, both the first and the second verbs are to be regarded as present imperfects; **जीन खजावे नाद सुबावे बढो हे मेल के द्वार**, 'he is playing the lute, singing a song, standing without the palace'. Similar is the verb in the following; **सुज कुं क्या करमावो**, 'what do you command me?'.
 403. The formation of the Past imperfect is analogous to that of the present, except that the auxiliary past tense, **हो** or **हो**, of the substantive verb, is added, both in the sing. and plur., to that form of the verb only, which is found in the 3rd sing. of the contingent future. Thus, for the H. H. **मैं सुनता था**, we have **हूँ सुबे हो**, 'I was hearing'; similarly, for **तुम क्या करते थे**, 'what were you doing?', **जे काँरे करे हा** or **करे हा**, etc.

a. These forms are colloquial throughout Rájputáná, but the tense is sometimes also formed as in High Hindí, by adding the past tense of the substantive verb (हो or है) to the imperfect participle.

404. The tenses of the Perfect are all formed with the perfect participle in combination, when necessary, with the various tenses of हूँ (होना); and transitive verbs construe these tenses with the case of the agent, taking the object either in the nominative or dative, exactly as in High Hindí (§ 332). Thus in the following we have both the active and passive construction: सुपुनं आयो रैन मंस चांको उड़तो देणो सीस, 'a dream came in the night,—I saw (thy) head flying'. The following are illustrations of the more common tenses: म्हें घ नै मेल्यो हो, 'I had sent thee'; ऊ घोड़े चढ़यो हूँलो, 'he must have mounted (his) horse'; कब उब नै माह्यो होसी, 'some one must have struck him'.

405. The irregular verbs mentioned at § 311, are irregular also in the Rájputáná dialects. In W. Rájputáná, करबो, 'to do', makes its perf., कीघो, कीदो, or कयो; लेबो, 'to take', perf., लीघो and लीदो; देबो, 'to give', perf., दीघो and दीदो. So also, खाबो, 'to eat', makes the perf., खाघो.* मरबो, 'to die', makes its perf., मरयो or मूच्यो. But in the 'Plays' and in E. Rájputáná, करबो, लेबो and देबो, make the perfect in नु or ना, fem. नी, as will appear from the following passages: भायां कीनी गाफली, 'my brothers have been careless (*lit.*, done carelessness); लीनी ककीरी, '(I) have taken up the life of a *faqír*'; दुष दुष दीनु राम जी, '*Edm Jé* hath given sorrow and joy'. जाबो, 'to go', makes the perf. गीयो.

a. Besides the verbs that are usually irregular in all the Hindí dialects, all verbs of which the root terminates in ह, often lose that letter before the various verbal terminations and thus appear as irregular. Thus the perf. of the verbs कहबो, 'to say', रहबो, 'to remain', बहबो, 'to flow', becomes कयो, रयो, बयो, as in the following: कयो हमारो मान, 'regard what I have said'; कातिक मास रया अलूबा, 'in the month of *Kátik* we remained without salt'; नीर बयो चारा नैब में, 'water has flowed in your eyes'. Sometimes the घ of the termination is doubled in compensation for the loss of ह; thus, हो मेरा कय्या माने, 'if thou regard my word'. Sometimes, again, ह is inserted in the hiatus caused by the elision of ह, giving such forms as कयो, = कहा; रकतो, = रहता; etc., etc.

* These perf. forms in घो and दो are well illustrated by such archaic Hindí perfects as ददिय, 'given', ललिय, 'taken', cited by Mr. Beames from *Chand*, who has also दिहो and दीघो, = दिया and किहो, = किया. (*Journ. As. Soc. Beng.*, Part I. No. II, 1873).

Thus, we have, *e.g.*, कुसी रवो, 'remain in happiness'; कवो जात, 'say the word'; वो नहीं रक्ता इस नगरी के माई; 'that (man) dwells not in this village'; वो जो मरद कयता घा, 'that man also was saying'. Sometimes in the imperative, ह being dropped, the concurrent vowels are united, so that we have कौ for कहे, and रौ for रहे. Similarly, कै stands for कहि, and वै for वह or खाह, as, *e.g.*, नदी वै जावै, 'the river flows away'.

406. Causal verbs in Mārwarī and Rājputānā generally, are formed as in Braj, by adding आव to the root for the 1st, and आव for the 2nd causal. A long vowel in the root of the primitive, is shortened as usual before the heavy affix. These forms therefore require no further illustration. But a few verbs with monosyllabic open roots shorten a final long vowel in the root, and insert र before आव for the 1st causal. Thus देवो, 'to give', makes its 1st causal, दिराववो, and लेवो, 'to take', लिराववो; as, *e.g.*, में जोग लिरावुं, 'I will cause (him) to take up jog'; *i.e.*, 'to become an ascetic'. Alternative forms, दवाववो and लवाववो, also exist.

a. Verbs with ह final in the root drop this ह before the causal terminations, as in the primitive conjugation; thus we have the following examples: जवा दिवो पावो, 'the water caused (all) to flow away'; मूं राजा कवावतो हूं, 'I am called a king'.

407. The colloquial Mārwarī west of the Aravallī hills is distinguished by a regular passive derivative verb, the root of which is formed by adding the syllable ईज to the root of the primitive. Roots containing a long vowel shorten that vowel before this affix. Verbs which take र before the causal, insert it also before the passive affix. Thus, to illustrate, from करवो, 'to do', is derived the passive, करीजवो, = H. H. किया जाना, 'to be done'; from खाववो, 'to eat', the passive खवीजवो, 'to be eaten'; from लेवो, 'to take', and देवो, 'to give', the passives, लीरीजवो, 'to be taken', and दिरीजवो, 'to be given'. Even neuter verbs may take this passive form. Thus, we have from आववो, 'to come', the passive अवीजवो. In the case of such verbs, however, the passive is only used impersonally in the 3rd masc. sing. These passive verbs are conjugated throughout like regular primitive verbs. Thus, म्हें सूं अवीजे नहीं, = H. H. मुझ से आया नहीं जाता, 'it is not come by me', *i.e.*, 'I cannot come'; म्हुं मरोज्यो, 'I was beaten'; तूं सूं नहीं खवीजेलो, 'it will not be eaten by you'; *i.e.*, 'you will not be able to eat it'. These forms are rarely heard east of the Aravallī hills.

408. In the dialects of W. Rājputānā the various forms of Intensive compound verbs, explained §§347-350, are but rarely used. Instead of these forms, परो or परो is prefixed to the verb. Thus, for मार डालना, the Mārwarīs say, परो मारवो;

for चला जाना, 'to go away', परी जावबो; for उठ जाना, 'to rise up', परी उठबो. But when the action is regarded as terminating with, upon, near, or for the agent, खरो is used instead of परी. Thus, खरो लेबो, 'to take for one's self, = H. H. ले लेना, etc. These compounds with खरो therefore approximate in use to the middle voice in Greek. परी and खरो are inflected to परा and खरा, obl. masc., and परी and खरी, fem., to agree with the subject of neuter verbs, or with the object of transitives. Examples are, पूं खरो जा, or (fem.) पूं खरी जा, = H. H. तू चला जा or चली जा. But with a transitive verb, in *any* tense these must agree with the object. Thus, ऊ पोथी खरी लेवै, 'let him take the book'; (i.e., for himself); पूं पोथी खरी लेऊं पूं, 'I take the book (for myself)'; ऊ पोथी परी देवो, 'he will give the book away', etc.

a. In Márwár, when the imperf. part. of any verb is combined with रहना, as in Continuative compounds in standard Hindí, the combination has, not a continuative, but a *negative* sense. Thus, in the Rájputáná colloquial, गातो रहबो, is not 'to continue singing', but 'to be kept from singing', 'not to sing'. So, again, कीवाड़ बड़ दो के मनष माई आता रहे, is 'shut the door that the people may not come in',—not 'may continue to come in'.

409. Before leaving these Rájputáná forms, we may briefly indicate a few peculiar forms of the Rájput bard *Chand*, as noted by Mr. Beames. (1) The imperf. part. occasionally ends in न्त; as, e.g., दुवन्त, रहन्त, = H. H. होता, रहता. (2) The perfect termination, हयो (हयो), is transformed into खव or खव, as, e.g., ममेव, 'wandered', for H. H. ममाया; खुल्लिव, 'spoke', = H. H. बोला, etc., etc. (3) The final आ of हुआ is sometimes shortened, thus, हुआ; हुये is used as a conjunctive participle. (4) For दीना, 'given', and कीना, 'done', दिन्नो and किन्नो occur. (5) The conj. part. is sometimes made to terminate in ह्ये, as, e.g., in किये for H. H. करके.

410. The verb in the Himalayan dialects of Garhwál and Kumáon presents in some respects a suggestive resemblance to the Márwárfi conjugation. Thus, the auxiliary substantive verb has ह for its radical consonant; लो, (fem. ली), instead of गा, is in many places the termination of the future; न in the infinitive, as elsewhere, is changed to ख. ह final in a root is very commonly rejected and the concurrent vowels combined; but the consequent *sandhi* is to औ and not रे, as in G. रौबो for H. H. रहना; so that उ, instead of ख, appears to be preferred as a vowel of union before the infinitive termination. But with these resemblances, there also are some variations from the Márwárfi type. Most noticeable is the imperf. part. which, as in Panjábí, often ends in दो or न्दो, plur. दा or न्दा, instead of तो, ता. The तो forms, however, are also used, also sometimes retaining the ancient न before त, as in खरवन्तो, 'raining';

for H. H. **करसता**. In the tenses of the imperf. part. of some verbs with a vowel final in the root, Kumáoní rejects the participial termination before the auxiliary, and shortens the final radical vowel, giving, e.g., **दि द**, for H. H. **देता है**, 'he gives'. The fut. term., **लो**, in Garhwáli is often added, not to the cont. fut. terminations, but to the root. I have sometimes heard the negative particle interposed between the cont. fut. and this suffix **लो**, thus; **रनी कूँँ जोह न लो**, = H. H. **रेशी बात नहीं होगी**, 'such a thing will not be'. Of the two Garhwáli forms often given in the 'Tables' the first belongs to Tírí, the second is used further east. The causal affix **आव** is softened to **औ**; giving, e.g., from the intransitive verb, **जगबो**, 'to float', the causal **जगौबो**.

*Conjugation in the dialect of the Rámáyán, and other
Eastern dialects.*

411. In the old Púrbi of the *Rámáyán*, as in all archaic Hindí poetry, the tense-system is not so fully developed, nor are the distinctive characteristics of the various tenses always so distinctly marked as in modern High Hindí. But on the other hand, we find a great variety of terminations, and some tenses which are unknown to the modern form of speech. We begin with the tenses corresponding, at least in a general way, to those of the standard dialect.

412. The Infinitive or Gerund presents two forms analogous to the two in Braj, *vis.*, one in **न**, and another in **ज**. Examples are, **जब तेहि कहा देन वैदेही**, 'when (he) told him to give up *Vaidehi*?'; **जिनु चिय राम किरज भल नाहीं**, 'it is not well to return without *Rám* and *Sítá*'. The inflected forms also occur; as, e.g., **अस न होने**, 'it is not so to be', = H. H. **नही होने का**; **मैं तव दसन तोरिखे लायक**, 'I am able to break thy teeth'.

413. The Imperfect participle is formed by adding **त** only to the root; as from **खिलोकन**, 'to behold', **खिलोकत**, 'beholding'. This is often, though not invariably, inflected to **ति** for the fem.; as in **सगावति** from **सगावत** = H. H. **सगाती**. There is no other inflection. In the following we have the longer Braj participle in **ता**; **धेनु मन भावती पय बवधि**, 'the cow drops milk gratifying to the heart'.

414. The Perfect participle regularly consists of the root alone; to which **ह** is added in the fem. only. Thus from **कहन**, **सुनन**, come the perf. participles, **कह**, **सुन**, fem., **कहि**, **सुनि**. But the longer H. H. forms in **आ** and **ई** are frequently used where the metre may require it. In the case of verbs with roots in **आ**, the **व** which in the standard dialect has only been retained in the tenses of the future, maintains its

place before *a* or *ā* in the perf. part. also; thus we have गावा, 'sung', for H. H. गाय; आव or आवा, 'come', for H. H. आया. But the common forms in *य* also occur.

415. The Conjunctive participle is regularly formed by adding *व* to the root; thus, तेहि देखि सीतल भइ जाती, 'seeing thee, (my) breast has become cool'. As in the case of all short final vowels, this *व* may be lengthened *metri gratiā*. This is especially common at the end of a line; as, बैठेउ सभा अरि खरि पारि, 'receiving such news, the assembly sat down'. Much less frequently we find the Braj form in *औ*, after *व* as a union-vowel; as, मुनीसआयसु पावकौ, 'receiving the great sage's command'. The root alone is occasionally used; and the final inherent *a* may be lengthened *metri gratiā*, as in the following, where चीन्हा is not the perfect, but the conjunctive participle; सुफल अन्न माना प्रभु चीन्हा, 'recognizing the lord, he regarded his birth as having borne good fruit'.

416. For the Noun of agency, the affix वार, (plur. वारे, fem. वारि,) is added to the root, as in the following; ते रहि ताल चतुर रखवारे, 'these are the watchful guardians of this lake'.

417. The *Rāmāyan* exhibits forms of the Contingent Future identical with the longer Braj forms; viz., *Sing.* (1) औ or औ; (2, 3) हि; *Plur.* (1, 3) हिं; (2) हु. For the longer forms with *ह, र, रे, and रं, रें,* are sometimes used. Examples are;—पावक जरी, 'I could burn in the fire'; केहि मगु जाही, 'by what road shall we go?'; को कहै, 'who can tell?'. *य* is sometimes inserted after *व* final in a root; as, जौलीं जियौ, 'as long as I live'.

a. But instead of these final diphthongs, their elementary vowels often appear; as, e.g., जौ में करतं रयोई, 'when I prepare food'; कीचइ मिलइ, 'it mingles with the mud'. The final vowel of these forms, again, *metri gratiā*, is often lengthened; as, जौ अपने अवगुन सब कहई, 'if I should tell all my faults'; अन्न जो जो भोजन करई, 'whoever may eat that food'.

b. Before *ई*, in the 1st sing., *र ई* is sometimes inserted; thus, तुम्हहिं सुनारई सोइ, 'that same I will make known to you'.

c. Or, again, the final diphthongs, *र, रे,* are reduced to their cognate vowel, *र*, as in चाहि for चाहे, and especially in the substantive verb; thus, जो आयसु होइ, 'if the order be'.

d. This final *व*, again, is often dropped, leaving the 2nd and 3rd sing. in form like the root; as, अघम जो नारि जो खेव न तेही, 'base (is)

that woman, who will not serve her'; *सो किमि सोच*, 'how could he sleep?'. And this final *a*, again, may be lengthened, *metri gratiā*, giving a form identical with the H. H. perf. part.; as, *मास दिवस महं कदा न माना*, 'if in a month's time thou obey not what is told (thee)'; *आकर नाम मरत मुख आवा*, 'whose name, (if it) come into the mouth of one dying'.

e. For *र* of the 2nd and 3rd sing., *ष* or *ह्य* is sometimes written; as, *सपनेहु सुनिय न छिद पुराना*, 'not even in a dream might one hear *Ved* (or) *Purān*'. *उ* is sometimes substituted for *र* in the 2nd and 3rd sing.; as, *जो अस होउ*, 'if it be so'.

f. Finally, for *हि*, we often find the older form, *सि*; as, *जो तैं चाहसि*, 'if thou wish'; *तेहि न मजसि मन मंद*, 'wilt thou not worship him, O dull heart?'. Sometimes *सु* is substituted for *सि*.

418. Besides the above forms, I have found in archaic eastern Hindī, a conjugation of this tense with *ख* as the characteristic letter, to which the regular terminations are then added; thus, *Sing.* (1) *खै*, (2, 3) *खे*; *Plur.* (1, 3) *खैं*, (2) *खौ* or *खो*. With these *v* or *b* forms, as well as those (to be hereafter noticed) of the abs. fut., may be compared the Bangālī fut. terminations, *ibo*, *ibā* or *ibe*, *iben*.

419. It may be observed, finally, that although, very often, the forms above noted indicate, in the *Rāmāyan*, a degree of dubiety, and for the certain futurity of the event, the forms of the absolute future, as given in § 420, are preferred, yet now and then these forms are unquestionably used where there is no contingency intimated. Thus, *सब दुख मिटहि राम पद देखी*, 'all sorrow will cease on beholding the feet of *Rām*'; *भरतहि समर सिखावन देऊँ*, 'I will give *Bharat* instruction in war'; *प्रभु भंजहिं दारुण बिपति*, 'the lord will remove the terrible calamity'; *विकल होसि तैं कपि के मारे*, 'thou shalt be distressed because of a monkey'. But illustration of this belongs rather to Syntax.

420. The Absolute Future exhibits three varieties of conjugation, of which *ग*, *ङ*, and *ख* are, severally, as the characteristic letters.

(1) The *ग* forms are not often used. The suffixes, *गो*, etc., are added commonly to the longer forms of the cont. fut.; as, e.g., *अभय करहिंगे तोहि*, 'he will make thee free from fear'; *य को फल पावहुंगे आगे*, 'of this thou shalt receive the fruit hereafter'. But as these forms will be quite familiar to the student of the *Rāmāyan*, further illustration is not required.

(2) The 2nd form of the conjugation of the absolute future

exhibits the following terminations; *Sing.* (1) **है**; (2, 3) **हहि**; *Plur.* (1, 3) **हहिं**; (2) **हहु**. As in Braj, **ह** is sometimes used as a union-vowel before these terminations; whence after **आ** final in a root, we have, by *sandhi*, **हे**. Illustrations of these future forms are;—**काज में करिहौं तोरा**, 'I will do thy work'; **ले जैहौं तुम काहं**, 'I will carry you off'; **आचरजन मानिहहिं**, 'they will believe the wonders'; **मोहि राज ... देहु जवहीं**, 'when you shall give me the kingdom'; **हंविहहु सुनि हमारी जड़तारहं**, 'you will laugh, hearing my foolishness'.

Of this general type of conjugation there are several variations:—

a. **खि** appears for **हि**; as, **पक्षितैहखि अंत आभागी**, 'O luckless (woman) I thou wilt repent it in the end'. Analogous is **हेसु** for **हहि**, as in the peculiar form, **दिहेसु**, = H. H. देगा; thus, **तिन्है दिखार दिहेसु तैं खीता**, 'to him thou shalt show *Sitá*'.

b. The first **ह** is sometimes rejected; thus, **उभय न देखिअहि**, 'if one shall regard neither', *lit.*, 'not regard both'.

c. **ह** having thus been rejected, **य** is sometimes inserted: as, **कौतुक मात देखियहु मेरा**, 'in the morning you shall see my exploits'.

(3) The 3rd variety of the absolute future is formed by simply adding **ख** to the root in all persons and numbers. This, it may be observed, is an extremely common form in the modern eastern colloquial dialects. Examples of its use in the *Rámáyan* are;—**चौथे दिवस में मिलख आई**, 'the fourth day I will come and meet (you)'; **सुनि सुख लख राम वैदेही । अनुचित कहख न पंडित जेही**, 'hearing this, *Rám* and *Vaidehí* will obtain joy, nor will any wise (man) call it wrong'.

Variations from the general type occur as follows:—

a. After **आ** final in a root, **उ** or **ह** is sometimes, but not necessarily, inserted; thus, **आख जहं पाउख तहीं**, 'where I shall obtain that same, there shall I go'; **तौ तुम दुख पाउख**, 'then you will find sorrow'; **कुलाख गालु**, 'thou wilt puff out the cheek'. So also, more rarely, after a consonant; as, **पुरख में अभिलाष तुम्हारा**, 'I will fulfil thy desire'.

b. For **ख**, **खि** occasionally occurs; as, **में मारखि काढ़ि कृपाना**, 'drawing the sword I will kill thee'.

421. The Imperative exhibits two forms of conjugation; the one, identical with that of the contingent future; the other, with that of the absolute future in **ख**. In both the **ह** and the **ख** forms we find many of the same variations as have already been noticed in the contingent and absolute futures.

(1) Examples are, of the **इ** (इ) forms;—**पावर्ड में तिन्ह करि गति छौरा**, 'may I obtain their terrible fate'; **खिय मानसि जनि छना**, 'do not lose heart'; **करसि जनि धैला**, 'be thou not anxious'. Before **सि**, **ए** (ऌ) may be substituted for *a*; as, **बो रवेसि उपाक**, 'contrive that plan'. **इ** also occurs; as, **परखेसु मोहि एक पखवार**, 'try me for a fortnight'. Or, eliding **इ**, in the 3rd sing., **रे** may be the termination; as, **आचरज करै जनि कोई**, 'let no one wonder'. The most common termination in the 2nd sing. is **उ**; thus, **देखु तैं जाई**, 'go thou and see'. The same termination is found in the 3rd sing.; as, **राज कल्पसत होउ**, 'may (mine) be a reign of a hundred *kalpas*'. As in the cont. fut., the final vowel may be reduced to *a*, so that the root alone appears in both the 2nd and 3rd sing.; thus, **मोहि जान न कोई**, 'let no know me'. In the 2nd plur., **हु** is the common termination; as, **प्रभु चरित सुनावहु मोही**, 'tell me the deeds of the lord'; **तजहु बोच**, 'cease (your) anxiety'. But **ए** (ऌ) is very often substituted for *a* or inserted before **हु**; as in **पद पंकज गयेहु**, 'olasp (his) lotus feet'; **मांसदिवस महं आयेहु**, 'come in a month's time'. And **इ** is sometimes rejected; as in **करउ बो जोगि जो तुम्हहिं बोहाई**, 'do quickly, what may seem good to you'. The 1st and 3rd plur. regularly end in **हिं** (हीं); thus, **तव चरन हम अनुरागहीं**, 'let me love thy feet', where **हम** is used for the sing., में.

(2) The Imperative, may also, like the absolute future, terminate in **ज** throughout, **इ** or **उ** being optionally inserted before this termination. Thus, **बो जानज सतसंग प्रभाक**, 'know (that) it (is) from the virtue of good association'; **मनोरज पुरइज मोरी**, 'fulfil my desire'. **खि** or **खी** may be used for **ज**; as, **करखि पाय परि खिनय**, 'make entreaty, falling at his feet'; **आनखी जानकी**, 'bring *Jānaki*'. More rarely **बो** is used, in the 2nd plur. only; as, **अपराध किमबो**, 'pardon (my) transgressions'.

422. The Respectful form of the imperative commonly ends in **य** or **इय**; as, **खिनय करसि सागर सन जाई**, 'go and make entreaty of the ocean!'; **हम कहुं परिपालय**, 'be pleased to take care of me'. From this form, the letter **य** is sometimes omitted; as, **तुम नोकि उपाय करिअ**, 'devise a good plan'. Sometimes **ए** or **रे** is added as in Braj and High Hindī.

a. For the forms in **य**, the older forms in **ज** are occasionally used, not only as in High Hindī, after roots ending in **ई** or **ए**, but even after consonants, as in Braj and *Mārwarī*; thus, **तेहि अभय करीजे**, 'make him free from fear'; **जियाये जीजे**, '(if he) preserve thee alive, live'.

To this termination in *जे*, *बु* is also sometimes added ; as, रावन कर बीजेहु यह पाती, 'give this letter into the hand of *Rāvan*'.

423. The Present Imperfect, in the dialect of the *Rāmdyan*, occurs under two general forms ; the one, like the inflected present previously noted (§ 386), is precisely identical in form with the contingent future ; the other is formed by the imperfect participle, either alone, or, as in standard Hindī, in combination with the pres. tense of the substantive verb.

a. There appears to be no difference in signification between these two forms of the tense, except that the participial form is restricted in use to denote an action as occurring in the actual present ; whereas the inflected form is extended, as will fully appear in the Syntax, to comprehend all *imperfect* or *incomplete* action, not only in the present, but also in the past and future.

424. The first or inflected form of the Imperfect, exhibits all the variations from the general type, which have been noted in the case of the contingent future. It will not be necessary to refer to these again in detail ; the following examples will abundantly illustrate the various forms. करई एक बिस्वास, 'one faith I hold' ; बंदौ सब के पद कमल, 'I salute the lotus feet of all' ; न जानहि मोहि सुरारी, 'dost thou not know me, the enemy of the gods ?' ; फूले फले न जेत, 'the reed neither blossoms nor bears fruit'. *वि* is especially common as the termination of both the 2nd and 3rd sing., and before this, *र* may be inserted ; thus, करसि पान, सोचसि दिन राती, 'thou drinkest and sleepest day and night' ; कहसि संसय, 'he declared (his) doubt'. In the following the 3rd sing. termination is *इ* (*metri gratiā*, ई); देह दिनहि दिन दूखरि होई, 'day by day (his) body becomes thin'. *य* commonly occurs as the 3rd sing. termination after a radical *आ*, and also in the following ; मन संकुचय न, 'in (her) heart (she) shrinks not'. *इ* may precede *य* in the same form. *उ* also occurs in the 2nd and 3rd sing. ; as, जो कर मांगु देई, 'the gift thou askest, I bestow' ; अगम लागु मोहि, 'difficult it is to me'. Finally, the root alone is found in the 2nd and 3rd sing. ; thus, तेहि जिनु मोह न भाग, 'without that, illusion flees not away'. The final *a* is lengthened in the following ; जीव नित्य कोहि लगि रोवा, 'the soul is immortal,—why weepst thou ?'. Of the plural the following are examples :—1st pers., खिनय हम करहीं, 'we make our supplication' ; 2nd pers., करहु कवन कारण तय भारी, 'why are you doing (this) heavy penance ?' ; 3rd pers., जे पर दोष लखाई, 'who gaze upon another's fault'. In the

following, one of the first two verbs must be rendered as a present, the other, as contingent future; जे देखहिं देखहिं जिन्ह देखे, 'who see, shall see, who have seen'.

425. In the following passages, the imperfect participle alone is used as a present tense:—जे अवलोकत लोकपति, 'who beholds the lord of the world'; मनहुं जरे घर लोन लगावति, 'she, as it were, applies salt to a burn'.

a. But to this the pres. of the substantive verb is occasionally added, as in standard Hindí. Examples are;—धर्म में जानत अहकं, 'I understand religion'; निशि दिन देख जपत हनु जेही, 'whom, O divine one, you worship night and day'; मेरि करत हहिं निन्दा, 'they deride me'.

426. Besides the common form of this participle we also find the older form in न्त used as a present tense; thus, सब संत सुखी विचरत मही, 'all the holy walk happy on the earth'. The final vowel is sometimes lengthened; as, सापत ताड़त पुरुष कहंता, 'cursing (and) upbraiding, men say'. It is also found in the writings of *Kabir*, as in the following from the *Sákhí*; ज्यो ज्यो नर निघरक फिरे त्यो त्यो काल हंसत, 'by so much as man goes about unconcerned, by so much Death laughs'.*

427. The *Rámáyan* exhibits a Past Conditional tense derived from the imperfect participle. To form this tense, in the 1st sing., उं, and in the 2nd plur., हु, is added to the imperfect participle. I have noted no special terminations for the other persons. Before the above tense-endings ए (ँ) is commonly inserted; thus, पितहि खाइ खातेउं पुनि तोही, having eaten thy father, I could then eat thee'. For ए, ए is employed for the fem., as in the following, where, in the first stanza, इ is omitted before उ in the 2nd plur.; जौ तुम मिलतेउ प्रथम मुनीसा । सुनितिउं सिख तुम्हारि धरि सीसा, 'had you met me first, great sage, I bowing my head, would have heard your advice'. ए, again, is sometimes hardened to ए, and औ or औ substituted for उं in the 1st sing.; thus, जौ अनित्यौ जिनु भट भुइं भाई । तो प्रन करि होत्यौ न इंसाई, 'had I known that the earth had become destitute of warriors, then I had not (by) making (this) decree become a laughing-stock'. One more example will suffice; जौ तुम अवतेहु मुनि की नाई । पद रज विर सिसु धरत गुसाई, 'had you come like a sage, the youths had placed, O lord, the dust of your feet upon their heads'.

* This old form of the pres. imperfect is still heard in the colloquial of interior Gahwál, where, for example, I have heard a villager say, पानी ऊपर तें नाईं बरखन्तो, *lit.*, 'water rains not from above'. *Vid.* § 410.

428. For the Past Imperfect no separate form occurs, except in the following, where रह is used instead of था, as noted at § 371; मन कुग्वत् रह नृपनिवासू, '(his) heart was keeping guard at the womens' apartments'.

429. The tense mentioned under § 387, as an Inceptive Imperfect, is much more common in the *Rāmāyan* than in Braj prose. Examples are;—गाइत क्षेत्र मध्य तई भये, 'they began to bury (it) there in a field'; पूइत भये, 'they began to inquire'.

430. The Indefinite Perfect is commonly employed in the *Rāmāyan* to express action completed, whether in the past, present or future. The compound participial forms employed in the standard dialect to express the various temporal and modal modifications of such completed action, very rarely occur. The most of them, indeed, are quite unknown. As in the case of the imperfect, two forms of the perfect tense occur, the one consisting merely of the participle, the other, inflectional.

431. The participial form of the perfect differs from that of the standard dialect, precisely in the same manner as the imperfect participle; viz., by the shortening of the final long *á* to *a*. Thus, for कइ, 'said', we have कइ, for रहइ, 'remained', रह, etc. This is inflected to इ for the fem., giving, e.g., such forms as सुनि, मानि, for H.H. सुनी, मारी. But the final इ is often lengthened for the sake of the metre. Further examples are;—गिरिवरगुहा पैठ सो जाई, 'he went and entered a cave in a great mountain'; कइ सुग्रीव सुनहु, '*Sugrív* said, Hear!'

a. In the masc. plur. the inflection इ is very often assumed, so that the form of this tense thus frequently becomes identical with that found in the standard dialect.

b. Observe, that after roots in आ or ओ, अ is commonly inserted; as, में काइ नसावा, 'what have I destroyed?'; मइ मारि गिरावा, 'he struck him to the earth'.

432. It may be well here to call especial notice to the exceeding ambiguity of many verbal forms in the *Rāmāyan*. What with the extreme attrition of many once distinct forms, and the frequent prosodial modifications of final vowels, one and the same form has come to represent several different parts of the verb. Thus, e.g., मार may be 2nd or 3rd sing., of the cont. or abs. fut., or of the imper. or pres.; or 1st, 2nd or 3rd sing. perf. कइ, again, may be, 2nd or 3rd sing. of the cont. or abs. fut., or of the imper. or pres.; or 1st, 2nd or 3rd fem. perf., or the conj. participle; or, again, it may be used to represent the H. H.

perf. part. masc. in the passive conjugation, as, e.g., कहु कहि न सार्हे, 'it cannot at all be told'. देखी, again, may be 1st, 2nd or 3rd fem. of the perf., or it may be the conj. part. देखि, with the final vowel lengthened *metri gratiâ*. This remark will be abundantly illustrated by referring to the citations made in the preceding and the following paragraphs.

433. In the case of active transitive verbs, the passive construction mentioned § 332 (1), is often employed; i.e., the verb is made to agree, not with the subject, but with the object of the action in gender and number. As ने does not occur in this dialect, the subject, noun or pronoun, is simply put in the inflected form, where such form happens to exist. But as no nouns are inflected in the sing., it comes to pass that very often, (as where, e.g., subject and object are both masc. sing.) the construction is in outward form identical with the active construction of intransitive verbs. Examples are, of intransitive verbs;—भरोस जिब आवा, 'confidence came to (her) heart'; निसरी रुधिर धार, 'a stream of blood issued'; भूपगृह आये, 'they came into the king's house'. Of transitive verbs, examples are;—जो प्रभु विपनि फिरत तुम देखा, 'that lord whom you (sc. *Párcati*) saw wandering in the forest'; भगति तैं मांगी, 'thou hast asked piety'; जिन्ह मोहि मारा ते में मारे, 'I have beaten those who have beaten me'.

434. Besides the more common passive construction of this tense in transitive verbs, the active construction also very often occurs, after the regular idiom of all the modern eastern dialects. Thus, बेल-पात ... तीनि सहस्र संवत सो खाई, 'for three thousand years she ate the leaves of vines',—where the reference is to *Umâ*, afterward the wife of *Shiv*. Similar is the construction in the following; कोउ कह जियत धरहु, 'one said, take (them) alive'.

Rem. Here also, on further consideration, I would place the phrases quoted in § 226.c., viz., धन्य जे जाये, 'blessed they who bore them'; ते देखे दोउ भाता, 'they beheld the two brothers': जे and ते, therefore, in these passages are to be regarded as in the nominative, and not in the oblique plural as suggested, *loc. cit.*

435. Instead of the above forms of this tense, which are to be regarded as characteristic of the dialect, the longer forms (K. and B.) in जो and जो, (यो and यौ,) also occur. Thus, कपि चरनन्हि परयो, 'the monkey fell at (his) feet'; नारद मुनि गरुड़ पठाये, '*Nárad* the sage sent *Garuṣ'*. देना, 'to give', and लेना, 'to take', sometimes make the perf. देवा and लेवा, also दयो and लयो.

436. The inflected perfect is formed by adding to the perfect part., in the *Sing.*, (1) उं; (2, 3,) उ; and in the *Plur.*, (1, 3,) न् or न्ति; (2,) वु. For the feminine, these terminations are added to the fem. form of the participle. Before all these endings, र is often inserted or takes the place of a final short *a*. Observe, that the inflected perfect is used in the active construction only. Examples are;—सब दरस निःपाप भइलें, 'through the sight of thee, I (*fem.*) have become free from sin'; तुम जानहु कोहि कारण आयेलें, 'you know for what reason I have come'; अब लगि रहिलें कुमारी, 'until now I have remained a virgin'; भवानी सती शरीर रहिल, '*Bhavānī* remained in the body of *Sati*'; खगपति खिरंछि पइं गरुड, 'the lord of birds went to *Biranchi*'; निज नाम सुनाय, 'he declared his own name'; तासु पर डारेन्दि गिरितरूइ, 'they cast upon him trees (and) mountains'; मारेहु मोहि व्याध की नार्हें, 'you have slain me, like a hunter'; भल मूलिहु, 'you (*O Umā*) have forgotten good'.

a. In the 2nd and 3rd sing. the termination सि is often substituted for उ; thus, रिपु सम मोहि मारेसि, 'he has beaten me like an enemy'. And this sometimes becomes हि, as in the fut.; thus, अब मोहि आइ अगायेहि काहा, 'now for what hast thou come and waked me?'. In the following, वु is probably the emphatic particle; कहि न सकाहि अस भयहु विषाद, 'he could not tell the sorrow as it really was'.

b. Observe, that these terminations are in like manner added to the irregular participles noted at § 439. Thus, हरि लीन्हेसि सबस अरु नारी, 'he has robbed me of property and wife'; कीन्हेहु सब काजा, 'you have accomplished all (your) work'.

437. As remarked above, the indefinite perfect in its various forms, commonly takes the place of all the tenses of the perfect in standard Hindī. Very rarely, however, we find a cont. perf., and a past perf. formed by the combination of the perf. part. with the verb रहन as an auxiliary. Thus, द्वौ भाई गये रहे देखन फुलवारी, 'the two brothers had gone to see the garden'; and, again, एक सखी सिय संग विहार्ह गइ रही, 'one maiden companion, sporting with *Sitā*, had gone'. (*Bāl K.*)

438. The irregular forms of the perfect of certain verbs, already noticed in Braj and standard Hindī, occur also, with dialectic variations, in the *Rāmāyaṇ*. Thus from होन, 'to be', we have the perf. *Sing.*, भा, भयउ or भयउं; *Plur.*, भे, भै, etc.: from ठानन, 'to determine', perf. ठयउ. जान, 'to go', sometimes makes its perf. गयउ, (H. H.

गवा), plur. गये, etc. ; and also, more rarely, गा, plur. गै. Besides these, note also, हये or हिय, 'killed', perf. plur. from हनन and लयक, perf., (for H. H. लग्गा), from लगन. Examples are ;—तब जो दुख भा, 'the sorrow which then was'; बहु रोग धियोगनि लोग हये, 'people were slain by diseases and bereavements'. (Also see §448, 4.) The *Rāmāyaṇ*, besides the common pres. and fut. forms from जाना, also presents a pres. formed on the base गव् or गवन्, from the ultimate root, गा, of the perf. गवा. Thus, देखि सरासन गवधिं सिधारे, 'seeing the bow they went away'.

439. The verbs करना, देना, लेना, present, in the *Rāmāyaṇ*, not only such forms of the perf. as किय, लिय, दियो, लियो, etc., but also, as in Braj, कीन्ह, 'did', 'done'; दीन्ह, 'given', 'gave'; लीन्ह, 'taken', 'took'; as, e.g., बिज्जा कोहि न कीन्ह बीराहा, 'whom has not greed made mad?'

a. As elsewhere remarked, the final ह् of these forms is dropped by many old writers, whence कीन, लीनै, दीन, etc. Thus, in the *Sabbhā Bilās*, बिपत कसौती कीन, '(he) has made affliction a touch-stone'.

b. Similarly, in the *Rāmāyaṇ*, and other archaic poetry, the perf. of pure verbs in आ also often terminates in न; as, सुनि दसकंध रिसान, 'hearing (this) the Ten-shouldered was enraged'; सकल हरबाने, 'all rejoiced'. Or the termination may be ने; thus, जगती सकल किराने, '(he) went around the whole world'.

440. In one instance, again, in the *Rāmāyaṇ* the perfect is made to terminate in ल, as in the modern colloquial of Tirhut; thus, कोपि गगन पर धायल, 'angrily he rushed toward heaven'; where धायल is for H. H. धाया, from धाना, 'to run', 'to rush'.

441. In one passage, again, the perfect is made to terminate in र (for the ल just mentioned?), as in the following;—गरजेर बहुरि दसोय, 'again roared the Ten-headed'.

442. Sometimes, for the modern forms of the perfect, Sanskrit or Prākṛit forms are employed. Thus, for H. H. किया, 'done', and गवा, 'gone', we often find the corresponding Sk. forms कृत and गत, as in the following;—कोहि कै मति हन्ह कृत न मलीनी, 'whose understanding have these not defiled? (*lit.*, 'made unclean'); हहि प्रकार गत कासर डोर, 'in this way passed that day'.

443. Besides the various participles, referred to in § 66, various other Sanskrit conjugational forms occur in the *Rāmāyaṇ*. It will be sufficient, for the most part, merely to notice them, without giving lengthy examples in each case. Most common (1) is the *Pres. Parasmaī*,

of the 1st conj. ; thus, 1st sing. नमामि or प्रनमामि, 'I salute', पश्यामि, 'I behold', जपामि (for जल्पामि,) 'I repeat' : 3rd plur. पश्यन्ति, 'they behold'; वदन्ति, 'they speak', नदन्ति, 'they roar', निरखन्ति, 'they behold'; Thus, पश्यन्ति ये योगी जतन करि, 'whom ascetics having toiled, behold'; प्रनमामि निरंतर खीरमन, 'I salute without ceasing the glorious *Rám*'. The 2nd sing. ऋषि, of the Sk. subst. verb, occurs in the following; येषि ऋषि* तव खरज नमामो, 'thou art that which thou art, thy feet we adore!'

(2) The following forms of the *Pres. Atmane* also occur: 1st plur., वसामहे, 'we salute'; स्मरामहे, 'we remember'; भजामहे, 'we worship'. Examples are ;—भवनाथ सो स्मरामहे, 'that lord of existence we remember'; रमेस नित्य भजामहे, '*Rám*'s lord we ever worship'.

(3) The following Sk. *Imperatives*, 3rd sing. *Parasmai* are also found, *vis.* ; त्तोतु, 'let him extend'; खसतु, 'let him dwell'; श्रातु, 'let him save'. More frequent is the 3rd sing. imper. of the subst. verb, usually in the formula of permission, खलमस्तु, 'let it be so'; as, खलमस्तु कस्तानिधि बोले, 'Let it be so, said the Treasury of Compassion'.

(4) The 2nd sing. *Imper. Parasmai* of two or three words is not infrequent; as, षाहि, 'do thou protect'; श्राहि, 'do thou save'; thus, मवमयमोचन षाहि षाहि, 'Protect, protect (me)! O thou deliverer from the dread of existence'.

444. The following *Prakritio* verbal forms also occur, *vis.* :— निर्मेप्यो, for Sk. निर्मितः, 'composed'; as, रामायन् जिन निर्मेप्यो, 'who composed the *Rámáyan*'; कथै, for H. कहै, Sk. कथति, 3rd sing. pres., 'he tells'; तिष्ठै, for Sk. तिष्ठति, 3rd sing. pres. from root स्वा, 'he stands'; वंदि, 'I salute', for Sk. वंदे, 1st sing. *Atmane*; as in खडुरि वंदि खलमन, 'again, I salute the wicked'; नैमि, for Sk. नमामि, 1st sing. pres., I adore; as in नैमि निरंतर श्री रघुबीर, 'I adore without ceasing the glorious *Raghubír*'; and also नमाम्यं(?). Finally, in a single instance, we have a *Prák.* reduplicated perfect, खिखर्ध, for Sk. ववृधे, from वृध्, 'to increase'; as in the following, खेवत खिखय खिखर्ध खिमि, 'as sensual enjoyment grows (even) on one serving (the gods)'.

445. The *Passive* is commonly formed by conjugating the verb जाना, 'to go', together with the perf. part., or, more commonly, with the root of the verb combined with the suffix च्. Thus, कल्प कोटि लमि षाहि न गाये, '(the deeds of *Rám*) cannot be sung in ten million *kalpas*'. षाहि जात सो नाहीं, 'that is not told', *i. e.*, 'cannot be told'.

* For the elision of ऋ initial, see §§ 44, 51.

a. But besides the above, a Prakritic present passive often occurs, which is formed by adding to the root, after च् as a union-vowel, the termination वत्, unchanged for gender or number; thus, जेवप्रताप पूजियत तेव, 'even these are worshipped in virtue of their disguise'; मायापतिसेवक सन माया करियत, 'with the servant of the lord of deception, deception is employed'.

446. Causal verbs are formed in the *Rāmāyaṇ*, by adding चाव or चा to the root of the primitive, for the 1st, and चा for the 2nd causal. Many verbs, however, as in standard Hindī, instead of adding these letters to the root, form the 1st causal by lengthening or *gunat-ing* the medial vowel of the root. Both the 1st and 2nd causal occur in the following: नृपतनु वेदविहित अन्धवावा परम विचित्र विमान बनाव, 'he caused the body of the king to be washed according to the *Ved*, (and) made a most beautiful chariot'. देना and सेना, make their causals, दिवाना and सिवाना.

a. Observe, that many verbs, which in standard Hindī form the causal by the addition of a syllable, in the *Rāmāyaṇ* follow the other method. Thus, e.g., for H. H. जलाना, 'to burn', and बुलाना, 'to call', the *Rāmāyaṇ* often uses चारन (for जालना) and बोलना; as, e.g., जे महिसुर पुर जारे, 'who have burnt villages of Brahmans'; बुधि सेवक बोले, 'he called his upright servants'.

b. Occasionally the root of the causal is made to terminate in व, instead of चाव, as in the following, where पुरवहु, 'fill', is for पुरावहु; पुरवहु...मनोरथ मेरि, 'fulfil my desire'.

c. Occasionally, again, the characteristic च्वा or चाव of the causal, is contracted to चो. Thus, in the following, रिसोहें is for रिसावहें; रदपुट करकत नयन रिसोहें, 'his lips quiver, (and) angry are his eyes'.

d. When a syllable is added to a close root, to form the causal, the usual shortening of a medial long vowel in the primitive, is not unfrequently neglected. Thus, for H. H. बुलाना, 'to call', and दिखाना, 'to show', we have sometimes, बोलावन, देवावन; as, e.g., तैं विप्र बोलावें, 'thou, calling a Brahman'.

447. The various *Compound* verbs explained §§ 347—365, also occur in the *Rāmāyaṇ* and similar poetry. But it is important to notice that the parts of the compound are separated at pleasure, often by many intervening words, or, again, are often inverted in order, as the exigencies of the metre may demand. All these various compounds,

moreover, present forms more or less divergent from those of standard Hindi, Thus,

(1) In all such compounds as are formed in High Hindi with the root, *व* (*metri gratiā*, *वै*), is added to the root in the *Rāmāyan*. Examples will be found on almost every page. Thus, *कहं चंद्रिका चंद्र तजि जाई*, 'how can the moonlight forsake the moon?'; *जात पथिक जनु सेत दुतार्थ*, 'calls, as it were, the passing traveller'. So also, *सो सुधारि हरिजन विमि लेही*, 'as the servants of *Hari* rectify (all) these'; where *लेही* cannot be separately translated, but must be connected with *सुधारि* as a compound, = H. H. *सुधार लेते हैं*. In the following, again, the parts are inverted and the final *व* of the primary verb lengthened, *metri gratiā*; *सरिता सुभगता सक को कही*, 'the loveliness of the river, who can tell?'; where *सक को कही*, is for *को कहि सक*, H. H. *कौन कह सके*.

Rem. The student will do well to take especial notice of this separation and inversion of the parts of compounds and the frequent lengthening of this final *व*; as these are among the marked peculiarities of the poetic style, which, until recognized and understood, greatly embarrass the reader who is familiar only with prose Hindi.

(2) *व* alone is often appended to the root in participial combinations, where in High Hindi we would have *आ* or *ए*. Thus, *देखि राम रिपुदल चलि आवा*, *lit.*, 'seeing *Rām* and *Ripudal* are coming along'; where standard Hindi would have *चले आते हैं*; the first *व* has become *व*, and the last is changed to *आ*, to rhyme with the following stanza.

448. Desiderative, Inceptive, Permissive and Acquisitive Compounds present in the *Rāmāyan* a variety of forms.

(1) The Desiderative is sometimes formed with the perfect participle; as, *बिबाह में चाहैं कीन्हा*, 'I wish to marry'.

(2) All these are often formed, as in H. H. with the infinitive in *न*. Thus, *मरन आव चहसो*, 'dost (thou) now wish to die?'; *मोहि जान दे*, 'let me go'; *सुग्रीवहि तब खोजन लाग*, 'he then began to seek for *Sugrīv*'.

(3) But especially common in combination with the secondary verb, is an inflected verbal form in *ए* or *रे*. Thus, *चाहहु सुनै राम गुन गूढा*, 'you desire to hear the mysterious attributes of *Rām*'; *कोहि कारन करै न दीन्हा*, 'for what reason didst thou not allow (me) to do (it)'; *रखवारे जज करै लागे*, 'when the keepers began to forbid them'. For the final *व*, *अह* is sometimes written; thus, *लाग कहव*, 'he began to tell'.

(4) This *व* is sometimes further reduced to *व* (*metri gratiā*, *वै*); thus,

जो नहाव वह बहिर सर भाई, 'if thou wish to bathe in this lake, brother'; चासु चरित लखि काहु न पावा, 'whose exploits no one was permitted to behold'. And व also becomes य; as राम चंद्र गुन करनय लाग, 'he began to rehearse the virtues of *Rám Chandra*'. All these forms may suffer separation or inversion like those above mentioned; as, लागेउ कृष्टि करे बहु खाना, 'many arrows began to rain; आपन नाम कहन तक लयक, 'he then began to repeat his own name. (*Rámáyán*, Bál. K.)*

449. The Avadhí, it will be observed, in the verb as in the pronouns, closely follows the old Púrbi. The dialect of Bírwa does not differ widely from that of Avadh. In both we may notice in some words, the extreme abrasion of the leading verb before the auxiliaries, already noted in Kumáoní. This is well illustrated by such forms as Av. भ रवे, ग रवे, (*fem.* भै रहीं, गै रहीं,) for H. H. हुए थे, गर थे, R. भ है, भ ता, = H. H. हुआ है, हुआ था. In the dialect of Bírwa, व final in a root is often changed to या before the terminations. Thus, द्याकव, द्यावा, द्यात, = H. H. देगा, देगे, देता. In both the dialects of Avadh and Bírwa, the verbs देना, लेना and करना, add the terminations of the perfect, to the irregular forms, दीन्ह, लीन्ह and कीन्ह. In the dialect of Avadh, छ is often inserted instead of व before the terminations of the perfect. Thus, for H. H. गया, 'gone', Av. has गया; for बनाया, 'made', बनाया, etc. etc. In both Avadh and Bírwa, we find a Past Conditional tense closely analogous to that mentioned at § 427, as occurring in the *Rámáyán*. The conjugation, however, in both these dialects is more complete. In Avadh, this tense, in the verb होना, is conjugated as follows:—*Sing.* (1) होत्येउं, (*f.*) होतिउं, (2) होतेश, (*f.*) होतेश, (3) होत, (*f.*) होति. *Plur.* (1) होयित or होदत, (2) होत्यो, (*f.*) होतिउ, (3) होते, (*f.*) होती. In Bírwa it is but slightly different. Thus, (1) होत्येउं, (2) होत्येव, (3) हूत. *Plur.* (1) होतै, (2) होत्येन, (3) हूत. As previously remarked, neither in these nor the following dialects does the special H. Hindí construction with ने occur.

450. In the dialects of Bhojpúr and Tirhut we have a still wider divergence from the High Hindí type of conjugation; and a close approximation, in the characteristic ल of the perfect, and, in Tirhut, in the substantive verb हो, to the Bangálí system. In Tirhut we have, again, a distinct Past Conditional tense, which is conjugated, e.g., in the verb होना, as follows:—*Sing.* (1) हना, (2) चाहँ or (3) छ होरहँति, (*f.*) होरहँती. *Plur.* (1) हने, (2) आपने or (3) चा होरहँत, (*f.*) होरहँती.

a. The dialect of Tirhut is peculiar in forming its present imperfect, not by means of the auxiliary substantive verb, कुं, कु, etc., but by adding to the root, for the sing., the termination रँकी (*f.* रँकी); and, for the plur., रँके (*f.* रँकी),

* I judge that this is merely a corruption of लगक, —the व marking the place of the elided ग. Compare the remarks in § 162, c.

in all the persons. Thus, *e.g.*, मैं होता हूँ, is हमारा हूँ; वे देखते हैं, जाँ देखीके, etc. The pres. perf. is formed, however, analytically, by means of the usual auxiliary. Thus, मैंने किया है, is हमने किये हैं; उसने दिया है, उसने दे दिया है; तुमने बुक है, अपना मैले हूँ, etc., etc.

b. Besides the regular Bhojpúri conjugational forms mentioned in the tables, Mr. Beames mentions such peculiar forms as कहितारि, 'I am saying'; जाँतारि, 'I am going'; जान्तारि, 'I am tying'. The letter ह is sometimes added to the imperative, as in जाह जाह, 'go!'. For the conj. part. Bhojpúri commonly uses the obl. perf. part. with a postposition; thus, जानिले पर, 'on knowing', etc.

c. A passive is formed in Bhojpúri by adding जा to the root. Thus, from देखना, 'to see', the passive form is दिखाना; of which the various tenses are formed after the usual manner of the dialect; thus, हम दिखारत् जा, 'I am seen'; उह दिखारत् गेल, 'he has been seen'; उह दिखारत्, or दिखारत् जाह, 'he will be seen'. The causal is formed by adding जाह. The छ is often softened to उ, as, *e.g.*, in दिखारत्=H. H. दिखारत्गा; or the concurrent vowels may be combined, as in दिखारत्,=H. H. दिखारा.

d. Mr. Beames also mentions the existence of a verbal noun in दे or ले, of the use of which he gives the examples, सुंवे न कौलन, 'they would not give a hearing; होवे करि रेसन, 'it will probably be'. But this idiom is not confined to Bhojpúr, as I have often heard it in the central Doáb; thus, खेवे न करे, 'he will not drink'; वे मानवे न करिहें, 'they will not mind'. The verbs करना, जाना and मरना are irregular in Tirhut and Bhojpúr, as in H. Hindí. Thus for H. H. मैं गया, 'I went', T. has गौले or गयले and Bh. गौली; for किया, 'I did', T. has कौले, and Bh. कौली; etc. Similarly in Tirhut the past tense of जाना, 'to find', is पैले, etc. In Tirhut as in Avadh, etc., verbal roots are often shortened in compound forms; as, *e.g.*, in ऊ भ गौली=H. H. उह हो गया, etc. Other peculiarities of these dialects will be learned from the tables of conjugation.

451. Of the dialect in Central Bundelkhand, I have obtained but scanty specimens. From these, its affinities would seem to be rather with eastern than with western Hindí. The conjugational system is very meagre; the distinction of person and number is commonly neglected. Thus the future terminates throughout in हें, often ऊहें; as, *e.g.*, in हूहें=H. H. हूंगा, होगा, होंगे or होंगे. The imperfect participle terminates in त्त or तु; a preceding a after छ in causals is changed to उ. All the tenses of the imperfect are formed by means of the auxiliary substantive verb. All the tenses of the perfect in all verbs, terminate in न, in both the singular and plural. The construction with the case of the agent appears to be unknown.

452. The principal forms illustrated in the preceding sections will be found in the following tables:—

Origin of the Verbal Forms.

453. The various parts of the Hindí verb are either directly descended from corresponding Sanskrit or Prákrit forms, or are new modern combinations of such ancient forms.

454. The Hindí Infinitive appears under two general types, of which the characteristic letters are respectively *n* (*ṅ*) and *v* (*b*). The *n*-terminations are *naus*, *no*, *ṅo*, *ṅús*, *ná* or *nás*, *n*; the *v*-terminations, *vau* or *vaus*, *v* or *bo*, *b*. Dr. Hoernle, has, I think, conclusively proved, that these two varieties of the Hindí infinitive are respectively derived from the two forms of the Sk. fut. pass. part. neut.; the *n*-forms, from the participle in *antya*; the *v* (*b*)-forms, from the participle in *tavya*.* Not only may all the dialectic variations of the two types be thus explained, but all the peculiarities of the use of the infinitive as a noun, an adjective, or an imperative, are thus accounted for, as originally exhibited in this Sk. participle.† Thus, e.g., we may derive the H. H. inf. *karnd* as follows:—Sk. (neut.) *karanyam*, Pr. *karaniam* or *karaniyam*, archaic H. *karanyam*, Br. *karnaus*, K. *karnoy* or *karno*, M. *karno*, Me. *karnis*, H. H. *karnd*, E. H. *karan*. And the *v*-forms of the same arise thus:—Sk. *kariavayam*, Pr. *kariavvam* or *kariavayam*, *kariavayam* or *karaavayam*, Br. *kariavus* or same fut. pass. part. *karavaus*, M. *karbo*, E. H. *karab*.

a. An infinitive, *kardau*, mentioned in Prof. De Tassy's grammar, I would explain by reference to another Prákrit form in *davvam* (for *tavyam*) of this same affix. ‡

b. We should expect the penultimate vowel in the *v*-forms to be lengthened, as in the corresponding Maráthi, *karáve*, but the shortening is probably due to the accent, which rests on the first syllable.

c. Inasmuch as the Sk. fut. pass. part., when used as a noun, was declined like neut. nouns of the 1st Sk. decl., the H. obl. infinitive in *e* or *á* must therefore be explained as a corrupted gen. sing. || But the Braj inflected infinitive in *i* has probably arisen from the Sk. loc. sing. in *e*, so that, e.g., *karani* presupposes an original Sanskrit form, *karaniye*.

455. The Imperfect participle presents two general types; the one ending in a consonant or short vowel; as, e.g., the archaic *kahant*, Br. *kahtu*, K. *chalat*; the other, ending in a long vowel, e.g., G. *chalanto* or *chaldo*, Br. *chaltan*, M. *challo*, H. H. *challá*. All these forms have arisen from the Sk. pres. part. Par. in *at*; the *n* which in one or two dialects appears before *t*, belongs to the original Sk. base, and in Prákrit was always retained throughout the declension of the participle. ¶

* Journ. As. Soc. Beng., Part I, No. 2, 1873. † Vid. Williams' Sk. Grammar, §§ 902, 905, 908. ‡ Vid. Lass. Inst. Ling. Prac., § 129, 3. || Vid. § 155. ¶ Vid. Williams' Sk. Grammar. § 141; Lass. Inst. Ling. Prac., § 127, 1.

a. In accordance with the principles illustrated in §§ 154, 154, a., we must attribute the shorter participial forms to the simple Sanskrit participle; and the longer to an augmented participle formed by the Prakritic suffix *k*. * Thus, in order of derivation, we shall have, e.g., for the Sk. nom. masc. sing., *chalán* (from *chalat*), Pr. *chalanto*, archaic H. *chalant*, Br. *chaltu* or *chalatu*, E. H. *chalat*; † and from an augmented Prákrit form, *chalantako*, G. *chalanto*, and *chaldo*, Br. *chaltau*, M. *chalto*, and finally, H. H. *chaldá*. The inflections are explained at § 155, 156.

456. The Perfect participle occurs under three general forms, of which, the 1st ends in *a*, the 2nd, in a long vowel, *d*, *o*, *au*, or *e*. In the 3rd form, *l* is the characteristic letter of the termination.

(1) The 1st and 2nd forms are without doubt derived from the Sk. past pass. part. in *ta*. The 1st form is to be explained, as in the imperf. part., as having arisen from the simple Sk. part. The longer forms have come from an increased Prák. part., ending in *taka* for *ta*. The *y* which in Br. and M. precedes the vowel-termination has arisen from the *i* which, according to Vararuchi, was inserted before the participial termination much more freely in Prákrit than in Sanskrit. ‡ To illustrate, the Eastern perf. part., *chala* or *chal*, (in the passive conjugation, *chali*.) has been reduced from the Sk. part. *chalitak*; while from a Prák. part., *chalitakah*, have come the longer forms, thus:—Pr. *chalitakah*, *chalitao*, *chaliao*, Br. *chalyau*, M. *chályo*, K. *chalo*, H. H. *chaldá*.

a. The peculiar adjective form of the Mārṣwáfi participle, formed with the affix *ro*, as *chályoro*, etc., is identical with the same affix in the pronominal adjectives, and is to be connected with the Sanskrit diminutive affix *r*, which in Prákrit was often added to nouns and adjectives with no intention of a diminutive sense. Similarly Sindhi adds to these participles *ro* or *lo*, and Maráthí, *lá*, all of which affixes have the same origin.

b. The peculiar Garhwáfi participle in *e* may be explained by the substitution of *a* for *i* as a union-vowel, and the insertion of a euphonic *y*, instead of *sandhi* as in the other dialects; thus:—*chaldó*, *chalayo*, *chalya*, *chale*.||

(2) It has been common to regard the *l* of the perf. part. in some eastern Hindí dialects, as having arisen from the *t* of the Sanskrit participle, through *d* and *r*. But inasmuch as the change supposed, of *r* to *l*, is the exact reverse of that which these dialects constantly exhibit in other words, it is highly improbable that the law should have been uniformly reversed in the participle only. Nor has it yet been proved that the use of this form in *l*, (which is found also in the Prákrit dialects coëxistent with those in *d* and *r*.) historically followed the use of the other forms. I am therefore inclined to believe, that in this participle in *l*, as also in the labial future of these same dialects, to be hereafter noticed, we have a form as ancient as the Sanskrit participle in *t*, and having no connexion with it.

*Vid. §71, (1). †Vid. §75. ‡Vid. Prák. Prakás. VII, 32. ||Vid. §§77, b, 155.

(3) The irregular perf. part. of some verbs, ending in *na, ṅá, etc.*, is to be connected with the Sk. perf. pass. part. in *na*. Many verbs which in Sanskrit formed this participle with *ta*, in Prákrít preferred the affix *na*. Thus, e.g., we have in Prákrít, *diṅṅa*, for Sk. *datta*, whence H. *díná, etc.*, for *diyá*.

457. The Conjunctive participle, in most of its forms at least, must, I think, be connected with the Sk. indecl. past. act. part. in *ya* or *tvá*.

(1) The termination *ya* in Prákrít became *ia*, whence, e.g., from Sk. *chalya*, Pr. *chalia*, Br. etc., *chali*, and *chal*. When the significant termination had thus almost or quite vanished, the corresponding participle of the ever convenient root *kṛi*, 'to do', viz., *kari* or *kar*, (Sk. *kṛitya*, Pr. *karia*,) was pressed into service, and appended to the remainder of the old participle; whence, Br. *chalikari*, H. H. *chalkar*, etc. The other affix, *ke* or *kai*, is another form of this same participle, and has arisen from *kari*, by the elision of *r* and *sandhi* of *a* and *i*.* A still further reduction gives us the Garhwáli affix, *k*, for *ke*, as, e.g., in *śárik*.

(2) In the *ú* which is added to the root in Mairwár, to form such conjunctive participles as *marúne, suṅúne, etc.*, we probably have the remainder of the other Prákrít affix of the past act. part., viz., *túṅa* or *úṅa*, for the ancient Vedic *tvánam*.† Thus, e.g., for the Sk. *mrítvá*, the Prákrít had *maráúna*, whence, by the operation of the regular phonetic laws, *maráúṅ, marau*, and *marú*, as in Mair. *marúne*.‡

(3) At first sight it might be natural to explain the *ne* which is added in Mairwár to this *ú*, and elsewhere, to the root, as identical with the *n* of this Prákrít affix *túṅa*. But seeing that even in Prákrít the affix had been worn down to *úṅa*, it is quite unlikely, if not impossible, that this should have been afterward increased to *úne*. I would therefore suggest that the affix *ne* should be connected with the Prákrít past pass. part., *kinṅa* (*kinṅaka* ?) for *kṛita*, from the root *kṛi*, 'to do'. When the participial affix was nearly or quite abraded, the gen. or loc. absolute of this participle appears to have been added to the old form.|| This is perhaps confirmed by the other form of this affix, *kane*, which is added in Mairwár, to the imperf. part., to give the sense of the conjunctive. Analogous is the Bhag. affix, *kaná*, of this same part., as, e.g., in *sunkaná* = H. H. *sunke*. With the other form of this participle in *iyána* (§394,6) may be compared another Prákrít form in *dáni*; as, e.g., *kariḍáni*, whence, if *ḍ* be elided, and *y* inserted, we shall have *kariyáṅi, kariyána*.

(4) Of the very peculiar Kumáoní form of this participle, in *ber*, I am not able to offer any explanation.

* This is still used in E. Hindí in some phrases, for H. H. *karke*. Thus, I have heard a villager say, *kas ke jáb ?* = H. H. *kaiá karke jáoge, lá*, 'doing what will you go?' i.e. 'how will you go?'

† Compare the Maráṭhí form of this participle in *a*, as *karúṅ*, = H. H. *karke*, and the Gujaráṭí, as, e.g., *hoine*, = H. H. *hoke*.

‡ Vid. Williams' Sansk. Grammar, § 555, a. || Cf. § 159.

458. Of the affixes *wáá* and *hárá*, used with the inflected infinitive to form the Noun of agency, *wáá* is the Sk. *pálaka*, and *hárá*, Sk. *dháraka*.* This etymology of *wáá* may be illustrated by H. *gwáá*, for Sk. *gopálaka*; and that of *hárá*, by an intermediate form in the 1st line of Chand's poem, *dháranadhárayam*, = H. H. *dháranhárá*. The inflected infinitive in this idiom is therefore in fact an objective genitive, under the government of the suffix.

459. The tense-forms which in High Hindí are used as a Contingent future, (and in old Hindí, also as abs. fut. and pres.,) have all arisen from Prákrit modifications of the Sk. present. It is to be noted that Prákrit often substituted for the Sk. terminations, in the 1st sing. and plur., the full forms of the substantive verb, *vis.*, Sing., *amhi*, = Sk. *asmi*, and Plur., *amho*, *amha*, = Sk. *asmah*. On the strength of this analogy, I assume a Prák. 3rd sing. in *atthi*, = Sk. *asti*. This will explain, as the regular Prák. form in *di* does not, the Hindí 3rd pres. in *hi*. Similarly I would postulate for the termination of the 3rd plur., a Prákrit form, *ahanti* for *asanti* (Sk. *santi*), of the substantive verb, as the original of the old Hindí form in *hi*. The following table, with the appended notes, will enable the student to work out most of the Hindí forms.

PRESENT.

	SANSKRIT.	PRÁKRIT.	HINDÍ FORMS.
Singular.	1. <i>chalámi.</i>	<i>chalamhi.</i>	<i>chalávi, chalaui, chalávi, etc.</i>
	2. <i>chalasi.</i>	<i>chalasi.</i>	{ <i>chalasi, chalahi, chalávi,</i> { <i>chalai, chale.</i>
	3. <i>chalati.</i>	{ <i>(chalatthi)?</i> { <i>(chalasati)?</i>	{ <i>chalahi, chalávi,</i> { <i>chalai, chale.</i>
Plural.	1. <i>chalámah.</i>	<i>chalamho, -ha.</i>	{ <i>chalávi, chalaui,</i> { <i>chalahi, chalahi, chale, chalávi.</i>
	2. <i>chalatha.</i>	{ <i>chaladham.</i> { <i>chalaha.</i>	{ <i>chalahi, chalahi, chalahi,</i> { <i>chalahi, chalahi, chalahi.</i>
	3. <i>chalanti.</i>	{ <i>(chalahanti)?</i> { <i>chalenti.</i>	{ <i>chalahi, chalávi, chalahi, chale,</i> { <i>chalahi, chalávi, etc.</i>

Rem. 1. In all the above forms the Prákrit optionally substituted *e* for *a* after the root, whence the frequent appearance of *e* before the terminations in Old Hindí. This may give a clue also to the explanation of other Hindí forms.

Rem. 2. According to Vararuchi, (*Prák. Prak.* VII, 20,) Prákrit sometimes substituted *jja* and *jjá* for the proper affixes of the present and definite future. Hence have arisen the common Hindí pres. and fut. forms in *aya* and *iya*, as *variya*, *maraya* = *martá hai*, etc. The forms in *yai* and *ye*, are explained by *Prák. Prak.* VII, 21, which states that *jja* or *jjá* was also inserted before the terminations of the present, future and imperative.

460. (1) The various inflected forms of the Absolute future, with *s* or *h* as the typical letter, are all, I think, to be connected, not with the 1st fut., as has

* Or possibly *kára* (or *káraka*?). So Dr. Trumpp, *Sindhí Gram.*, §10, (33).

been suggested, but rather with the 2nd fut. of the Sk. verb. Space will not allow us to work out all details, but the following tables will suffice.

FUTURE.

	SANSKRIT.	PRÁKRIT.	HINDÍ FORMS.
Singular.	1. <i>chalishyámi.</i>	{ <i>chalissámi.</i> <i>chalissam.</i>	{ <i>chdlasyúṣ, chdlasúṣ, etc.</i> <i>chdlahúṣ, chalihauṣ, etc.</i>
	2. <i>chalishyasi.</i>	{ <i>chalissasi.</i> <i>chalihissasi.*</i>	{ <i>chdlasṭ, chdlasṭ.</i> <i>chalihasi, chalihahi, chalihai.</i>
	3. <i>chalishyati.</i>	{ <i>(chalissatthi)?</i> <i>chalissái.</i>	{ <i>chdlasṭ, chdlasṭ.</i> <i>chalihahi, chalihai.</i>
Plural.	1. <i>chalishyámaḥ.</i>	{ <i>chalissámo, etc.</i> <i>chalihissámo,* etc.</i>	{ <i>chdlasyáṣ, chdlaháṣ.</i> <i>chalihahiṣ, chalihaiṣ.</i>
	2. <i>chalishyatha.</i>	{ <i>chalissadha.</i> <i>(chalissadham)?</i>	{ <i>chdlasyo, chdlaho.</i> <i>chaliháhu, chalihau.</i>
	3. <i>chalishyanti.</i>	{ <i>chalissanti.</i> <i>chalihissanti.</i>	{ <i>chdlasṭ, chdlasṭ.</i> <i>chalihahiṣ, chalihaiṣ.</i>

(2) Neither Sanskrit nor Prákrit literature gives any forms which could be the original of the various Hindí inflected future forms in *b (v)*. But all the analogies of the Áryan languages lead us to believe, that just as Sanskrit, like Greek, formed a future by the aid of the substantive verb *as*, so the eastern Hindí dialects, with the Bangálí, and, beyond doubt, a Prákrit tongue, which for some reason has not been preserved in literature, formed their future, like the Latin, by the aid of the other substantive verb, *bhú*. Compare, *e.g.*, the E. Hindí forms, *jáb* and *jávaṣ*, 'I shall go', with the Latin *ibo*.

(3) In many parts of India, where, for some reason, the Sanskrit future failed to maintain itself, when the old present, which usurped its place, by reason of its great diversity of use, had become quite indefinite in meaning, the people constructed a new future, by adding to the various forms of the present, one of two new terminations. These terminations now exist, the one as *gau, go*, or *gá*, the other as *lo, lá*, or *lyo*. Of these, the former is probably the past pass. part. of the Sk. *gam*, 'to go', for *gataḥ*, Pr. *gao*. *Lo* may be connected with the Sk. past. pass. part., *lagitaḥ*, Pr. *laggiao*, of the root *lag*.

a. In illustration of this use of a verb of motion to form a future, compare with the above the English idiom, 'I am going to say', which is nearly equivalent to the future, 'I shall say'.

461. In the Imperative the forms in *hi* and *si*, are originally real futures, used, after the analogy of the Sanskrit, for the imperative. The 2nd sing. in *su*, appears to stand for the Sk. 2nd sing. imp. Átm. in *sva*. The common 2nd plur. imper. in *o*, Br. *au*, has arisen from the older Hindí termination, *hu*, which we may, with Prof. Lassen, connect with the Sk. 2nd plur. imper. Átm. in *dhvam*; so that, *e.g.*, the order of derivation would be, *chaladhvam*,

* The Prákrit sometimes, as here, reduplicated the fut. termination through-out. Hence, possibly, come the longer inflected forms in the *Bámdáyan*.

chalakus, chalahu, chalan, chalo. Or it may be connected like the 2nd plur., pres. with the Prákrit termination *dham*. The 3rd sing. forms in *e, ai*, etc., as also the 1st and 3rd plur. in *ey*, etc., have, I suspect, arisen from a Prakritic confusion of the imperative terminations with those of the present. The following table will illustrate the derivation of this tense.

IMPERATIVE.

	SANSKRIT.	PRÁKRIT.	HINDÍ FORMS.
Singular.	1. <i>chaláni.</i>	<i>chalamu,</i>	<i>chalamu, chaliy.</i>
	2. <i>chala.</i>	{ <i>chalamu, chaldhi.</i> <i>chala.</i>	{ <i>chalamu, chalahu.</i> <i>chalu, chalu, chale, etc.</i>
	3. <i>chalatu.</i>	<i>chaladu, chalāu.</i>	<i>chulu, chule, etc.</i>
Plural	1. <i>chalāma.</i>	<i>chalāmo, etc.</i>	<i>chaley, etc.</i>
	2. <i>chalata.</i>	<i>chalaha, chala-</i> [<i>dham.</i>	{ <i>chalahu, chalan.</i> <i>chalo.</i>
	3. <i>chalantu.</i>	<i>chalantu.</i>	<i>chaley, etc.</i>

462. The Respectful forms of the Imperative are to be explained by the above-mentioned Prákrit custom of inserting *jja* before the verbal terminations.* The following comparisons will illustrate the derivation:—Prák. 2nd plur. imp. (alternative form), *chalijjadham* (or *chalijjidham*), Old H. *chaliyahu*, Mār. etc., *chaliyo* or *chaljo*, H. H. *chaliyo*. Or again, 2nd plur. Prák. *chali-jjaka*, (*chalijjaa*), Br. *chalijjai* or *chalije*, (for *chalijjaya*), H. H. *chaliye*.

463. (1) As the remaining tenses in most of the dialects are formed by means of the auxiliary substantive verb, we may here briefly indicate the origin of the forms of this verb. Those forms of the present which contain *h*, are to be connected with the Sk. *asmi*, Prák. *amhi*, etc. The forms in *chh*, as, e.g., M. *chhamu, chhai*, etc., are to be connected with the root *achchh*, which was substituted in Saurasenic Prákrit for Sk. *as*, 'to be'.† This root was conjugated like all Prákrit verbs; thus, Sing., 1, *achchhāmi*, 2, 3, *achchhāi*, 3rd plur. *achchhanti*, etc. It is of course possible that some or all of the *h*-forms may have been derived from those in *chha*, but the former theory seems the more probable. It is noticeable that Vararuchi (III, 1,) omits *chh* from the list of aspirates changeable to *h*.

(2) Of the various forms of the past tense, *thá*, the Br. *tho* stands, probably, for the Sk. *sthitaḥ*, from the root *sthá*, 'to stand', which in Sanskrit was already

* On this topic, Lassen's remark is worthy of note. He says,—“*Conjicio ... artius limitatam fuisse regulam ab aliis, et relatam esse incrementum potissimum ad formas, quas potentiali et precativo Sanscr. respondeant.*” *Inst. Ling. Prac.*, § 124. † *Vid. Vár. Prák. Prak. XII. 19, 20; Lass. Inst. Ling. Prac. p. 346.*

used in the sense of simple existence. The intermediate Garhwálí form, *thayo*,* seems to prove that *thá* cannot have arisen, as Mr. Beames has suggested, from the Sk. *bhútaḥ*. With this latter, however, I would certainly connect the other Braj form, *huto*, and the K. *hato*. The Kumáoní *chhiyo* is, of course, the past participle of the Prákrit root, *achchha*, (for *achchho* or *achchhiao*).† The verb *honá*, in all its variations, is derived from the Sk. *bhú*.

464. The formation of the Márwáří Present, by adding the present of the substantive verb to a form which, as has been above shewn, was itself a true present, is to be explained by the ambiguity which had come to attach to that tense. As it was often used as a cont. fut., and therefore did not, *per se*, any longer denote present time, Márwáří solved the difficulty by adding again, as of old, but in a modern form, the present of the substantive verb. Most other dialects met the case by dropping the old present as such, and forming a new present with the imperfect participle.

465. The limits assigned to this section preclude more than a mere reference to most of the remaining verbal forms.

(1) The perf. in *eu*, common in the *Rámáyana*, is to be referred to the Sk. past act. part. in *tavat*, nom. masc. sing., *taván*, Pr. *awanto*. Thus the Sk. *chalíván*, became in Prákrit, *chaliavanto*, *chaliáú*, H. *chaleu*.

(2) Both the act. and pass. Sk. past participles, were used as perfect tenses in conjunction with the substantive verb, *as*. From this combination have arisen many of the inflected forms of these tenses; as, e.g., Br. *chaleuḥ*, 'I have walked', for Sk. *chalitvānasmī*. An analogous origin is to be sought for the various terminations which are affixed to the imperfect participle, in the *Rámáyana* to form a past contingent, and in Garhwálí to form a present tense.

466. (1) The Sk. causal affix, *aya*, became in Prákrit, *e*. This *e* was sometimes added directly to the root, but very commonly, *p*, which in Sanskrit was added only to certain roots ending in vowels, in Prákrit was added, with *d* prefixed, to many other roots before the causal termination. This *p*, again, was early changed to *b* or *v*, so that, e.g., for the Sk. causal base, *káraya*, from *kri*, Prákrit exhibits not only *káre* but *karáve* (for *karápe*), whence, in succession, the causal bases, Br. *karáva*, G. *karau*, H. H. *kará*. The *o*, which occurs in two or three H. H. verbs, as, e.g., *bhigondá*, is a contraction of *áva*.

a. A few Sk. causals, as, e.g., *pá*, 'to preserve', inserted a euphonic *l*, instead of *p*, before the causal affix, making *pálaya* (whence H. *pálná*). This is the original of the *l* (in many dialects, *r*) which is found in many Hindi causals, as, e.g., *pálná*, *biḥlándá*, etc.

(2) The regular form of the Sanskrit causal in *aya*, Prákrit, *e*, is preserved in Hindi in many causals of the 2nd form (§ 341, 2), where the causal affix,

* This verb, *thavúḥ*, though defective in Hindi, is conjugated in full in Gujarátí. Vid. Shápurjí Edaljí's Grammar, pp. 72—81. † Var. *Prák. Prakás.*, XII. 19, 20.

eya (e), having disappeared, Hindí retains only the ancient lengthening or *gunating* of the radical syllable. Thus, e.g., from the Sk. neuter base, *sphaṭ*, 'to burst', (represented by H. *phaṭná*.) comes the causal base, *spháṭaya*, (Pr. *pháṭe*?) whence H. *pháṭná*.

467. The Prákrit commonly formed the stem of the passive by adding *ijja* to the root instead of the Sk. pass. affix, *ya*. (Var. *Prák. Prak.* VII. 8, 9.) From this Prákrit formation has arisen the modern Mārwarí passive in *ṭjaṇo*, as, e.g., *karṭjaṇo*, 'to be done'. Similarly are to be explained the pres. pass. participles in *yata* found in the *Rámáyana*, (§345, a.) and certain passive forms in *iya*, as, *sarḍhiya*, 'it is praised', for Sk. *shlághyate*, etc. In all these, *ijja* has been softened to *iya*.

a. Sometimes Prákrit assimilated the *y* of the Sk. pass. affix to the final consonant of the root, as, e.g., in *dissái*, for Sk. *ḍṛisyate*. (Var. *Prák. Prak.*, VIII, 57, 58.) From this form of the passive are derived many Hindí verbs of a passive sense, as, e.g., *sichná*, 'to be watered', which is for *sichchána*, and is properly a passive derived from the Sanskrit root *sich* (*sich*), of which the passive base is *sichya*, Pr. *sichcha*.

CHAPTER IX.

OF DERIVATIVE AND COMPOUND WORDS.

I. Of Derivatives.

468. The general principles of the derivation of words in Hindí have been already treated in Chapter III. ; where also we have noted the forms under which pure Sanskrit words appear in Hindí. It will be our object, in this section, to indicate the most common affixes by which Tadbhava words of various classes are formed either from original roots or from secondary formations.

469. The following are the most common forms of *Abstract Nouns*:—

(1) The roots of very many verbs are used as abstract nouns ; as, मार, (vb. मारना,) 'a beating'; बोल, (vb. बोलना,) 'speech'. A short vowel in the verb is often lengthened or *gunated* in these nouns ; as, e.g., चाल, (vb. चलना,) 'walk', 'behavior'; मेल, (vb. मिलना,) 'harmony'.

a. Here we must also place many words ending in आव (आव, आव, or आवो); as, उवाव, 'salvation'; उनाव, 'adornment', etc.

Rem. 1. In many such words the final व is identical with the व (Sk. व) which is the characteristic of the causal affix. Although this व has disappeared from

the High Hindi causals, it is retained in almost all the dialects ; so that the original Hindi form of the causal root, e.g., of बनाना, was not बाना, but बनवाव. Hence appears the propriety of placing such words as the above under this class. It should be remarked, however, that many words with this final labial express the abstract idea, not of the causal, but of its primitive. Such nouns will be explained below (3).

Rem. 2. It must not be supposed that nouns of this class are derived from the infinitives with which they are connected. Both the infinitive and the noun are collateral formations from one primitive root.

(2) न, (for Sk. न, forming neuters in नै,) is added to verbal roots to form abstract nouns ; as, चलन, (vb. चलना,) 'walk' ; मरण, (vb. मरना,) 'dying'.

a. Or आन may be added ; as, उठान, (vb. उठना,) 'rising' ; लगान, (vb. लगाना,) 'fastening'.

(3) आर, (Sk. आत् or आत्,*) is added to primitive verbal roots to form abstract nouns ; as, चढ़ार, (vb. चढ़ना,) 'an ascent'. ऊ, ए, or ओ, is sometimes written for the final उ.

a. आरै is sometimes added instead of आर, giving the same sense ; as, चढ़ारै = चढ़ार.

(4) A large class of abstract nouns is formed with the affixes वत, वट, इत, and इट. These are often added to causal roots ; as, from बनाना, 'to make', बनावट, 'a fabrication', also बनवत ; from बुलाना, 'to call', बुलावट, 'calling' : and also to adjectives ; as, from कड़वा, कड़वाइट, 'bitterness' ; from चिकना, चिकनाइट, 'greasiness'.

a. Here also properly come a number of nouns in सौती or सौटी (for आवती or आवटी) ; as, कसौती or कसौटी, 'a touchstone' ; कुहौटी, 'deliverance' ; which come respectively from कसाना, कुड़ाना.

Rem. All these formations are to be connected, like the foregoing, with the Sk. affix, *ātu* or *atu*. The labial which appears in many of these words really belongs, not to the termination, but to the causal base : *h* has apparently been inserted merely for euphony.

(5) Very common is the affix ई, (Sk. यै,) forming abstract nouns from other nouns and adjectives. Thus, from ऊँचा, 'high', ऊँचाई, 'height' ; बुरा, 'bad', बुराई, 'badness' ; गोला, 'a ball', गोलाई, 'roundness' ; लड़का, 'a boy', लड़काई, 'boyhood'.

a. When added to causal roots, ई (for आनी.) forms nouns denoting the price paid for the work denoted by the verb ; as, from धुलाना, 'to

* Sindhi preserves the consonant, hardening *t*, however, to *f*.

cause to wash', धुलार्हे, 'the price paid for washing'; उतारना, 'to carry over', उतरार्हे, 'ferriage'; दुलार्हे, 'price of carriage', etc.

(6) Other abstract nouns are formed by adding to adjectives and verbal roots the affix आर्हे; as, from चतुर, चतुरार्हे, 'cleverness'; from ठाना, ठगार्हे, 'cheating'.

(7) Many Sanskrit fem. abstract nouns are formed with the affix ति (sometimes नि); as, मति, 'the mind'; बुद्धि, (बुध + ति,) 'intelligence'; स्लानि, 'languor'.

a. In Hindí Tadbhava nouns also, this suffix is added to verbal roots; but ह् is either dropped or lengthened. Thus, लागत, 'price', (vb. लगना, the radical *a* being lengthened); बढ़ती, (for बढ़तिका, बढ़तिया?) 'increase', (vb. बढ़ना); चढ़ती, 'rise, (in price,)' (vb. चढ़ना.)

(8) Tatsama masc. abstracts are formed from nouns and adjectives, by the affix त्व; as, from ईश्वर, 'God', ईश्वरत्व, 'divinity'; गुरु, 'heavy', 'venerable', गुरुत्व, 'dignity'.

a. This affix, through different Prakritic modifications, has become in Tadbhava words, प, या, पन or पना; as, from बुढ़ा, 'old', बुढ़ाप or बुढ़ापन, 'old age'; लढ़का, 'a child', लढ़कपन or, more rarely, लढ़कपना, 'childhood'. प is very rare; examples are, स्याप, 'maturity'; बुढ़ाप, 'senility'. पनी also, very rarely occurs; as, लुप्तपनी, 'wantonness'.

(9) A few abstracts are formed with क; as, ठंढक, 'coolness'.

(10) Many Sanskrit fem. abstracts are formed from adjectives with the affix ता; as, from नक्ष, नक्षता, 'courtesy'; from पुरुष, पुरुषता, 'manhood'. Others are formed from roots with आ, and, rarely, ना; as, इच्छा, 'desire'; तृष्णा, 'thirst'.

a. For ता, तार्हे is often substituted; as, सुंदरतार्हे, for सुंदरता, 'beauty'.

(11) Masc. abstract nouns are formed from Sanskrit roots or nominal bases, by adding इमा (Sk. इमन्); as, लघिमा, 'lightness'; महिमा, 'greatness'.

a. In Hindí, this termination has become चाँ; as, e.g., in ऊँचाँ, 'height'; लंबाँ, 'length'.

(12) Other Sanskrit abstracts (neut.) occur in Hindí, formed from nominal bases with the suffix य; as, e.g., राज्य, 'kingdom'; स्वाम्य, 'lordship'. But Hindí very commonly drops this य; as, e.g., in राज.

470. The following terminations are used to form nouns denoting Agency or Occupation.

(1) घाला (Sk. घालक), as thus used with inflected infinitives, has

already been noticed. It is also added to nouns to denote 'occupation'; as, दूधवाला, 'a milkman'; and to verbal roots, as, रक्षवाला, 'a guard'.

a. But some words terminating in वाला, have come directly from an old Sanskrit compound, as, e.g., ग्वाला, 'a cowherd', Sk. गोपालक. Dialectic variations of this affix are चारी, चार, etc.

(2) द्वारा or द्वार, as used with verbs to form nouns of agency, has also been already noticed. It is occasionally used with nouns; as in पनद्वारा, 'a water-carrier'. The penult is sometimes shortened; as, पनहरा.

(3) चारा, (Sk. कारक,) and चार or र (Sk. कार,) are added to nouns to denote 'occupation'; as, from सोना, सोनार, (Sk. सुवर्णकार,) 'a goldsmith'; from जन्त, जन्तार, 'a trader (in grain)'; सुधार, (Sk. सूपकार,) 'a cook'.

a. A few nouns of agency end in री or चारी, (Sk. कारिन्); as, पूजारी, (Sk. पूजाकारिन्,) 'a worshipper'.

b. Other nouns of agency are formed with री and र; as, चुरेरी, for पूजारी; लुटेर, 'a robber', etc.

Rem. The explanation of these variations is perhaps to be found in the Prāk. root केर, for Sk. कृ. री would then stand for Pr. केरिक्, and र for Pr. केरक.

(4) Sanskrit nouns of agency were also formed from roots with the affix क्क. These are common in Hindī, as, पूजक, 'a worshipper'; रक्षक, 'a protector'.

a. क्क is often corrupted to का, whence Hindī nouns of agency in का; as, मुंजा, (for मुंजक,) 'a parcher'.

b. In Prākrit, this क्क often became क्क, whence the Hindī affix च्या, denoting 'agency'; as, from लक्ष्म, 'to behold', लक्ष्मिया, 'a beholder'; from गार, 'a sheep', गारिया, 'a shepherd'. This च्या, again, became च्, whence many Hindī nouns in च्, denoting 'occupation'; as, e.g., बलवाच, 'a confectioner'; बट्च, 'a carpenter'.

c. क्क also became क्क, whence, again, nouns of agency in च्या or क्क; as, मकुष्या, 'a fisherman'. And च्या became च, whence, finally, other nouns of agency in च; as, बैठ, 'a sitter'; खाक, 'a great eater', 'a glutton'.

d. वैया, (also वाच्य and वय्या,) also forms nouns of agency from verbal roots; as, रक्षवैया, 'a keeper'; मरवैया, 'a beater'. A long vowel is shortened before the affix; as, लिवैया, 'a taker', from लेना; गवैया, 'a singer', from गाना.

(5) A few nouns of agency are formed with हा (for क?); as, चरवाहा, from चरवाला, 'a shepherd'. This is also added to nouns; as, कबीराहा, 'a follower of Kabīr'.

(6) Two or three nouns of agency are formed from verbal roots with दा; as, देवा, 'a giver'; लेवा, 'a taker'.

Rem. This is possibly an oblique form of the infinitive in दा so that देवा, लेवा, = देने का, लेने का.

(7) A few nouns of agency are formed with आक (Sk. आकु); as, तैराक, 'a swimmer'.

(8) Very common are Sanskrit nouns of agency or relationship in ता; as, कर्ता, 'a doer', दाता, 'a giver'; पिता, 'a father'.

(9) Many Sanskrit nouns of agency are formed with the affix क्त (क्त). In Hindi, these are chiefly found in poetry, as the last member of compounds; as, शयन, 'a sleeper'; दुःखहरन, 'a remover of sorrow'.

(10) Finally, Sanskrit formed nouns of agency with क्त, after गुण of the root. These are found in Hindi, but only as the last member of compounds; as, from the root धृ, धर, = धरनेवाला, 'a supporter', in धरनीधर, 'a mountain', *lit.*, 'an earth-supporter'.

471. Nouns denoting the *Instrument* are formed from verbal roots

(1) With नी, ना, or न, (Sk. क्त, Pr. क्तक, क्तिक?); as, from धीकना, 'to blow', धीकनी, 'a bellows'; बेलना, 'to roll out', बेलन or बेलना, 'a rolling-pin'. Compare with this the postposition ने, used with nouns.

(2) Some nouns with an instrumental sense are formed by the affix का (Sk. क्त?); as, घेरा, 'a fence', from घेरना, 'to surround'.

472. (1) *Possessive* nouns are most commonly formed from other nouns with the affixes वाला or द्वारा; as, *e.g.*, दांतवाला, 'one having teeth'; कपड़ेवाला, 'a draper'. वाला may be thus added to a series of words, all of which must then be inflected; as, छोड़े गंडे पट्टे वाले, 'horses having collars and girths', *i.e.*, 'harnessed'.

a. Here may be noted a large class of Persian nouns, formed with the suffix दार (2nd root of داشتن, 'to have',); as, जमीनदार, 'a landholder'; हवादार, 'ventilated', *lit.*, 'possessed of air'.

(2) The termination आल or आला, (Sk. आल, Pr. आलक,) is added to a few nouns to form possessives; as, लठियाल, 'one having a stick'; जवाला, 'a mixture of other grain with barley (जौ)'.

Rem. But in a few words expressive of place, आल stands for the Sk. आलय; as, ससुराल, 'father-in-law's house'. So also, perhaps, घड़ियाल, 'a gong', from घड़ी, 'a division of time'.

473. *Diminutives* are most commonly formed in Sanskrit (1) with the affix क्त. This termination is similarly used in Hindi; thus,

from **छोल**, **छोलक**, 'a small drum': or **का** (fem.) is added ; as in **पशुका**, 'a small animal', from **पशु**; or **चका**, as in **चकटिका**, 'a toy-cart', from **चकट**; or **की**, as in **टमकी**, 'a small drum'.

a. **क** being elided from such diminutives, **य** was often inserted, whence a large class of Hindí diminutives (fem.) in **का**; as, from **दिखा**, 'a box', **दिखिया**, 'a little box', 'a casket'; from **फोड़ा**, 'a boil', **फुड़िया**, 'a small sore', 'a pimple'. These diminutives often express 'affection'; as, **बेटिया**, 'little daughter', from **बेटा**.

b. **का**, again, very often became **ई**; whence a large number of diminutives ending in **ई**, as, e.g., **गाड़ी**, 'a carriage'; **टोकरी**, 'a small basket', etc., etc.

c. In the east, especially, **क** being elided, **च** was inserted instead of **य**, whence another class of diminutives in **चा**; as, e.g., from **पुर**, **पुरवा**, 'a hamlet'; **घोड़वा**, 'a small horse', often used by way of depreciation. **च** is often softened to **उ**, whence diminutives in **उचा**; as, **बेटुचा**, 'a little son'.

(2) Sanskrit also formed diminutives in **र**, whence have come (a) Hindí diminutives in **री**; as, **तितरी**, 'a butterfly'; and (b) in **ड़ी**; as, **टिकड़ी**, 'a wafer'; **पलंगड़ी**, 'a small bedstead'; and, still more common, (c) others in **ला** and **ली**; as, **तितली** and **टिकली**, for **तितरी** and **टिकड़ी**; **घंटाली**, 'a little bell', from **घंटा**. For **ल** (**र**) **इल** and **उल** seem to have been added; as, e.g., in **खटोला**, 'a small bed'; **मुरेला**, 'a peacock', etc.

(3) A very few diminutives are formed with **ना**; as, from **सूत**, 'a goblin', **भूतना**, 'a sprite'; from **मटका**, 'a large earthen jar', **मटकना**.

474. **क**, and also **रा**, **ड़ा** and **ला**, (Sk. **र**), with their fem. forms, **की**, **री**, **ड़ी** and **ली** are often added to nouns to form derivatives expressive of various relations difficult to classify. Sometimes the consonant of the affix is preceded by **ह** or **उ**, which is combined with the final vowel of the primitive according to the rules of *sandhi*. Examples are, from **मट्टी**, 'earth', **मटका**, 'an earthen jar', dim. **मटकी**; from **हाथ**, 'hand', **हथेला**, 'a pilferer'; **हथेली**, 'the palm of the hand', **हथौड़ा**, 'a hammer', dim. **हथौड़ी**; **हथरी**, 'a handle'; **हथेली**, 'a plough-handle'.

a. **चा** and **ई**, (for **चक**, **चक**.) are similarly added; as, again, from **हाथ**, **हथा**, 'a handle', **हथी**, 'a horse-brush'.

475. Nouns expressing *Nativity* or *Relationship* are formed from other nouns with the affix **ई** (Sk. **ईय**, **इय**). Examples are, **माड़वाड़ी**, 'a native of *Mārwar*'; **कबीरी**, 'a follower of *Kabir*'.

476. Hindí Adjectives are derived as follows:—

(1) Many adjectives were formed in Sanskrit with the affixes क्क, च्क, or उक्क. Before these affixes, medial *a* or a final radical vowel was *eridhdied*, and any other vowel changed to its *gun*. Examples are;—*वर्षादिक*, 'worldly', from *वर्षा*, 'the world'; *तापक*, 'inflammatory', from *ताप*, 'heat'.

a. In Prākṛit, क्क was dropped from these forms, whence, य being inserted, Hindī adjectives in च्या; as, *दूधिया*, 'milky', from *दूध*. But more commonly *sandhi* took place; whence, from क्क came the Hindī adj. termination, चा; as, from *मैल*, 'dirt', *मैला*, 'dirty'; from *सुष्टक*, for *सुष्ट*, *मोटा*, 'fat', etc. Similarly, from च्क has often come the termination चै; thus, from *भार*, 'a burden', *भारी*, 'heavy'; *ऊन*, 'wool', *ऊनी*, 'woolly'. उक्क also became ऊ, as in a few modern adjectives, *e.g.*, *ढालू*, 'sloping'.

(2) Many Sanskrit adjectives were formed with the terminations ल, ञालु, च्ल, उल; र, ञर, हर, उर. All of these, perhaps, have been preserved in Hindī. Examples are;—from *दूध*, *दूधल*, 'milky'; from *दया*, *दयाल* or *दयालु*, 'merciful'; from *दांत*, *दन्तेल* or *दन्तेल*, 'toothed'; from *भोक्त*, *भोक्तेल*, 'loaded'; from *काम*, 'work', *कमेरा*, 'industrious'; from *नोक*, *नोकीला*, 'pointed'; from *रस*, 'juice', *रसीला*, 'juicy'. Adjectives in र (रर) are less common, but examples occur; as, *दंशेर*, 'cruel', from *दंश*, 'a bite'; *दूधेर*, 'milky', from *दूध*. And through the change of र to ङ come a very few adjectives in ङ; as, *हंसैङ्ग*, 'merry', (*हंस* + *उर*), from the root of *हंसना*, 'to laugh'.

(3) A few adjectives or nouns occur, which are formed with the Sanskrit suffix च्ल; as, *दंगैल*, (*दंग* + *च्ल*), from *दंग*, 'seditious'; *खर्चैल*, *lit.*, 'having a spear', 'a spearman', from *खर्चा*.

(4) The following suffixes are also occasionally used to form adjectives; *viz.*, *ई* (added as initial); as, *दंगई*, 'turbulent'; *हम*; as, *तुन्दिम*, 'corpulent'; and *हा*; as, *कंपहा*, 'tremulous'.

(5) Many Tatsama adjectives denoting 'possession', are formed with *ई* (Sk. *इन्*); as, *धनी*, 'wealthy', (Sk. *धनिन्*.) from *धन*, 'wealth'; and also with *वान* or *वन्त* (Sk. *वत्*); as, from *धन*, *धनवान*; 'wealthy'; from *बल*, *बलवान*, 'strong'; from *कृपा*, *कृपावन्त*, 'merciful', etc.

(6) Many Sanskrit participles, especially those in *त्त* and *मान* (मत्), are used as adjectives in Hindī; as, *e.g.*, *क्रोधित*, 'angry', (from *क्रुध्*); *शोभयमान*, 'beautiful', (from *शुभ्*).

(7) The Sanskrit affix मय, = Engl.—'ful'; is also often added in Hindī to Tatsama nouns; as, *दयासय*, 'merciful'; *पावकमय*, 'fiery'.

(8) Very rarely Tatsama adjectives are found in Hindí, formed with the Sk. affix *वत्*, expressing 'similitude'; as, *चिचिचत*, 'like the moon'.

(9) A very few adjectives occur, formed with the Sk. desiderative affix, *ञ्*; the chief example is *पिपासा*, 'thirsty', for Sk. *पिपासितः*, perf. pass. desider. part. from the root *पि*, 'to drink'.

477. A very large number of *Onomatopoeitic* words occur in Hindí, whose derivation is to be traced to an attempt to imitate or suggest a sound or action by the voice. These often have a reduplicated form. Such, *e.g.*, are *खटखट*, 'a knocking'; *जलजल*, 'a jingling'; *चट्टाचट्टा* 'a rattle'; *किंकरी*, 'a tinkling girdle'; *सुनसुनाना*, 'to whistle', etc., etc.

II. Of Compound words.

478. Hindí admits of the greatest freedom in the use of compound words, the length and complexity of which form a distinguishing feature of Hindí as compared with Urdú. Urdú, indeed from the side of the Arabic, does not admit of composition of words, and even in its Persian element it cannot compare in this respect with Hindí.

a. Long and complex compounds are for the most part confined to poetry; but short compounds are freely admissible in prose and in conversation. Many idioms, moreover, which cannot be strictly termed compound words, can only be explicated on the principles which regulate the formation of compounds. Thorough familiarity with these principles is absolutely essential to the understanding of Hindí poetry. The constant omission of the postpositions, which otherwise seems quite arbitrary, upon these principles commonly admits of a simple explanation, and the relations of such groups of words are at once easily determined.

479. The various compounds admissible in Hindí, are the same as those which we meet in Sanskrit, and therefore may be classified in the same manner. And we cannot do better in treating this subject, than adopt, for the most part, the classification of Prof. Williams, as given in his Sanskrit Grammar, which will be found much more clear and easy of comprehension than that of the Indian grammarians. We have then five general classes of Compounds; 1st, *Dependent Compounds*, in which the relation of the several words is that which is expressed by the cases of a noun: 2nd, *Copulatives*, in which the relation of the elements is that expressed by a copulative conjunction: 3rd, *Descriptives*, in which an adjective is united with a substantive: 4th, *Numerals*, in which the first element is a numeral: 5th, *Adverbials*, in which the first element is an adverb.

480. *Dependent Compounds* are of six varieties, corresponding to the six cases of nouns by which dependence is expressed.

(1) *Accusatively dependent Compounds* are very common; the second member is a verbal root or noun of agency, to which the first member stands in the relation of an *accusative* case.

The following are examples of *Tadbhavas*: तिलचट्टा, *lit.*, 'oil-licker', 'a cockroach'; कठफोड़ा (काठ + फोड़ा), 'wood-borer', 'a woodpecker'; बिड़ीमार, 'a fowler'; मक्खनचोर, 'butter-stealer' (an epithet of *Krishna*). Similar *Tatsamas* are;—जगतार, 'world-savior'; गुणज्ञाता, 'merit-discerner'; जीवनदाता, 'life-giver'; पतितपावन, 'purifier of the guilty'; आहिकार, 'cry for mercy'; मनोहर, (मनस + हर, § 51,) 'heart-ravishing'.

a. In many such compounds, the verbal root consists of a single letter or compound letter; as, *e.g.*, प, (*Sk.* पा, 'to protect,') in भूप, *lit.*, 'earth-protector', 'a king'; or द, (*Sk.* दा, 'to give,') in सुखद, 'pleasure giving'; or ज्ञ, (*Sk.* ज्ञा, 'to know,') as in सर्वज्ञ, 'all-knowing', etc.

b. Compounds in which गत, 'gone', is the last member, belong to this class; but गत often appears to have lost its specific meaning, and implies mere connexion or proximity, without any suggestion of motion, as in the following from the *Rámáyan*: सुरसरिगत बलि, 'water in the divine river'; करतलगत पुष्प, 'a flower lying in the hand'.

c. The *accusative* member is occasionally last in the compound; as, मर्दनमयन, 'destroyer of *Mayan*'.

(2) *Datively dependent Compounds* are those in which the first word of the two is equivalent to a *dative* case. These are rare; a common illustration is, शरणगत, *lit.*, 'having come for refuge', 'a refugee'.

(3) *Instrumentally dependent Compounds* are those in which the first stands to the second in the relation of the case of the *agent*. The last member of these compounds is always a Sanskrit perf. pass. participle. They are comparatively rare, and are all *Tatsamas*. Most common are those in which कृत, (perf. pass. part. of *Sk.* कृ, 'to do,') is the second member; these are chiefly used in the titles of books: as, तुलसीदासकृत रामायण, 'the *Rámáyan* by *Tulsí Dás*'.

(4) *Ablatively dependent Compounds* are those in which the first word is related to the second as an *ablative* case. Examples are, of *Tadbhavas*;—वैशिनिकाला, 'banishment'; of *Tatsamas*;—मोहजनित, 'born of ignorance'; रत्नजटित, 'inlaid with jewels'; बुद्धिहीन, 'void of wisdom'; पंचकलित, 'composed of the five (*sc.* elements).

Rem. It should be observed that many of the functions of the Sanskrit instrumental case are in Hindi assumed by the ablative; so that many compounds which in Sanskrit would be classed as *instrumentally* dependent must be reckoned *ablatively* dependent in Hindi.

(5) *Genitively dependent* Compounds are those in which the relation of the first member to the second is that of a *genitive* case. These are exceedingly common, both in poetry and in prose. As in other Tadbhava compounds, a long vowel in the first member is commonly shortened, and the laws of *sandhi* are neglected. Examples are, of Tadbhava compounds;—लक्षपति, (लक्ष + पति,) 'a millionaire', *lit.*, 'owner of a *lák*h'; पनचक्की, (पानी + चक्की,) 'a water-mill'; घुड़खाल, 'a stable (for horses)'; of Tatsamas;—जगदीश, 'Lord of the world'; जलखिंडंग, 'water-fowl'; दादुनारि, *lit.*, 'a wood-woman', *i.e.*, 'a puppet'; रामकथा, 'the story of *Rám*'.

a. अर्थे, in the second place in these compounds, may often be rendered, 'because of'; as, भयार्थे, 'because of fear'; स्नेहार्थे, 'because of affection'.

b. These compounds are especially common in titles of persons; as, धर्मावतार, 'Incarnation of virtue'; गोपीनाथ, 'lord of the milk-maids': and also in proper names; as, रामचरन, *lit.*, 'feet of *Rám*'; देवीदास, *lit.*, 'servant of the goddess': also in the titles of books; as, प्रेमसागर, 'Ocean of love'; ब्रजखिलास, 'sport of *Bray*', etc., etc.

c. Under this head come many idiomatic combinations in which a numeral is the last member; as, कालकोटि, *lit.*, 'a death-*kroy*', 'a crore of deaths'; तापत्रय, 'the three penances'; नरसहस्र, 'a thousand men'. Similarly is कामअनेक to be explained in the compound, कामअनेक इति, 'the beauty of countless *Kám Devs*'.

d. राज or राज (राज) occurs as the last member in many such compounds, denoting 'eminence' or 'superiority'; as, *e.g.*, सुनिराज, 'the prince of sages'; तीर्थराज, 'the chief of sacred places'; ऋतुराज, 'the prince of the seasons', *i.e.*, 'the Indian autumn'.

e. In these compounds an adjective occasionally occupies the last place; especially, योग्य (योग), 'worthy', 'fit'; as, व्याह्नयोग्य, 'marriage-able'.

(6) *Locatively dependent* Compounds are those in which the relation of the first word to the second is that of a *locative* case; as, घोड़चढ़, *lit.*, 'horse-mounted', 'a horseman'; स्वर्गवासी, 'dweller in heaven'; आनन्दमग्न, 'immersed in joy'; धनुषाभि, 'bow in hand'. Here we may note

especially a large number of compounds in which ज, 'born', is the second member; as, जलज, *lit.*, 'the water-born', 'the lotus'; द्विज, 'the twice-born', *i.e.*, 'a Brahman'; also others with चर; as, निराचर, *lit.*, 'night-walker', 'a demon'; जलचर, 'aquatic animals'; and a few with ग, 'going'; as, जगग (जगः+ग), 'moving in the atmosphere', 'a bird'.

481. Occasionally the first member of Dependent Compounds is in the plural; as, भक्तवदित्, 'love to worshippers'; दोषमंडल, 'friend of the afflicted'.

482. *Copulative* Compounds include all compounds the relation between whose members might be expressed by a copulative conjunction. Under this general class we may notice, especially,

(1) *Complementary Copulative* Compounds, in which the one member may be regarded as *complementing* or supplementing the other. These are the most common. Examples are;—माताप, 'parents'; अन्नपान, 'food and drink'; *lit.*, grain-water'; रामानुज, 'Rám and (his) younger brother, *i.e.*, *Lakshman*, *lit.*, Rám- after-born'.

a. Words of opposite meaning are often thus coupled; as, कर्मतो जड़तो, 'loss and gain'; चराचर (चर+अचर), *lit.*, 'moveable-immoveable', *i.e.*, 'animate and inanimate'.

b. Under this head also comes the common colloquial idiom in which a word is repeated, either with its initial letter omitted or another substituted, or with a different medial vowel, to denote indefinitely the remainder of a class. The repeated word gives a sense exactly equivalent to the Sanskrit इत्यादि, or '*et cetera*'. Examples are;—ढेरे रेरे, 'tents, etc.', *i.e.*, 'tents with all their appurtenances'; घोड़े घोड़े, 'horses, etc.', as, *e.g.*, 'mules, donkeys, etc.'; कोस कास, '*kos*, etc'.

(2) *Reciprocal Copulative* Compounds are those in which two words of similar or identical meaning, are grouped together with a *reciprocal* force. Often the second word is merely the feminine form of the first. Examples are;—कहा कही, 'altercation'; लाठा लाठी, 'mutual beating'. Sometimes the two members of the compound differ in a radical letter only; as, अड़ोस पड़ोस, 'neighbourhood'; आमने सामने, 'facing one another'.

(3) Many other combinations occur which must be reckoned as copulative compounds; but the second word seems to be added merely for the jingle, and adds nothing to the first. The same varieties

of formation occur in these as have been mentioned under (1) and (2). Examples are;—भला बंसा, 'well (and) sound'; टोन्ना टोई, 'groping'; काना कानी, 'whispering'; खोज खोज, 'search'; चाल चलन, 'walk', 'behaviour'; पूछ पाछ, 'inquiry'.

483. Observe that not only the postpositions, but the substantive inflection, is added only to the last member of a copulative compound; as, भूत प्रेतों को, 'to ghosts and goblins'; लखनरामसीतादि, 'to *Lakshman, Rám and Sítá*. Similar is the relation of the first two nouns in the following phrase from the *Prem Ságar*: सब लगे पगड़ी फेंटे मिलाय मिलाय . . . उसे काढ़ने, 'all began, tying turbans and waistbands together, to pull at it'; so also in the *Rámáyan*; हटिअविवेकहि भजई, 'he praises obstinacy and stupidity'.

a. In the same way various suffixes, as वाला, मय, etc., are sometimes attached to the last of a number of nouns, which are then to be regarded as forming a copulative compound; as, छह तीन सूर नौ पाग इह कर वाला, 'that three-headed, nine-footed, six-handed creature'; सिधाराममय सब जग जानी, 'regarding the whole world as pervaded by *Sítá* and *Rám*'; जइचेतनगुनदोषमय विस्व कीन्ह करतार, 'the creator (has) made the world to consist (both of) the animate (and) the inanimate, (of) virtue (and) of vice'.

484. *Descriptive Compounds* are those in which an adjective or a word used adjectively, is compounded with a substantive. In these the one member of the compound is predicated of the other. Examples are;—भलमानुस (भला + मनुष्य), 'courteous'; कनकटा, 'ear-split', 'an ascetic with split ears'. Here come all compounds in which महा, (for महत्, 'great,') occupies the first place; as, महापाप, 'great sin'; महाराज, 'great king'. Other illustrations are;—अल्पबल, ('having) little strength'; परमेश्वर. (परम + ईश्वर), 'the supreme God'; मध्यलोक, 'the middle world', i.e., 'the earth'; बहुमूल्य, 'of much value', 'precious'.

a. Under this head fall compounds, common in poetry, in which छर or चर्य, 'excellent', follows a substantive as the second member of the compound; as, मुनिचर्य, 'noble sage'; स्त्रीचर, 'excellent woman'. The qualifying member also takes the second place in मनमलीन, 'mind defiled', 'unholy'; and regularly in compounds implying *comparison*; as, सरोरुहस्याम, 'dark as the lotus flower'.

b. Sometimes an inseparable prefix takes the place of the adjective; especially, कु, (also क, का, कद् or कव,) 'bad'; as in कुसपना, 'a bad

dream'; कापूत, 'a bad son'; also सु (Greek, *eu*), 'well', 'good'; as in सुसंगति, 'good society'; also दुः (दुष्. दुस्), (Greek, *dus*), 'bad'; as, दुर्वचन, 'abuse'; दुष्कर्म, 'crime'; दुस्तर, *lit.*, 'difficult to cross'. सु has sometimes an intensive force; as in सुदूरि, 'a great distance'.

Rem. Regularly, these prefixes can only be joined with Sanskrit words; but in poetry this rule is not always observed. Thus we have in the *Rāmāyaṇ*, सुसाहेब, 'the good master', and even, सुचारिभ भाई, 'the noble four brothers'. I have also noted, in poetry, सुखोरिके, (सु + खोलके,) 'well-opening'.

c. A noun may supply the place of the adjective; as, राजहंस, *lit.*, 'the king-goose, the flamingo'. So explain such idioms as the following;—मथुरापुरी का आहुक नाम राजा, 'a king of *Mathurá* named *Ahuk*'; where आहुक नाम is a descriptive compound, in which the proper name, आहुक, takes the place of the adjective. These might be termed *appositional* compounds.

d. Similar is the use of आदि as the second member of compounds; as in ब्रह्मादि, *lit.*, '*Brahmá*, the beginning'; *i.e.*, '*Brahmá* and the other gods, beginning with *Brahmá*'; सुधादि अन्न, 'nectar and other kinds of food'.

e. Sometimes a Sanskrit and a Persian word meaning the same thing are coupled together, as in तन अदन, 'the body'.

485. *Numeral Compounds* are those in which the first member is a numeral; as, त्रिलोक, 'the three worlds'; सहस्रमुख, 'thousand-mouthed'; चतुष्पथ, 'a place where four roads meet'; पंचप्राय, 'the five vital airs'; शतवर्ष, 'a century'.

486. *Adverbial Compounds* are those in which the first member is an inseparable adverb or preposition; as, *e.g.*, compounds with यथा: as, यथाविधि, 'according to rule'; यथोक्त, (यथा + उक्त), 'as spoken', 'true': compounds with सह्, abbreviated to स; as, सटीका, 'with commentary'; सान्न, 'with (his) younger brother'; and many others: as, प्रतिदिन, 'every day'; अधिकृत, 'a superintendent'.

a. Here also may be noted compounds with the negative prefix, अन् (Greek, *alpha* privative). In pure Sanskrit words, अन् becomes अ before consonants, but in Hindi words of modern formation, अन् is used before both vowels and consonants. Examples are, of Sanskrit words;—अनन्त (अन् + अन्त), 'without end'; अप्रिय, (अन् + प्रिय), 'unlovable'; अनोश, *lit.*, 'not-God', *i.e.*, 'created existence'; अदेय, (अन् + देय, *Sk. fut.*

pass. part.) 'not to be given'. Modern Hindi compounds are;—अज्ञान, (अन् + ज्ञान,) 'unknown'; अनगिनत, 'uncounted'; अनमल, 'ill-fortune'; अनइस, *lit.*, 'not so', 'other-like'. It is even compounded with a perf. part.; as in अनभयुत, in the following : जागउ नृप अनभयुत विहाना, 'the king awaked ere it was morning'; *lit.*, 'morning not having been'. (*Rám. B.*)

b. Under this head also include परस्पर, 'mutual', from पर, 'other', reduplicated with a euphonic स.

487. Many of the above compounds are adjectives, and yield no complete sense in themselves. Many others, although substantives, may also be used in an adjective sense; in which case the adjective termination ई, is often added; as, मृगनैनी, 'gazelle-eyed'; पिकवैनी, 'having a voice like the cuckoo'. But this ई is often omitted, and the compound is used in its original form; as, मेघवरण, 'cloud-colored'; नररूप, 'having the form of a man'.

Rem. These compounds used thus adjectively are constantly met with in poetry, as the predicates of an implied relative clause; of which the copula, usually, and almost always the relative also, is unexpressed. Examples of this construction will be found on almost every page of the *Rámáyana*.

a. The word रूप, 'form', at the end of compounds, often has the sense of 'of', 'consisting of'; as, मोहरूपी सागर, 'sea of error'. But sometimes it may be rendered literally; as, नररूपहरि, '*Hari* in the form of man'.

488. Anomalous compounds are formed with मात्र and अन्तर; as, कखि मात्र, 'mere bone'; देशान्तर, 'another country'. पूर्व or पूर्वक is added to nouns to form compounds denoting 'manner'; as, बुद्धिपूर्वक अवन, 'words with wisdom'; स्नेहपूर्वक, 'loving', 'kindly'.

489. Compound words are themselves often compounded with other words or with other compounds, thus forming *Complex Compounds*. Examples are;—षट्प्रसभोजन, 'food of six flavors'; a descriptive, involving a numeral compound; नभजलधलबासी, 'dwellers in air, on earth, and in water'; a locative compound, involving a copulative of three members; भानुकरवारि, *lit.*, 'sunbeams-water', *i.e.*, 'the mirage'; नानायुधधर, (नाना + आयुध + धर), 'bearing various weapons'; an acc. dep. comp., used descriptively, in which the acc. member, नानायुध, is itself a descriptive compound. In the *Prem Ságar*, we have the anomalous *quasi* compound, मोह औ चिन्तारूपी, for मोहचिन्तारूपी.

a. In the *Rámáyan* and other poetry, we find complex compounds of great length; as, **जनमनमंजुमुकुरमलहरनी**, 'cleanser of the filth from the beautiful mirror of the human soul'; an accusatively dependent, involving four genitively dependents and a descriptive; **नखादशनशैल महाद्रमायुध**, 'having (their) nails and teeth, rocks and great trees as weapons'.

Rem. Such long compounds are often explicable by beginning with the last member, and proceeding regularly to the first. They are in imitation of Sanskrit idiom and are not admissible in prose, where the postpositions are commonly preferred even for short phrases. Still, in prose, compounds of simple form are preferred, when the two ideas are conceived of as one compound whole; as, **प्रभुभक्त**, 'worshipper of the Lord'; **ऊषाहरण की कथा**, 'the story of the rape of *Ushá*'; **चित्तद्वी**, 'one who has subdued the senses'.

490. As remarked §480(5) the laws of *sandhi* are always neglected in all Tadbhava compounds, and very often, in compounds formed with Tatsamas also. Thus, e.g., we find, **हरिदृष्ट्या**, 'the will of *Hari*', for **हरीदृष्ट्या**; **हिमउपल**, 'hail-stones', for **हिमोपल**; **भयआतुर**, 'distracted with fear', for **भयातुर**, etc., etc.

491. In poetry, the parts of compounds are often inverted; as, e.g., **युतविवेक**, *lit.*, 'joined with judgment', i.e., 'discreet', for *Sk.* **विवेकयुक्त**; **हीनमणि**, 'deprived of the jewel', for **मणिहीन**; **मर्दनमयन**, 'destroyer of *Mayan*', for **मयनमर्दन**; **दिनप्रति**, 'every day', for **प्रतिदिन**; **विमोक्तविवेक**, 'deprived of judgment'.

492. Before leaving this subject it is important to observe that a large number of Sanskrit words used in Hindí, are compounds formed with various prepositions.

The following list contains the most important:—

- (1) **अति**, 'beyond'; as in **आत्यन्त**, *lit.*, 'beyond end', 'infinite'.
- (2) **अधि**, 'above', 'over'; as in **अधिपति**, 'a ruler'.
- (3) **अनु**, 'after'; as in **अनुज**, *lit.*, 'after-born', 'younger'; also with nouns, as in **अनुदिन**, 'daily'.
- (4) **अन्तर**, 'within'; as in **अन्तःकरण**, 'the internal sense', 'the heart'.
- (5) **अप**, 'away',—usually implies detraction; as in **अपवाद**, 'blame'.
- (6) **अभि**, 'to', 'towards'; as in **अभिमत्त**, 'desired', 'chosen'.
- (7) **अव**, 'down',—often implies disparagement; as, **अवगाह**, 'bathing', **अवगुण** (also **औगुण**), the opposite of **गुण**, 'vice', 'demerit'.
- (8) **आ**, 'to', 'towards'; as in **आदर्शक**, 'a mirror'. With the derivatives of **गम्**, (and also **या** and **ह**), 'to go', **आ** reverses their meaning; as in **आगमन**, 'coming', contrasted with **गमन**, 'going'; so in the verb **आना**, 'to come', from (**आ + ह**).

(9) उद्. (उत्. उच्. etc.) 'up'; as in उत्पन्न. 'born'; उत्तरण, 'pronunciation'; so also in उठना (*Sk. उत् + स्था*) *lit.*, 'to stand up', 'to rise'.

(10) उप, 'to', 'down', 'under'; as in उपस्थित, 'prepared', *lit.*, 'stood under'. It often gives a depreciative sense; as in उपहास, 'ridicule', from हस, 'to laugh'.

(11) नि, 'down', (in contrast with उत्,) as in निगमन, 'the conclusion (in Logic)'; निग्रह, 'subduing'.

(12) निर (निस, नि, etc.) 'out', commonly has the effect of a negative; as in निष्कलंक, 'without blame'; निर्दोष, 'without fault'.

(13) परि, 'around'; as in परिचारक, 'an attendant', *lit.*, 'a walker around'. It often has merely an intensive force; as in परिपूरण, 'completely filled'.

(14) प्र, 'before',—hence often indicates superiority; thus, प्रधान, 'chief'; प्रयत्न, 'effort', etc. Often its force is scarcely appreciable; as in प्राप्त (प्र + आप्), 'obtained'.

(15) प्रति, 'against', 'towards', 'back again'; as in प्रतिवादी, 'a respondent'; प्रतिकूल, 'recompense'.

(16) वि, 'apart', often denotes 'negation', 'separation', 'distinction', etc; as in वियोग, 'separation'; विवेक, 'discrimination'; व्यर्थ (वि + अर्थ), 'profitless', 'vain'.

(17) सस्, 'with', (opposed to वि); as in संयोग, 'conjunction'; संग्राम, 'fighting', 'war'. But often its force is imperceptible.

a. Two or three Persian and Arabic inseparable prepositions and other words are also compounded with nouns in Hindi. Most common are the negative particles *बे* and *गैर* (غير); as in बेकाम, 'without work'; गैर हाजिर, 'not present'.

CHAPTER X.

ADVERBS, PREPOSITIONS, CONJUNCTIONS

AND INTERJECTIONS.

I. *Adverbs.*

493. The tables on the next two pages exhibit a series of adverbs formed from the five pronominal elements noted at *p.* 109.

494. (1) Of the temporal adverbs, all which contain a labial vowel or consonant, have arisen from the combination of the Sanskrit noun, *veld* (H. *ber*), 'time', with one of the pronominal elements. The forms containing *d*, are connected with the Sanskrit series formed with the suffix *dā*, as given in the table.

TABLE XVIII: PRONOMINAL ADVERBS.

PRONOM. BASE.	Prox. Dem.	Rem. Demonstr.	Relative.	Correlative.	Interrog.	
	अ, इ, ई, ए, य.	उ, ऊ, ओ, ए.	ज, जि, (य).	त, ति.	क, कि.	
TIME.	H.H	अब, 'now'.	<i>Wanting.</i>	जब, 'when'.	तब, 'then'.	कब, 'when'.
	B.	अबे, अबे.*	„	जबे, जो, जव.	तबे, तौ, तव.	कबे, कव.
	M.	„ अभी.	„	जव, जवे, जवी.	<i>Relat. used.</i>	कव, कवे, कवी.
	Me.	„ „	„	जदू, जदां, जव्यां	„ „	कदू, कदां, कव्यां.
	Bh.	खेबर.	„	जेखेर.	तेखेर.	केखेर.
	Sk.	<i>Wanting.</i>	„	यदा.	तदा.	कदा.
PLACE.	H.H	यहाँ, 'here'.	वहाँ, 'there'.	जहाँ, 'where'.	तहाँ, 'there'.	कहाँ, 'where'.
	B.	(इत, इतै, ईतै. यहाँ, यां.)	उत. उहाँ, उां. †	जित.	तित.	कित, कत.
	M.	अटे, अठी, ईंटे	उटे, उठी, उंटे.	जटे, जठी.	<i>Relat. used.</i>	(कटे, कठी. केटे, कोटे.
	Me.	(काटे, काठी. काटे, काठी.)	(कटे, कठी, कवे, कवी. काटे, काठी.)	(जटे, जठी. जाटे, जाठी.)	„ „	(कटे, कठी. काटे, काठी.)
	O.P.	इहाँ, ईहाँ.	उहाँ, उहाँ.	(जई, जेहाँ, जइयां जइया.	(तई, तइउं, तइ- वां, तइया.	कई.
	Do.	(रठियां, रठियन रिहयां, ईयां.)	(ओठियां, ओठियन. हुयां.)	जेठियां, जेठियन.	तेठियां, तेठियन.	केठियां, केठियन
	R.	इइंवां. ‡	उइंवां.	जइंवां.	तइंवां.	कइंवां.
	Bh.	इठां, इठाईं.	उठां, उठाईं.	जेठां, जेठाईं.	तेठां, तेठाईं.	केठां, केठाईं.
	T.	यइंवां, येईंठान.	उइंवां, ओईंठान.	„ जेईंठान.	„ तेईंठान.	„ केईंठान.
	Bún.	इतै, यां, याजी.	उतै, उां, उाजी.	(जितै, ज्यां, ज्याजी.)	तितै, त्यां, त्या- [जो.]	कितै, कयां, कयाजी
	Sk.	अत्र, इह. ¶	<i>Wanting.</i>	यत्र.	तत्र.	कुत्र.

* Also, in the Saháranpúr district, योज. † *Kumdoní* completes the series after the same analogy, thus; उां, तां, कां. ‡ *Bhojpúr* uses the same series, only omitting the first nasal. || The अ in this series is very peculiar, but my Pundit insists upon it. ¶ In Hindi, ईह, also, occurs, but is probably connected rather with यहाँ, etc.

TABLE XVIII, *Concluded*: PRONOMINAL ADVERBS.

PRONOM. BASE.	<i>Prox. Dem.</i>	<i>Rem. Dem.</i>	<i>Relative.</i>	<i>Correlative.</i>	<i>Interrog.</i>	
	इ, ई, ए, य.	उ, ऊ, ओ, व.	ज, जि, (य.)	त, ति.	क, कि.	
DIRECTION.	<i>H.H.</i>	इधर, इवर, अधर. 'hither'.	उधर, उवर, 'thither'.	जिधर, 'whi- thier'.	तिधर, 'thi- ther'.	किधर, 'whi- ther?'.
	<i>Me.</i>	कौथैदखै.
	<i>R.</i>	रही कौत.*	ओही कौत.	जेई कौत.	तेई कौत.	कोई कौत.
	<i>Bh.</i>	रन्धर, रने.†	उन्धर, उने.†	जेन्धर, जेने.	तेन्धर, तेने.	कोन्धर, कोने.
MANNER.	<i>H.H.</i>	सूँ, 'thus'.	<i>Wanting.</i>	सूँ, 'as'.	सूँ, 'so'.	कूँ, 'how?'.
	<i>B.</i>	यौं, यो.	वौं, वो, वूँ.	ज्यौ, ज्यो, जौ, जौ, जूँ, जिय.	त्यौ, त्यो, तौ, तौ.	क्यौ, क्यो.
	<i>M.</i>	कं, ककं.	कूँ.	जिकं.	<i>Relat. used.</i>	किकं.
	<i>Me.</i>	रंकर, रंगा.	वीकर, वोंगा.	जीकर, जीगा.	,, ,,	कीकर, कीगा.
	<i>O.P.</i>	रिमि.	<i>Wanting.</i>	जिमि.	तिमि.	किमि.
	<i>Sk.</i>	रत्थस्.	,,	यथा.	तथा.	कथस्.

* Also कथित and कौती : मुंह is also employed for कौत. † Dr. Fallon gives the following additional variants of इधर, viz. : in the east, रट्टे, रहर, रने, रने, रन्धर, इन्धर, रहार, हेमर ; in the west, रंवे and रंमार्हे : and also the following similar variants of उधर ; in the east, अट्टे, ओहर, ओने, उने, उन्धर, ओहार, हुमर ; and, in the west, उन्ने or ऊन्ने. Analogous forms probably exist for the other adverbs of this series.

(2) Of the adverbs of place, all containing *t* are to be connected with the Sanskrit series in *tra*. All the other forms, in *hān*, *the*, *ḍai*, etc., as will be evident from comparison, have arisen by common phonetic processes from the combination of the pronominal elements with the Sk. loc. sing. *sthāne*, from *sthāna*, 'place'.

(3) The adverbs of manner, in the first three dialects noted, are to be connected with an old series in *tham*, of which Sanskrit has preserved only *ittham*, 'so', and *katham*, 'how'. The *y* which appears in the relative, correlative and interrogative adverb, presupposes a weakening of the *a* of the pronominal base to *i*, giving, e.g., *ki* for *ka*, and thus, *kitham*. The remaining processes are evident. The Mewāri suffixes, *kar* and *gā*, I would derive from the Sanskrit verbal roots, *krī*, 'to do', and *gam*, 'to go'.

495. The emphatic suffix, *ही* or *ई*, may be added to any of the adverbs in the table. But *ई* is commonly substituted for the final *आ* of the series in *ही*.

Examples are;—*अभी* (अबही), 'immediately'; *तभी* (तबही), 'just then'; *कभी* (कबही), 'ever'; *यहीं*, (rarely, *यहाँ ही*), 'just here'; *कहीं*, 'anywhere', 'somewhere'; *यूँहीं*, 'just as'.

a. The dialects similarly add *हू*, *ऊ*, or *हुँ*; as, e.g., *Br.* अबहू = अभी; कहूँ = कहीं; क्यौँहूँ = क्यूँहीं; कधी, and in the *Rāmāyaṇ*, काऊ = कभी and कतहुँ = कहीं; *Ar.* चौहू = अबही, etc., etc.

496. Inasmuch as these adverbs are virtually substantives, they may be followed by postpositions, thereby expressing yet other variations of the adverbial idea.

Examples are;—with *से*, 'from': अब से, 'henceforth'; अब से, 'since'; कब से, 'since when?'; यहाँ से, 'hence'; वहाँ से, 'thence'; कहाँ से, 'whence?'; with *को*: कहाँ को, 'to what place?'; with *का*: अब का, 'of the present time'; कहाँ का, 'of what place?'; with *तक*, or *तलक*, *सौ*, etc.: अब तक, 'till now'; अब तक, 'till when', 'as long as'; तब तक, 'so long'; कब तक, 'how long?'; यहाँ तक, 'as far as this', 'to this degree'; तहाँ तक, 'thus far'; कहाँ तक, 'how far?'

a. These postpositions may also be added to some of the intensive forms; as, अभी से, 'from this very time'; यहीं का, 'of this very place'; कहीं से, 'from some place', etc.

497. Various other modifications of the radical meaning of these adverbs, are expressed by their repetition and combination.

(1) Some of them may be repeated to express *universality, distribution, or indefinite repetition*; as, **जब जब**, 'whenever', followed by **तब तब** in the correlative clause; **जहाँ जहाँ**, 'wherever', regularly followed by **तहाँ तहाँ**; **कभी कभी**, 'sometimes'; **कहीं कहीं**, 'in some few places'.

(2) The relative may be combined with the corresponding indefinite adverb to express *indefiniteness*; as, **जब कभी**, 'whenever'; **जहाँ कहीं**, 'wherever'.

(3) Or the negative particle, **न**, may be interposed between two cognate adverbs to express a certain sort of indefiniteness; as, **जब न तब**, 'now and then'; **कभी न कभी**, 'at some time or other'; **कहीं न कहीं**, 'somewhere or other'.

498. For the pronominal adverbs of manner, **यूं**, etc., the oblique forms of the pronominal series, **सेना**, etc., (Table XI,) are often employed.

a. The Sanskrit **इत्थम्**, = **यूं**, 'so', occurs in poetry in Sanskrit phrases, chiefly in the formula, **इत्थम्स्तु**, 'let it be so'.

b. The 3rd sing. cont. fut. **चाहे**, of **चाहना**, 'to wish', before pronominal adjectives is equivalent to an indefinite adverb; as, **चाहे कितना बड़ा हो**, 'howsoever great it be'.

499. Besides the above pronominal adverbs, are many others of various derivations. Very many of these, indeed, are, in fact, old locative cases of nouns. The following lists will be found to comprehend the most common.

(1) Adverbs of *Time*: as, **आगे**, (Sk. अग्रे) 'before'; *Dial.* **आगारे**, **आगाव**, **आगू**, **आगी**, **अगु**; **आज**, (Sk. अद्य) 'to-day'; *Dial.* **अज**, **अजु**, **आजु**, **अज्जवा**; **कल**, (Sk. कल्प्य) 'yesterday', 'to-morrow'; *Dial.* **काल**, **कालि**, **कालिह** (W. forms); **तड़के**, 'at dawn', 'early'; **तुरन्त**, **तुरत**, (Sk. pres. part. from **तुट्**) 'immediately'; **तिसैं**, (Sk. त्रि + श्वस्) 'three days ago', or 'three days hence'; *Dial.* **अतारसैं**, **तारसैं**, **तरी**, **तरी**; **नरसैं**, (Sk. ? + श्वस्) 'four days ago', or 'four days hence'; *Dial.* **नरसैं**, **नरी**, **नरी**; **परसैं**, (Sk. परश्वस्) 'the day before yesterday', or 'the day after to-morrow'; *Dial.* **परसैं**, **परी**, **परी**; **निदान**, (Sk. नि + दा) 'at last'; **नित**, **नित्य**, (Sk. नित्यम्) 'constantly'; **पीछे**, (Sk. पश्चे) 'after', 'afterwards'; *Dial.* **पीछू**, **पिछाव**, **पिछारे**, **पिछाड़ी**, **पाछे**, **पाछे**, **पाछू**; **फिर** or **फेर**, 'again'; *Dial.* **अहोरि**, **अहुरि**, * **अहुरी**, also

* This is really a conjunctive participle, from **अहोरना** or **अहुरना**, 'to return'.

पुनः, पुनि, (Sk. पुनइ); भोर, 'at break of day'; बारंबार, (Sk. बारंबार,) 'repeatedly'; सवेरे, (Sk. स+वेलायास्, fem. gen. sing.,) 'early', 'betimes'.

a. The following are dialectic; अजौ, 'hitherto'; सकारे, (Sk. स+काले.) 'early'.

b. Of the pure Sanskrit words denoting time, which are used adverbially in Hindi, the following are among the most common, viz. ; certain compounds with the affix दा, as, एकदा, 'once'; सदा, सर्वदा, 'always'; and, with the suffixes चित् and अपि, कदाचित् and कदापि, 'sometimes', also 'perhaps'; तत्काल, तत्काल, 'instantly'.

(2) Adverbs of Place: अन्यत्र, (Sk. अन्यत्र,) 'elsewhere'; निकट, (Sk. नि+कट,) and नेरे. Dial. नेरौ and नेब, 'near'; पार, (Sk. पारे,) 'over', 'across'; पास, 'near', Dial. पस्यौ and पाहि; and reduplicated, पास पास, 'on both sides', 'all around'; परे, (Sk. पारे.) 'on that side'; दरे, (Sk. अदारे,) 'on that side'; वारापार, वारपार, 'on both sides'; बाहिर, (Sk. बाहिस्,) 'without'; भीतर, (Sk. अभ्यन्तस्,) 'within'. आगे, 'before', and पीछे, 'behind', are also used as adverbs of place.

a. The following Sanskrit adverbs occur, formed with the suffix त्र, viz. ; अन्यत्र, 'elsewhere'; एकत्र, 'in one place'; सर्वत्र, 'everywhere'.

(3) Adverbs of Manner: अचानक, 'suddenly'; जानो, (imp. 2nd plur. of जानना,) 'so to speak', 'as it were'; Br. जानौ, जानहु; in Rām., अनु, जानिजी; ऋट्, (Sk. ऋटति,) Dial. छट; also, ऋट पट (पट Sk. past. act. part. पट् ?,) 'quickly'; ठीक, reduplicated intensive form, ठीक ठीक, (Sk. root, खा,) 'exactly'; दैवी, (Sk. दैव, 'fate'.) 'perchance'; धीरे, (Sk. root धृ,) 'slowly'; निपट, (Sk. नि+पट् ?,) 'very'; पैदल, (Sk. पद,) 'on foot'; बहुत, (Sk. बहु.) 'much', 'very', (for Dial. forms, vide § 255); बेग, (Sk. वेग,) 'quickly', Dial. बेगि; मानो, (imp. 2nd plur. of मानना,) 'as', 'so to speak', Dial. मानौ, मानहु, मानु; लगातार, (Sk. लग्.) 'incessantly'; सच, (Sk. सत्य,) 'truly', intensive form, सचमुच; सेंत, 'freely', 'gratis'; intensive form, सेंतमेंत, Dial. सेंति; हौले, 'gently'; Dial. हौरे.

a. The following are dialectic: G. पबडो or पाबडो, 'quickly', and मुचाटे, 'slowly'; सुठि, (Sk. सुष्ठु.) 'very', 'extremely'; and in the Rāmāyan, बर, (Sk. वरस्,) 'rather'.

b. The conjunctive participle करि, of करना, 'to do', is often used adverbially, for 'as'; thus, निज जन्म सुफल करि लेखौ, 'I will count my birth as having borne good fruit'. Similar is the use of the Braj form, कै; thus, मानुष कृष्ण देव कै माने, 'they regard the man Krishna as a god'.

c. The following Sanskrit words are commonly used as adverbs of

manner: अकस्मात्, 'suddenly'; अति, 'very'; अत्यन्त, 'infinitely'; अधिक्, 'more'; अर्थात्. (abl. sing.,) 'id est'; आनन्द, (for Sk. instr. sing. आनन्देन,) 'well', 'happily'; केवल. 'only'; निरन्तर, 'incessantly'; परस्पर, 'mutually'; (§ 486, b,) यथा, 'as'; तथा, 'so'; व्यथा, 'in vain'; शीघ्र. 'quickly'; सहज, *lit.*, 'born with', hence, 'naturally', 'easily'; सत्य, 'truly'. Sanskrit adverbs formed with the suffix घा, denoting 'distribution', 'kind', occasionally occur, as, in the *Rámáyan*, नवघा, 'of nine kinds.

c. Here may be noted the Sanskrit particle इव, 'like', which approximates the nature of an affix, and always follows the word to which it refers; as, हरिजन इव, 'like the servants of *Hari*'.

(4) Adverbs of Affirmation and Negation. The common affirmative adverb is हाँ, 'yes'; *Bún.* हाँ and होँ; east of Búndelkhand, often तौ. सही, 'truly', is also very common in affirmation. The negative adverbs, are न, नहीं and मत, 'no', 'not'. Of these, मत is regularly used with the imperative only; नहीं, never with the imperative; न, with any part of the verb.

a. Dialectic variations are;—for नहीं, *Br.* नाहिँ, नाहि, नाँही, नाहि, नाही; in the *Rám.*, नाहि, नाहिँ; modern eastern form, नाहिन, pronounced *náhina*. Other variations are, नही, नाह and नाह.* For मत, Kanaují has मति and मती. But in eastern Hindí, जिन is always used for मत, and, like that, with the imperative only. Variants of जिन, are जनि and जिनु.

b. तौ, 'indeed', *Dial.* तौ, तउ or तऊ, is common. In the *Rámáyan*, छौँ, is occasionally used with a similar force, usually with अह; as, अजधौँ; or sometimes कि precedes; as, किधौँ or कीधौँ.

c. Various Sanskrit nouns and adjectives are also used in affirmations; as, अवश्य, 'certainly', *Rám.*, अवसि; निःसंदेह, 'without doubt'; निश्चय, 'assuredly'; *Dial.* निहचे, निहचे, निहचैँ, *etc.*

500. Here may be also noted the occasional use of the particles अद्य, 'now', and इति, 'thus'. In Hindí prose these are never used except at the beginning and the end of narratives. Thus, at the beginning of the *Prem Ságar*, we have अद्य कथा आरंभ, 'now the beginning of the story'; and at the end of each chapter, we find the particle इति, which is scarcely capable of translation, but is similar in force to the marks of quotation in English. In Sanskrit, इति was always written at the end of a citation; and traces of this usage are found in Hindí poetry. Thus, in the *Rámáyan*, महिमा निगम नेति कहि गार्ह; where नेति is, by *sandhi*, for न इति, and we may literally translate, 'Holy writ,

* For the derivation of these forms, *vide* § 372.

saying No, has sung his greatness'; इति after न simply marks the negative as the word, not of the writer, but of 'Holy writ.*' So also, in prose, इति, as the first member of the compound इत्यादि, refers to the noun or nouns immediately preceding; as, ब्राह्मण महेश इत्यादि, 'Brahmá, Mahesh, etc'.

501. The following Persian and Arabic words occur now and then as adverbs in modern Hindí:—(1) *Pers.* जल्द or जल्दी, 'quickly'; बारहा, (plur. of بار, time'), 'often'; शायद, 'perhaps', *vulg.*, सायद and सादद; हमेशा (همیشه) 'always', *vulg.*, हमेश and हमेश: (2) *Arab.* बख़्तता. (البطلة) 'certainly', 'indeed', *vulg.* बख़्तत; खास कर (خاص کر), 'especially'; फकत (فقط), 'only'; बिलकुल (بالكل), 'altogether'; याने, (يعني), 'namely', 'that is to say'.

502. Some adverbs and nouns compounded form useful adverbial phrases; examples are;—दौर कहीं, 'elsewhere'; कभी नहीं, 'never'; धीरे धीरे, 'slowly', 'easily'; नहीं तो, 'else', *i.e.*, '(if) not, then'. For नहीं तो, we find in the *Rámáyán*, नाहिंत्त, नतु, नत and नतर; किन also occurs, for कौ नहीं, 'how not?'

503. Many adjectives, especially such as denote quantity or quality, are used as adverbs; as, अच्छा and भला, 'well', ('good'); थोड़ा, 'a little'; बड़ा, ('great,') 'very'.

504. Conjunctive participles are very often equivalent to English adverbs; as, जानके, 'knowingly'; मिलके, 'together'; etc. Here we may also note the use of करके, conj. part. of करना, with nouns, adjectives and numerals, forming adverbial phrases; as, परिश्रम करके, 'laboriously'; मुख्य करके, 'chiefly'; एक एक करके, 'singly'; नीचे मुंह करके, 'with face downwards'. Further illustrations will be found in the Syntax.

505. Finally, we may here notice the particle ही, which may be placed after any word to render it emphatic. It may sometimes be rendered by 'just', 'very', or some similar word; often, however, its force can only be expressed by a stress of the voice.

a. After the pronouns यह and वह, and often after जो and सो, ही becomes वै, and is written as a part of the pronoun; thus, यही, 'this very'; वही, 'that very', etc. For its usage with pronominal plurals, see §202.

*The meaning of the passage is, that the *Ved*, while attempting to set forth the greatness of *Rám*, declares that it had not yet done so; *i.e.*, that his greatness was ineffable.

Examples are ;—में यह कहता ही था, 'I was in the very act of saying this'; दोही आर. 'just two came'; मेरे एक ही घोड़ा है, 'I have only one horse'; उस ने यही बात कही, 'he said this very thing'.

b. For ही or ई, Braj also has हू or ऊ. The final ई or ऊ is often shortened, and *Anusár* is occasionally added. In one instance in the *Rámáyana* (*Utt. K.*) उ is hardened to ञ; thus, जो मन हूँ न समार्ई, 'that which the very mind contains not'. In colloquial *Márwárí*, इज and ञ are used instead of ही; thus, मूँज, =मेंही; वीँज कीघो, =उसी ने किया; ओज हो, =वही था, etc., etc.

PREPOSITIONS.

506. With the exception of those particles, more precisely termed *postpositions*, which are employed in substantive declension to denote the several cases of nouns, and a very few other words, Hindí possesses no words of a strictly prepositional character. The words which, for the sake of convenience, are enumerated below, as the equivalents of the English prepositions, are really substantives in the obl. sing. Many of them as, *e.g.*, पीछे, साम्हने, etc., actually occur in the nom. sing., पीछा, साम्हना. etc.; and when in the obl. sing., they not unfrequently are themselves followed by postpositions, as में, पर, etc. In virtue of this their substantive character, they require the noun they modify to be in the inflected genitive. Nearly all are masculine, and therefore require the preceding genitive in के. The few feminines are noted in the list, and of course inflect a preceding का to की. Many words which have been enumerated as adverbs, are also used as prepositions and will therefore be found in the following lists.

507. The following take the noun either with or without the postpositions. In the latter case the noun must take the oblique form :—

तले, (*Sk.* तल,) 'beneath', *Br.* तर. तरे; पार, 'across'; पास, in *Rám.* पसं, पाहि, पाहिं, 'near', 'to'; पीछे, *Már.* पाछो, 'behind', 'after'; जिन or जिना,

(*Sk.* विना,) *Br.* लिनू, विनू; बीच, (*Sk.* and *W. Hindí,* विच,) 'between', 'among'; लमि, (*Sk.* लमित्वा,) *Br.* लामि, 'for the sake of'; संग, (*Sk.* सम्, 'with', + गम्, 'to go'), 'with'; समेत, 'together with'. सहित, 'with', properly a Sanskrit adjective, is used as the last member of a compound, as, प्रेम सहित, 'with love'; but it also appears as a postposition, as, गाड़ियों सहित, 'with the carriages'.

a. पास is also used as a noun; e.g., in the *Rámáyana*, देवारसु चारिसु पासा, 'adorn (her) on every side'.

508. The following commonly require the preceding noun to take the genitive postposition, *viz.* :—

आगे, 'before'; आस पास, 'around', 'on both sides'; ऊपर, (*Sk.* उपरि,) *Már.* ऊपरै, (§ 144,) 'over', 'above'; डिगा, (*Sk.* दिक्,) 'towards'; द्वारा, (*Sk.* द्वार, 'a door'), 'through', 'by means of'; निकट, 'near'; नीचे, (*Sk.* नीच,) *Br.* नीचू, 'under'. (The Garhwáli form, निस्वो, inflects the preceding substantive as a true postposition; as, हें ठाला निस्वो, 'under this tree'.) नेरे, 'near'; पलटे, संतो, 'instead of'; बाहर or बाहिर, 'without'; भीतर, 'within'; मारे. (perf. part. of मारना,) 'in consequence of', 'because of'; लिये, (perf. part. of लेना,) 'for', *K.* लये, लये, लर, *Bhug.* लाने, लिंगा. *T.* लैल. लेल; साथ, 'with'; साम्हने, 'in front of', *Br.* साम्ही, साम्बू, समुहें, सोहे. सोही, *Már.* हामो. नाहें, 'like', requires the preceding genitive to take the fem. form.

a. समान, 'equal to', 'like', commonly requires the genitive with को; but I have noted an instance in which it is made to agree in gender with the noun to which it refers; thus, स्त्री माता की समान, 'a woman like a mother'.

509. Dialectic are the following :—*K.* etc., कने, 'to', 'near', = *H. H.* पास; this often takes the preceding noun in the oblique form without a postposition; सुधा, (*Sk.* सहस्रम्.) 'with'; in the *Rám.*, सरिस, (*Sk.* सदृश,) 'like'; काजे, काजे, = कारब, 'for', 'by reason of'; भायें, 'for', 'in consideration of'; in eastern Hindí, वरे, = लिये, 'for'; *Már.* बेठो, 'below'.

510. It is to be noted that in Rájputáná, these words which in High Hindí are used with the gen. as postpositions, are often construed as predicative adjectives, and made to agree with the subject of the sentence in gender and number. Thus, ऊ म्हां पाछो बैठ्यो है, = *H. H.* वह मेरे पीछे बैठा है, 'he is seated behind me'; but, वा म्हां पाछो बैठी है, 'she is seated behind me', where standard Hindí would also have मेरे पीछे. Compare the remarks concerning सधो, § 144.

511. The following Sanskrit words, among others, are often used in Hindi in a prepositional sense:—अनन्तर, 'after'; अनुसार, 'according to'; उपरान्त, 'after'; कारण, 'for', 'because of'; निमित्त, 'on account of'; विरुद्ध, (oftener विरुद्ध,) and विप्रीत, 'contrary to', 'against'; विषय or विषय, also विश्वे, 'in respect to', 'about'; समीप, 'near'; हेतु, *vulg.* हेत, 'by reason of'.

512. The following Persian words are often used in modern Hindi as prepositions:—अन्दर, 'within'; गिर्द, 'about', 'around'; नजदीक (نزدیک), 'near'; *vulg.* in the Doáb, नगीच, in the Himalayas, नजीक; बाबत (*fem.*, takes की,) 'concerning'.

513. The following Arabic words are also much used as prepositions by Hindi-speaking people:—बदल (موض), 'instead of'; खिलाफ (خلاف), 'contrary to', 'against'; बगैर (بغير), 'without'; बदले, 'in exchange for'; बाबत (باعت), 'by reason of'; बाद (بعد), 'after'; बिदून, 'without'; मुवाफिक (موافق), *vulg.* माफिक, 'according to'; वास्ते (واسطے), 'for'; सबब, 'for', 'by reason of'; सिवा, 'except', 'besides'.

a. The following are feminine, and require की with the preceding noun:—खातिर (خاطر), 'for', 'for the sake of'; तरफ (طرف), 'towards'; तरह (طرح), 'like', 'in the manner of'; निस्बत (نسبت), 'concerning'.

CONJUNCTIONS.

514. *Copulative* conjunctions are the following:—

और, (*Sk.* अपर,) 'and'; *Br.* औ, अर, वो, *O. P.* अयर, *Bhag.* डोर; भी, 'also', *Dial.* बी; फिर, 'again', 'moreover'. For भी, 'also', the Sanskrit अपि, sometimes with elision of अ, ऽपि, is used in poetry only. पुनर, also पुन and पुनि, is used for फिर in eastern Hindi.

515. The most common *Adversative* conjunctions are परन्तु, (*Sk.* परे+त्), 'but'; पर, (*Sk.* परे,) *Br.* पै, 'yet'; बरब, (*Sk.* बरब,) 'but', 'nay'.

a. But the common people in the N. W. P. very commonly use the Arabic लेकिन, for परन्तु, 'but'; and the Arabic बल्कि. (also, *vulg.*, बल्किन and बलुक,) for बरब, which latter is never used by the common people. Equally rare, and used only in poetry and scientific writing, is the Sanskrit किन्तु, = परन्तु, 'but'. The Persian मगर, 'but', 'except', is often used by Urdú-speaking Hindoos.

516. The *Disjunctive* conjunctions are वा and वाचवा, 'or'.

The Arabic **वा** is often preferred to these by the common people in the N. W. P. The negative disjunctives, 'neither', 'nor', are expressed by repeating the negative particle **न** with each successive clause.

a. **कि** is sometimes used as a disjunctive, especially in alternative questions; as, **क्या तुम जाओगे कि नहीं**, 'will you go or not?'. The Sanskrit **किंवा**, (or **किंवा.**) 'or', is occasionally found in literature.

b. The 3rd sing. cont. fut. **चाहे**, of **चाहना**, 'to wish', is often used disjunctively in two successive clauses for 'whether' . . . 'or'; as, **चाहे आवे चाहे न आवे**, 'whether he come or not'. For the second **चाहे**, **अथवा** may be used.

c. The interrogative **क्या**, similarly repeated with nouns, must also be rendered 'whether' . . . 'or'; as, **क्या स्त्री क्या पुरुष**, 'whether men or women'.

517. The *Conditional* conjunctions are **यदि** (*Sk.*) or **जदि**, and, much more commonly, **जो**, 'if', *Dial.* **जु** and **जे**. The Persian **अगर** is sometimes used for **जो** by Hindoos familiar with Urdú.

518. The *Concessive* conjunctions are **तो**, 'then', 'indeed', **यद्यपि**, 'although', and **तथापि**, 'nevertheless'; both **यद्यपि** and **तथापि** are Sanskrit. But, colloquially, **जो...भी** is used for **यद्यपि**, and **तो** or **तौभी**, for **तथापि**; as, **जो आप मुझे त्याग भी करें तो**, etc., 'even though you should forsake me, yet', etc.

a. Dialectic variations are, for **तो**, *Br.* **तौ**, in *Rám.* **तउ** and **त**; for **यद्यपि**, *Rám.* **यदपि**, **जदपि**. *Br.* **जौहू**; for **तथापि**, **तदपि**; for **तौभी**, *Br.* **तौहू**.

b. **चाहे**, sometimes followed by **भी** in the same clause, is often equivalent to 'although'; **पर**, 'yet', may then introduce the consequent clause. Thus **चाहे वह मुझे मार भी डाले**, 'even though he should kill me'; **चाहे माल सब जाता रहे, पर धर्म रहे**, 'though property all go, but virtue remain'. **चाहे** may be thus used for **चाहे**.

c. **अगराचि** (*Pers.*), 'although', is only heard from Urdú-speaking Hindoos.

519. The *Causal* conjunctions are **कि**, 'for', and **क्यूंकि**, 'because', *Br.* **क्योकि**, **क्योकि**, and **क्याहू**. The Sanskrit noun, **कारण**, 'reason', is also used as a causal conjunction, = 'because'.

520. The common *Illative* conjunction is **तो**, 'then'. After **जो** in the *protasis*, **तो** is also often used in an illative sense ; as, **वह जो आया तो मुझे जाना पड़ेगा**, 'as he has come, I shall therefore have to go'. Under other conditions, the abl. sing. of the prox. dem. pron., **यह**, *viz.*, **इस से**, *Br.* **यहाँ**, has the force of the illative 'therefore'.

521. The *Final* conjunctions are **कि**, 'that', and, more emphatic, the abl. sing. of the relative pronoun, **जिसमें**, 'in order that'.

a. No negative final conjunction exists ; its place is supplied by the 3rd sing. cont. fut. of the substantive verb, with a negative before **कि** ; as, **न हो कि** or **सेना न हो कि**. The Persian **ताकि**,=**जिस्तै**, belongs rather to Urdú than to Hindí.

INTERJECTIONS AND ENCLITICS.

522. Vocative interjections are the following :—

हे, **अहो**, **जो** or **हो**, **अजी**, **अबे**, **अरे**, **रे**, 'O'. Of these **हे** is the most respectful, and must be used to superiors ; **जो**, **हो**, **होत** and **अहो**, also **अजी**, may be used in addressing equals or inferiors when no displeasure is intended. **अबे** and **अरे** or **रे** always indicate some degree of displeasure or disrespect ; the final **र** of these three is always changed to **ई** in connection with a feminine noun. **जो**, **हो** and **रे** (**री**) follow, and the others mentioned, precede the noun with which they are connected.

523. Various emotions are expressed by the following :—

अ, expresses pity, **आ**, despondency, **वाह**, approbation and surprise, 'bravo', 'well !'. **धन्य**, expresses praise, 'bravo', 'well done !'; **हार हार**, also **हा हा** and **आह**, 'alas !'; **आहि**, (also **आह**), is 'mercy !', *lit.*, 'save !'. **ऊह** and **ओह**, 'oh', express pain or disgust ; **जय जय**, 'hurra !', *lit.*, 'victory !' 'victory !'; **हीही**, 'fie', expresses disgust. Yet other interjections are, **धिक्**, 'shame', also **धिकार** ; **दूर**, 'begone !'; **शुप**, 'hush !'; **लो**, 'lo !'; **किश**, 'pshaw !'; **स्वस्ति**, (*Sk.* सु + अस्ति,) 'salutation !'. I have also found **स्वस्ति** used as an adjective with a noun ; as, **स्वस्ति बचन**, 'a well-said word'.

524. The usual words of salutation among the Hindoos are, to equals or inferiors in caste, **राम राम**, *Rám! Rám!*; to Brahmins, **नमस्कार**,

'Obeisance!'; to Europeans or Mohammedans, *सलाम*, *lit.*, 'peace!'; or, still more respectfully, *बन्दगी*, *lit.*, 'service!'.
 525. The following interjections are also used in the colloquial of some parts of the country :—*बू बू* and *बुढ़ी*, express disgust; *ल्यो* calls attention; *उड़ानू* and *उत्तेरी*, 'begone!'; *हाय देया*, and *हाय मैया*, 'Alas! woe!', *lit.*, 'Alas! nurse', or 'mother!'. *आहि दहय* occurs in the *Rámáyan*; thus, the slave girl *Kubarí* says, *आहि दहय में काह नसावा*, 'Alas! what have I destroyed!'.
 526. In the *Márwáří* of the 'Plays', various unmeaning letters or syllables are attached enclitically to various words. These remind us of the ancient Prakritic addition of *क* to which we have had frequent occasion to refer. The principal of these *Márwáří* enclitics are *क, ज, झ, र, स, सी, सन*. These appear to be added alike to all parts of speech, as fancy may suggest. *स* and *सन* seem to be the most common. I cannot certainly learn whether these are used in the modern colloquial. The following examples are from the 'Plays':—*हुकम दिया है कंपनीस*, 'the Company', (*i.e.*, the E. I. Company,) 'has ordered'; *पाँवाँ आई आप कैस*, 'I have come to your honor's feet'; *बखरस लेवो चाय* (*बखरस* for *Ar. خبر*), 'go and get news'. Other examples will be found §§ 369, *a.*, 393, *c.*

CHAPTER XI.

SYNTAX.

527. In this chapter we shall treat first of the functions of the several parts of speech under their various modifications in respect of number, case, tense, etc., and, in the second place, of the construction of sentences from the material thus exhibited. The former may be termed *Analytic*, the latter *Synthetic* Syntax.

PART I. ANALYTIC SYNTAX.

OF THE NOUN.

Number.

528. The singular number denotes *unity*, the plural, *plurality*. To this general rule there are three exceptions.

(1) The singular may be used for the plural in a generic sense, to denote a *class*; as, तखली हैं पति को अकुलीनी नारी, *lit.* 'base-born women desert the husband'; सुर नर मुनि को अति आनन्द हुआ, 'to god, man and sage, there was great joy'.

a. This generic singular must not be confounded with those cases in which the plural termination is simply dropped, leaving the noun, although plural in form like the singular. Thus, in the following, उस ने विन की हाथ पाँव की हथकड़ी खेड़ी काट दीं, 'he cut off the manacles and fetters from their hands and feet', the plural verb indicates हथकड़ी and खेड़ी as really plurals, for हथकड़ियाँ, खेड़ियाँ.

Rem. This omission of the plural termination occurs chiefly in the nominative of fem. nouns, and is probably becoming more and more common. The plural inflection is also regularly omitted from both masc. and fem. nouns after a numeral; as, aṭhārah paṭrāntī, 'eighteen queens'; do ghāṭī mūrchhit rahā, 'four hours he remained in a swoon'. But sometimes with special reference to the plural, the plural inflection is used; as, apnī do betīyāṅ byāh dī, 'he gave his two daughters in marriage'.

(2) The plural is used for the singular to express *respect*; as, तारे in the following: हमारे नेनों के तारे श्री कृष्ण चंद, 'the star of my eyes, *Shrī Kṛishṇ Chand.*

(3) A very few Hindī nouns are idiomatically used in the plural, where English would require the singular. Examples are found in such phrases as भूखों, पियासों, जाड़ों मरना, 'to die of hunger, of thirst, of cold'. So also दाम, 'price', भाग, in the sense of 'fortune', 'lot', दर्शन, 'vision', and समाचार, 'news', are very commonly construed as plurals.

Of the Nominative.

529. The *Nominative* is used,

(1) As the grammatical subject of the verb; as, राजा बीर सभा में बैठा था, '*Rājā Bīr* was seated in the assembly'.

(2) It is found as the predicate after many intransitive verbs, as in the following examples:—

पाताल का राजा शेषनाग है, 'the king of *Pātāl* is *Shesh Nāg*'; गोपी नाथ कहावेगा, 'he shall be called *Gopī Nāth*'; वह अपराधी ठहरा, 'he was counted a transgressor'; वह योगी बन गया, 'he became a *Jogī*'.

(3) It is sometimes used for the vocative; thus, बानासुर ने बुलायके कहा कि बेटा, '*Bānāsūr* called and said, Son!'.

(4) It sometimes stands independent by *anakolouthon*; as, श्री कृष्ण चंद का पुत्र जो जामवती से था ... वह भी वहाँ पहुँचा, 'the son of *Shrī Krishn Chand* who was (born) of *Jāmvatī*, he also arrived there'; शास्त्रविद्या औ शस्त्रविद्या ये दोऊ उच्च पद की देनेवाली हैं, 'sacred science and military science,—these two confer high rank'.

(5) It is sometimes used for the genitive, absolutely with the infinitive; as, *e.g.*, in the phrase, धनुष टूटने का शब्द, 'the noise of the breaking of the bow'.

Of the Accusative.

530. The *accusative* is used to denote (1) the direct object of a transitive verb; or (2) local or temporal relations.

531. To denote the direct *object* of a transitive verb, we may employ either the inflected accusative with को, or that form of the accusative which is like the nominative. Similarly, with the perfect tenses of transitive verbs, the object of the action may either be put in the dative of reference with को, or in the nominative. But these two constructions or the two forms of the accusative are by no means interchangeable.

Rem. The correct use of these two alternative forms and constructions is perhaps the most difficult thing in the Hindi language. Only by extensive and continual reading of native books and long intercourse with the people, can the foreigner become able to use them with idiomatic accuracy. But the following principles and illustrations will, it is hoped, at least throw some light on the subject.

532. The general principle which regulates the use of these two forms and constructions is the following: when it is desired to emphasize the object as specific and individual, the accusative with को must be used; otherwise, the nominative form is to be preferred.

(1) Under this general head, observe, that in the case of nouns denoting rational beings, whether they be (*a*) generic, or (*b*) relative terms, or (*c*) proper names, the accusative with को is more commonly preferred.

a. Under this head, examples are, (a) of generic terms ;—साथियों को साथ लिया, 'he took his companions with (him)'; ऐसे कायर को क्यों मारो, 'why will you mind such a coward (as Indra)?: (b) of relative terms ;—हरि मा को देखते ही कहने लगा, 'Hari, immediately on seeing his mother, began to say'; मंत्री हरिमठों को ठूँठ ठूँठ मारने लगे, 'the councillors, seeking around, began to kill the worshippers of Hari': (c) of proper names ;—असुदेव ने गर्ग मुनि को बुलाया, 'Basudev called the sage Garg'; कंस ने बकासुर को भेजा, 'Kans sent Bakásur'; सब गोपी कन्हैया को लिए जसोदा पास चलीं, 'all the milkmaids took *Krishn* and went to *Jasodá*'.

N. B. बुलाना, 'to call', as implying a definite object, is almost invariably followed by the accusative with को.

(2) Conversely, for nouns denoting (a) irrational beings, or (b) inanimate things, or (c) for abstract terms, the nominative form of the accusative, or, with the perfect of transitive verbs, the nominative case, is much more commonly preferred.

a. Examples are (a) of animate, irrational beings ;—गर्भे चराने लगे, 'they began to pasture the cows'; बहड़े चरने को हाँक दिये, 'they drove off the calves to graze': (b) of inanimate, material objects ;—श्री कृष्ण ने अपना शरीर बढ़ाया, 'Shri *Krishn* enlarged his body'; यहीं जार्क खाँय, 'let us eat (our) lunches just here': (c) of abstract terms ;—मेरा दोष चित्त में न लीजे, 'do not take my fault to heart'; जिस पर मैं अनुग्रह करता हूँ उस का सब धन खोता हूँ, 'I destroy all the wealth of him to whom I show favour'.

(3) Although the use of the two forms of the accusative or the two alternative constructions of the object with the perfects of transitive verbs, is regulated to a great extent, especially in the colloquial, by the above principles, still it must be observed that other subordinate considerations often limit and modify their application.

a. When it is specially intended to denote the object of the verb as indefinite, the nominative form is preferred, even when referring to rational beings. Thus in the *Prem Ságar*, *Kans* says, जीती लड़की न दूँगा तुझे, 'a living girl I will not give thee'; where the omission of को, making the expression indefinite, adds to the emphasis. Similar is the phrase, आप ने मारे हैं बालक, 'you have killed children'; referring to the general massacre by *Kans*.

b. On the other hand, when it is desired to indicate the object with special *definiteness*, the form with **को** may be employed even with nouns denoting irrational objects or abstract ideas. The accusative with **को** will therefore generally be preferred when the object of the verb has just been mentioned, or is well known. Thus, **बिन दोनों तरवर के बीच रखल को आड़ा डाल**, 'throwing the mortar', (*i.e.*, the mortar previously mentioned,) 'obliquely between those two trees'. Again, (*P.S. Adhy. LXXXVII.*) **सोई इस माया को जीतता है**, 'that one overcomes this illusive power'. Here **को** indicates **माया** as the **माया** first mentioned in the previous context, where, it should be noted, the nominative form of the accusative is employed; thus, **अपनी माया दूर करो**, 'remove your illusive power'.

c. Again, in the case of plural nouns, when it is desired to denote the object *collectively*, as a class or a totality, the accusative with **को** is employed; but when it is rather to be denoted *distributively*, as a plurality, the nominative form or construction is preferred. Thus we read, **सोलह सइस एक से आठ स्त्रियों को साथ ले**, 'taking (his) 16108 wives with him',—where **को** denotes the object collectively; **उस ने योतियियों को बुलाया**, 'he called the astrologers',—where **को** denotes them as a class. But in the following, the nominative form of the accusative denotes the objects as a *plurality*; **ये चारों भाई चांदी सोने के फूल बरसाते**, 'these four brothers, showering flowers of silver and gold,—'.

d. The choice between the two forms for the object of a verbal action is frequently determined merely by a regard to *euphony*. Thus, especially, when an accusative and a dative occur in close proximity, the nominative form is often preferred for the direct object, simply to avoid the disagreeable repetition of **को**. Thus, **मैं ने तुम्हारा पुत्र रोहिणी को दिया है**, 'I have given your son to *Rohini*'; **मैं चावमती से कृताग्रमा को मांगी है जिसे न दूंगा**. '*Chārumatī*, who is betrothed to *Kṛitābramā*, I will not give to him'.

e. So also, again, the one form may be preferred to the other simply out of regard to the *rhythm* and balance of clauses, so much affected, even in prose, by Hindī writers. Even a fancy for a rhyme may determine the choice, not only in poetry, but in prose writing. Thus, **कहाँ किसी ने देखा मेरा कुंवर कन्हारै**, 'has any one seen anywhere my boy *Kanhái*?'—where **कन्हारै** is apparently preferred to **कन्हारै को** in order to rhyme with **मारै**, which ends the previous clause. Every

page of the *Prem Ságar*, with its artificial, rhyming style, will illustrate this remark.

f. Finally, the accusative with **को** must always be employed, when otherwise the expression might be ambiguous.

533. Many verbs, transitive and intransitive, may be followed by an accusative derived from the same root.

a. Observe, this *cognate* accusative is invariably used in the nominative form; and rarely, if ever, without an attributive adjunct. Thus, **तुम कैसी चाल चलते हो**, *lit.*, 'what kind of walk are you walking?'; **कोकिल मनभावन बोलियाँ बोल रहे**, 'cuckoos were uttering their pleasing notes'; **वह बड़ा बोल बोलता है**, *lit.*, 'he talks a great talk', *i.e.*, 'he speaks boastfully'; **सिपाही ने उस को बड़ी मार मारी**, *lit.*, 'the sepoy beat him a great beating'.

534. Many verbs may take after them two accusatives. We may here distinguish two cases.

(1) The verb, commonly a causal, may take one accusative of the person, and a second, either of a person or a thing. In accordance with the above principles, the personal accusative regularly takes **को**, and usually, though not invariably, precedes the other.

(2) Verbs signifying 'to think', 'to suppose', 'to make', 'to name', 'to appoint', etc., take a second accusative definitive of the first. The first may be termed the *objective*, and the second, the *predicative* accusative. In this case the objective accusative, as more specific, commonly, though not always, takes **को**, and the predicative accusative is put in the nominative form.

Examples are, under (1), **वह सब को ज़ागे पहिराय देगा**, 'he will put vestments on all'; **मैं सब को मिठाई खिलाऊँगा**, 'I will feed all with sweetmeats'; and under (2), **इस को तुम क्या कहते हो**, 'what do you call this?'; **मैं इस को दुख जानता हूँ**, 'I regard this as suffering'.

535. The accusative after a verb of motion may denote the *place to which*, as in the following examples:—

इन्द्र अपने स्थान को गया, 'Indra went to his own place'; **इस्तिनापुर को चलिये**, 'be pleased to go to *Hastinapur*'.

536. It may also denote absolutely *the time at which*; as, **कार्तिक बदी चौदस को**, 'on the 14th of the dark half of the month

Kártik; कि कोई रात को न्हावे न पावे, 'that no one be permitted to bathe at night'.

N. B. The postposition is often omitted from both the local and temporal accusative.

537. The accusative with को or its equivalents, को, कहं, etc., is also used in accordance with the principles above indicated, in both early and modern poetry. But in archaic poetry the inflected accusative in हि (हिं) is often used for the analytic accusative with को, subject to the same general conditions. Examples of both forms are as follows:—
वे निज मित्र भानु को माने, 'who regard the sun as their own friend'; राम कहं जेहि तेहि भांती, 'keep *Rám* in whatever way (you may)'; कहु जेहि रंकहिं करौ नरेसू, 'say! what pauper shall I make a king?'; मुनि रघुवरहि प्रसंस, 'the sage extolled *Raghubar*'.

538. It is important to observe, however, that in Hindí poetry the laws of grammar often yield to the necessities of the measure. Even agreement in gender and number is often sacrificed to the exigencies of the metre. Moreover, in archaic poetry, the modern analytic accusative is but beginning to appear in literature. Hence the nominative form of the noun is constantly employed for the accusative, with a license which in prose or in the colloquial would be quite inadmissible. Thus, *e.g.*, in the following stanzas prose usage would have demanded वशिष्ठ को and पुरुष को; आदि पुरुष हम मानुष जान्यो, 'we thought the First Man to be a mortal' (*P. S.*); तब नरनाह वशिष्ठ बुलाये, 'then the lord of men summoned *Vasishṭ*' (*Rám.*); and so in almost every stanza of the *Rámáyana*.

539. The inflected form of the noun alone is never used in modern Hindí for the object of a verb. But it should be noted that in Permissive and Acquisitive compound verbs as also sometimes in Desideratives, the inflected infinitive in ए alone, is *de facto* an accusative under the government of the following verb. Similarly is to be explained the colloquial Braj and Kanaují idiom, in such phrases as, वह खेवे न करे, 'he will not eat'; where the inflected gerund, खेवे, as the object of करे, must be regarded as an inflected accusative.

The Dative.

540. We may classify the uses of this case as follows:—

(1) Dative of the *Recipient*. As thus used the dative denotes the indirect object of a transitive verb.

Examples are ;—बलराम जी सब को आशा भरोसा देते थे, 'Balram Ji was inspiring all with hope and confidence'; श्री कृष्ण चंद अपनी माया को आज्ञा की, 'Shri Krishn Chand commanded his Illusive power'; यह मूसा मोहि दुख देतु है, 'this mouse gives me trouble'. So sometimes we have a dative of the person after verbs of speaking ; as, श्री कृष्ण चंद ने बलदेव जी को सेन से कहा, 'Shri Krishn Chand said with a wink to Baldev Ji'. But कहना is more commonly followed by the ablative of the person.

Rem. It should be observed that the case with *ko* after causal verbs is not to be regarded as a dative, as might often appear from the equivalent English idiom, but as an accusative. This will appear, if for the English equivalent to the causal verb, the verb 'cause' be used with the infinitive of the primitive verb. Thus, *wah ghore ko ghas khilata hai*. 'he feeds grass to the horse', *i.e.*, 'he causes the horse to eat grass'.*

(2) *Dative of Necessity.* The dative of a person is often very idiomatically used after an infinitive with the verb होना or पड़ना, to denote *necessity, certainty, or obligation*. The idiom is commonly equivalent to the English 'must', 'have to', etc. Similarly the dative is used after the infinitive or perfect participle with चाहिये (§ 356, b,) to express obligation.

Examples :—कल हमें तुम्हें यमदग्नि के यहां जाना है, 'to-morrow you and we have to go to the abode of Yamadagni'; परब को पहुंचा चाहिये, '(we) ought to arrive there to the festival'; हमें मरना पड़ेगा, *lit.*, 'it will fall to us to die'; *i.e.*, 'we must die'.

(3) *Dative of Possession.* The dative is very commonly used to denote *possession or acquisition*.

a. The dative of possession usually follows the substantive verb; as, उन को तन मन की भी सुध न थी, 'they were not conscious even of soul and body'; सब को आस भयो, 'to all was terror'.

b. But often the copula is omitted ; as, हमें इतना ज्ञान कहाँ, 'where have we so much wisdom?'; तिन कौं जैसा सुख है, तैसा असंतोषी कौं नाहिं, 'such happiness as these have, the discontented have not'.

c. Or some other neuter verb may take the place of the copula; thus, दुख नाम को न रहा, *lit.*, 'sorrow remained not to the name', *Angl.* 'only the name of sorrow remained'.

* With the Hindi idiom, compare the Sanskrit construction of causal verbs. (Williams' Sansk. Gramm. § 847.)

d. Here may be noted the common idiom with मिलना, 'to meet', 'to be found'; which is always construed with the nominative of the thing found, and the dative of the finder. Thus, उन को चारों पदार्थ मिलते हैं, 'they obtain the four blessings'; मुझे कुछ नहीं मिला, 'I obtained nothing'.

(4) Dative of *Advantage*. This is found after such adjectives as उचित, योग्य, 'proper', 'right', भला, 'good', कठिन, 'difficult', etc., with their opposites.

Examples:—ऐसा साहस करना नारी को उचित नहीं. 'it is not seemly for a woman to be so daring'; स्वामी बिन स्त्री को मरना हीं भला है. 'for a woman without a husband, it is well even to die'; मनुष्य को परमेश्वर का सत्यज्ञान प्राप्त करना अत्यन्त कठिन है, 'for man to obtain the true knowledge of God is extremely difficult'.

Rem. योग्य is often construed with the genitive, with a slightly different meaning.

(5) The Dative of the *Final Cause* denotes the *motive*, *purpose*, or *object* of an action, or the *use* for which a thing is designed, as in the following examples:—

पुरी की चौकसी को कौन रहेगा, 'who will remain for the watching of the city?'. The infinitive, in its capacity of a gerund, is very commonly used in the dative in this sense; as, देखने को कृष्ण बलदेव भी आयगे, '*Krishn* and *Baldev* will also come to see'; देखिये कौं तो द्वे आंखि हीं, 'for seeing, indeed, were two eyes'; कहीं रहने को ठौर बताइये, 'be pleased to show me a place to stay'. The postposition को is often omitted from this gerundial dative; as, e.g., वह पढ़ने आता है, 'he comes to read'.

Rem. For the dative of the final cause, modern Hindî often substitutes the genitive with लिये or खास्ते, and in the east, also वरे and खातिर.

a. Here also may be noticed the peculiar use of this dative of the gerund with the substantive verb, to denote the proximate futuration of the act denoted by the gerund. Thus, वह चढ़ने को हुई, 'she was just about to mount'; वह जाने को था, 'he was about to go'.*

(6) The Dative of *Reference* is used after a great variety of words, to denote the object with respect to which any affirmation is made.

* Compare the English colloquial idiom, 'he was for going'.

Thus it is so used after many neuter verbs; as, *खान मोर को लगा*, 'the arrow struck the peacock'; *दरिद्री कौ संसार सूना लागतु है*, 'to a poor man the world seems lonely'; *वही कहिये जो किसे सुहाय*, 'whatever may be pleasing to any one, that very (thing) say'; *अनिरुद्ध जी को बांधे बांधे चार महीने हुए*, 'four months passed over *Aniruddh* in bondage'. So we may have the dative of reference after an active verb; e.g., *स्त्री को कहा है कि कैसा ही पात होय*, 'with regard to the woman, it is said, that of whatever kind (her) husband may be'.

a. To this head may be referred the use of the dative to denote the object of an action, in the *impersonal* construction (§ 332) of the perfect tenses of transitive verbs. Thus, e.g., *उस ने लड़कों को देखा*, is literally, 'by him seen (with respect) to the boys'.

b. Finally, the dative of reference may follow some adjectives; as, *पियहि पियारी*, 'dear to (her) husband'; and also, some nouns, in expressions of praise or blame; as, *धन्य है तेरे साहस को*, 'praise to thy courage!'; *धक्कार मेरे जीतख को*, 'a curse to my life!'.

541. The dative with the postposition *को*, (*कौ*, *कहं*, etc.) is also used in poetry according to the same general principles, as will appear from the following examples:—*सज्जन कौ दुख हू दिये*, 'from having given even pain to a good man'; *तुम कहं ब्रिपति बीज विधि अयउ*, '*Brahmá* has sown for you the seed of trouble'. But very often in the *Rámáyan*, the inflected dative in *हि* (*हिं*) is preferred. Thus, *मातु पितहिं पुनि यह मन भावा*, 'this counsel, again, pleased her parents'; *बहु विधि खेरिहि आदर देई*, 'in many a way she shows the bondmaid honor'; *राजहि तुम पर प्रीति विशेषी*, 'the king has a special love for you'.

a. Or the postposition may be omitted; as, *पर अकाज मट सहस बहु से*, 'for another's injury, warriors with a hundred hands'.

The Case of the Agent.

542. The case of the Agent is used only with the tenses of the perfect participle of transitive verbs, and that only in modern standard Hindí and other western dialects, to denote the *agent*. Examples will be found further on in the sections which treat of the aforesaid tenses.

a. Quite peculiar and exceptional is the use of this case with the infinitive, in a Hindí translation of the *Bhágavat Purán*; where it is very common in the titles of the chapters, but occurs in no other

position. Thus the title of the *8th Skandh* reads, हरि अवतार लेकर बचाना प्राब दासी का परमेश्वर ने, *lit.*, 'the saving of the life of (his) handmaid by God, having become incarnate as *Hari*'. Again, in the *2nd Adhyāya* of the same; कहना शुकदेव जी ने कथा गजेन्द्र को ग्राह की, 'the narration by *Shukdev Jī* of the story of *Gajendra* and *Grāh*'.

543. In both Braj prose and poetry the postposition *नें* is often omitted. Thus, सन्यासियन मेरे खिल सैं सब धन काटि लियो, 'the *Sanyāsīs* took out all the store from my hole'; ब्राह्मन कही, 'the Brahman said'; मोहो सों तुम प्रीति बढ़ाई, 'you have increased (your) love for me'.

544. In the *Rāmāyaṇ* *ने* is never used; and in the singular, the case of the agent is thus identical in form with the nominative. In the plural, the oblique form alone denotes the case of the agent. Thus, सीताहि चितव कही प्रभु खाता, 'looking toward *Sītā*, the lord spoke this word'; हरिचरित सुहाये भाति अनेक सुनीसन गाये, 'the illustrious deeds of *Hari*, the great sages have sung in countless ways'. But, as previously remarked, the nominative with the active construction is very often used where modern High Hindī would use the passive construction with the case of the agent.

The Ablative.

545. Most of the Hindī idioms with the ablative rest upon the idea of 'separation'. We may classify them as follows :—

(1) The *Local* ablative is used commonly with verbs of motion, to denote the *place from which* the motion proceeds.

Thus, जन से घर को आते थे, 'they were coming from the jungle to the house'; मथुरा से चल बिये, 'they set out from *Mathurā*'; सिंहासन से उठे, 'he rose from the throne'. But sometimes the local ablative occurs with other verbs also; as, दूर से उस ने श्री कृष्ण चंद से कहा, 'from afar he said to *Shrī Kṛishṇ Chand*'.

(2) The *Temporal* ablative similarly denotes the *time from which*, as in the following :—

दिसी दिन से कृष्ण कुंड राधा कुंड करके वे प्रसिद्ध हुए, 'from that day they became celebrated as the Pool of *Kṛishṇ* and the Pool of *Rādhā*'; यह रीति परंपरा से चली आती थी, 'this custom was coming on down from old time.'

(3) The ablative is used after all adjectives, verbs and other words denoting *separation*.

Thus, after adjectives;—**वह हम से अलग हुआ**, 'he became separated from me'; **मैं ने उन को सब भय से निर्भय किया**, 'I made them free from all fear'. It is also used after a great variety of verbs, especially, tropically, verbs of *asking, refusing, forbidding, desiring, saving*, etc., etc. Thus, **तुम अपने पिता से जा पूछो**, 'go and inquire of your father'; **हम से चाहता है अपनी मौत**, 'he desires from me his death'; **तुम ने हम को आग और जल से किस लिये बचाया**, 'for what did you save us from fire and water?'. Similarly, the verbal noun **वर्जन**, 'prohibition', may be followed by the ablative; thus. **का वर्जन ऋषिवरों को हरिभजन करने से**, 'what prohibition to the great sages from worshipping *Hari*?'.

(4) The ablative is used to express the *source, origin, or cause*.

Examples are:—**इन्द्र के मानने से कुछ नहीं होता**, 'nothing comes from obeying *Indra*'; **दुःख से अति घबराय**, 'greatly agitated with sorrow'; **तू किस पाप से अजगर हुआ था**, 'for what sin didst thou become a serpent?'; **नंद जी से इतनी बात सुन**, 'hearing this much from *Nand Ji*'. Thus may be explained the ablative after verbs of *fearing*, where the ablative denotes that which is the cause of the fear; as, e.g., **मैं अपजस से डरता हूँ**, 'I fear infamy'.

(5) Hence, by a natural transition, the ablative comes to denote the *means or instrument*, as that from which action immediately proceeds; as, for example,

तू हाथी से चिरवा डालियो, 'do thou tear them to pieces with an elephant'; **खुर से खोदे नदी करारे**, 'with (his) hoof he digs up the banks of the river'. To this head may be referred the ablative after verbs of 'filling', as denoting that with which the action of filling is performed; as, e.g., **सरोवर निर्मल जल से भरे हैं**, 'the lakes are filled with pure water'.

(6) Hence, again, the ablative may denote the *agent*.

a. Observe, however, that this construction is only found in connexion with neuter verbs or with the passive conjugation. Thus, **हम से नहीं बनेगा**, *lit.*, 'it will not be made by me', *i.e.*, 'I cannot make it'; **उन का बल मुझ से नहीं संभाला जाता**, 'their strength cannot be resisted by me'.*

* In *Naipálk* the abl. postposition *le* is also used for the H. H. *ne* of the agent, in the passive construction with the perfect tenses of transitive verbs.

(7) The ablative is used after all words denoting or implying *comparison*.

a. Thus, it is used (a) after adjectives; as, मुझ से बड़ा, 'greater than I'; ऐसे पुत्र होने से वह अपूत क्यों न हुआ, 'why was he not sonless rather than have such a son?'; वह सब से पहिले जा मिली, 'she went and met him first of all': (b) after verbs; as, कोई मुझ से न जीते, 'no one may conquer me'; बालहत्या से बड़कर तो कोई पाप ही नहीं, 'there is no sin at all, greater than obild-murder': (c) after adverbs; as, इस से आगे, 'before this'; घर से बाहर, 'outside of the house'.

(8) The ablative may denote the *price*, as that by means of which a thing is obtained.

Examples:—यह पुस्तक मुझे एक रुपये से मिली, 'I got this book for one rupee'; दो आने से कभी बिकता है, 'does it ever sell for two *ánás*?'. .

(9) The ablative is very commonly used to denote the *manner* of an action.

Examples:—उलटे वेदमंत्रों से यज्ञ कर, 'sacrificing with the vedic formulas (read) backward'; नख सिख से सिंगार कर, 'adorning (themselves) from head to foot'; उस ने अति प्यार से कहा, 'he said with great love'; This use of the ablative is especially common with such words as प्रकार, भाँति, रीति, विधि, etc.; as, इस रीति से, 'in this way'; उस भाँति, 'in that manner', etc. Here also place such phrases as इस पंथ से चलो, 'go by this road'.

Rem. This modal ablative denotes the noun as a *norm* or *standard* from which the action may, in a manner, be regarded as proceeding. Compare the English idiom, 'I made it from this rule'; and the Latin, *nostro more, meo consilio*, etc.

(10) The ablative is used after nouns expressing *need* or *use*.

Examples:—मुझे औषधि से प्रयोजन है, 'I have need of medicine'; इस से क्या काम, 'what is the use of this?'. .

(11) Finally, the ablative with से is used to express a variety of relations expressed in English by the prepositions 'with', 'by', or, more rarely, 'in', or 'to'.

Examples:—मुझ से संग्राम कर, 'fight with me'; किसी से कलह न करवाओ, 'do not stir up discord with any one'; जिस से विघना ने संबंध किया, 'with whom *Brahmá* contracted an alliance'; मुँह से मुँह, 'mouth to mouth';

उसे कृष्ण भेष से देख, 'seeing him in the disguise of *Krishn*'; आप की कृपा से, 'by your honor's kindness'.

a. कहना, 'to say', is commonly followed by an ablative of the person addressed, instead of the dative or accusative with को, which is only exceptionally used; as, मुझ से कहो, 'tell me'; किस से कहूँ, 'whom shall I tell?'. Other words and phrases of analogous meaning to कहना, are also followed by the ablative; as, जसोदा से तुम ने यह वचन किया था, 'you made *Jasodá* this promise'. In one place in the *Rámáyana*, however, the object of कहना takes पाहि (पाहिं); thus, तब रघुवीर कहा मुनि पाहिं, 'then *Raghubír* said to the sage'.

Rem. It has been denied that we can correctly say, in such cases as the above, that the noun is in the ablative; and, indeed, if we restrict the word 'ablative' to its etymological sense, then the words mentioned under (10) are certainly not ablatives. But in no language is the usage of the word thus rigidly restricted. Prákrit and modern Hindí, especially, afford abundant examples of the usurpation by one case of the functions of another. It is quite possible, moreover, that 'with' may be the radical signification of से, from which all the modern usages of the word are to be derived.

546. The ablative is used in poetry in the same manner as in prose. Two or three examples will suffice; thus, पद नख तें भू खोदत भई, 'they began to dig the earth with their toe-nails'; ये दृग से कुटी जलधारा, 'the stream of water which fell from their eyes'; जासु कृपा सु दयासु, 'by whose gracious compassion'; प्राण ते अधिक राम प्रिय मेरे, '*Rám* is dearer than life to me'.

547. Even in prose the ablative postposition is often omitted. This idiom, however, is by no means everywhere admissible, but occurs chiefly with the ablative of *manner* or of *cause*, and, occasionally, with the ablative of *place*; as, इस रीति, or इस प्रकार, 'in this way'; सब कुशल से हैं, 'all are well'; गोपी चारों ओर घिर आई, 'the milk-maids gathered around him from all four sides'.

a. But in poetry, as usual, the postposition is omitted much more freely; thus, पूछि लोगन्ह काह उकाहू, 'she asked the people, for what was the joy', etc., etc.

548. As has been remarked (§145), the conjunctive participle करके, is sometimes used, instead of से, as an ablative postposition, in the sense of 'from' only. Often, करके can hardly be distinguished in meaning from से; e.g., पाप से रहित and पाप करके रहित, both mean 'free from sin'. But sometimes, when a distinction is intended, से denotes the *source*,

and करके, the *means* or *instrument*, as in the following: जिस से और जिस करके शुभ अशुभ अपना कर्म होता है, 'from whom, and through whom, one's fate, good or evil, comes'.

The Genitive.

549. The genitive in Hindî expresses a very great variety of relations, which may be classified and illustrated as follows :

(1) *Possession* ; as, राजा का मंदिर, 'the king's palace'; मैं कंस की दासी हूँ, 'I am the handmaid of Kāns'; यह सब मेरे घोड़े हैं, 'all these are my horses'.

(2) *Relationship* ; as, मेरा पिता, 'my father'; उन की माएँ, 'their mothers'; ये भनजे कंस के दोह, 'these are the two nephews of Kāns'.

(3) *Material* ; as, कंचन के मंदिर, 'temples of gold'; शकटिक के चार काटक, 'four gates of crystal'; मधुमाखियों का झुंड, 'a swarm of bees'. Here also I would place the phrase दिन की रात हो गई, *Angl.*, 'the day was turned into night'; and some reduplications with the genitive, as, दूध का दूध, *lit.*, 'milk of milk'; *i.e.*, *pure* milk.

(4) *Origin* or *source* ; as, धूप की सुगंध, 'the fragrance of incense'; धनुष टूटने का शब्द, 'the noise of the breaking of the bow'; जन्म के भिखारी, 'beggars by birth'.

(5) *Cause* or *reason* ; as, पंथ का हारा शका, 'weary and exhausted because of the way'; कपटो के मारने का कुछ दोष नहीं, 'there is nothing wrong in killing a deceiver'.

(6) *Place* ; as, मथुरा की नारियाँ, 'the women of Mathurá'; देस देस के राजा, 'kings of various countries'.

(7) *Age* ; as, जब उषा सात बरस की भई, 'when Ushá became seven years old'. In this case the genitive is used predicatively.

(8) *Quality* or *kind* ; as, अनेक प्रकार की बातें, 'a countless variety of things'; बड़े आश्चर्य की बात है, 'it is a matter of great wonder'; दस पैसेरी का बोझ, 'a load of ten *panserí* (100 lbs)'.
a. Here may be noted the idiomatic use of the genitive of the infinitive or gerund, to denote a *certainty*, as determined by the will or nature of the agent. Thus, मैं जाने का नहीं, 'I will not go'; ऐसी बात नहीं होने की, 'such a thing is not to be'.

Rem. In this idiom, the genitive of the gerund is a predicative adjunct of the subject of the sentence, and is therefore inflected to agree with it in gender and number, as in the above examples.

(9) *Use*; as, खाने का पदार्थ, 'provision for eating'; पीने का पानी, 'drinking-water'; यह देह किसी काम की नहीं, 'this body is of no use'.

(10) *Subject* of the action denoted by the word it qualifies.

Examples:—बानासुर के भागने के समाचार, 'the news of the flight of *Bánásur*'; उस के जाने का कारण, 'the reason of his going'.

(11) The *object* of an action, direct or indirect.

Examples:—मैं तुम्हारे भरोसे पर रहा, 'I relied upon you'; हमें अति चिंता थी तुम्हारी, 'we had very much anxiety about you'; मेरे अङ्गठन न मलना, 'do not rub *abtan* upon me'; उस का छोटा महादेव जी की अति कठिन तपस्या करने लगा, 'his son began to perform a most difficult act of penance to *Mahádev Jí*'; अक्रूर ने प्रभु के चरण का ध्यान घर कहा, '*Akrúr*, fixing his contemplation on the feet of the lord, said'; यदुवंशियों का राज का अधिकार नहीं, 'the house of *Yadu* have no right to the kingdom'; परमेश्वर का पापी, 'a sinner against God'.

Rem. The same word may be accompanied either by the subjective or objective genitive, or even by both, as in the following: उन की मेरी दया कुछ न आई, 'they had no compassion upon me'.

(12) *Price*; as, मुझे दस आने का आटा दो, 'give me ten *ánás* worth of flour'; यह कितने का घोड़ा है, 'what is the value of this horse?'.

(13) *Time*; as, आठ दिन की बात है, *lit.*, 'it is a matter of eight days', *i.e.*, 'eight days ago'; किसी समय की बात है, 'it is a matter of a certain time'; *Angl.*, 'it once happened'.

(14) The *Partitive* genitive is used when it is intended to denote anything as a *whole* of which a part is taken.

Examples:—सृष्टि का आरंभ, 'the beginning of the creation'; जमीन की चौथाई, 'one fourth of the land'.

a. Here may be classified many reduplicated forms denoting *intensity* or *totality*; as, यह सच का सच है, 'this is very truth'; मीठे का मीठा, 'very sweet', *lit.*, 'sweet of sweet'; सभा की सभा, 'the entire assembly'; मुँह के मुँह, 'swarms upon swarms', *lit.*, 'swarms of swarms'.

b. Observe, that when a generic term is accompanied by a noun denoting 'measure' or 'quantity', the partitive genitive is not employed, but the generic term follows the other in apposition with it; as, दो बीघा जमीन, 'two *bighas* of land'; तीन सेर दूध, 'three *seers* of milk'; एक कटोरा पानी, 'a cup of water'; दो जोड़े कपड़े, 'two suits of clothes'.

(15) Many other combinations of nouns with the genitive might be noted; as, *e.g.*, in *oaths*; thus, गंगा जी की कसम, 'by *Gangá Jí*!': in

interjectional expressions; as, गंगा माँ की जय, 'Victory to Mother Ganges!': in phrases denoting the *contents* of any thing; as, पानी का जड़ा, 'a jar of water', etc., etc. But the above specifications comprise the most important idioms.

(16) The genitive is used after a few adjectives; as, योग्य (योग), and लायक or लायक (*Ar. لائق*), 'worthy', 'fit'.

Examples:—सिखाने के योग्य, 'fit to teach'; पानी के जोग है, 'it looks like rain'; चलने के लायक, 'fit to walk'; and, in the *Rámáyan*, तोड़ने लायक, 'able to break'.

550. In various common phrases in which the noun limited by the genitive can be readily understood, it may be omitted. The inflection of the genitive is determined by the noun which is to be understood. Thus, the genitive is regularly omitted after सुनना and मानना; as, उस ने मेरी न सुनी, 'he did not hear me', *lit.*, 'my', (*sc.* बात, 'word'); तुम मेरा क्यों नहीं मानते हो, 'why do you not regard my word?' (*sc.* वचन).

551. It is important to observe that के is idiomatically used in many expressions denoting possession, where we might expect का or की; as, मेरे बचिन न हुई, 'I had no sister'; मेरे एक पुत्र जन्मा, 'one son was born to me'; टट्टू के भी जीव है, 'a pony, also, has a soul'.

a. The practical rule for the use of this idiom would seem to be this; whenever, in English idiom, possession must be expressed by a verb, as, *e.g.*, 'to have', the Hindí genitive in के must be used, whatever may be the gender of the following noun. But when, in English, the possessive case must be employed, then Hindí idiom demands the genitive with का, की, or की, according to §140. Thus, 'it is my son' must be rendered in Hindí, मेरा पुत्र है; but, 'I have a son', मेरे पुत्र है. So also, टट्टू के जीव है, is 'a pony has a soul'; but, टट्टू का जीव है, would mean, 'it is the soul of a pony'. Thus, in the *Rámáyan*, नाथ एक संशय बड़ मेरे, 'Lord, I have one great doubt'.

Rem. It has been common to postulate some such word as *pás* or *yahás*, after this *ke*; but native grammarians deny that there is any ellipsis. Moreover it may be noted that in *Márwáří*, which inflects the genitive postposition, *ro* or *ko*, to *rá* and *ká*, (obl. masc.) and *ri* and *ki* (fem.), *re* or *ke* is also used as a *third* inflection before both masc. and fem. nouns, when possession is denoted. I would suggest, therefore, that this *ke* of possession probably only chances to be identical in form with the obl. masc. inflection, *ke*; and, in fact, has arisen from another modification of the Sanskrit participle *kṛta*. The matter, however, needs further investigation.

552. The genitive postposition is very often omitted, even in prose, when the governing noun immediately follows. The two nouns then become, in fact, a Genitively Dependent Compound. (§480,(5).) In conversation, however, the omission is much less common.

a. Peculiar is the omission of the postposition in the following phrase : *वे मुंह मांगा धन पावेगा*, 'he shall obtain the wealth his lips shall ask', *lit.*, 'the mouth's asked wealth'.

b. In phrases expressing a date, the genitive postpositions are always omitted ; as, *छेठ सुवी पंचमी*, 'on the 5th of the light fortnight of *Jeth*'. The order is regularly the reverse of the English.

553. The genitive postpositions, *का, को, कर, कोर*, etc., as used in poetry, are subject to the same rules as in prose. Thus, *देवन हूँ कौ देव सुरारी*, 'of the very gods, *Murári* is the God'; *सुरपति की पूजा तजी*, '(they) abandoned the worship of the ruler of the gods'; *तीन लोक को बोझ ले*, 'assuming the weight of the three worlds'; *चरन कमल बंदो सब कोरे*, 'I salute the lotus feet of all'; *निटईं दोष दुख भवरजनी के*, 'the sins and sorrows of the night of existence vanish'; *न आजु लागि अनमल काहु क कोन्ह*, 'nor has (he) to this day done harm to any one'.

a. In the following sentence from the *Rámáyan* (*Ay. K.*) we have a *Márwári* possessive genitive in *रे*; *सियरे बदन सूख गौ*, 'the face of *Sítá* withered'.

The Locative Case.

554. The postpositions commonly assigned to the locative case, are (1) *में*, (2) *पर*, (3) *तक, तकक, लग, लो*, etc. As they differ radically in their meaning, we treat them separately.

555. (1) The locative with *में* denotes, primarily, existence *in* a place.

Examples:—*उस ने ब्रज में जन्म लिया*, 'he became incarnate in *Braj*'; *इस संसार में*, 'in this world'.

a. After a verb of motion, *में* must be rendered by 'into', or 'to'.

Examples:—*वह सभा में गये*, 'he went into the assembly'; *इस्तिनापुर में राजसु यज्ञ में आओ*, 'come to *Hastinápura* to the royal sacrifice'.

b. The locative may often be rendered by 'among'.

Examples:—*स्त्रियों में कतनी बमक कहाँ पाइये*, 'among women where could one find so much beauty?'; *हमें में कौन है*, 'who is there among us?'

c. The locative with **में** is used idiomatically after all verbs of '*tying*', '*fastening*', '*wearing*', etc.

Examples :—**इस में गांठ बांधो**, 'tie a knot in this'; **गंदे कठले गले में डाले खेलते थे**, 'with dirty wooden trinkets hung about the neck, they were playing'.

d. It is also used after verbs of *filling*.

Thus, **इस समुद्र में चिन्ता की मोह बपी जल भरा है**, 'this ocean is filled with the water of anxiety and vain affection'.

(2) The locative with **में** naturally also expresses the *time within which* any thing happens.

Examples :—**उन दिनों में**, 'in those days'; **कितने एक दिनों में पहुंचे**, 'in several days they arrived'.

(3) And it also expresses tropically various other relations, as follows :

a. *Difference* ; as, **हम तुम में कुछ भेद नहीं**, 'there is no difference between me and you'. It may thus follow verbs of *fighting* ; as, **उन दोनों में युद्ध रहा**, 'a battle was waged between them'; or words expressing *union* or *reconciliation* ; as, **उन में मेल हुआ**, 'harmony was made between them'.

b. *Sphere of action* ; as, **इस में मेरा कुछ बस नहीं**, 'I have not any power in this (matter)'.

c. *Subject of discourse* ; as, **उन की स्तुति में मैं क्या कहूँ**, 'what shall I say in his praise?'; and also, *occupation* ; as, **वह अपनी पति की सेवा में रही**, 'she continued in the service of her husband'.

d. *Condition* ; as, **पति के ध्यान में सो गई**, 'she went to sleep, thinking of her husband', *lit.*, 'in thought of her husband'.

e. *Cause* ; as, **अल्प ही अपराध में क्रोध कर**, 'becoming angry for a very small offence'.

f. *Instrument* ; as, **उस ने एक ही तीर में इस अजगर का काम तमाम किया**, 'he finished this serpent's work with a single arrow'.

g. It is often used in *comparison*, instead of the ablative; as, **इन तीनों देवताओं में शीघ्र बरदाता कौन है**, 'of these three gods who (most) quickly grants a blessing?'

h. It is used after certain verbs to denote the *price*.

Examples :—**चार आने में कितनी घास मिलेगी**, 'how much grass will one get for four *áns*?'; **यह गाय में ने तीस रुपय में मोल ली**, 'I bought this cow for thirty rupees'.

Rem. The distinction between the genitive, accusative, and locative of price, seems to be as follows. The genitive denotes value *absolutely*, as an attribute of the subject; as, *yah kitne ká hárá*, 'what is the value of this diamond?'; the *accusative* denotes the price *definitely*, as that for which a thing is obtained; as, *yah tum ne kitne ko liyá*, 'for how much did you get this?'; the locative denotes the price under a slightly different aspect, as a sum *within which* a thing is bought; as, *yah mujhe ek rupaye men milá*, 'I got this for (*lit.*, within) one rupee'.

i. The locative with *नौ* is sometimes used *partitively*; as, *नव मींहे एकौ जिन्ह के होई*, 'he who has even one of the nine'.

556. The locative with *पर*, 'on', denotes, (1), *external contact*. Thus it expresses,

a. Position *on* or *upon* anything; as, *वह कोठी पर बैठा हुआ था*, 'he was seated on the house'. Thus it regularly follows certain verbs; as, *घोड़े पर चढ़ो*, 'mount the horse'. After verbs it is often to be rendered by 'at', or 'to'; as, *वह द्वार पर खड़ा है*, 'he is standing at the door'; *उसी ऋंछे कूर पर गए*, 'they went to that same blind well'.

b. *Distance*; as, *काशी से कुछ दूर पर*, 'at some distance from *Káshí*'; *एक कोस पर*, 'at (the distance of) one *kos*'.

c. *Addition*; as, *ताले पर ताला दे*, 'putting lock upon lock'.

(2) It is used to denote the *time at which*; as, *वह ठीक समय पर आया*, 'he came at the exact time'; *पाँचवें दिन पर*, 'on the fifth day'.

(3) The locative with *पर* also denotes a variety of tropical relations, as follows:

a. The *object* toward which an action or feeling is directed.

Examples:—*हम पर दया कीजे*, 'be pleased to have mercy upon me'; *हस बात पर मन लगाओ*, 'apply your mind to this'.

b. Hence it denotes the *subject of discourse*, as the object to which discussion is directed.

Examples:—*षट्दर्शनों के मत पर सहस्रों ग्रन्थकर्ता हुए हैं*, 'there have been thousands of commentators on the doctrines of the six systems'; *हस पर यदि तुम कहो*, 'as to this, if you say'.

c. It may express *conformity* to a rule or custom; as, *हम अपने धर्म पर रहेंगे*, 'we will abide by our own religion'.

d. Also, *superiority*;

as, *इन्द्र का कुछ तुम पर न बस आया*, 'no power of *Indra* prevails over you'.

e. The *reason* of any action, as tropically its foundation ; as, मेरी इस बात पर वह जल गया, 'at this word of mine he fell into a passion'.

f. Very rarely the locative is used for the ablative with a verb in the passive conjugation. Thus, in the *Rājñiti*, मो पै चल्यो नहीं जातु, 'I am not able to walk'.

557. The locative forms with तक, तकक, लग, or लें, all denote, literally or tropically, the *limit to which* an action extends or a statement is made. There is no difference at all in the meaning of these postpositions.

Examples are ;—नाक तक पानी आया, 'the water came up to (his) nose'; लड़के से ले छूटे तक, 'from the child to the old man'.

a. Peculiar is the following phrase (*poet.*): हम लैं तू निज पियहि संन्दारे, 'thou mentionest thy own beloved even to us'.

558. The locative postpositions, में and पर, are often omitted in prose and in the colloquial. This omission occurs chiefly in certain adverbial phrases of time and place. Thus we have, उस समय, for उस समय में (or पर), 'in' or 'at' 'that time'; पाँचीं पाँड़ि, 'falling at (his) feet'; पूरे दिनों लड़का हुआ, 'the days being fulfilled, a boy was (born)'; वह घर गया, 'he went to the house'.

a. में is almost invariably omitted in certain verbal combinations, commonly called 'Nominal' verbs ; as, काम आना, (for काम में आना,) 'to be of use', *lit.*, 'to come in work'; व्याह करना, 'to marry'; व्याह देना, 'to give in marriage'; दृष्टि आना, 'to appear', *Angl.*, 'to come in sight'. तक and its equivalents are never omitted in prose.

559. When the above locative postpositions are employed in poetry, their usage corresponds to that already noted. A few examples will suffice.

(1) उपजाहिं एक संग जल माहीं. 'they are produced in the water together'; ते उबरे तेहि काल मई, 'they remained safe in that time'; की तुम तीन देव मई कोऊ, 'are you one of the Three gods?'; राम प्रताप प्रगट रहिं माहीं, 'in this the glory of *Rām* is manifest'; समिरन कर में सुरत न हर में, 'the rosary in the hand, the thoughts not on *Hari*'. (2) कपि डार पर, 'the monkeys on the branches'; भले भलाई पै लहहिं, 'the good lay hold of goodness'; जो तुमाहिं सुता पर नेहू, 'if you have affection for (your) daughter'. (3) कहउं कहाँ लागि नाम जडाई, 'whereunto shall I declare the greatness of the Name?'

a. In poetry, however, these postpositions are more frequently omitted; but any attributive of the noun in the locative, if capable of inflection, must be inflected. Thus, in the following, माहि (मैं) is omitted: बहि कर नाम सुमिरि खेवारा, 'remembering the name of this One in the world'; हे तुम्हरे सेवा बस राख, 'the king is subject to your service'. And in the following, पर would have been used in prose: भयिउ खरोखविपिन हिम राती, 'cold night was on the lotus-bed'; पठइय नाच काख, 'send me, O lord, upon your service'. And in the following examples, prose usage would have demanded तक (or तकक, etc.): तोनि सहस्र संवत खो खाई, 'these she ate for three thousand years'; गगन चढ़ै रज, 'the pollen ascends to the sky'.

560. A noun in the locative, whether in poetry, prose, or the colloquial, in addition to its own proper postposition, may take that of the ablative, or, less frequently, the genitive. Each postposition retains in full its special meaning.

Examples are;—इम में से कौन है. 'who of us is there?', *lit.*, 'from among us'; पुर में का एक मनुष्य, 'a man belonging to the town'; कोई राजसभा में से निकल्यो, 'some one went out from the court'; दिल्ली की गद्दी पर से अहमद शाह को उठाया, 'he removed Ahmad Sháh from the throne of Delhi', *lit.*, 'from on the throne'. Two postpositions are commonly used after verbs of *falling*, with the noun denoting that from which one falls; as, उस डाली पर से गिरा, 'he fell off that branch'.

a. In *Márwári*, the accusative postposition, ने (=H. H. को,) is also sometimes added to माहै, (=H. H. में,) when it becomes, literally, 'into'. Thus, in '*Dúngar Singh*', कूद पड़ो किलाक माहीने, 'jump into the fort'.

561. Before leaving the cases which are formed with postpositions, it is to be noted with regard to them all, that, inasmuch as the postpositions still partake more of the nature of prepositions than of true case-endings, when several nouns follow one another in the same case and construction, the postposition proper to them all is used only after the last. Thus, राजा भीमसेन की कन्या दमयन्ती का बच, 'the beauty of *Damayanti*, the daughter of *Bhím Sen*'; कल फूल बंद मूल से गुजारा करने लगा, 'he began to live on fruits, flowers, bulbs and roots'. But, much more rarely, the postposition may be repeated with both nouns or pronouns; thus, नंद जसोदा से इम ने तुम ने यह वचन किया था, 'you and I made this promise to *Nand* and *Jasodá*'.

Of the Vocative.

562. The vocative is used in calling or address, either with or without an interjection.

Examples :—*हे बेटे*, 'O son!'; *सखियों सुनो*, 'companions! hear'; *पुत्री ऐसी विकल मत हो*, 'daughter! be not so distressed'.

a. Certain words in *भाई*, often make the vocative in *इया*; as, e.g., from *भाई*, 'brother', *माई*, 'mother', vocative singular, *भाइया*, *माया*. In Garhwál, *ओ* is often similarly added to proper names; as, *हे पंचमो*, '*Pancham!*', etc.

b. In poetry, the writer often addresses himself by name in the vocative. Thus, *मंगलकरनी कलमलहरनी तुलसी कथा रघुनाथ की*, *lit.*, 'joy-inspiring. *Kali-yug*-impurity-removing, O *Tulsí*, is the story of *Raghu-náth!*'; *तुलसी ऐसे पतित को बार बार धिरकार*, '*Tulsí!* to such a sinner, again and again a curse!'

ADJECTIVES.

563. Little needs to be said here as to the construction of adjectives in the sentence. They may define a noun either (1) *attributively*, or (2) *predicatively*.

Examples are, of (1);—*बड़ा नगर*, 'a large town'; *मीठी आवाज़ी*, 'a sweet voice'; *बड़े घोड़े*, 'large horses'; and of (2); *वह अति सुन्दर थी*, 'she was very beautiful'; *यह जल ठंडा है*, 'this water is cold'; *मैं ने उस को व्याकुल देखा*, 'I saw that he was distressed'; *यह लाठी साधी बनी है*, 'this staff is made straight'.

a. The rules which govern the agreement of the attributive or predicative adjective with the noun qualified, will be found further on, in the section on 'Agreement'.

564. Adjectives are often used as nouns, in which case they are inflected like nouns of the same terminations.

Thus, *बड़ों के समय से*, 'from the time of the ancients (*lit.*, of the great)'; *किसी ज्ञानी ने कहा है*, 'some wise (man) has said'; *समरथ कई नहीं दोष गुसार्हे*, 'there is no blame to the powerful, *Gusárin!*'.

a. When two adjectives used as plural nouns; and connected by a copulative conjunction, follow one another in the same case, the first may take the singular, and the second only, the plural form; as in the phrase, *छोटे दो बड़ों ने कहा*, 'small and great said'.

565. *Comparison* has been explained and illustrated, §§169, 170. It may be noted in addition, that a very high degree of any quality may be expressed by repeating the adjective; as, काला काला, 'very black', मीठे मीठे फल, 'very sweet fruits'.

a. Or, for greater emphasis, the first adjective may be taken as a noun in the ablative; as, भारी से भारी पाप, 'the very greatest sins'; i.e., 'heavier than the heavy'; उत्तम से उत्तम वस्तु, 'the very best thing'.

566. Agreeably to § 545 (7), all adjectives used comparatively, require the noun with which the comparison is made, to be in the ablative.

Thus, पत्थर से भारी, 'heavier than stone'; राजा से धनी, 'richer than a king'; सब जीवों से श्रेष्ठ, 'the noblest of living creatures'; यह उस से उत्तम है, 'this is superior to that'.

567. Certain adjectives are followed by a noun in an oblique case. Thus, especially.

(1) Adjectives denoting *advantage* or *fitness*, or their contraries, govern a noun in the dative.

Thus, स्त्री को उचित है, 'it is proper for a woman'; हम को योग्य है, 'it is right for us'. (*Vid.* § 541, b.)

(2) Adjectives denoting *likeness*, *conformity*, *worthiness*, or the contrary, commonly take a noun in the inflected genitive.

Thus, बादल के गरज के समान, 'like the thunder from the cloud'; इस के तुल्य, 'equal to this'. So also, योग्य. (Urdú *جائز*, often written लायक.) in the sense of 'worthy', takes the genitive; as, यह पंडित के योग्य है, 'this is worthy of a wise man'.

a. When such adjectives are preceded by any infinitive or gerund, the postposition, especially in poetry, is often omitted, and the gerund put in the oblique singular. Thus, तुम मेरे पुत्रों को पंडित करके योग्य है, 'you are competent to make my sons wise men'; मैं तब दसन तोरिबे लायक, 'I am able to break your teeth'.

(3) A few verbal adjectives expressing desire or affection, take an objective genitive (§ 549, (11)); as, बच्चों का लोभी, 'covetous of money'; वह धन का लालची है, 'he is covetous of wealth'.

568. The adjective भर, 'full', is never used by itself; but partakes rather of the character of an affix, like the English 'full', in such phrases as a 'spoon-full', a 'house-full', etc. But भर is used much more extensively than the corresponding English 'full'. Any noun taking this affix is regularly inflected before it, as before the postpositions, whenever inflection is possible.

Examples :—पियाले भर, 'a cup-full'; हाँडी भर, 'a jar-full'. भर is used also with nouns of distance, as, कोस भर, 'as much as a kos'; and with expressions denoting time, as, दिन भर, 'the whole day'; मेरे जीवन भर, 'all my life long'; and with the pronominal adjectives. उतना, उतना, etc., when it has an intensive force; as, जितना उस ने मुझे दिया, उतना भर मैं उसे फिर देऊँगा, 'I will give him back just as much as he gave me'.

Rem. In examples like the last, where the noun or adjective with *bhar* is not inflected, *bhar* may be more correctly regarded as the conjunctive participle of *bharná*, 'to fill'.

569. Adjective formations with the affix ञा have been already explained and illustrated, §§ 165, 166.

NUMERALS.

570. एक, 'one', may be used for the English indefinite article (§ 148), in cases where that article is equivalent to the phrase, 'a certain'.

Examples :—एक पुरुष ने मुझ से कहा, 'a (certain) man said to me'; एक दिन की बात है, 'a certain day it happened', *lit.*, 'it is the thing of a (certain) day'.

Rem. It should be observed, that most Europeans use *ek* for the indefinite article much too freely. In the majority of cases, it should not be translated into Hindi.

571. एक, when repeated in the same clause and construction, is equivalent to 'each', or 'each one'. But when the first एक is in the subjective construction, and the other in the objective, the first must then be rendered 'one', and the second, 'another'.

Examples of both cases are as follows : एक एक चला गया, 'each one went away'; उस ने एक एक को वहाँ पहुँचा दिया, 'he conveyed each one

there'; एक एक से लड़ा, 'one fought with another'; एक एक से जुट गया, 'each one was joined to another'. So also when repeated in successive clauses, the first एक may be translated 'one', the second, 'another'; as, एक आता, एक जाता था. 'one was coming, another going'.

572. एक is often used elliptically in the beginning of a sentence; as, एक तुम्हारे ही दुख से हम दुखी हैं, 'one (thing is), I am troubled because of your trouble'. If the enumeration is continued, the ordinal दूसरा, may follow in the next sentence; but even more frequently फिर or पुनः, 'again', introduces the second particular in the enumeration; as, एक मैं मन्दमति . . . पुनः प्रभु मोहि बिखारेउ, 'one (thing is), I am of a dull mind; again, the lord forgot me'.

573. एक संग or एक साथ is rendered 'together'. Thus, सनमे एक संग सब भाई, 'all the brothers were born together'; सिंह गाय एक साथ रहते, 'the lion and cow would dwell together'. In this idiom, संग or साथ is to be regarded as a noun in the locative, with the postposition omitted.

574. For the use of the singular and plural form of nouns with numerals, see § 528 (1) a, Rem.

575. The *Aggregative* form of the numerals in जों (§176), is used when it is designed to indicate the noun as a collective whole.

Examples occur in the common phrases, आठों घहर, 'the eight watches'; चतुं दिस, 'the four quarters (of the heavens)'; तीनों लोक, 'the three worlds'. Similarly, सो ज्यों बसुदेव को व्याह दी, 'he gave those six in marriage to *Basudev*'.

576. Colloquially, a numeral with the postposition तक is used as equivalent to the English, 'as much as', 'as many as'. This phrase may be construed as a nominative; as, दस तक आर, 'as many as ten came'; मैं ने चार हाथी तक देखा, 'I saw as many as four elephants'.

PRONOUNS.

577. A Personal pronoun, when the subject of a verb, is very commonly omitted.

a. This omission is generally allowable when no emphasis is intended, and when it can occasion no ambiguity; as, e.g., in direct address; as, जाओ, 'go'; sc. तूम; ज़ोतूँ, 'may (I) speak?'.

578. Pronouns are to be regarded as of the same gender and number with the nouns to which they refer.

Thus, राजकुम्या जो भौमासुर ने छेर रखी थीं, 'princesses whom *Bhaumasur* had kept captive'.

a. But when it is intended to show respect, the pronoun is put in the plural, even when referring to a singular noun.

Thus, तहाँ के राजा . . . उन्हें ले जाते थे, 'the kings of that place would convey him along', where उन्हें refers to *Bahrám*. And in the following, उन्हीं refers to *Krishn*; हम उन्हीं का ध्यान किये रहते हैं, 'we remain in meditation upon him alone'.

b. The use of the plural for the singular of the 2nd personal pronouns, has already been explained (§ 194).

c. The use of the plural *ham*, for the singular *main*, 'I', is characteristic rather of eastern Hindi. The usage, however, is not regarded by the best authorities as in good taste, and it is doubtless better for the speaker to use the singular. Still we often find examples in literature of the use of *ham* for the singular; nor is it easy to trace any principle which guides the choice.

579. The use of the Honorific pronoun आप, for the 2nd personal pronoun, has been explained in § 211.

580. The usage of the various pronouns referred to in the above paragraphs cannot, in the nature of the case, be adequately illustrated by individual phrases separated from their context. But we may note such passages as the following. The demon *Bánásur* angrily calls to *Aniruddh*, को है रे तू गेह मन्तार, 'who art thou, thou within the house?'. (*P. S. Adhy. LXII*). So *Krishn* says with anger and contempt, तैं ने यह क्या किया, 'what is this (that) thou hast done?'. But again, when in the *Prem Ságar* one girl says to another, सबी तू कुछ चिंता मत करे, 'friend, do not thou be anxious', in this instance तू indicates affectionate familiarity. So the great sage *Vishvamitra*, with no intention of contempt, addresses in the singular the king *Harischandra*, as one ranking far beneath him; तुम से अधिक धनवान सो दानी कोई नहीं दृष्टि जाता है, 'no one appears more wealthy and liberal than thee'. A man says to his brother, in the 2nd person plural, साथ पास खेलें, 'let me play dice with you'; but a son to his father, आप इतना खतला दीजे, 'please inform me so much as this'; and *Bahrám* and others to *Krishn*; आप की आज्ञा से, 'obtaining your honor's permission'.

N. B. Observe, that आप, as the subject of a verb, always requires the verb to be in the 3rd plural; and if the imperative be used, the respectful form in हय्ने is invariably required. Occasional exceptions are irregular and not to be imitated. The following examples may be noted : आप कहाँ जाते हैं, 'where is your honor going?'; महाराज ऐसे आप ने क्या चिन्ह देखे, 'Great king! what such signs has your excellency seen?'; आप सिधारिये, 'be pleased to depart'. Similarly, all other predicates of आप must be in the plural; as, कन्व इस के पिता ऐसे कहते हैं, 'Kanya is in this way called the father of this (maiden)'.

Rem. In the opinion of the Hindoos, the distinctions which are made in the use of the pronouns, are of great importance; and the foreigner cannot be too careful to observe them in conversation with the people. Indeed, a failure to discriminate in the use of these different pronominal forms, is often the occasion of much unnecessary dislike and ill feeling on the part of natives of India toward foreign residents of the country.

581. The choice between the two forms of the dative and accusative which occur in the singular and plural of the pronouns (§ 206), is regulated to a great extent by euphonic considerations. But in accordance with the principles indicated in § 532 (1), the forms with को are preferred for personal objects.

a. But if a dative and accusative both occur in the same simple sentence, the form with को is apparently preferred for the accusative, and that in ए (plur. एं), for the dative.

582. The ablative singular of the proximate demonstrative, यह, is often idiomatically used to introduce a clause expressing a consequence or conclusion; as, इस से अब तुम तीरथ न्हाय आओ, 'do you therefore go and bathe at a sacred place'.

583. When यह and वह occur in contrasted clauses, यह may often be rendered 'the one', and वह, 'the other'. Thus, (*P. S. Adhy. LXXXVII*), ये धरे खनमाल वे मुंडमाल, 'the one wears a necklace of flowers, the other, a necklace of skulls'; and so repeatedly in the context.

584. The demonstrative, relative, and interrogative may be used adjectively before not only single nouns, but also entire phrases.

Thus, यह हमें बड़ा पाप भुगतना पड़ा, 'this expiating of a great sin has fallen to us'; तैं ने यह क्या किया जो केरी लोक लाख कान आपनी, 'what is this

that you have done, to abandon your family, and shame, and modesty?'; **हे समुद्र तू जो लंबी सांस लेता है सो क्या तुझे किसी का बियोग है, 'O ocean! art thou parted from some (loved) one, that thou heavest the long-drawn sigh?'**

a. Hence **जो** is used to introduce the *protasis* of causal and conditional clauses; and **जो**, less frequently, the *apodosis*. So also, the relative **जो**, especially in the locative, **जिस में**, and ablative, **जिस से**, or **जिस से**, is used to introduce final clauses denoting the object or purpose of an action. Illustrations of the above will be found further on, in the sections on adjective and causal adverbial clauses.

585. The relative and interrogative pronouns are often used, by *attraction*, for the indefinite pronoun.

Thus, **जो कोई बच से जाकर जो मांगता है, 'whatever any one goes and asks of him, that he obtains';** **क्या जानिये कि किस समय क्या करे, 'who knows what he may do at some time?'**

a. In poetry this attraction is often extended to a great length, as in the following: **मति कीरति गति भूति भलाई अब जेहि जतन जहां जेहि पारै, 'whoever, at any time, by any effort, in any place, has obtained intelligence, renown, felicity, wealth, prosperity'.**

586. **जो** is often used, especially in the colloquial, pleonastically with **है**, 'is'; thus, **परमेश्वर जो है सो सर्वशक्तिमान है**, where in English idiom we would simply say, 'God is almighty'.

587. The distinction between the two interrogatives, **कौन** and **क्या**, and that between the two indefinite pronouns, **कोई** and **कुछ**, has been already explained (§§ 208, 209).

a. The following idiom with **कौन** may be noted; **हम दुटानेवासे कौन हैं, 'who am I, that I should deliver (you)?'**

588. The usage of **कौन** in the plural varies. The Urdú oblique plural form, **किन**, is used; as, **किन लोगों का**, 'of what people?'. But the common people often use the uninflected singular in the oblique plural; as, **कौन लोग से**, 'from what people?'

589. **क्या** is used as both nominative and accusative; the oblique form in **जो** is appropriated to the dative.

Thus, **तुम क्या बोलते हो**, 'what are you saying?'; but, **तुम काहें जो बोलते हो**, 'why (for what) are you speaking?'

a. **क्या** is used idiomatically in expressions denoting surprise.

Examples:—देखती क्या है कि एक पुरुष सम्मुख आव कड़ा हुआ, 'what does she see (but) that a man has come and stands before her'; छोड़े दौड़े क्या हैं उड़ जाए हैं, 'the horses have run—(why,) they have come flying'.

b. **क्या** is sometimes used absolutely in the accusative, as in the following :

बस को मारने से परलोक क्या बिगड़ेगा, 'in what respect will (my) future life be harmed?'. Hence it is often used merely as the sign of a question; as, क्या तू ने आज तक नहीं सुना, 'hast thou not yet heard?'. The dialectic कि is also similarly employed (§ 228).

c. For the use of **क्या** as a conjunction, see § 516, *c.*

d. The postposition is sometimes omitted after **कारे**; thus, तू कारे रोवति है, 'why art thou crying?'.
 590. In further illustration of the distinction between the two indefinite pronouns, **कोई** and **कुछ** (§209), the following points may be noted :

a. **कुछ** is often practically used as a plural for **कोई**.

Thus, 'some book has fallen', is **कोई पुस्तक गिरी है**; but, 'some books have fallen', is **कुछ पुस्तकें गिरी हैं**.

b. When **कोई** is used substantively, the inflected form, **किसी को**, is commonly preferred for the accusative; but when it is used adjectively, if the accompanying noun be in the nominative form of the accusative, **कोई** also retains the nominative form, as in the following: अपने रहने को **कोई** ठौर रखोगे, 'will you keep any place for your residence?'.
c. **कोई** is used with numerals to denote a number approximately, like 'some' in English; as, **कोई** दस आदमी आए, 'some ten men came'.
d. With proper names, **कोई** must be translated 'a certain'; as, **कोई** उधो आया, 'a certain *Udho* (has) come'.
e. **कुछ** is used adjectively before substantives in any case singular or plural; as, **कुछ** दूर पर, 'at some distance'; **कुछ** गाँवों में, 'in some villages', etc.
f. **कोई** and **कुछ** in successive clauses must be translated 'one'.... 'another'; thus, **कोई** कुछ कहता था **कोई** कुछ, 'one was saying one thing, (and) another, another'; **किसी** को पानी बरसाय कहावा **किसी** को आम बरसाय

बलावा, 'raining water, one he washed away ; raining fire, another he burned (to death)'.

g. कुछ is added to the relative pronominal, जैसा, 'as (what-like)', to impart indefiniteness ; as, जैसा कुछ हो, 'of whatsoever sort it may be'.

591. The *Reflexive* pronoun, आप, may be used with both nouns and pronouns, when it is equivalent to the English 'self', 'myself', 'yourself', 'himself', etc., according to the context.

Thus, मैं अपने को खिला सकता हूँ, 'I am able to feed myself'; वह आप कहता है, 'he himself says'. The ablative, आप से, is often to be translated 'of one's own accord'; कुत्ता आप से चला गया, 'the dog went away of his own accord', or 'of himself'.

a. In the following, the plural आपस में, refers to the persons mentioned in the context ; आपस में दुःख की चरचा जली, in English idiom, 'they talked with each other of the sorrow'.

b. In the following, अपने is accusative singular ; हेतु अपने पुनि जानि, 'regarding himself, again, as the cause (of Rám's exile)'. *Rám. A.*

c. The reflexive is repeated in the idiomatic phrase, अपने आप, 'of myself, himself, itself', etc. (*sc. से*); as, क्या यह अपने आप मुक्ता है, 'has this bent of itself?'.

d. आप ही आप, is used in the drama, for the English 'aside'. It is evidently an abbreviation for आप ही आप से कहता है.

592. The reflexive genitive, अपना, must always be substituted in standard Hindí for the genitive, singular or plural, of all pronouns, when the genitive in question refers to the grammatical *subject* of the sentence, or to the *agent* in the passive construction (§332).

Examples :—तुम अपनी बड़ाई चाहते हो, 'you desire your own greatness'; राजा अपने देश को गये, 'the king went to his own country'; उस ने अपनी जान दी, 'he gave his life'.

a. अपना may also be used when the reference is not to the grammatical subject, but to the *subject of discourse*. Thus, in the *Prem Ságar*, तुम्हारा कुछ दोष नहीं है अपने कर्म का दोष है, 'it is no fault of yours, it is the fault of your fate'; जिस में अपनी कुशल होव सो कीजे, 'be pleased to do that wherein your safety lies'.

b. अपना is also sometimes employed, when the reference is to the

speaker ; as, *आवध अपना देश है*, 'Avadh is my country'. So also when another is associated with the speaker ; as, *यह सब अपने दिनों का कर है*, 'all this is the change of our times'.

c. But in the examples under *a* and *b*, the genitive of the personal pronouns might also have been used ; and *must*, in general, be used in such cases, where the use of the reflexive would occasion ambiguity.

d. *अपना*, as well as the other pronominal genitives, is idiomatically omitted when the reference is obvious ; as, especially, before nouns expressing relationship. Thus, *वह स्त्री पति के निकट जाय बोली*, 'that woman, approaching (her) husband, said' ; *मैं घर जाता हूँ*, 'I am going to (my) house'.

e. *अपना* is used substantively in the plural, to denote one's own kindred or connexions ; as, *जो तुम अपने ही को मारोगे*, 'if you will kill even your own (friends)'.

593. The pronominal *वतना*, is idiomatically used in the locative case with *मैं*, as an adverb of time ; as, *वतने मैं क्या हुआ*, 'in the mean while what happened ?'. Also observe the use of *वतने* in the following : *वतने जून आऊंगा*, 'I will come at this same hour'.

594. The oblique singular pronominals, *ऐसे* and *जैसे*, are colloquially used in the manner of prepositions governing the genitive, in the sense of 'like' ; thus, *कुछ किला को ऐसे दिखाई देता है*, 'something like a fort appears' ; *वह क्या तोप को जैसे सुनाई देता है*, 'what is that which sounds like a cannon ?'.

SYNTAX OF THE VERB.

The Infinitive.

595. The uses of the *Infinitive* may be classified under three heads.

(1) It is most commonly used as a *gerund* or *verbal noun*. Under this head we may note the following particulars.

a. As a nominative it often stands as the subject of a verb ; as, e.g., *हमें यहाँ रहना भला नहीं*, 'it is not well for us to remain here' ; *lit.*, 'for us, to remain here is not well' ; *मैं ने सुन्दारा कहना मान लिया था*, 'I (on the former occasion) believed your word'.

b. In accordance with the original use of the Sanskrit future pas-

sive participle, whence the Hindí infinitive is probably derived, it is often used as a subject with the copula, to express *necessity* or *obligation*; as, मनुष्य को मरना है, 'man must die'; तुम को वहाँ जाना है, 'you must go there'.

c. As an accusative, the infinitive is commonly used in the nominative form; as, तुम राम नाम कहना छोड़ दो, 'cease to speak the name of *Rám*'!

Rem. But in Permissive, Acquisitive, and sometimes in Desiderative Compound verbs, the infinitive in its inflected form, without the postposition, is practically used as an accusative. Examples will be found in §§ 361, 356, and, further on, in the Section on the Syntax of Compound Verbs.

d. The postposition को, of the dative of the final cause (§ 540, (5)), is very commonly omitted; as, हम आप से कुछ माँगने आए हैं, 'I have come to ask something from you'; स्त्रियाँ न्हात आरँ, 'the women came to bathe'. So also the genitive postposition is often omitted from the infinitive before certain adjectives, as, लायक, योग्य, etc., especially in dialectic Hindí; as, e.g., राजा हिरण्यगर्भ के गुण प्रीति करिखे जोग हैं, 'the virtues of the *Rájá Hiranyagarbha* are worthy of being esteemed'; मैं तब दसन तोरिखे लायक, 'I am able to break thy teeth'.

e. The dative of the infinitive, as remarked §540, (5), is idiomatically used with the substantive verb, to denote an action as *imminent*. Thus, नारद जी उठने को हुए, '*Nárad Jí* was about to rise'; वह गड़िये की मई, 'she was about to clasp him'. In this idiom को must always be used, as also in phrases like the following; दुर्योधन ने द्रौपदि को जाँघ पर बैठने को कहा, '*Duryodhan* told *Draupadi* to sit on his lap'.

f. Occasionally, an action or event about to happen, is also denoted by the infinitive with पर. Thus, जब पाँच बरस बीतने पर आए, 'when five years were drawing to a close'.

g. The genitive of the infinitive is often used, chiefly in negative clauses, as the predicate of a sentence, to express *certainty* or *resolution*; as, मैं नहीं कहने का, 'I certainly will not tell'. In this idiom, the का of the genitive must be inflected to agree in gender and number with the subject; as, e.g., यह स्त्री नहीं जाने की, 'this woman certainly is not going'. In the *Rámáyan* the same idiom occurs, the postposition, however, being omitted; as, भे न भाद अहाँई न होने, 'he neither has been, nor, brother, is he, nor will he be'. The same idiom occurs in the following, where the emphatic particle उ or हुआ is added to the infini-

tive: **बन्दे खम कोउ . . . है नहिं कतहूँ होनेहु नाहीं**, 'like these . . . are none, nor even ever is to be'; **भयउ न है कोउ होनेउ नाहीं**, 'like you, none was, nor is, nor even is to be'.

b. While thus used as a noun, the infinitive may also govern the case proper to it as a verb. Of this, the examples already given, afford abundant illustration.

(2) The infinitive is occasionally used *adjectively*, and is then made to agree with its object in gender.

Thus, **स्त्री को पति की सेवा करनी योग्य है**, 'a woman is bound to serve her husband'; **एक वस्तु पायकरि छिराय देनी**, 'having found a thing to mislay it'.

(3) The infinitive is correctly used for the *imperative*, when it is not intended to insist on the immediate fulfilment of the order, but merely to say that a certain thing *is to be done*.

Thus, (P. S. Ch. XLVIII.) *Jasodā* says to *Udhā* about to go to *Krishn*; **यह तो तुम श्री कृष्ण बलराम प्यारे को देना**, 'this, then, you are to give to dear *Shrī Krishn* and *Balrām*'.

The Imperfect and Perfect Participles.

596. The essential distinction between these two participles has been already indicated (§ 316), and will receive abundant illustration from the examples in the following sections. As there is no difference in their use, they are conveniently treated together.

(1) They are used *adjectively* with nouns and pronouns, both in the *attributive* and the *predicative* construction. In this case the participle **हुआ** or **भया**, of the substantive verb, duly inflected if necessary, is regularly added to the participle. But when there is no danger of ambiguity, this may be omitted.

a. Examples of the *attributive* use of these participles are as follows: **कमकमाते रथ पर बैठी जाती थीं**, '(the women) were going, seated on the glittering chariot'; **कोई दुष्ट मरा हुआ काला नाग तुम्हारे पिला के बँड पर डाल गया है**, 'some evil person has cast a dead black snake upon

your father's neck'; तुम ने दान की हुई गाय फिर दान की, 'a cow already given as alms, you gave in alms again'; उन्हों ने तुम्हारी बिल्हे संपदा पाई, 'they received the property given by you' (*lit.*, 'your given property').

b. In the following examples these participles are used adjectively in the *predicative* construction: लिन के पीछे एक झुड़ मारता जाता है, 'a *Shúdra* beating them, follows'; जरासिंह भी वहाँ कड़ता हुआ उन के पीछे दौड़ा, '*Jarasindh* also, thus speaking (as he went), ran after them'; जो मैं जीती जाऊँगी, 'if I escape alive'; क्या तैं ने अर्जुन को दूर गया जाना, 'did you suppose *Arjun* to be gone far away?'. Similarly, in the *Rámáyan*;—वह मोहि मांगे देवु, 'give me this which I have asked', *lit.*, 'give this to me having asked'; वो मुझ कोटिहिं न परै कही, 'that with ten million mouths could not be told', *lit.*, 'fall told'; अरन परत नृप राम निहारे, '*Rám* beheld the king falling at (her) feet'.

c. Usually when the noun qualified takes *को* in the singular or plural, a predicative participle remains uninflected whatever be the gender or number of the noun; thus, उन दोनों को लड़ता देखि, 'seeing them both fighting'.

d. Under this head are properly explained the so-called Continuative Compound verbs (§ 358). Thus, *e.g.*, in वह स्त्री गाती रही, 'that woman remained singing', it is plain that the imperfect participle, गाती, is simply a predicative adjunct of the noun स्त्री after रही. The same remark applies to analogous combinations with the perfect participle; as, *e.g.*, in वह भागा जाता था, 'he was fleeing away', where भागा is a predicative adjunct of वह.

e. Here may also be noted the common phrase, होता आता आना, where both होता and आता are predicative adjuncts; as, *e.g.*, यह परंपरा से होता आया है, 'this has come along down from old time'. In this, as in the similar phrase, होता आता आना, होता represents the action as repeatedly occurring during the time indicated.

(2) The perfect and imperfect participles are constantly used *absolutely* in the inflected masculine form, to denote various circumstances of time, manner, etc., accompanying the leading verb.

Examples:—एक ब्राह्मण आप को दर्शन की अभिलाषा किये खड़ा है, 'a Brahman, desirous of beholding your excellency, is standing (at the door)'; वह मन मारे जी हारे भारी खाँसी से रही है, 'she, broken in spirit and dis-

heartened, is drawing heavy sighs'; यह मुझे निगले जाता है, *lit.*, 'this (serpent) is going, me swallowed', *i.e.*, 'he is devouring me'; कृष्ण साथ रहते हम क्या डरे, '*Krishn* remaining with (us), what should we fear?'.
 a. The perfect participle absolute लिये, of लेना, 'to take', is often equivalent to the English preposition 'with'; as, कोई ब्राह्मण कांस में बोधी लिये आता है, 'some Brahman, with a book under his arm, is coming'.

b. The perfect participle absolute is especially common in expressions which denote 'time elapsed'; as, पाँच बरस हुए वह चला गया, 'five years ago, he went away'; कितने एक दिन बीते राजा फिर गये, 'several days having passed, the king went again'.

c. In these participles absolute, in eastern Hindî, संते * is often used for होते; as, यह असंभव संते, 'this being impossible'. In the following, संते is redundant : इस देह को त्याग करत संते, 'in leaving this body'; विधवा भर संते पुत्रों के अधीन रहे, 'having become a widow, let her remain subject to her sons'.

d. These participles absolute are even more common in poetry than in prose. Thus, विद्यत न करब सवतिसेवकारे, 'while I live, I will not serve a rival wife'; कटत सीस नृप पैतृक तट्यो, 'king *Pautrik*, on his head being cut off, obtained salvation'; तसु बचन सुनिते सब डरो, 'on hearing her word, all feared'; तुम तौ...धरे देह जनु रामसनेहू, 'you are, indeed, love to *Rám*, as it were, incarnate'.

e. In archaic poetry, the perfect participle absolute is often used where modern Hindî would have the conjunctive participle. Thus, गये भवन पूछहिं पितामाता, 'having gone home, they asked their parents'; यथा नवाहिं बुध विद्या प्राये, 'as bow the wise, having received knowledge'. And so *Chand* (as quoted by Mr. Beames); वसि किये भूमियां छुनि बरम, 'having subdued the rulers of the land with fire and sword'.

Rem. It will often be impossible to express in English idiom the distinction between the participle absolute and the predicative participle, and often it is a matter of little consequence which is used. But the distinction appears to be as follows. In the predicative construction the participle describes or defines the *subject* of the verb; in the absolute construction it defines after the manner of an adverb, the *verb* itself. Thus, *wah rotá huá chalaá játá thá*, 'he was going along weeping'; but, *wah rote hue chalaá játá thá*, is rather, 'he was going along tearfully'.

* For the Sanskrit सति, pres. part. loc. absol. of सृ, 'to be'. Vid. Williams' Sanskrit Grammar, § 840.

f. It will be evident from the above examples that in the so called Statistical or Statical compound verb (§360), we have simply an imperfect participle absolute in construction with a finite verb; as, e.g., in *ek apsará gáte át*, 'a nymph came singing'. So also, the so called Adverbial participle is nothing more than the imperfect participle absolute, with the emphatic particle *hí*. The perfect participle is similarly employed; as, *rúp dekhe hí ban áwe*, 'having actually seen (her) beauty, (description) may succeed'; *gaye hu majjana na pá-wá*, 'even having gone, he could not bathe'.

(3) In the third place, both these participles are often used as *substantives*, both with and without the postpositions.

Examples :—*उस सेते का पलंग उठाय*, 'lifting the bedstead of the sleeper'; *उस ने सब के देखते रुकम को मार डाला*, 'he slew *Rukm* in sight of all'; *मेरे गये का सोग*, 'grief at my departure'; *मेरा कहा मानिये*, 'obey my word'; *सूरज डूबते समय*, 'at the time of sunset'; *उस के पूछे तें क्या प्रयाजन*, 'what is the use of having asked him?'

a. As substantives, these participles are often construed with a preposition; as, *युद्ध बिना किये*, 'without having fought'; *बिना मेरे गये नहीं सुलेगा*, 'it will not be disclosed without my having gone (there)'.

b. The substantive use of these participles is also common in poetry. Thus, *सुकृत आय अस कहत तुम्हारे*, 'may your merit perish, for your speaking thus'; *रहत न प्रभु चित्त चूक किये की*, 'the defects of (our) work remain not in the mind of the Lord'; *देह धरे कर यह कल*, 'this is the fruit of having assumed a body'. So is to be explained a common idiom of the imperfect participle with the verb *खनना*, 'to be made'; thus, *भरतमुख खनै न उत्तर देत*, *lit.*, 'from the mouth of *Bharat* no reply is made', *i.e.*, '*Bharat* could frame no reply'.

Rem. In many cases it is impossible to distinguish this substantive use of the participle from the participle absolute. Thus, in the following, *muyai* may be explained in either way: *muyai karai há sudhá taḍgá*, 'when dead' (or 'to a dead man') 'what avails a lake of nectar?'

The Conjunctive Participle.

597. The chief uses of the *Conjunctive* participle may be classified as follows.

(1) It is used to denote an action as merely *preliminary* or *introductory* to the action of the leading verb.

a. As thus employed it is very commonly used where English would have the copulative conjunction. It is, indeed, always

idiomatically preferred to the conjunction, except when the two clauses are distinctly of co-ordinate importance. Thus we say, पाठ-शाला को जाकर पढ़ा करता है, 'he goes to school and reads', because the first verb is merely preliminary to the action of the second. But, again, we must use the conjunction in the following: वह पढ़ता और लिखता है, 'he reads and writes'; because the two actions are co-ordinate. Other examples of the preliminary use of the participle are as follows: वहाँ जाकर उस से कहो, 'go and tell him', *lit.*, 'having gone, tell him'; कोई भोजन बनाय जिमाय, 'one would prepare food and give him to eat'; शिला उठाया तो देखे, 'lifting up the stone he then sees—'; चित्ररेखा से ऐसा कह कर उठा बैठा, 'having spoken thus to *Chitrarekhá*, *Ushá* sat down'.

a. In rendering such English phrases as 'go and see', 'did you go and call him', where the leading verb is preceded by the verb 'to go', Hindí idiom often reverses the English. Thus, 'go and see', is देखि आइयो, *lit.*, 'having seen, come'; वह ब्राह्मण को बुलाय आया, 'he has gone and called a Brahman', *lit.*, 'has come, having called a Brahman'.

Rem. In this idiom, the participle formed with the affix *i* or *y*, is commonly preferred to that with the affix *kar* or *ke*.

b. It is well to note here the distinction between the conjunctive participle, and the perfect and imperfect participles absolute. The conjunctive participle represents the action without any reference to its progress; the two participles absolute add each their own characteristic idea, denoting the action as in progress or completed. Thus, *wah kapre pahinke báhar áyá*, is 'having dressed he came out'; *kapre pahine báhar áyá*, is 'he came out dressed'; and *kapre pahinte báhar áyá*, 'he came out dressing', *i.e.*, 'in the act of dressing'. But English idiom is often incapable of expressing the distinction between the conjunctive participle and the perfect participle absolute; and, as remarked § 596 (2) e, in old Hindi, the perfect participle often takes the place of the conjunctive.

(2) By a natural transition, the conjunctive participle, from denoting simple antecedence, comes also to express the *cause* of the action of the leading verb.

Examples:—बानासुर अति भय स्त्राय भाग गया, '*Bánásur*, greatly fearing, fled away'; नगर को जलता देख सब यदुवंशी भय स्त्राय पुकारे, 'seeing the city burning, all the family of *Yadu* cried out with fear'.

a. It should be observed, that although the causal relation may thus be expressed by the conjunctive participle, yet when it is intended to give prominence to the causal relation, it is expressed

by some tense of the verb in a subordinate clause. Thus, without such emphasis, we may say, यह मनुष्य अति अपवित्र हो नष्ट हो जायगा, 'this man, being very unholy, will perish'; but if we wish to make the cause more prominent, we must say, यह मनुष्य जो अति अपवित्र है वह नष्ट हो जायगा, 'since this man is very unholy, etc.'; or, again, यह मनुष्य नष्ट हो जायगा, क्योंकि अति अपवित्र है, 'this man will perish, because he is very unholy'.

(3) The conjunctive participle may also denote the *means* by which an action is effected.

Thus, कलिन्दी ने हरि को पाँव दाब जगाया, 'Kalindī awaked Hari by pressing his feet'.

(4) It sometimes has a *concessive* force.

a. This is especially the case with the conjunctive participle होकर, etc., of होना, 'to be'; thus, तिस को देख सुन बड़े बड़े मुनीश होकर उठे, 'hearing and seeing him, great and mighty sages though they were, they arose'; ऐसे सूर हो स्त्री पर शस्त्र करो, 'being such a brave, do you raise a weapon against a woman!'

(5) It is constantly used to express various circumstances accompanying the action of the leading verb.

a. In this *modal* sense, it may often be best rendered into English by an adverb of manner, or by some equivalent phrase. Examples are as follows: उस ने हँसकर कहा, 'he laughingly said'; धित दे सुनो, 'listen attentively!', *lit.*, 'giving attention, hear!'; वह क्रोध कर बोला उठा, 'he spoke up angrily'; तुम ने महा अधर्म जानकी कियौ, 'you have knowingly committed a great wrong'.

b. Under this specification may be noted various idiomatic uses of करके, etc., conjunctive participle of करना, 'to do' or 'make'. Thus, दो दोनो ब्राह्मण मेरी मेरी कर भगड़ने लगे, 'those two Brahmans, crying Mine! Mine! began to quarrel'; आत्मा अपने को उन के साथ एक करके समझता है, 'the soul regards itself as one with these'; तुम हरि को पुत्र कर मत जानो, 'do not regard Hari as a son'. कर or करके is thus often added to nouns, when it gives them an adverbial force; as, वह अति मान सन्मान कर बोले, 'he, with the greatest respect and deference, said', or 'most respectfully said'. Similarly, it is added to some pronominals; as, रात की बात सब कर सुनाती हूँ, 'I am going to tell you in full the affair of the night'.

c. The conjunctive participle of होना, 'to be', is sometimes equivalent to 'as', in such phrases as the following: मैं ब्रह्मा हो बनाता हूँ विश्व

हो पालता हूँ, शिव हो संहारता हूँ. 'as *Brahmá*, I create, as *Vishnu*, preserve, as *Shiv*, destroy'.

(6) The conjunctive participle **बढ़कर**, is sometime used as an *adjective*; thus, **इस से बढ़कर नहीं है**, 'there is none superior to this'.

(7) Occasionally, certain conjunctive participles have a *prepositional* force. Thus, *e.g.*, **वह गाँव इस से थोड़ा आगे बढ़के है**, 'that village is a little beyond this'; **वह पुरवा सड़क से कुछ हटके है**, 'that hamlet is somewhat off the road'; **इस को छोड़के और कोई नहीं**, 'there is no other besides this'; **जिस जिस देश में हो प्रभु जाते थे**, 'through whatever country the lord was passing'; **वह गाय रुपये ले नहीं दी जाती है**, 'that cow is not given for money'; **उस ने पियाला भरके दिया**, 'he gave him a cupful'.

a. The conjunctive participle **कर** or **करके**, of **करना**, 'to make', is especially common in this prepositional sense; as, **बल करि हीन**, 'deprived of strength'; **जिस करके**, (§548,) 'through which', etc. Very idiomatic is the use of **करके** in the following: **एक पाँच तत्व करके मृत्यु है**, '(there) is one death, pertaining to the five elements'; *i.e.*, 'there is one death, of the body'.*

b. The conjunctive participle **मिलके**, 'having met', must sometimes be rendered 'with' or 'together'. Thus, **ज्ञान ध्यान मिलके विसरायो**, 'he caused them to forget both knowledge and contemplation'; **दोनों मिलके गये**, 'both went together'.

598. Ordinarily, as in most of the above examples, the conjunctive participle refers to the subject of the leading verb, or, in the passive construction of the perfect tenses, (§ 332,) to the agent. But sometimes it may refer, instead, to the subject of discourse. Thus, **राज्ञी को कुछ सोच समझकर धीरज आया**, 'the queen, somewhat reflecting and understanding, became composed'. This is especially frequent in poetry; as, **बँधु निधन सुन उपजा क्रोधा**, 'hearing of the death of his brother, (his) wrath arose'. In the story of *Dharm Singh*, (in *Gutaká*,) the conjunctive participle once refers to the agent of a verb in the passive conjugation; thus, **मारके तू निकाला गया**, 'thou wast cast out by beating'. This idiom is often heard in the colloquial.

599. There is no difference in meaning between the different forms of the conjunctive participle. The forms in *kar* and *ke* are the most modern, and are

* The Hindoos believe the body to be composed of the five elements, *viz.* 'earth', 'fire', 'air', 'ether' and 'water'; and suppose death to consist in the dissolution of these elements.

preferably employed in modern standard Hindî. But in a long succession of participles, where the repetition would be disagreeable, the root-form is often preferred. When two participles of similar meaning follow each other with no word intervening, *kar* or *ke* can be used only after the last; as, *jān bīj kar*, 'knowing'; *soch samajhkar*, 'reflecting and understanding'; *khā p̄kar*, 'eating and drinking'. So also when the participle immediately precedes the leading verb, as in certain *quasi* compounds, §351, the root-form is usually employed; as, *wah uṭh dhāyā*, 'he arose and ran'; *kāshī ho āyā hai*, he has come by way of Benares'.

600. By means of conjunctive participles, a sentence may be idiomatically sustained to a great length, without any danger of obscurity; thus, *वहाँ से उठ उग्रसेन के पास जाय सब समाचार सुनाय उन से विदा हो बाहर आय बरात की सब समा मंगवाय मंगवाय हकट्टी करने लगे*, 'rising thence, going to *Ugraven*, and telling all the news, taking leave of him and going out, they began, sending hither and thither, to gather all the supplies for the marriage procession'.

The Noun of Agency.

601. After the verbal Noun of Agency in *वाला* or *द्वारा*, the object of the action is regularly put in the genitive.

Examples:—*ऐसे काम का करनेवाला*, 'the doer of such a deed'; *पापी लोगों का सारनहारा*, 'the savior of sinners'.

a. In many cases, the genitive postposition is omitted from the object of the verbal noun, and it therefore appears in the nominative form of the accusative; as, *प्रेम करनेवाला*, 'one who exercises love'; *प्रजा को दुख देनेवाला*, 'a troubler of the people'; *वह गीत गानेवाला है*, 'he is a singer of hymns'.

Rem. Native grammarians deny that in such phrases as the above, the noun is to be regarded as an accusative. They say that there is *samāsa*, 'union', of the noun and verb; so that the object of the verbal action and the noun of agency, are to be regarded as forming a genitively dependent compound.

602. As the predicate of a sentence after the substantive verb, the noun of agency is often nearly equivalent to a future participle. Thus, *वह यहां से जानेवाला है*, 'he is about to go from here'.

Of the Tenses.

603. As already shown, (§§ 315, 316,) the tenses of the

Hindí verb are properly distributed under three heads, as follows : (1) the tenses denoting *future* action; (2) those denoting action as *imperfect* or *incomplete*; (3) those denoting action as *perfect* or *completed*. For a brief statement of the distinction between the several tenses of each group, the student may refer to §§ 316, 323.....328. The statements made in those paragraphs, it is hoped, will be justified by the illustrations of the use of the several tenses which will be found in the following sections. We begin with the tenses of the *future*.

The Contingent Future.

604. The Contingent future, in modern standard Hindí, denotes a future action as conditioned or contingent. We may specify the following cases.

(1) It is used, in simple sentences, to express a *possibility*.

Thus, कोई कहे, 'some one may say'; तुम सहित गिरि से गिरी, 'with you I could drop from a mountain'.

(2) It is therefore used in the *protasis* of conditional clauses, when the condition is not regarded as an objective reality, but only as a *possibility*. And similarly it is employed, in the *apodosis* of conditional clauses, whenever the conclusion is only affirmed as *possible*.

Thus, in the *protasis*, we have, जो तुम उस को एक बार देखो तो फिर ऐसी न कहोगे, 'if you once see her, then you will not again say such a (thing)'; and, in both *protasis* and *apodosis*, इसी के समान बर मिले तो दें, '(if) a husband be found (who is) her equal, then we may give (her)'.

(3) Similarly the contingent future is required in *relative* clauses implying a condition, when the condition is merely supposed to exist.

Thus, मन क्रम बचन कपट तत्ति जो कर भूसुरसेव, 'whoever, abandoning deceit, in heart, deed, and word, serves the lords of the earth (i.e., Brahmins)'.

(4) Hence, again, it is used (a) in all *final* clauses denoting *purpose*, and (b) in all clauses denoting the *result* of an action, when that result is regarded not as a reality, but merely as a future possibility.

Thus, under (a), इस बात की चर्चा हम ने इस लिये की है कि... उस का शंका दूर हो जाय, 'I have mentioned this thing that... his doubt may be removed'; and, under (b), मुझे ऐसे बली कीजे कि कोई मुझे न जीत सके, 'make me so powerful that no one may be able to overcome me'; ऐसे उपाय करो जिस से वह राक्षस फिर मिले, 'contrive some plan by which I, may again meet that royal sage'.

(5) It may express *liberty*.

Thus, आजा हो तो हम घर जाय. 'if permission be given, then we may go home'; मार तो डालूँ, 'I might, indeed, kill (her)'; and in questions; as, मैं जाऊँ, 'may I go'; हम यहाँ रहें, 'may we remain here?'.

(6) It must be used in all interrogative phrases relating to the future, which imply *uncertainty* or *perplexity*.

Thus, हम इस लड़की को किस को दें, 'to whom shall we give this girl?'; हम क्या करें, 'what shall we do?'.

(7) It must be used to denote a future action or event when the time of its occurrence or continuance is regarded as *indefinite*.

Examples:—जब यह ध्वजा आप से गिरे तब मेरे पास आइयो, 'whenever this banner shall fall of itself, then come to me'; जब हम पुकारें तब उत्तर दो, 'when we call, then answer (us)'; जब तक मैं यहाँ रहूँ, 'so long as I remain here'.

(8) It is also sometimes used to express an *intention*.

Examples:—जो मैं आज आप से न मिलूँ तो आग में जलूँ, 'if I be not united with you to-day, then I will burn myself to death'; जो हम हारें तो तुम्हारे दास होकर रहूँ, 'if I am beaten, then I will remain with you as a slave'; मैं तुम्हें क्या मारूँ, 'why should I kill thee?'.

(9) It is used to express a *wish*.

Examples:—किसी दिन मैं आप अपने को न भूल जाऊँ, 'may I not some day forget my own self'; पावडं में तिन्ह करि गति घोरा, 'may I obtain their fearful fate'; मोहि संकर देऊ, 'may Shankar (i.e., Shiv) give me'.

(10) It is used in *comparisons*, denoting that with which

the comparison is made, not as an objective reality, but merely as a supposed case.

Examples :—बलदेव ची का क्रोध यों बढ़ा, जैसे पून्यो को समुद्र की तुरंग बढ़े, 'the wrath of *Balder* swelled, as will swell the tide of the sea at full moon'; यों चीर डाला कि जैसे कोई दातन चीर डाले, 'he split him, as one might split a tooth-stick'.

(11) It may express a *concession*.

Examples :—स्त्री अपने पति से जितना कष्ट पावे. 'however much hardship a woman may experience from her husband'; कवि न होऊं न चतुर कहाऊं. '(though) I be not a poet, nor be called clever'.

(12) It is employed to express *propriety* or *duty*; and after clauses expressing 'fitness', 'unfitness', etc.

Examples :—फिर उस को यह भी दिखावे, 'again, it should show him this also'; तुम को कब योग्य है कि अन में बसे, 'when (*i.e.*, how) is it befitting you that you should live in the wilderness?'

(13) It is sometimes used, in the 2nd singular, for the *imperative*.

Examples :—तू हमारे चरण मत परसे, 'do not thou touch our feet'; मेो सेां कपट करै जिन पियारी, 'do not deceive me, beloved!'

605. It is important to observe that the accurate discrimination which has appropriated the Contingent Future exclusively to the indication of *contingent* futuration, belongs only to the most modern development of the language. In old Hindí, as, *e.g.*, in the *Rámáyana*, the forms denote not only contingency, but also the certain futuration of an action, and even, as previously remarked, an action in the present. The proverbs of the language afford abundant illustration of the use of this tense in its original character, (§459,) as a present. Thus, *e.g.*, *háth ko háth pácháne*, 'the hand knows the hand'. Other illustrations will be found in the section on the syntax of the Present Imperfect.

The Imperative.

606. The imperative needs little illustration. We may observe,

(1) It is the only tense ordinarily admissible in command and prohibition.

N.B. The future cannot be substituted for the imperative. 'Thou shalt not steal', in Hindí is *tú choré na kar*; *choré na karegá*, would be 'wilt not steal'.

(2) In prohibition, न or मत may often be indifferently

used. But when the phrase consists only of the imperative and the negative, मत्त is preferred to न; thus, मत्त जाओ, 'do not go'; मत्त दौड़ियो, 'do not run'. नहीं, as containing the present of the substantive verb, (§372,) cannot be used with the imperative.

(3) The use of the singular and plural forms of the imperative is determined by the pronominal form which is used. (§§ 578, a, 580.)

(4) To the 1st and 3rd persons of the imperative are to be assigned all hortatory phrases.

a. But it is to be noted that whenever the English 'let', means to 'allow' or 'permit', not the imperative, but the permissive compound must be used. Thus, 'let us go', in the hortatory sense is हम जाय; but if it mean, 'permit us to go', we must render the phrase, हम को जाने दो.

b. Further examples of the use of the imperative are as follows: शकुन्तला से भी पूछ, 'ask (thou) *Shakuntalá* also'; तुम तो यादवों को मारो, 'do you then destroy the *Yádavs*'; हम भी बैठें, 'let us too sit down'; खो बानासुर से जाय कहें, 'come, let us go and tell *Bánásur*'; तेरे मन को दुख परिहरौ, 'let me remove the sorrow of thy heart'. Poetic examples are;—पावक महं करहु निवासू, 'make your abode in the fire'; हो जानक कतसंग प्रभाच, 'know, (that it was) in virtue of good association'; ताहि बोह तू फूल, 'sow thou for him flowers'.

The Respectful forms of the Imperative.

607. Of the two Respectful forms of the imperative, in वे and ये, the latter is the more respectful. The form in वे is properly used only to equals and inferiors; that in ये, to equals and superiors, but never to inferiors. The less frequent form in वेग does not differ from that in वे.

Thus, in the *Prem Ságar*, *Satrajít* says to his wife, तू किसू के सेहीं मत कहियो, 'do not mention (it) before any one'; and *Krishna* to his companions, तुम दस दिन तक यहाँ रहियो, 'remain here for ten days'; and the Sun-god to *Satrajít*, त्व को मेरे समान जानियो, 'regard this (person) as equal to me'. But the cowherds say to *Krishna*, त्व महा भयावनी गुफा में आप भी न जाइये, 'into this great (and) dreadful cave neither let your honor enter'; again, to *Krishna*, मुझे दास समझकर कृपा रखियो, 'regarding me as your servant be pleased to have mercy';

करिय न संशय अस तर आनी, 'raising such questions in your heart, cherish no doubt'.

a. In the following, the respectful form is used in the 1st plural, in a hortative sense : देखिय कपि कहाँ कर आही, 'let us' (or 'me') 'see the monkey, of what place he is'.

608. Forms outwardly identical with these respectful forms, are often used, especially in poetry, for the contingent future, and even for the present. Thus, जो मर जाहये तो संसार के दुख से छूटिये, 'if one die, then he is released from the sorrow of the world'; चायस पालिय अति अनुरागा, '(though) one bring up a crow with extreme affection'; जाहय किनु जोलेहु न संदेहा, 'though you should go even without having been called, there is no danger'.

a. In the following, the form in *र* is used in the 1st singular of the contingent future; as, इस लिये में आया हूँ कि अपने भाइयों को ले जाय माता को दीजे, 'I have come here for this (purpose) that I may take away my brothers, and give (them) to (my) mother'.

b. In the following, the form in *येगा* is used for the absolute future; जद आप कोपियेगा तधी भाग जायगे, 'when your honor shall please to be angry, then at once they will flee away'.

609. The explanation of the use of these forms in *ya, ye, etc.*, in these various tenses, is to be found in their derivation from the Prākṛit affix *jja*, which in Prākṛit appears not only in the imperative, but was also added to the root to form a present and future. (Vid. §§ 459, Rem. 2, 462.) It is not therefore correct to say, as many do, that these respectful forms of the imperative and absolute future are used for the present and future.

610. In many cases, again, these forms in *हये* and *हय* must be interpreted as the remainder of the old Prākṛit passive conjugation formed with the suffix *ijja*, (§ 467,) now almost obsolete. Thus, in particular, I would interpret the common idiom with *चाहिये*, expressive of 'duty' or 'obligation'; as, हमें यहाँ जाना चाहिये. Here जाना, (sometimes जाया,) is evidently the nominative to *चाहिये*, and we may render, *lit.*, 'with respect to us, to go there is' (or 'should be,) desired'. In the following examples also, these forms in *य* should be explained as passives : न जानिये यह कौकर जिया, *lit.*, 'it is not known how this (man) lived'; हमें जो जो वस्तु चाहिये, 'whatever things we ought to have'; *lit.*, 'whatever things should be desired for us'; क्य जो लुनिय, लहिय जो दीन्हा, 'that is reaped which was sown, that is received which was given'; सुधा सराहिय अमरता, गरल सराहिय मोच, 'ambrosia is praised by Immortality, poison is praised by Death'.

The Absolute Future.

611. As remarked in § 316, in the absolute future a future action or state of being is either (1) affirmed, or (2) assumed as a *certainty*.

Examples : (1) ऐसा घर घर और कहीं न मिलेगा, 'such a husband (and) house will not be found elsewhere'; मैं कल आऊंगा, 'I will come tomorrow'; अब तुं या कौं मारिहौं, 'I will kill this (snake) immediately'; भसी भाँति पछताव पिताहूँ, 'you, (my) father, will thoroughly repent (of this)'; हँसी करैहहु पर पुर आरै, 'you will cause a laugh, going to a strange city'; अब क्यों जीवैहंगे, 'now how will we live'; जहाँ तुम जावगे, तहाँ हम हूँ जावंगे, 'where you go, there I will go': (2) जो कृष्ण को देंगे, तो लोग कहेंगे, 'if we shall give (her) to *Krishna*, then people will say—'; ये माट अब न पावेंगे, तो अपकीर्ति करेंगे, 'if these bards shall receive nothing, then they will give us a bad name'.

612. The future of the substantive verb is often very idiomatically used, both alone and as an auxiliary, to denote what is *presumed* to be true.

Thus, पिता कन्व को ये तुम से भी अधिक पियारे होंगे, 'to (our) father *Kanva*, these are doubtless dearer than even thou (art)'.

a. The future 3rd singular, होगा, is thus often used alone, in answers, as equivalent to the adverb 'probably'. Thus, क्या यह नगर बहुत पुराना है? होगा, 'is this town very old? Probably'.

613. Occasionally in the *Rāmāyan*, the future in हौं, हहि, etc., has an optative sense. Thus, होइहहु संतत पियहि पियारी, 'may you ever be dear to (your) husband'; मेो से सठ पर करिहहिं दाया, 'may (the prince of *Raghu*) be gracious to a wretch like me'.

Tenses of the Imperfect Participle.

614. The characteristic common to all the tenses of the Imperfect Participle, is the indication of an action, under various modifications of mode and time, as *unfinished* or *incomplete*. We consider, first,

The Indefinite Imperfect.

615. This tense, primarily, denotes an incomplete action,

without necessary reference to any time. It may therefore refer to the past, present, or future. It is moreover employed both in an indicative and a contingent sense.

(1) It is frequently used to denote an action in *past* time as *repeatedly* occurring.

Examples:—जब कभी छात पा जाते उस को बिना छोड़े न छोड़ते, 'whenever they would find an opportunity, they would never let him go without having insulted him'; कोई उस के राज मर में भूखा न सोता, 'no one in his whole kingdom would sleep hungry'.

(2) It is also occasionally used to denote a *single* action in past time, in such sentences as the following:—

अर्जुन की क्या सामर्थ्य थी जो हमारी बहन को ले जाता, 'what was Arjun's power that he should carry off our sister?'

(3) It is sometimes used to denote an action incomplete at the *present* time.

a. In such cases it will very commonly be found that the time is determined as present, by an auxiliary verb, or by some adverb in the context. Thus, हम यही तुम से मांगने आए हैं, और कुछ नहीं मांगते, 'I have come to ask just this from you; I ask nothing else'.

b. It is also used for the present in other cases, when no special stress is laid upon the time; as, मैं नहीं जानता कि जब वह पूछेगा तुम क्या उत्तर देओगे, 'I know not, when he shall inquire, what answer you will give'; मुझ से कुछ नहीं हो सकता, 'nothing can be (done) by me'. This usage is especially common in the *Rāmāyan*, where the auxiliary is rare; thus, बहु विधि करति विलाप जानकी, 'in many a way, Jānakī laments'.

(4) It is often used in statements of *general application*, in which no limitation to any time is intended.

Examples:—चाँद बिन यामिनी सोभा नहीं पाती, 'without the moon, the night has no beauty'; होनेहार कहीं नहीं रुकती, 'that which is to be is never hindered'; कोई नहीं जानता इस का भेव, 'the nature of this (person) no one knows'.

(5) It is used very commonly in the *protasis* and *apodosis* of conditional clauses. As thus employed, it refers to past time, and in the *protasis* denotes the non-fulfilment of the condition; in the *apodosis*, it states what would have been, had the condition been fulfilled.

Examples :—जो मैं उस का नाम गाँव ही जानता, तो मैं कुछ उपाय करता, 'had I known even his name and village, then I would have devised some plan'; नहीं तो एक भी जीता न रहता, 'else, not even one would have remained alive'.

616. It may be doubted whether in this sense of a past conditional, this tense is really identical in origin with the exactly similar forms which have an indicative sense. The actual existence of an *inflected* past conditional, derived from the imperfect participle, in the eastern Hindi dialects, suggests the opinion that we have here in reality two tenses, the one indicative, consisting merely of the imperfect participle; the other, a contingent, being an inflected derivative from the imperfect participle; which two tenses, through the processes of phonetic decay, have been reduced in modern High Hindi to one identical form.

617. The inflected past contingent of the *Rāmāyaṇ* has already been noted (§ 427). One or two illustrations will illustrate its perfect identity in meaning with the indefinite imperfect in the contingent construction. बूढ़ भयं न तो करते ककुब सहाय तुम्हार, 'I have become old, else I would render you some assistance'; जै जनस्यो जन वंशु विहोइ पिता बचन मनस्यो नहिं ओइ, 'if I had known of this bereavement of my brother in the wilderness, I would not have obeyed that word of (my) father'; नाहिंत. . . .सै जाते सं सीतहि बरजोरे, 'else, I would have taken away *Sita* by force'.

The Present Imperfect.

618. This tense denotes, primarily and fundamentally, (1) an action in progress, or a state as existing at the present time.

Examples :—तुम तपस्वी की कन्या को चाहते हो, 'you desire the hermit's daughter'; तू क्यों डरता है, 'why dost thou fear?'; मेरि करत इहिं निन्दा, 'they mock me'.

a. Hence it also denotes *habitual* or *repeated* action continued up to the present time.

Examples :—ये दोनों. . . .जहाँ जाते हैं, तहाँ हीँ उत्पात मचाते हैं, 'where these two go, there they stir up mischief'; निराकार ब्रह्म की स्तुति वेद किस भाँति करते हैं, 'in what way the *Veds* extol the formless *Brahm*'; निशिदिन देव अपत इहु जेही, 'whom, O deity, you invoke night and day'.

b. It is used, like the indefinite imperfect, to express *general truths*, but commonly with special application to the present time.

Examples :—जो नर तीरथ ... करता है वो ... परममति पाता है, 'the man who performs a pilgrimage, obtains supreme felicity'; जो कर्म में लिखा है सोई होता है, 'what is written in fate, that very (thing) comes to pass'.

c. Hence the use of this tense in comparisons, when that with which the comparison is made, is represented as a common occurrence. Thus, वह सारे फल जैसे आस्मान से जोले गिरते हैं, धरती पर गिर पड़े, 'all those fruits fell on the ground, as falls the hail from heaven'; जैसे सूरज का तेज मेंह बरसाकर सुखकारी होता है, 'as the heat of the sun, causing it to rain, becomes a source of pleasure'.

(2) The present imperfect is used for the *future*, to denote that future as *imminent*.

Examples :—मैं गुफा में जाता हूँ, 'I am going into the cave'; मैं तुम्हें अभी मारता हूँ, 'I will kill thee immediately'; इस मणि को ढूँढने को जाते हैं, 'I (*plur. for sing.*) am going to seek for the jewel'. This idiom represents a future action, as it were, already begun.

(3) It is also used of *past* time,

a. In vivacious narration, as a *historical present*, when the narrator mentally transfers himself to a past time.

Examples :—मदक बजते हैं कड़वेत कड़खा गते हैं, 'the drums are beating, the bards are singing their war-songs'. This is especially the case with the idiomatic phrase क्या देखता हूँ, etc.; as, ऊषा क्या देखती है कि चट्टुं ओर बिजली चमकने लगी, 'what does *Ushá* see, but that on every side the lightning has begun to flash'.

b. When an action begun in the past, is regarded as continuing at the present time.

Examples :—जिस दिन से मांगी उसी दिन से मैं दुख उठाती हूँ, 'from the very day I asked (it), I have suffered pain'; मैं कई दिन से देखता हूँ, 'for some days I am noticing, etc.'

c. It is also used for a past action, when that action has been just *interrupted*, and is therefore really an action *unfinished* in the present.

Thus, in the *Prem Ságar*, *Shatdhanv*'s speech is interrupted by *Akrúr*, who replies, तू बड़ा मूर्ख है जो हम से ऐसी बात कहता है, 'thou art a great fool, to say (*lit.*, who sayest) such a thing to me'. Similarly we may explain *Akrúr*'s words to *Shatdhanva*; क्या हम तेरी जाति जाति पूछते हैं, 'are we inquiring thy caste (and) rank?'.

619. The use of the inflected present corresponds with that of the analytic present as above explained. In illustration we may add to the examples of this tense previously given, (§§ 386, 402, a, 424,) the following.

(1) Examples of the *actual* present; **सकौ तारि अरि अमरहु मारी**, 'I can kill thy enemy, even (though he be) immortal'; **केहि आराधहु का सुम कहहु**, 'whom are you worshipping? what do you wish?'; (2) of the *habitual* present; **जासु भजन बिनु जरनि न जाहीं**, 'without whose worship, passion departs not'; **संतत संत प्रसंसहिं तेहीं**, 'the good ever extol that man'; **ये मुरखी अजावे वे सींगी**, 'this one plays the flute, the other, the horn'; (3) of the *imminent* present; **अरनीं रघुवर विमल अच**, 'I will set forth the spotless fame of the chief of *Raghu*'; (4) of the *historical* present; **देखि त्रिविहि सुरत्रय मुमुकाहीं**, 'seeing *Shiv*, the divine Triad smile'; **गये भजन पूरहिं पितुमाता**, 'having gone home, they ask their parents'.

a. Very often in the inflected present the habitual and historical sense are combined. Thus, **कोई मुख धुलावे कोई जिमावे**, one would wash (his) face, another would feed (him)'; **विन्हीं का गुन गाया करे**, 'she would often sing his praise'.

b. In the following this tense is used for the *presumptive imperfect* (§ 327): **जानहिं सानुअ रामहिं मारी**, *lit.*, 'he is probably thinking (thus), Having killed *Rám* with his younger brother (I will rule)'; where modern High Hindí would have जानते हींगे for जानहिं. (*Rám. Ay.*)

c. In the following, the same form occurs twice in the same line, once as an absolute future, once as a present: **जे देखहिं देखहिं जिन्ह देखे**, 'who shall see, do see, or have seen'. (*Rám. Ay.*)

620. Similar also is the use of the western inflected present, (§ 386, a,) which occurs not infrequently in the *Prem Ságar*. Thus, **तू इमें नहीं जानती, मैं पहचानूँ हूँ**, 'you do not know me, (but) I recognize you'; **एक दुख मुझे अब न तब साले है**, 'one sorrow pierces me now and then'; **तहाँ कुछ न कुछ उपद्रव मचावें हैं**, 'they excite some violent act or other'.

The Past Imperfect.

621. This tense is commonly used, (1) to denote an action as in progress at a certain definite past time.

Examples:—**मैं श्री महादेव के पास पढ़ता था**, 'I was reading with *Shrī Mahádev*'; **ठौर ठौर दुंदुभी जाकते थे**, 'in every place drums were beating'; **एक नारी रोवति ही**, 'a woman was crying'.

(2) This tense is also sometimes used to denote an action as *repeatedly* occurring during a certain period of past time.

Examples :—जिस नगर में जाते थे तहां के राजा अति शिष्टाचार कर उन्हें ले जाते थे, 'into whatever city they were entering, the king of that place would with extreme courtesy convey them (on their way)'; जितने अस्त्र अस्त्र चलाते थे, एक भी न लगता था, 'of all the weapons and missiles they were hurling, not even one would hit'.

The Contingent Imperfect.

622. This tense denotes the action of a verb as in progress, not actually, but *possibly* and *contingently*.

Thus, कदाचित कोई मन में कहता हो, 'perchance some one may be saying in his mind'.

a. It is used in *comparisons*, when the comparison is made, not with an actual event, but with a supposed case.

Examples :—तीनों ऐसे चले कि जैसे तीनों काल देह धरि जाते हों, 'the three walked as though the three Times (*i.e.*, Past, Present, Future,) were walking incarnate'; ऐसा शब्द हो रहा था कि जैसे मेघ गरजता हो, 'there was a continuous sound as if it were thundering'.

The Presumptive Imperfect.

623. This tense differs from the preceding, much as the absolute future differs from the contingent future; *i.e.*, whereas the contingent imperfect represents the action of the verb as *possibly* in progress, the presumptive imperfect represents it as *probably* in progress (§ 327). The absolute future of the auxiliary, however, never denotes the action as an objective reality, but only as assumed to be so.

Thus, वे हमारे सुरत करते होंगे, 'they will be (*i.e.*, are probably) thinking of me'; ब्राह्मण तुम्हारे तुम्हारी आट देखते होंगे, 'your Brahmans will be expecting you'.

The Negative Contingent Imperfect.

624. This extremely rare tense represents an action conditionally assumed to have been in progress at a certain past time; but invariably implies the negation of the condition. A single example will

suffice; जो तुम उस काल अपना काम करते होते, तो तुम मार न खाते, 'had you at that time been doing your work, you would not have got a beating'.

Tenses of the Perfect Participle.

625. The rules for the two constructions of the tenses of the perfect participle of transitive verbs, have been already given (§335), and need not be repeated here. The following examples will abundantly illustrate those rules.

(1) The following are examples of the *passive* construction, in which the verb agrees with the object of the action, in gender and number : नंद जसोदा ने बड़ा तप किया था, '*Nand and Jasodá had performed a heavy penance*', *lit.*, 'by *Nand-Jasodá* heavy penance was performed'; श्री कृष्ण ने बासुरी बजाई. '*Shrī Krishn played the pipe*'; उस ने सहस्र ब्राह्मण जिमार, 'he fed a thousand Brahmins'; जसोदा ने रस्वियां मंगवाई, '*Jasodá sent for ropes*'.

, a. In the case of pronouns the gender of the verb is of course determined by that of the noun to which the pronoun may refer. Thus, यह हम ने क्या किया, 'what is this we have done?' (*sc.* काम); and Sítá says (*Rám. S.*), कोई अपराध नाच है त्यागी, 'for what fault, (my) lord, am I deserted?'.

, b. The verb मारना, when used with the instrument, idiomatically agrees, not with the object struck, but with the instrument of striking, and the object is put in the genitive. Thus, उस ने मेरी तलवार मारी, 'he struck me with a sword'; उस ने उस का घण्ट मारा, 'he boxed him', (*i.e.*, 'struck him with the palm of the hand').

(2) The following are examples of the *impersonal* construction, in which the verb is always put in the masculine singular, without reference to the gender or number of either the subject or object of the action : प्रभु ने जरासंध को छोड़वाय दिया, 'the lord caused *Jarásandh* to be released'; कंस ने असुदेव देवकी को एक कोठरी में मूढ दिया, '*Kans shut up Basuder and Devakí in one room*'; मैं ने उस गाय को देखा, 'I saw that cow'; उस ने अपनी बेटियों को बुलाया. 'he called his daughters'.

a. The pronominal accusative plurals in *इं*, like those with *को*, whatever their gender may be, require the verb to be in the impersonal construction, in the masculine singular. Thus, उस ने इन्हें रखा, 'he has kept these'; उस ने इन्हें पकड़ बांधा, 'he caught and bound them'.

626. As remarked before, the perfect, even of transitive verbs, is often construed actively in the *Rāmāyaṇ*. To the examples given in §434, the following may be added : तुम्ह देखे दयाल रघुराई, 'have you seen the gracious prince of *Raghu*?'.

a. The inflected perfect of the *Rāmāyaṇ*, whether of intransitive or transitive verbs, is always used in the active construction. Besides the examples given in § 436, the following may be noted : जनमत काहे न मारसि मोही, 'why didst thou not kill me at my birth?'; कहेन्हि करिब उतपात अरंभ, 'they (*i.e.*, the monkeys) said, Begin the destruction'; हरि आनेहु सीता अगदंवा, 'you have carried off *Sītā*, the mother of the world'. So in the modern colloquial of Alláhábád, etc., people say, तुम का कहिन, = H. H. तुम ने क्या कहा, 'what did you say?', etc., etc.

b. So also the perfect in न or ना (§ 439) is most commonly construed actively. But this termination is chiefly used in *quasi* causals with a neuter sense. Thus, डर आनंद अधिकाय, 'joy swelled in his breast'; कपि सकल पराने, 'all the monkeys fled'; पादिसि पदिताना, 'afterward he repented'.

The Indefinite Perfect.

627. The *Indefinite Perfect* (1) simply indicates an action as completed, without reference to any definite time. It thus nearly corresponds to the Greek aorist.

Examples :—उस ने यह बात कही, 'he said this thing'; यह भेद किसी ने न पाया, 'no one discovered this secret'; समय भई, 'she became free from fear'; सदा सुमन फल सहित सब दृम नव नाना जाति, 'various sorts of trees ever bent with flowers and fruits'.

(2) It may be used for the *present perfect*, when the time is evident from the context.

Examples :—रेखे बली कौन यदुकुल में उपजे, 'who so powerful has arisen in the house of *Yadu*?'; तुम बहुत दिन जीते बचे, 'you have escaped alive for many a day'.

(3) Under similar conditions it is also used, where English idiom would demand the *pluperfect*.

Examples :—किसी ने न जाना कि वह किधर गये, 'no one knew whither he had gone'; जब असुरों की बहुत सी सेना कट गई, 'when much of the army of the demons had been destroyed'.

(4) It is occasionally used where we would use the *present*, in general statements, when these are referred to as a matter of past experience.

Examples :—जिस ने संसार में आय तुम्हारा नाम न लिया, तिस ने अमृत छोड़
जिस दिया, 'whoever coming into the world takes not (*lit.*, did not take)
your name, that person, leaving ambrosia, drinks (*lit.*, drank) poison'.

a. So also, when used for the present perfect, it must sometimes be rendered by the present in English; thus, मैं जान्यौ जिस कर निर्मान,
'measuring (you) in (my) mind, I know (that you are not Brahmins)'.

628. In the *Rāmāyan* and other archaic poetry, one tense constantly discharges all the functions of the different compound perfect tenses of modern prose Hindí. Thus, सती. . . जननी जार्ह हिमाचल गीहा,
'*Satí* has gone and been born in the house of *Himáchal*'. Other illustrations will be found in §§ 436, 626, a.

The Present Perfect.

629. The *Present perfect* represents the action of a verb as complete, with a reference to the present time.

Examples :—इम यही तुम से मांगने आए हैं, 'I have come to ask just this of you'; जब से मैं ने आप का नाम सुना है, 'since I have heard your honor's name'; तुम्हारे पिता ने. . . मूँद रखा है, '(whom) your father has kept shut up'.

a. It is thus often used where English idiom would require the *present*.

Thus, तुम निश्चिन्त क्यों बैठे हो, 'why are you seated unconcerned?'; बार बार मैं तैारन बंदनवार बंधी हैं, 'in each door wreaths and garlands are fastened'.

b. It is more rarely used where we would have expected the *past perfect*; as, in the *Prem Ságar*, किसी समय राजा हरिश्चंद्र बड़ा दानी हो गया है, 'once the *Rájá Harishchandra* had become (or became) very liberal'.

c. And in the following we would have expected the *indefinite perfect*: मुझे कल राजा के यहाँ से गार मिली है, 'I got (the cow) yesterday from the *Rájá's*'.

Rem. In this case the action is regarded as effecting a result continuing to the present time; whence the use of the present auxiliary.

The Past Perfect.

630. The *Past Perfect* differs from the English pluperfect, in that the latter always refers to a certain definite point of past time, prior to which the action or event occurred; while this Hindi tense simply indicates that the action occurred prior to an interval of past time, which is *not*, necessarily, defined. The Hindi past perfect may therefore be employed whenever an interval of time, definite or indefinite, has elapsed since the completion of the action.

It is therefore often necessary to translate this tense by the English indefinite past tense. Thus, मैं तुम्हें सावधान करने आया था, 'I came to put you on your guard'; जिस समय यह जन्मा था, 'when this person was born'; वे वहाँ पहुँचे जहाँ सिंह ने प्रसेन को मार खाया था, 'they arrived where the lion had killed and eaten *Prasen*'; तुम तो अमर हो भय, (हे भय *poet.* = हुआ थे,) 'you had, indeed, become immortal'.

The Contingent Perfect.

631. The *Contingent Perfect* represents a completed action as a mere *hypothesis* or assumption. Thus it may be used (1) in *conditional* clauses, denoting the condition not as a fact, but as a mere assumption.

Thus, जो नल ने कोई निर्दयता का काम भी किया हो, 'if *Nal* have committed some deed even of unkindness'.

(2) It may express *doubt*;

as, इसी से न कही हो, 'may she not have spoken in jest?'

(3) Or a *concession*;

as, जो जो कुछ उस ने रींघा होय, 'whatever he may have cooked'.

(4) It may describe a *past possibility*.

Thus, यदुकुल में ऐसा नहीं कोय, तबके खेत जो भाग्यो होय, 'in the family of *Yadu* is no one who, fleeing, has left a (battle) field'.

(5) It is often used in *comparisons* referring to past time, when the comparison is made, not with an actual, but with a supposed case.

Thus, जैसे ... ऋष्य ऋष्य के घटा घिर आर्य होय, 'as if clouds of various had gathered round'.

a. In the *Rámáyan*, also, this tense occurs, but very rarely. Thus, जो परिहास कौनह कहु होई, 'if he have ridiculed you in any thing'.

Of the Presumptive Perfect.

632. In the *Presumptive perfect* a completed action is assumed as an objective reality; *i.e.*, the action is denoted as a *probability*. It is thus often to be rendered by the aid of an English adverb.

Examples:—बालक का क्या गति हुई होगी, 'what must have been the state of the child!'; आप ने यह दोहा सुना होगा, 'your honor has doubtless heard this couplet'; नदी के प्रवाह से मुका होगा, 'it must have bent by the current of the river'.

The Negative Contingent Perfect.

633. The *Negative Contingent Perfect* is used only in the *protasis* and *apodosis* of conditional clauses. It always denotes an action or event as a past possibility which was not realized.

Examples:—जो तू एक बार भी जी से पुकारा होता तो तेरी वह पुकार तारों से पार पहुंची होती, 'if thou hadst even once called from the heart, then that cry of thine had reached beyond the stars'; अपनी लड़की अपने हाथ से न मारी होती, 'had I not killed my daughter with my own hand'. I have noted a single example in the *Rámáyan* (*S. K.*); जो न होती सीता सुधि पाई, 'if I had not obtained intelligence of *Sítá*'.

a. This tense differs from the Indefinite Imperfect in conditional clauses, only in that it denotes the action as finished; and it may thus often be a matter of indifference which tense is employed. But when the completion of the action is an essential element in the supposition, as in the second clause in the first of the above examples, then this perfect tense should be used in preference to the imperfect.

Of the Passive Conjugation.

634. The *Passive* conjugation is employed in Hindí chiefly in the following cases:—

(1) When the agent is either unknown, or is not to be definitely mentioned.

(2) It is elegantly used with a negative to express *impossibility*. The negative is regularly placed between the verb and the auxiliary.

Examples are, under (1),—इस का भेद कुछ जाना नहीं जाता, 'the secret of this is not known'; नतु मारे वीहें सब राजा, 'else all the kings will be killed'; under (2),—उन का बल अब मुझ से सेमाला नहीं जाता, 'his strength cannot now be withstood by me'.

635. Even neuter verbs may be thus conjugated passively. Thus हम से आया नहीं जाता, 'I cannot come', *lit.*, 'it cannot be come by me'; राम कृपा बिना आइ न जाइ, 'without *Rám's* favor one cannot come'.

636. The agent with the passive voice is regularly put in the ablative, as in the above examples. But in the following from the *Ráj Niti*, the agent is put in the locative with पै=पर; मो पै चल्यो नहिं जाइ, 'I am not able to walk'. Observe, that the case of the agent is *never* used with the passive conjugation.

637. When the same passive verb in successive co-ordinated sentences, is used in different tenses, the participle of the principal verb is properly used only with the first auxiliary. Thus, लोग मारे गए औ जाते हैं औ जायगे, 'people have been, are, and will be killed'.

638. The place of the English passive is often idiomatically taken by the neuter verbs in Hindí. Thus, 'these fields are being irrigated', is idiomatically rendered ये खेत सिंच रहे हैं.

Rem. It will be remembered here, that many of these so-called neuter verbs are in reality corrupted Prakrit or Sanskrit passives (§467, a.)

639. The inflected passive forms found in archaic Hindí have been already illustrated (§§ 445, a, 610.) They are used under the same rules as the modern analytic passive.

Of Causal Verbs.

640. *Causal* verbs call for little special remark. True causals are regularly followed by two accusatives. Examples will be found in §534, a.

641. Sometimes the causal conveys the sense, not of causing an action, but (1), of allowing it to take place, or (2), of causing an action or state to continue.

Thus, नख कोम बढाये ... सब राजा खड़े हो बिन्ती कर रहे थे, 'with nails and

hair allowed to grow, all the kings were standing and making supplication'; मारे मरिय जियाये जीये, 'if he kill thee, die; if he save thee alive, live'.

Of Compound Verbs.

642. In the Syntax of *Compound* verbs, the following points are chiefly to be noted.

(1) In *Intensive* compound verbs, when the conjugated member is intransitive, the compound is always construed *actively* in the tenses of the perfect; whether the first member be transitive or intransitive.

Thus in the following examples, although the simple verb, as a transitive, is construed passively with the case of the agent in the tenses of the perfect, yet the compound forms given are construed actively :—उस ने रोटी खाई, 'he ate bread', but वह रोटी खा गया, 'he ate up the bread'; मैं ने उस को देखा, 'I saw it', but वह देख पड़ा, 'it appeared'; उस ने सुना, 'he heard', but वह सुन रहा है, 'he is listening'.

(2) On the other hand, in *Frequentative* and *Permissive* compounds, although the second conjugated member, when used alone, is always construed passively in the tenses of the perfect, yet in this combination it is always construed actively. The same remark applies to the following compounds, in which देना, लेना, or पाना, occur as the second element; *viz.*, चल देना, 'to go out', हो लेना, 'to follow', देख पाना, 'to get a sight'.

a. Also the following nominal verbs, denoting perception by the senses, although formed with the transitive देना, are always construed actively in all tenses; *viz.*, दिखाई देना, 'to appear'; सुनाई देना, 'to sound' (*intr.*); सुंघाई देना, 'to smell' (*intr.*); हुलाई देना, 'to be felt'. In like manner is construed बंधाई देना, 'to be bound'.

Examples :—वह फिरा किया, 'he was wont to go about'; मैं नहीं देखने पाया, 'I was not permitted to see'; वे चल दिये, 'they set out'; वह मेरे पीछे हो लिया, 'he followed after me'; कोई नहीं देख पाया, 'no one obtained a sight'; दो गाँव दिखाई दिये, 'two villages appeared'; मुझे कुछ नहीं

सुनाई दिया, 'nothing was heard by me'; कोई फूल सुंघाई दिया, 'some flower emitted a perfume'; वह क्या मुझे कुसाई दिया, 'what was that which I felt?'

(3) Some compounds govern a different case from the single verb. Thus we say, उस ने मुझ से कहा, 'he said to me', but मुझे कह दिया, 'he told me'.

(4) In standard Hindí literature, the verbs सकना and चुकना, are very rarely, if ever, used alone. But in the colloquial they are thus used in some parts of the country, especially when the action referred to may be readily understood. सकना, indeed, occurs alone in the *Rámáyán*; as, e.g., सकहु तो ... नेटहु कठिन कलेस, '(if) you are able, then ... remove this sore trouble'.

a. सकना is usually combined either with the root or the inflected infinitive in ने. But sometimes it is combined with the infinitive in अ, as in the following: राम चाप तोरख सक नाहीं, '*Rám* will not be able to break the bow'. (*Rám. Bál. K.*)

b. Although चुकना is only used in composition with another verb, a causal, चुकाना, 'to cause to finish', is formed from it, which is always used alone.

(5) The idiom of the desiderative compound with चाहिये, as denoting obligation or duty, has been already explained (§ 610).

643. In the colloquial, compound verbs are often themselves compounded. Examples of such colloquial expressions are as follows: साहिब लोग अभी चलने लग रहे, 'the gentlemen are just now in the act of starting'; नहीं सक जायगा, 'it will not be possible'; सब खाने लग गये, 'all have set to eating'.

OF ADVERBS.

644. The use of many adverbs as substantives has been already explained (§ 496.) But the following additional particulars may be noted.

645. जब तक followed by a negative, is to be rendered 'until'; but, without the negative, 'as long as'.

Thus, जब तक मैं न आऊँ, is 'until I come', but जब तक मैं रहूँ, 'as long as I remain'; similarly, जी लीं जियो ... तो लीं जनि कह कहनि कहारी, 'as long as I live, never say anything again'.

646. A relative adverb used as a substantive in the geni-

tive, is combined with the correlative to denote manner, place, etc., as unchanged; as, ज्यों का त्यों, 'in exactly the same way'; जहाँ का तहाँ, 'exactly in the same place'.

647. जहाँ तक is idiomatically used of *measure* or *extent* in such phrases as, जहाँ तक तुम से हो सके, 'as far as you may be able'. कहाँ तक idiomatically denotes a measure as indefinitely large. Thus, जो दान दिया मैं कहाँ तक कहूँ, 'how can I fully tell the alms he gave?'. This idiom cannot be literally translated.

648. कहाँ (कहाँ), 'where', is idiomatically repeated in successive clauses to denote extreme disparity or incongruity.

Examples:—कहाँ ये बालक बपनिघान कहाँ ये सबल मल्ल, 'what equality between these beautiful children and these powerful wrestlers?'; कहाँ कुंभज कहाँ सिंधु अणारा, 'what was the Jar-born' (*Agastya*, who drank the ocean!) 'in comparison with the boundless ocean?'.
 649. The relative and correlative adverbs are conjoined to express *universality*.

Examples:—जहाँ तहाँ देखीं दोउ भाई, 'everywhere I see the two brothers'; बिधर तिधर नगरनिवासी लोग प्रभु के चरित्र बखाने, 'in every direction the inhabitants of the town are recounting the exploits of the Lord'.

650. कत,—though derived from the Sanskrit कुत्र (कत्र), 'where',—is commonly to be rendered, 'how', or 'why'; thus, जगतार कत हम गादी, 'Saviour of the world! how shall I sing'; केकयि कत जनमी जग मांका, 'why was *Kekayi* born into the world?'.
 651. The indefinite कहीं, 'somewhere', is used in comparisons to denote excess as indefinitely great; कहीं is also idiomatically used in expressions of doubt, as equivalent to the phrase 'by any chance'.

Examples:—वह घर इस से कहीं ऊंचा है, 'that house is ever so much higher than this'; कहीं वह कपटी अक्रूर तो न आया होय, 'surely by no chance can that deceitful *Akrúr* have come again!'.
 a. For कहीं, कतहुँ is used in the *Rámáyān*; as, कतहुँ तम नहीं, 'nowhere is there darkness'.

652. इधर, उधर, 'hither', 'thither', as also the dialectic इत and उत, are often used in successive clauses to express a contrast.

Examples :—इधर तो अनिरुद्ध जी महाशोग करते थे उधर राजकन्या योग करने लगी, 'here, then, *Aniruddh Ji* was greatly grieving, and there the princess was devoting herself to austerities'; इत हित मित कूटं उतहि बिलोके परम हुलासा, 'here he parts from friend and loved one, there he beholds supernal joy'.

653. For यूँ, 'thus', the original Sanskrit इथं occurs in the *Rāmāyaṇ*, with इदं, 'this'; as, इदमिथम कहि न जाय, *lit.*, 'this (is) so—(it) cannot be said'; *i.e.*, 'it cannot be told just as it is'.

654. For क्यौं with the negative, किन is often used in the *Rāmāyaṇ* and in other poetry; as, कह संकेस कहसि किन जाता, 'said the lord of *Lankā*, why dost thou not speak a word?'

655. बरु, 'rather', 'sooner', I have only met with in poetry; thus, जिये मीन बरु बारि बिहीना, 'sooner might a fish live deprived of water'.

656. The particle कि is elegantly used for an adverb of time, denoting an action as coincident with another mentioned in the foregoing clause.

Examples :—मैं सपने में तुम्हे देख रहा था कि ... कोई मुझे उठाया यहाँ से जाया, 'in a dream I was gazing on thee, when some one, lifting me up, brought me here'; वह गाय रही कि शिव जी ने कहा, 'she was singing away, when *Shiv Ji* said'.

657. The particles अथ and इति have been already explained and illustrated (§ 500).

a. After a phrase or quotation, modern Hindī often uses ऐसा, where Sanskrit would have had इति. Thus, बिना प्रयोजन क्या यह हुआ ऐसा जानने की इच्छा न करे, 'what has taken place,—without a motive let him not desire to know this'; मृत्यु ने हमारे केश को पकड़ा है, ऐसा समझ धर्म का आचरण करे, 'considering that death has seized our hair, let him practice virtue'. In both these sentences, ऐसा, like the Sanskrit इति, marks the preceding clause as quoted, as it were, from the lips or mind of the subject of the sentence.

658. The emphatic particle इ, as remarked § 505, may be variously translated. In addition to the illustrations there given, the following may be noted.

वह पथ का द्वारा बका तो था ही, 'he was indeed wearied and exhausted by the journey'; बालक बच रहा सकट ही टूट गया, 'the child was saved, only the cart was broken'; दुख सुख ही जानै, 'I will regard sorrow as very joy'; ये सिद्धान्त क्या ही अद्भुत हैं, 'how very wonderful are these doctrines!'; मैं ने तुम ही को बुलाया, 'I called *you*!', *i.e.*, *you*, and no one else; जाइय बिना बोलेहु, 'should you go even without having been called'; एक अखिनाशी कदम तट पर था सोई था, 'one imperishable *kadam* tree stood on the bank, (and) that only'.

N. B. The emphatic particle *hi* is not to be confounded with the *hi* which in the *Rāmāyaṇ* and other old poetry is the sign of the dative and accusative cases. In the *Rāmāyaṇ*, *hu*, *huz*, or *au* is the common form of the emphatic affix. (*Vid.* §131, *e.*)

OF PREPOSITIONS.

659. The syntax of prepositions calls for little remark. Their real nature and construction have been already explained (§§506, 509.)

660. बाहर, 'without', भीतर, 'within', and आगे, 'before', are construed not only with the genitive, as previously noted, but also with the ablative. In the latter case there is always an implied comparison. Sometimes it is of little consequence which is used; but often the two constructions convey a slightly different sense.

Thus, इस के बाहर, *is, lit.*, 'on the outside'; but, इस से बाहर, 'outside of this'; मेरे आगे चलो, *is*, 'walk before me'; but, वह मुझ से आगे दौड़ा, 'he ran ahead of me', etc., etc.

a. समेत commonly takes the noun in its oblique form, where such a form exists. In the following from the *Rāmāyaṇ*, समेत exceptionally governs the accusative in हि; बैठे आसन ऋषिहि समेता, 'he sat on the seat with the sage'.

661. Many words which, when following a noun in the genitive, must be rendered into English as prepositions, under other circumstances must be regarded as nouns and often translated accordingly. Such, *e.g.*, are कारण, हेतु, निमित्त, and many others. Thus, मेरे जाने के कारण, 'on account of my going', but, इस कारण, 'for this reason'. So also, in the following phrase, लिये has a prepositional force: तुम किस के लिये आए, 'for whom have you come?'. But in the following it must

be regarded as a substantive, signifying 'object'; तुम किस लिये आए, 'for what object have you come?'.

662. The inseparable preposition च, 'with', is properly used only with pure Sanskrit nouns. In colloquial Hindí it is not often heard; but it is more common in poetry; as, e.g., सानुच (स + अनुच) 'with (his) younger brother'; सप्रेम, 'with love'; सपरिवार, 'with attendants'.

OF CONJUNCTIONS.

663. The copulative conjunction और is used much less freely than the equivalent English 'and'; the conjunctive participle is often preferred to a finite verb followed by the conjunction (§597 (1) a.)

Thus a Hindoo would not be likely to express the phrase, 'he went and saw the town', by वह गया और नगर को देखा, but rather, उस ने जाकर नगर को देखा.

a. It is also to be noted that Hindí idiom often requires the omission of the copulative between pairs of words where it would be necessary in English.

Examples:—भले दुरे की पहचान, 'knowledge of good (and) evil'; दुःख दुरु का देनेवाला, 'the giver of joy (and) sorrow'; चलो देखो, 'go! (and) see!'; कृष्ण बलदेव, '*Krishn* (and) *Baldev*'.

Rem. Such phrases are doubtless conceived in the popular mind as equivalent to copulative compounds (§ 482).

664. भी is to be rendered 'also', in an enumeration of particulars, but in other cases it must be translated 'even'.

Thus, श्री कृष्ण चंद और बलराम जी भी द्वारिका में आए, '*Shrī Krishn Chand* and also *Balrám Jí* came to *Dváríká*'; but, श्री कृष्ण चंद भी किसी को कुछ नहीं देते हैं, 'even *Shrī Krishn Chand* gives nothing to any one'.

a. After words implying a comparison, भी must be rendered 'still', 'yet', 'even'; as, और भी है, 'there is still more'; यह वृक्ष उस घर से भी ऊंचा है, 'this tree is higher even than that house'.

b. Sometimes, again, भी can scarcely be rendered into English except by an emphasis; thus, यह कार्य कौसा भी लघु क्यों न हो, 'howsoever trivial this work may be'.

665. The Sanskrit अपि, 'also', 'even', is never used in conversa-

tion, and only now and then in poetry; thus, अति गोप्यमपि सञ्जन करीषं प्रकाश, 'even that which is most mysterious, the good make clear'.

666. The phrase तिस पर भी, is often used as a copulative conjunction, equivalent to 'moreover'; as, तिस पर भी यह कहता है, 'moreover he says this'.

667. Of the disjunctive conjunctions, वा or अथवा, and या (Ar.) are the most common; कै and कैतो are dialectic. कि also is often used as a disjunctive.

a. कि and कै are especially used in short disjunctive phrases; as, मला हो कै बुरा, 'be it good or evil'. But sometimes it is repeated before successive sentences; as, कै हरि ने मेरी प्रीति की प्रतीति न करो कै जरासंध का जाना सुन प्रभु न आए, 'has not *Hari* had confidence in my affection? or hearing of the coming of *Jarásandh*, has the lord not come?'

b. किंवा is rare, but we find it in the *Rámáyan*, as, अभिमान मोह अस किंवा, or '(being) in the power of pride or love'.

668. Sometimes in brief phrases, where it may be readily understood, the disjunctive may be omitted.

Thus, संपति प्रभुतार्ह जाह रही पार्ह बिनु पार्ह, 'wealth and authority pass away, obtained (or) not obtained', *i.e.*, 'they are gone even before we obtain them'.

669. जो is commonly used as a conditional conjunction in the colloquial; यदि, usually pronounced, and often written अद, is Sanskrit, and in conversation is somewhat pedantic.

a. जो ये is sometimes used dialectically as a conditional conjunction. Thus, जो ये बिय न होति कुटिलार्ह, 'if there is no treachery in his heart'.

670. The conjunction तो has a two fold sense, namely, 'then', and 'indeed'.

a. In the following passage the word occurs in both senses; जो उस से कुछ मांगता तो वे देते तो सही, 'if I had asked anything from him, then he would indeed assuredly have given it'.

b. The illative तो is only apparently used for the temporal conjunction. Thus, यह समाचार सुनाय नारद जी तो चले गये, 'having told this news, *Nárad Jí* then went away'; where तो suggests the accomplishment of his object in telling the news, as the reason for his departure'.

b. In other cases **तौ** conveys a shade of meaning which can only be expressed in English by a peculiar stress of voice ; as, *e.g.*, **त्रिमुक्ता-पति उगत का कर्ता तौ मे हूँ**, 'lord of the three worlds, and creator of the earth am I!'.

671. The concessive conjunction is **यद्यपि** (यदि + अपि), 'although', to which **तद्यपि**, or **तथापि**, 'yet', answers in the principal clause. These are pure Sanskrit and are rarely used in the colloquial, except by pundits. The corrupted form **यदपि** is employed in the *Rámáyana*. In the common colloquial, **जो भी** and **तौ भी** are usually employed.

672. **कदाचित्** and **कदापि**, 'perhaps', like many of the foregoing, are rarely heard, except from those conversant with Sanskrit. The Persian **शायद** (सायद and सादद) is often heard instead. All these are regularly followed by the contingent future. The verbal forms **जाने**, **क्या जाने**, often take the place of these in the colloquial.

673. **कि** is radically an explanatory particle ; its use as a final, = 'that', is easily derived from this explanatory sense.

Thus, **वह इस कारण से गया कि देखे**, etc., 'for this reason he went, that he might see'; here **कि** is merely explicatory of the word **कारण**, 'reason'. And in cases where no such noun occurs in the principal clause, it may be yet be understood.

a. Often **कि** must be rendered by the word 'saying'; as, **वह यही मनाता था कि वह पुरुष कब प्रगटे**, 'he was propitiating this (deity), saying', 'When will that man appear?'

b. Sometimes **कि** is used pleonastically. after a relative pronoun or adverb ; thus, **जो बात कि तुम ने कही**. 'that thing which you said'; **जब कि परमात्मा कबभर भी ऐसा नहीं हो सकता**, 'since the supreme Spirit not even for an instant can be such'. Further illustration of the use of the conjunctions will be found in the section on compound sentences.

OF INTERJECTIONS.

674. Interjections call for little remark. The following interjectional expressions require a noun in the dative ; *viz.*, **धन्य**, **धिक** or **धिरकार**.

Thus, परमेश्वर को धन्य, 'praise to God!', धिक्कार मेरे जीतक को, 'a curse to my life!'.

675. करे or रे changes final र to ई after a feminine noun.

Thus, कृपायतन कर दास में सुनु मातु रे, 'I am the servant of the Abode of Compassion; hear! O mother!'.

OF THE REPETITION OF WORDS.

676. The repetition of words is a marked characteristic of Hindi idiom. Any part of speech, except a postposition or conjunction, may be repeated, to express, as the case may be, the various ideas of *repetition*, *distribution*, *variety*, *intensity*, or *continuance*.

677. Nouns when repeated may be taken (1) *distributively*.

Examples:—घर घर मंगलाचार हो रहे थे, 'festivities were going on in each house'; वह जन्म जन्म नरक बास पाते हैं, 'they in each birth find (their) abode in hell'.

(2) Or the repetition may express *variety*.

Thus, देश देश के राजा, 'kings of various countries'.

(3) To express *intensity* or *emphasis*, the noun is often repeated with the emphatic ही intervening.

Thus, मन ही मन में कहने लगा, 'in his inmost soul he began to say'; बातों ही बातों में, 'in the very midst of the conversation'; सब कृष्ण ही कृष्ण कहती थीं, 'all (the women) were saying nothing but *Krishn*, *Krishn*'!

a. When the first noun is in the plural, ही is not used; as, उन के हाथों हाथ, 'in their very hands'; मारों मार, 'blow on blow'.

b. Sometimes the first noun is put in the genitive; as, मूर्खों का मूर्ख, *lit.*, 'a fool of fools', *i.e.*, 'a very fool'; भँवरों के मुँड के मुँड, 'swarms upon swarms of bees'.

c. We have also noted the phrase दूधा दूध, 'very milk', *i.e.*, 'pure milk'.

(4) Sometimes the noun repeated is equivalent to an adverbial phrase; as, पाँति पाँति, 'in rows'.

(5) The repetition sometimes suggests *continuance* in a place; as, सड़क के किनारे किनारे चलो, 'walk along by the side of the road'.

678. For the repetition of nouns, etc., with the alteration of a letter, see § 482 (1) *b*.

679. Adjectives are repeated to express (1) *intensity*.

Thus, मीठी मीठी पवन चल रही है, 'the soft, soft wind is blowing'; सुधरे सुधरे वस्त्र, 'the cleanest clothes'. Sometimes the first adjective takes the genitive postposition; as, भूखे का भूखा, 'extremely hungry'.

(2) Or sometimes the repetition expresses *variety*;

Examples:—नये नये सुख, 'various new pleasures'; अनूठे अनूठे खेल खेलने लगे, 'they began to play various unheard of plays'.

(3) Or the adjectives may be taken *distributively*.

Thus, सब बड़े बड़े यदुवंशी, 'each and every one of the great *Yadubansis*'.

680. Numerals are repeated in a *distributive* sense.

Thus, उन के दस दस पुत्र भर, 'ten sons were (born) to each one'. To the repeated numeral, the conjunctive participle करके is often added (§ 504), as follows; दो दो करके निकल गये, 'they went out by twos'; एक एक करके आये, 'they came one by one'.

681. Pronouns, when repeated, are often to be taken *distributively*. Or the repetition may denote *variety*.

Examples:—उन्होंने ने अपने अपने घर जाय जाय कहा, 'having gone each one to his own house, they said—'; जो जो जिस जिस वस्तु की इच्छा करे सो सो ला दीजे, 'whatever different things each one may desire, that bring and give'; हम क्या क्या दुख पाते हैं, 'what various sorrows do we experience!'.

a. But कोई, repeated, is 'a few'; as, तुम्हारी कृपा पावे कोई कोई, 'some few may gain your favor'.

682. The relative *जैसा* is idiomatically repeated with the genitive postposition; as, जैसे का तैसा, 'exactly as before'; or, if the noun qualified be feminine, जैसी की तैसी उस की दशा रही, 'his state remained just as it was before'.

683. Repetition of verbs is confined to the participles. It may indicate (1) simple *repetition* of the action.

Examples:—हरि ने सब आयुध काट काट गिरा दिये, '*Hari*, breaking up the weapons one after another, threw them down'; सब गोपी पशु पक्षी वृम खेल से पूछती पूछती कूँठने लगीं, 'all the milk-maids repeatedly questioning beast, bird, tree and vine, began to search'; मुख पास मंचर आब आब बैठते थे, 'the bees kept coming and resting on her face'.

(2) The repetition of certain verbs thus expresses *intensity*.

Thus, इन्द्र पङ्कताय पङ्कताय रो रो कहने लगा, 'Indra, deeply repenting and weeping much, began to say'.

(3) It may sometimes denote the *continuance* or *prolongation* of the action.

It will sometimes be found difficult to render this idiom into English. चलते चलते घर को पहुँचे. 'walking on and on they reached home'; इसी रीति से चले चले राज मंदिर में जा विराजे, 'in this way having gone on, he came and displayed his glory in the palace'; श्री कृष्ण को बंधे बंधे पूर्व जन्म की सुधि आई, 'to *Shri Krishna*, as he remained bound, came the recollection of a former birth'.

a. होते होते, is rendered 'gradually', 'by degrees'. Peculiar is the phrase, हमारे न पहुँचते न पहुँचते, 'my continued non-arrival'.

b. Often the first of the repeated participles is put in the masculine, and the second in the feminine; as, छिपा छिपी, 'secretly'; उन की देखा देखी सब ... गोपी प्रबाम कर, 'all the milk-maids, making obeisance, with him looking on,—'.

c. The perfect participles of a neuter and its active or causal are sometimes idiomatically joined together. Sometimes the compound has a reciprocal sense, as, मारा मारी, 'mutual beating'; but often the combination seems to have a certain intensive force; as, यह उपाध बैठे बिठार में कहाँ से आई, 'whence came this calamity upon us sitting still?'.

d. Similarly, an active or causal participle is often prefixed idiomatically to a neuter verb with an intervening negative, giving an emphatic force. Thus, सो किसी भाँति मेटे न मिट्यो. 'they cannot in any way be possibly effaced'. Or the reverse order is found, the neuter participle preceding; thus, दनुज महाबल मरे न मारे, 'the demons, mighty in strength, (even when) dead, were not killed'; तनु टर्यो न टाप्यो, 'driven back, they not in the least gave way'.

684. The repetition of adverbs has already been noted. (§498.) The following illustrations are added.

जब जब होइ धर्म की हानी तब तब प्रभु धरि विविध शरीर, 'whenever religion suffers injury, then from time to time the lord, assuming various bodies—'; ज्यों ज्यों वह कन्या बढ़ने लगी त्यों त्यों उसे अति प्यार करने

सगा, 'just in proportion as the girl began to grow, so he began to love her greatly'.

a. An adverb may be repeated with the genitive postposition intervening, for the sake of emphasis. Sometimes the latter may also be in the emphatic form; as, सो (दल) यहाँ का यहीं रेसे खिलाय जायगा, 'that army in this very spot shall so vanish'; उस का तब, 'at that very moment'.

685. Prepositions also are sometimes repeated with a modification of the sense similar to that above noted.

Thus, उन के बीच बीच चारन उस गाले घे, 'all along through the midst, bards were singing (his) renown'; उन्हीं चरबचिन्हीं के पास पास, 'close along by those same footsteps'; मेरे पीछे पीछे चले आओ, 'follow along behind me'.

Onomatopœia.

686. The fondness of the Hindoos for onomatopœic words has been already mentioned. This regard for sound extends also to the construction of sentences, and is seen especially in the balanced structure of the language; as in the marked tendency to throw sentences of all sorts into the relative and correlative form; the expression of repeated action by repeating the word expressing the action; the fondness for rhyme, even in prose, etc., etc.

a. The following striking examples of onomatopœia in the choice of words, are from the *Rámáyan*. In the description of the fighting of the monkeys against *Rávan* we read, मर्कट बिकट भट जुटत न लटत तनु चर्कर भये, 'the terrible monkey warriors, fighting, their bodies torn to pieces, are not diminished'; and the fighting of the bears is thus similarly described; खंखुनिकर कटकूट कट्टिं खांखं हुंहांखं अघाह वण्टुं, 'the bear host gnash and grind their teeth; they eat, and howl, and (even) satiated, rush upon (their prey)'.

PART II. SYNTHETIC SYNTAX.

OF THE CONSTRUCTION OF SENTENCES.

I.—OF THE SIMPLE SENTENCE.

Of the Parts of a Sentence.

687. As in all language, the essential elements of a Hin-

di sentence are two, *viz.*, *subject* and *predicate*, to which may be added the *copula*, as a formal, though not, as will appear, a necessary element of the sentence. We treat first of the simple sentence.

688. The subject in Hindí, may be (1) a noun or pronoun in the nominative case; or (2) two or more nouns or pronouns in the nominative; or (3) an adjective or numeral used substantively in the nominative; or (4) an infinitive; or (5) any phrase or sentence.

Examples are, of (1);—तुलसी दास आया है, '*Tulsí Dás* has come'; ये भले मनुष्य के लक्षण हैं, 'these are the marks of a good man'; (2) श्री कृष्ण और बलराम जी आए हैं, '*Shrî Krishn and Balrám Jî* have come'; मैं और तुम जाओगे, 'I and you will go'; (3) दो वहाँ हैं, 'two are there'; कोई जानी नहीं कहेगा, 'no wise (man) will say'; (4) तुम को जाना है, 'you must go', *lit.*, 'to go is for you'; (5) उन्हें बार बार जन्म और मरण बंधी इस संसार चक्र में घमना पड़ता है, 'to them it falls to wander in this earthly circle of repeated births and deaths'.

a. The cases in which a complete sentence introduced by *कि* stands as the subject of the verb, will be noticed in the Syntax of the Compound Sentence.

b. Colloquially, the locative with *तक*, *तो*, etc. is used as the subject of a sentence in such phrases as the following: एक मनई तक नहीं आया, 'not so much as one man came'; दो सौ तक दकट्टे हुए, 'as many as two hundred came'.

689. The subject may sometimes be omitted; (1) when it can be readily supplied from the connexion, as, *e.g.*, in questions, or in direct address; or (2) when it is implied in the form of the verb; or (3) in proverbs, where brevity is sought. -

Examples; (1) क्या वह आता है हाँ आता है, 'is he coming? yes (he) is coming'; बेटा यह क्या चाल निकालते हो, 'son! what conduct is this you display?'; (2) ब्राह्मण हूँ, '(I) am a Bráhman'; (3) कमा तब खा, 'earn, then eat'.

a. In the phrase *करसता है*, the word *जानी* or *सँझ* is to be understood as the subject of the verb, and is indeed often expressed.

690. Sometimes by *anakolouthon*, a nominative, or the case of the

agent, stands without a verb, as गोपी in the following: गोपी जो चल भरने को निकली थीं सो रथ दूर से आते देख कहने लगीं. 'the milk-maids, who had gone out to draw water—they, seeing the chariot coming in the distance, began to say—'.

691. The predicate of a sentence may be (1) a verb; (2) a noun or pronoun either in the nominative or some oblique case; (3) an adjective; (4) a numeral; or (5) any word or phrase used as a noun.

Examples:—(1) वह जायगा, 'he will go'; (2) उस का नाम आहुक है, 'his name is *Ahuk*'; यह राजा का है, 'this is the king's'; वह कोठी पर है. 'he is on the house'; कारण यह है, 'the reason is this'; यह पुस्तक किस की है, 'whose is this book?'; ऐसा सामर्थ किसी में नहीं है, 'in no one is such power'; जो पुत्र मेरे होगा, 'the son whom I shall have'; (3) राजा सिसुपाल खड़ा खली भी प्रतापी है, 'the *Rájá Sisupál* is very mighty and renowned'; (4) मेरे चरण सोलह थे, 'my feet were sixteen'; (5) मैं राजा भीष्मक का पठाया हूँ, 'I am the messenger (*lit.*, the 'sent) of *Rájá Bhíshmak*'.

692. The predicate verb is sometimes omitted when it can be easily supplied from the context; as, दोनों हीरों ने प्रब्राम किया एक ने गुरु जान दूसरे ने बंधु मान, 'both heroes saluted him, the one, regarding him as a spiritual guide, the other, holding him as a brother'.

693. The copula, either explicitly, or as implied in a verbal form, is regularly required to connect the subject and predicate of a sentence. But even in prose the copula may often be omitted in Hindí, where it would be essential in English or even in Urdú.

a. Thus, in simple description, where the copula may be readily supplied, Hindí often characteristically omits it; as, मथुरापुरी का आहुक नाम राजा तिन के दो बेटे एक का नाम देवक दूसरा उग्रसेन, '(there was) a king of the city of *Mathurá*, named *Ahuk*, (who had) two sons; the name of one (was) *Devak*, the other (was) *Ugrasen*'.

b. The copula is also often omitted in comparisons; as, भूमि रेखी सुहावनी लगती थी कि जैसे सिंगार किये कामिनी, 'the earth looked as fair as a beauty adorned'.

c. Similarly, the copula is very commonly omitted in negative sentences; as, इस को किसी बात का ज्ञान नहीं, 'this (person has) no knowledge of anything'.

Rem. In such phrases the omission of the copula is in fact only apparent. *Nahts*, as remarked § 372, is a compound of the negative *na* with an archaic form of the copula, *áhts*.

d. The copula is also usually omitted in proverbial expressions; as, चोरी का गुड़ मीठा, 'stolen sugar is sweet'; कुंठर के सिर में चंभेली का तेल, 'oil of jasmine on the head of a musk rat'.

e. But when there is any emphasis on the time as to which any affirmation is made, as past, present, or future, the copula must be employed.

694. The omission of the copula is extremely common in poetry; indeed, in the *Rámáyan*, its use is quite exceptional. Examples will be found in almost every line. Thus, सब विधि सब पुर लोग सुखारी, 'in every way, all the people of the city (were) rejoiced'; सतसंगति मदमंगल-मूला, 'association with the good, (is) the root of joy and gladness'.

a. But occasional examples of the use of the copula occur, determined by emphasis, or by the necessities of the metre; as, *e.g.*, दुराराध्य पै अहहिं महेश. 'but difficult to be worshipped (is) *Mahesh*'.

b. As in all languages, we must distinguish the occasional use of the substantive verb, not as a copula, but as an essential word. Thus, वे लोग मानते हैं कि ईश्वर है. 'those people admit that God exists'; भये वे अहहिं वे होवहे आगे, '(those things) which have been, are, or shall be hereafter'.

695. The predicate may belong to the subject in a greater or less degree as compared with other objects. For illustrations of the syntax of adjectives in such cases, see § 566, under 'Comparison'. In the case of verbs, the comparison is expressed by prefixing the proper adverb.

696. The subject and predicate may both be extended or defined, as in other languages, by the addition of various words in grammatical dependence upon them. The subject may be defined (1) by a noun or nouns in apposition.

Examples:—हस्तिनापुर का रहनेवाला राजा भीष्मक आए हैं, '*Rájá Bhíshmak* of *Hastinápur*, (*lit.*, resident of) has come'; कार्तिक महीना आया, 'the month *Kártik* came'.

a. Here note the common idiom with the pronoun *क्या*, which occurs in the following phrase; सब नगरनिवासी क्या स्त्री क्या पुरुष आपस में थे

कहते थे. 'all the inhabitants of the city, whether men or women, were thus talking among themselves'.

b. The common idiom which occurs in the following sentences must be regarded as an appositive construction : मुझे दो जोड़े कपड़े मिले, 'I got two suits (of) clothes'; एक छूंद पानी नहीं पड़ा, 'not one drop (of) water fell'.

c. In the following from the *Prem Sagar*, बालक is a predicative adjunct of the personal pronoun मैं : मैं बालक हूँ बैरो तेरो, 'I, a child, (i.e., although a child.) am thy enemy'.

(2) The subject may be extended or defined by an adjective. In this case we may distinguish (a) the *attributive*, and (b) the *predicative* construction.

a. In the attributive construction, the adjective precedes the noun and forms conjointly with it one complex idea as, e.g., यह डरावनी मूर्त कलि युग है, 'this frightful form is the *Kali Yug*'.

b. In the predicative construction, the adjective follows the noun, and is apprehended separately from it, being, as it were, the predicate of an abridged relative clause. Thus, इस को मारें तो निर्भय राज करें, 'if I kill this (child), then I may reign without fear'. In the following both constructions occur : उस बाल का ज्येष्ठ पुत्र महापराक्रमी बड़ा तेजस्वी बानासुर था, 'the youngest son of that *Bal*, very powerful, and greatly renowned, was *Bánásur*'.

(3) The subject may also be defined by a pronoun used adjectively.

Thus, यह कन्या है भांजी तेरी, 'this girl is thy niece'; जो बात तुम ने कही, 'the thing which you said'.

(4) Or by a numeral.

Thus, इस बीच दोनों भाई आए, 'in the midst of this, the two brothers came'; दो सहस्र योद्धा दिखाई दिये, 'two thousand warriors appeared'.

(5) Or by a genitive.

Thus, सब सभा के लोग चुप हो रहे, 'all the people of the assembly held their peace'; अब मेरा मनोरथ पूरा हुआ, 'now my desire has been fulfilled'.

Rem. As the genitive is *de facto* an adjective, it admits of the two constructions mentioned above under (2). But as Hindi often imitates the Persian by placing the genitive after the governing noun, its

predicative character cannot always be certainly inferred from its position. But it is evidently used as a predicate in the following from the *Prem Ságar*: छः बालक तो विन को कंस ने मार डाला, 'six children of theirs, then, *Kans* has slain'.

(6) By an adjective participle.

Here again, we have both (a) the attributive and (b) the predicative constructions. Thus, एक मरा साँप वहाँ पड़ा था, 'a dead snake lay there'; but, in the predicative construction, एक साँप मरा हुआ पड़ा था, 'a snake lay dead'; कंस डरता काँपता उठ खड़ा हुआ, '*Kans*, fearing and trembling, rose and stood up'.

697. The predicate of a sentence may be extended,

(1) By a noun, pronoun, or any word or phrase used substantively. This includes several particulars.

a. The direct object of a verb; as, तुम संदेशा कहो, 'declare the message'; राजा भीष्मक कुछ न बोले, '*Rájá Bhishmak* said nothing'. The object may sometimes be a phrase or sentence; as in the following, after a conjunctive participle; कपिन्ह विधंस कृत मख देखि, 'seeing the sacrifice destroyed by the monkeys'; बरात घर के निकट आई सुन, 'hearing that the marriage procession had come near the house'; and, after an imperfect participle, अलिखि बरात सुनत सब रानी, 'all the queens, on hearing (the words), The marriage procession will move'.

Rem. Observe, that the object of the verb may itself again be defined in the same way as the subject noun (§696.) Thus, मेरा अपराध क्षमा कीजे, 'pardon my transgression'; इन्हें खन में अकेले न छोड़ियो, 'do not leave them alone in the jungle'.

b. Or the predicate, under the conditions specified in § 332, may be extended by the case of the agent; as, ब्राह्मना ने देवताओं को समझा दिया, '*Brahmá* caused the gods to understand'.

c. Or by a dative; as, नंद जी ने सब ब्राह्मणों को नौता भेज दिया, '*Nand Jí* sent an invitation to all the Bráhmans'.

d. Or, in short, by any case of any noun or pronoun, defining the predicate in respect of time, place, manner, etc.; as, इन्होंने ने गेह में मोहन को आने दिया, 'they allowed *Mohan* to come into the house; उस के मन से पिड़ला सब शोक गया, 'all the former grief left his heart'; आग पर्वत की चोटी तक लहकी, 'the fire swept to the top of the mountain'.

e. Or the defining noun may be a nominative in apposition with the

predicate ; as, षड्दर्शनों के नाम ये हैं न्याय वैशेषिक सांख्य योग्य मीमांसा वेदान्त, 'the names of the six systems are these, *Nyāya, Vaisheshik, Sāṅkhya, Yogya, Mīmāṃsā, Vedānt*'. In the following, the nominative defining the predicate is appositive to the subject : तिस का आठवाँ लड़का तेरा काल उपजेगा, 'her eighth child shall be born as thy death'.

(2) The predicate may be extended by an adjective, or if a noun, also by a numeral.

Examples :—इसारा घर पवित्र कीजे, 'be pleased to purify our house'; ये राजा के चार पुत्र हैं, 'these are the king's four sons'; यह पर्वत ग्यारह योजन ऊँचा था, 'that mountain was eleven *yojans* high'.

(3) Or by a conjunctive participle.

a. Observe that this participle always has the force of an adverbial adjunct of the predicate, expressing the various adverbial relations of time, place, manner, etc., as explained in §597. Besides the illustrations there given, the following may be noted : नंद जो अति उदास हो लंबी साँसें लेने लगे. '*Nand Jī*, being very sad, began to draw long sighs'; राज ले डंढोरा दे अपना थाना बैठाया. 'having taken the kingdom, and issued a proclamation, he established his seat'.

(3) Or by an adjective participle absolute (§596,(2)).

Examples :—कितने एक दिन मथुरा में रहते भये. 'a number of days passed staying in *Mathurā*'; श्री कृष्ण चंद एक सुंदरी नारी संग लिये आये हैं, '*Shrī Kṛishṇ Chand* has come in company with a beautiful woman'.

Rem. The conjunctive and adjective participles may, again themselves be defined in the same way as the tenses of a verb in the predicate of a sentence. For illustrations, see §§ 596—600.

(4) The predicate may also be extended by a preposition with its case.

Thus, उस ने खिन श्री कृष्ण चंद कोरुं घर न देखा, 'he saw no house without *Shrī Kṛishṇ Chand*'; सब गोपी यसोदा के पास चलीं, 'all the milk-maids went to *Yasodā*'.

(5) Or by an adverb.

Thus, वह अति प्रसन्न हुआ, 'he became greatly pleased'; शीघ्र आओ, 'come quickly'.

Agreement.

698. *Agreement* is three fold, *viz.*; (1) of an adjective used attributively with its noun; (2) of an adjective in the

predicative construction with its noun; (3), of the predicate of a sentence, whether verb or adjective, with the subject.

699. The general rules regulating the agreement of an adjective *attributive* with its subject have been already stated and illustrated (§163). The same rules apply to the agreement of the genitive attributive with the noun it defines (140).

700. But when an adjective or genitive attributive defines several nouns of different genders, usage as to agreement varies.

(1) The attributive may, preferably, agree in gender with the nearest noun.

Examples:—उस की बहू और लड़के, 'his wife and children'; तुम्हारी स्त्री और चार पुत्र, 'your wife and four sons'.

(2) Or the attributive may take the form of the masculine, as the 'more worthy' gender, even though the noun immediately following be feminine.

Examples:—तुम्हारा स्त्रीपुत्रादि, 'your wife, sons, etc.'; पुरुसराम जी ने अपने माता और भाइयों को बुलाया, '*Purusram Jí* called his mother and brothers'.

701. When an adjective or adjective participle occurs in the *predicative* construction with its noun, if the noun be in the accusative with को, the adjective or participle regularly takes the form of the uninflected masculine singular, irrespective of the gender or case of the noun.

Examples:—मैं त्रिमयन में ऐसा पराक्रमी किसे को नहीं देखता हूँ, 'in the three worlds I see no one so powerful'; नगर को जलता देख, 'seeing the city burning'.

a. But occasionally the predicative adjective or participle takes the feminine termination even after the accusative with को. Thus, in *Damayanti*, मुझ दासी को तुम ने जंगल में अकेली छोड़ा, 'you have left me, your handmaid, alone in the wilderness'.

Rem. Here the construction seems confused; for although the adjective

takes the feminine termination, the verb follows the usual rule and retains the masculine form after *ko*.

b. Observe, that when a participle is found inflected after a noun with *को*, it is to be regarded, not as a predicative adjunct, but as in the absolute construction (596, (2)). Thus, *जहाँ मुनि ऋषि देवताओं को बैठे पाता था*, 'where he would find seated, sages, philosophers and gods'.

702. The same rule as to agreement applies to the pronominal accusatives in *ए* and *ई* as to those in *को*. Thus, *हम किसे सच्चा जानें*, 'whom shall we regard as the real (one) ?'.

a. But in this case, again, we occasionally find a different usage; as, e.g., in the following from the *Prem Sāgar*; *बन में इन्हें अकेले मत छोड़ियो*, 'do not leave this child alone in the jungle'.

703. If the noun be in the nominative or the nominative form of the accusative, the predicative adjective or participle agrees with it in gender and number, as in the attributive construction.

Thus, *मन की चाह क्यों नहीं पूरी करती*, 'why dost thou not fulfil the desire of (my) heart ?'; *गायें रामली डौकती फिरती हैं*, 'the cows, panting and lowing, are wandering about'; *रेवा सोच करता ... सुदामा अपने घर के निकट आया*, 'thus reflecting, *Sudámá* came near his house'.

a. In the following phrase, we must supply the 1st personal pronoun; *तुम ने इस बन में तबी अकेली*, 'you have left (me) alone in this wilderness'.

704. The predicate verb, adjective, or noun must be inflected to agree with the subject in number, gender and person, in so far as they may be capable of such inflection.

Thus, *शास्त्रविद्या औ शस्त्रविद्या ये दोह उच्च पद की वैभवारी हैं*, 'sacred science and military science,—these two procure (men) a high rank'; *तिसी देस में सुदामा नाम ब्राह्मण . . . रहता था*, 'in that very country was living a Bráhman, by name *Sudámá*'.

a. Observe, that the case of the perfect of transitive verbs as construed with *ने*, is no exception to this rule; inasmuch as that which in English is the object, in this passive construction becomes the subject of the verb, with which it therefore agrees according to rule; as, *कौ (बिहारी ने) . . . पिहली प्रीति सब बिचारी*, 'lit., 'or is the old love all forgotten (by *Bihári*) ?'; *छो कछों बसुदेव को व्याह दी*, 'the six (daughters) were given in marriage to *Basudev*'.

705. When the subject of a verb is a sentence, the predicate is always put in the 3rd masculine singular. Thus, in the passive construction, एक गोपी ने कहा सुनो आली, 'one milk-maid said, Listen, dear !'.

706. When the subject is an honorific pronoun, an honorific plural, or a title of respect, although the reference is to an individual, the predicate or predicates must agree with it in the plural.

a. It will often happen that the noun or adjective in the predicate nominative, will admit of no distinction in form for plurality. But if, with such a predicate, any inflectible adjunct be joined, it must take the plural inflection, as in the second of the following examples : वे विद्याता हैं, 'this is *Vidhātā*'; यही जगत के कर्ता हैं, 'this is the Creator of the world'; आप कब तक लौट आयेंगे, 'by what time will your honor return ?'.

707. When a pronominal nominative plural refers to both masculine and feminine objects, the predicate takes the form of the masculine gender; as, सुदामा की स्त्री बोली ... अब हम महादुःख पाते हैं, '*Sudāmā's* wife said (to her husband),—Now we are experiencing great trouble'.

708. When the subject consists of two or more nouns or pronouns of different genders, the predicate and copula commonly agree in gender with the nearest noun. The same rule, it should be remarked, applies to an attributive adjunct under similar circumstances.

Thus, इस के तीन नेत्र औ चार भुजा थीं, 'this (creature) had three eyes and four arms'; तबब्यापन धन प्रभुता अविद्येकता ये चारों एक एक अनर्थ की करनिहारी हैं, 'youth, wealth, authority, lack of judgment, these four are each occasions of failure'; आंधी और नेंह आया, 'a dust-storm and shower came'.

a. Some say that occasionally the attributive or predicate takes the masculine gender without reference to the gender of the nearest noun. But I am not able to find any good authority for such usage, and have only noted the following illustration of it in literature : *na puruṣh na strī āyā*, 'neither man nor woman came'.

709. When the subject consists of two or more words of different persons, the verb then preferably agrees with the

1st person, rather than the 2nd or 3rd, and the 2nd, rather than the 3rd.

a. In this case, if the person preferred be in the singular, the verb agrees with it in that number, even though another noun be associated with it. Examples are as follows: वह तुम्हारा कल्पित आत्मा हम तुम नहीं हैं, 'you and I are not that imagined spirit of yours'; आज मैं और तू वहाँ चलूँगा वहाँ तू और वह बैठा था, 'to-day thou and I will go to the place where thou and he were seated'; वहाँ तू और वह न जाने पायगा, 'thou and he will not obtain leave to go there'.

Rem. In the colloquial, however, many people follow the same rule with regard to agreement in the case of different persons, as when there are different genders; i.e., the verb is made to agree in person with the nearest word. Thus many would say, *main aur tú chalegá, tú aur we chalege*.

710. When a subject noun denotes, not an individual, but a class, the predicate, although referring to a plurality individuals, is placed in the singular.

Example:—दल चला जाता था, 'the army was going along'. So in the following, the subjects are construed as collectives: ये छः कर्म्म ब्राह्मण के लिये स्थापन किया, 'these six duties were appointed for the Bráhmán'; तीन दिन रात बीत गया, 'three days and nights passed'.

a. On the same principle, सब, 'all', is often construed as a singular; as, सब की सब छबरारहे, 'all of them were troubled'; यह सब मित्र का दोष है, 'all these are faults in a friend'.

711. Finally, it should be remarked that the common people, as might be expected, are often very careless of the laws of agreement. Deviations from rule are even found occasionally in literature. Thus we read, even in Prof. Eastwick's carefully edited *Prem Ságar*, अपने बहन को नैतने गई, 'she went to invite her sister'.

712. In poetry, moreover, the rules of agreement often give way to the necessities of the metre, as in the following, where वे, (*plur.*) is construed first with a singular verb, and afterwards with a plural: वे यह कथा कपट तजि गाथा कहहिं सुनिहिं, 'those who, abandoning deceit, sing this tale, hear (it and) tell (it)'.

II.—OF COMPOUND SENTENCES.

A. Of Co-ordinate Sentences.

713. When two or more connected sentences are gram-

matically independent of one another, they are called *coördinate* sentences; and when one is dependent upon the other, it is called a *subordinate* sentence.

714. *Co-ordinate* compound sentences in Hindí, as in other languages, may be classified as *Copulative*, *Disjunctive*, *Adversative*, and *Causal*.

Copulative Sentences.

715. The conjunctions proper to copulative co-ordination are और and भी. और, 'and', joins two propositions when they are regarded as of equal importance, and as independent one of the other. और...भी, 'and'...'also', implies that the affirmation of the former clause is extended either, (a) in the subject, or (b) in the predicate.

Examples:—वह चला गया और फिर नहीं आया, 'he went away, and did not return'; श्री कृष्ण जी पधारे और बलराम जी भी उन के संग चले गये, '*Shrí Krishn* departed, and *Balráam Jí* also went off with him'; यह पुरुष धर्मी है और वह बहुत विद्यामान भी है, 'this man is virtuous, and he is also very learned'.

a. Very often the copula or verb may be omitted from either the first or the second member of the copulative sentence. Thus, यह पुरुष धर्मी और बहुत विद्यामान भी है, 'this man is both virtuous and also very learned'. The ellipsis of the verb in the second member, is more common in the colloquial speech than in literature.

b. फिर or पुनः is often used as a copulative conjunction, with a resumptive force. Thus, उस ने ऊषा को उठा लिया फिर अनिरुद्ध जी को भी उठा लिया, 'he lifted up *Ushá*; again, he also bound *Aniruddh Jí*'.

c. The pronominal phrase, तिस पर भी, *lit.*, 'upon that also', is often used as a copulative conjunction, with an *enhancive* force; as, तिस पर भी मनुष्य धर्म करेंगे, 'moreover, men will do unrighteousness'.

Disjunctive Sentences.

716. Disjunctive co-ordinate sentences are connected by the conjunctions वा or अथवा, या, किंवा, कौ and कि, 'or'. Any of these may be repeated in successive clauses, when the

first must be rendered 'either', and the second, 'or'. There is no difference in their meaning : **वा** is preferred to **अथवा** to connect single words ; **अथवा** is preferred to connect sentences.

Examples :—**हम इन को लेके कुत्ते को हांक सकते हैं अथवा खूंटी बना सकते हैं**, 'we can take them and drive away a dog, or make stakes of them'; **इन्हें पहाड़ मारो कै मेरे आगे से टालो**, 'throw him down, or drive him away from my presence'. Also see § 667, *a, b*.

a. Sometimes sentences are disjunctively coordinated by the verb **चाहे . . . चाहे**; thus, **चाहे आवे चाहे न आवे**, 'whether he come, or do not come'.

b. Negatively disjunctive sentences are connected by repeating with each the negative adverb, **न**; as, **न वह ठाँव है न वह टूटी मढ़ैया**, 'neither is there that place, nor that ruined cot'.

c. The first negative is sometimes omitted; as, **इन्हें पाने का हर्ष न जाने का शोक**, 'this (man) has neither joy at finding, nor sorrow at losing'.

Adversative Sentences.

717. In adversative coordination, two statements are contrasted with one another. These adversative sentences are of three kinds, *viz.*; (1) the second proposition may be *contradictory* or exclusive of the first; (2) it may be merely *restrictive* of the former statement; or (3) the contrast may be made by *extending* the former statement.

a. It is doubtful whether Hindi as yet has strictly appropriated certain adversative conjunctions to introduce restrictive as distinguished from contradictory adversative clauses. But, on the whole, the *tendency* seems to be, to introduce a contradictory adversative clause by **परन्तु** (very rarely, **किन्तु**), or the equivalent Arabic **लेकिन**; while **पर** is commonly employed to introduce a sentence merely restrictive of the other. But an *extensive* adversative clause is regularly introduced by **अथवा**, or the Arabic **अल्कि**.

b. In the following examples, **परन्तु**, **किन्तु** and **पर**, are used *strictly* in accordance with the principle above suggested: (1) **जीव का अना-नेवाला कोई नहीं परन्तु वह आप से आप सदाकाल से बना है**, 'of the soul there

is no creator, but it has existed of itself from eternity'; कुरास्मा को शास्त्र को पढ़ने से कुछ नहीं होता किन्तु इस विषय में स्वभाव ही बलवान है, 'a man of bad character gains nothing from reading the *Shāstra*, but in this matter the nature prevails': (2) तू ने तो बड़े बड़े बली मारे हैं पर अब मेरे हाथ से चीता न बचेगा, 'thou hast indeed slain many very mighty (men), but now thou shalt not escape alive out of my hand'; मन से तो चाहा कि भागूँ पर मारे लाज के भाग न सका. 'in his heart, indeed, he wished to flee, but for shame flee he could not'.

c. While these examples seem to sustain the principle suggested, it must be admitted that even good writers often fail to make this distinction in the use of the different adversative conjunctions. Thus, in the following from the *Prem Sāgar*, परन्तु is used to express a mere restriction: मैं तेरे आगे कहता हूँ परन्तु तू किसू के सोहीं मत कहियो, 'I am telling it before thee, but do not thou tell it before any one'. And in the following from the *Shad Darshan*, पर introduces a contradictory clause: वेद किसी का बनाया हुआ नहीं है पर आप से आप बनादिकाल से बना हुआ है, 'the *Ved* is not the composition of any one, but has existed of itself from eternity'.

d. Examples (3) of *extensive* adversative clauses are as follows: वे इन को कहने को कुछ ध्यान में न लाये बरन इन की ओर से मुंह फेरा, 'they paid no attention to their speaking, but turned their faces away from them'; ईश्वर के स्थापन करने के लिये नहीं बरन खंडन करने के लिये है, 'it is not for establishing (the doctrine of a) God, but rather for disproving it'.

Causal Sentences.

718. In causal co-ordination, the one sentence denotes either the reason or the consequence, the cause or the effect of the other. A sentence denoting the cause or reason, is commonly introduced by the conjunction क्योंकि, or the noun कारण, used conjunctively; a clause expressing a consequence or effect is introduced by the conjunctive phrases, इस लिये कि, किस लिये कि, इस वास्ते, or their equivalents. The conjunction पर, 'therefore', is confined to Urdú.

Examples:—इस उन्हें सुख देंगे क्योंकि विन्ही ने हमारे लिये बड़ा दुख सहा है, 'I will give them happiness because they have endured great affliction for me'; ऐसा काम न करना ईश्वर के वास्ते अपराध ठहरेगा इस लिये मैं

इस आशा का अवलोक करता हूँ, 'not to do such a deed, will stand as a sin before God, hence I cherish this hope'.

a. For इस लिये, etc., the pronominal ablatives, इस से, या से, ता से, etc., are often used to connect sentences in the causal relation, as, e.g., in the following : यह पाके दैरि मारैगो या से या के पास गये ही छने, 'this (vulture) will pursue and kill me, hence one can only succeed by having gone to him'.

b. The connecting conjunction or phrase is sometimes omitted in cases where we must nevertheless recognize the sentences as coordinated in the causal relation. Thus, मेरे भक्तों को भीर पढ़ी है इस समय चलकर उन की चिन्ता मेटा चाहिये, 'my worshippers are oppressed, (hence) I ought at this time to go and remove their anxiety'.

B. Subordinate Sentences.

719. Subordinate sentences are of three kinds, viz. (1) *Subordinate*, (2) *Adjective* or *Relative*, (3) *Adverbial*. These will each be defined and explained in their order below.

720. Before entering upon the consideration of subordinate clauses, it will be convenient to advert to a threefold classification of the tenses of the Hindi verb, as denoting the *possible*, the *impossible*, and the *actual*. *I*. The following four tenses denote an action or state of being, contingently, as merely possible, viz.; the Contingent Future, the Imperative, the Contingent Imperfect, and the Contingent Perfect. *II*. The following are used to denote a supposition whose realization has become *impossible*; viz., the Indefinite Imperfect, the Negative Contingent Imperfect, and the Negative Contingent Perfect. *III*. The remaining tenses are all indicative; i.e., they all denote an action either as a reality, or as assumed to be such. In all the rules for the use of the tenses in subordinate sentences, it is to be remembered that the tenses of Class *I* are required when an action or state is regarded as a mere possibility; those of Class *II* are used to denote a past possibility which cannot now be realized; * those of Class *III*, denote, under various phases, the actual and real. These statements will receive abundant illustration in the following sections.

* It should be remarked, however, that the Indefinite Imperfect, in virtue of its double character (§§ 615, 616), belongs properly to both classes *I* and *II*.

Substantive Clauses.

721. Those are called substantive clauses which are equivalent to a substantive expanded into a sentence.

a. Thus, in the sentence परमेश्वर एक है यह धर्म की मूल्य बात है, 'that God is one, is a fundamental doctrine of religion', the phrase परमेश्वर एक है, is evidently equivalent to the substantive phrase, परमेश्वर का एकत्व, 'the Divine unity'. Again, in the sentence कहते हैं कि वह आवेगा, 'the phrase वह आवेगा is evidently equivalent to an accusative case after the verb कहते हैं.

722. Substantive clauses are of two kinds, (1) *Subjective* and (2) *Predicative*. Those are called subjective which stand either in the relation of a subject to the leading verb, or in apposition with the subject. Those are called predicative which limit or define the predicate of the leading sentence or any adjunct of that predicate. All subjective substantive clauses are regularly introduced by the particle कि, 'that'.

Examples of subjective substantive clauses are as follows:—उस ने कहा कि हमें श्री कृष्ण से कुछ नहीं, 'he said (*lit.* by him [was] said), I have nothing to do with *Shrī Khrishn*'. Very commonly यह, 'this', stands as the subject of the leading clause, and the following substantive clause then stands in opposition with it; thus, यह सिद्ध होता है कि मनुष्य को अपनी बुद्धि से परमेश्वर का सत्य ज्ञान प्राप्त करना अत्यन्त कठिन है, 'this is evident, that for man by his own understanding to obtain the knowledge of God, is extremely difficult. In the following sentence the substantive clause *defines* the subject सोभा of the leading verb, as to its elements;—उस समय की सोभा कुछ बरनी नहीं जाती कि सब के आगे बड़े बड़े दंतीले मतवाले हाथियों की पंक्ति, 'the splendor of that occasion cannot be described, how before all (were) rows of enormous tusked and furious elephants'.

a. After a leading clause expressing 'fitness', 'duty', 'obligation', etc., the verb of the substantive clause is regularly put in the contingent future, or one of the respectful forms of the imperative. Thus, उचित है कि किसी को वहां भेज दीजिए, 'it is fitting that (you) send some one there'; तुम को आवश्यक है कि वहां जाओ, 'it is necessary that you go there'.

723. *Predicative* substantive clauses are of various forms. Thus, they may stand as the object, either of the verb in the leading clause, or of a participial adjunct in the leading clause. In this case they are usually introduced by the particle *कि*.

Examples :—नारद मुनि अनिरुद्ध जी को जाय समझाता था कि तुम किसी बात को चिन्ता मत करो, '*Nárad the sage went and comforted Aniruddh Ji, (saying)—Do not be anxious about anything*'; राजकुमारी मन ही मन यूँ कहती फिरती है कि मैं किसे खूँ. 'the princess walks about, saying in her heart of hearts,—Whom shall I marry?'; तुम देखि आओ कि कौन राजा चढ़ आता है, 'go and see what king is coming up against (us)'.

a. Occasionally *जो* introduces the substantive clause, instead of *कि*. Thus, यही विचारो जो मथुरा और बृन्दावन में अन्तर ही क्या है, 'consider this, what difference at all is there between *Mathurá* and *Brindávan*'.

b. Sometimes, especially before short clauses, *कि* may be omitted; as, चित्ररेखा बोली, सखी इधर आओ, '*Chitrarekhá said, 'Friend, come here*'.

N. B. It is very important to observe that after verbs of 'saying', 'thinking', 'wishing', etc., Hindí, unlike English, does not admit the *oratio obliqua*. On the contrary, idiom demands that the words or thoughts of the speaker be cited as they pass in his mind.

This principle makes it necessary, in translating from English into Hindí, to change both the tense and the person of the verb, as illustrated in the following examples: उस ने कहा कि आऊँगा. 'he said he would come', *lit.*, 'by him said, I will come'; जो चाहि कि बलदेव को मारूँ, 'as he wished (*i.e.*, was about to) kill *Baldev*', *lit.*, 'wished, May I kill *Baldev*'.

a. In the *Rámáyán* (*Bál K.*), we read, भुषति मन माहीं भइ गलानि मोरे सुत नाहीं. Here there is an ellipsis of a conjunctive participle, as *सोचि*, 'thinking', of which the substantive clause, मोरे सुत नाहीं, is the object; and these words, 'I have no son', are represented as actually passing in the mind of the king. Thus we may render the passage in English idiom, 'sadness entered the heart of the king, as he thought how he had no son'.

724. Predicative substantive clauses, again, may express the *purpose* or *object* of the action of the leading verb.

a. In this case, the substantive clause may be conceived of as in opposition to some such word as कारण, or हेतु, 'reason', 'object', in the principal clause. Such a word is indeed, for the sake of greater clearness, often expressed. The clause denoting the object or purpose, is introduced by the conjunction कि, or the relative जो used as a conjunction. The verb of the substantive clause expressing the purpose must be in the contingent future. Thus, हम तुम्हें बृन्दावन में भेजा चाहते हैं कि तुम उन का समाधान कर आओ, 'I wish to send you to *Brindāvan*, that you may go and comfort them'; मैं धर्म का कर्म ही न करूँगा जिस तैं उस बंधन से बचा रहूँ, 'I will not perform even an act of religion, in order that I may remain free from this bondage'; तू बाबा से समझायकर कहो जो मुझे ग्वालौ के संग पठाव दे, 'do thou coax father that he may send me with the cowherds'.

725. A negative clause denoting purpose is introduced by the phrase, ऐसा न हो कि, followed by the contingent future. Thus, वहाँ न जाइयो ऐसा न हो कि तुम गिरो, 'do not go there, lest you fall'. ऐसा is often omitted.

a. Sometimes the connective must be supplied from the context; as, नाहिन डर बिगारहि परलोकू, 'I have no fear lest (my) hereafter should be ruined'.

726. When the substantive clause denotes the result of an action, if that result be presented (1) merely as a wish or expectation, the verb must be in the contingent future; if (2) as an objective reality, the verb must be in one of the indicative tenses; if (3) as unattainable or inconceivable, the verb must be in the indefinite imperfect.

Thus (1) एक ऐसी सुन्दर रंगभूमि बनवावे कि जिस की सोभा सुनते ही गाँव गाँव के लोग उठ धावें, 'let us cause to be made such a beautiful theatre that the people of each village immediately on hearing may rise and run (to see it)'; (2) मथुरा में तेरा क्या काम है कि पिता को छोड़ यहाँ रहता है, 'what is thy business in *Mathurá* that leaving (thy) father, thou art living here?'; वह जन में इस भाँति रो रही थी अकेली, कि जिस को रोने की धुन सुन रोते थे पशु बँकी, 'in the wilderness alone, she was weeping away in

such a manner that the beasts, and birds, hearing the voice of her weeping, were weeping (too)'; (3) अर्जुन को क्या सामर्थ्य थी जो वहन को ले जाता, 'what power had *Arjun*, that he should carry away (my) sister?'

Rem. The result of an action is in Hindî more frequently expressed by an adjective clause introduced by a relative pronoun or pronominal, as illustrated in the next paragraph.

Adjective Clauses.

727. Those are called adjective (or relative) clauses which are equivalent to an adjective qualifying some word or clause in the leading sentence.

a. For example, take the compound sentence, श्री कृष्ण ने उन लकीरों को गिना जो उस ने खींची थी, '*Shri Krishna* counted those lines which he had drawn'. Here the phrase introduced by जो qualifies the substantive लकीरों को after the manner of an adjective, and is indeed equivalent to अपनी खींची हुई लकीरों को.

728. All adjective clauses are regularly introduced by the relative pronoun or a pronominal adjective to which the corresponding correlative regularly answers in the principal clause. The relative clause may be regarded as a simple expansion of the correlative pronoun. Instead of the correlative, one of the demonstratives (as, यह, वह, ऐसा, etc., or the pronominal सब) may be used in the principal clause.

a. Where especial distinctness is desired, the noun described by the adjective clause may be repeated in both the principal and subordinate clauses. Thus, राक्षसों का दल जो फिर आया था सो दल बादल का छाया था, 'the army of demons which had come up around them,—that army cast a shadow as a cloud'; जा घट प्रेम ना बसे ता घट जगै मसान, 'in whose body love dwells not, regard his body as a burning-ground (of the dead)'.
b. But, much more commonly, Hindî idiom, placing the relative clause with the noun first, omits the noun from the principal clause which follows. Thus, जितने शस्त्र हरि पर घाले तितने प्रभु ने सबस ही काट

हाले, 'the lord with perfect ease broke in pieces every weapon which was cast at *Hari*'. बाराह योजन का नगर जैसा श्री कृष्ण ने कहा था तैसा ही रात भर में बनाया, 'a city twelve *yojans* square, such as *Shri Krishn* had directed, he built in one night'.

c. Sometimes, when the principal clause precedes, the substantive is omitted in the relative clause, as in English. Thus, भौमासुर पुष्प विमान में बैठे जो लंका से आया था, '*Bhaumasur* sat in the 'Flower-chariot' which had come from *Lankā*'.

d. Or the substantive may be omitted in both the principal and subordinate clause, when no particular person is intended, or when the reference is to a subject well known. Thus, जो विन दोनों को मारेगा सो मुंह मांगा धन पावेगा, 'he who shall kill those two, shall obtain the wealth his lips shall ask'; जिस ने सारे संसार को सृजा हम सब उसी के बस हैं, 'we are all in the power of Him who created the world'.

e. Sometimes the correlative may be omitted from the leading clause especially in poetry; as, मेरे मन का सूख जो खटकता है निकालो, 'take out the thorn which is rankling in my heart'; जे अनिरुद्ध पर परं हथियार अघवर कटें सिला की धार, 'the weapons which fell on *Aniruddh*, were cut in two on the edge of the stone'. In the common formula of assent from an inferior, जो हुक्म, or जो आज्ञा, there is an ellipsis of the entire principal clause (*sc. हो सो में करेगा*).

f. The relative may be omitted from the subordinate clause. Thus, बचे सो भागे, 'those who escaped, fled'; मोटे बोले ताहि कौन परायो, 'who is unfriendly to him who speaks kindly?'. This is especially common in poetry; as, गुरुपदरज मृदु मंजुल अंजन नयन अमिय दृगदोषविमंजन तेहि करि विमल विवेक विलोचन, 'the soft and beautiful collyrium of the dust of (my) *Guru's* feet; (which is) nectar (to) the eyes, removing (all) defect of vision,—applying this to the clear eyes of the understanding, etc.'

g. Or, finally, where the connexion is quite plain, both the relative and correlative pronouns are omitted; as, भला किया कंस को मारा, 'you have done well (in that you have) killed *Kans*'.

729. The indicative tenses (Class III. § 721) will appear in adjective clauses whenever the qualification is stated as a fact. Of this abundant illustration will be found in the above quotations. But when the qualification is not stated

as an objective reality, one of the contingent tenses is employed.

a. This is especially the case, (1) in adjective clauses, denoting the object, purpose, or prospective result of an action ; also, (2) in all indefinite specifications of number, quantity, quality, etc., where no particular individuals are intended. In this latter case, **ऐसा**, and **इतना** or **इत्ना** are very commonly found in the principal clause ; and the subordinate clause is to be regarded as the expansion of that pronominal. Sometimes the adjective clause is introduced by **कि**, instead of **जो**. Examples are as follows : (1) **जिस में कृष्ण बलदेव आवें सो कर काज**, 'do that thing by which *Krishn* and *Baldev* may come'; **भांति तेहि राखब राऊ सोच मेर जेहि करई न काऊ**, 'keep the king in such a way that he may never feel troubled about me'; (2) **जिस शास्त्र में परमेश्वर का शुद्ध बर्णन हो**, 'in that Scripture in which there may be a clear account of God'; **जितने लोग आए हों सब को नैश्रोता दो**, 'as many people as may have come, invite them all'; **ऐसा आनन्द उपजा कि दुख नाम को न रहा**, 'such joy arose that sorrow remained not to (its) name'; **ऐसा उपाय करो जो फलदायक हो**, 'lay such a plan as may be effective'; **किसे इतनी सामर्थ्य है जो उसे बखाने**, 'who has so much ability that (he) might set it forth?'

b. In the following the principal clause implies a condition, which not being realized, the result was impossible. Hence the Indefinite Imperfect (§ 615, [5]) is used in the adjective clause, **अर्जुन की क्या सामर्थ्य थी जो हमारी बहन को ले जाता**, 'what was *Arjun*'s power that he should carry off our sister?' But in the following the contingent future is employed ; **नहीं तो उन की क्या सामर्थ्य थी जो कौरवों से लड़े**, 'else what was their power that they should fight with the *Kauravs*?'

c. Sometimes the adjective clause contains two or more relatives corresponding to as many correlatives in the principal clause. In this case English idiom requires that all except the leading relative be translated as indefinites. Thus, **जो जेहि भाव नीक तेहि सोई**, 'whatever one's disposition may be, that (disposition) seems good to him'; **जिन के रही भावना जैसी प्रभु मूर्ति देखी तिन तैसी**, 'whatever affection existed with any one, according to that they beheld the lord's form'.

Rem. A similar construction occurs with relative adverbs.

d. Sometimes **जैसे**, used adverbially, is elegantly substituted for the relative in final clauses, so that they assume the form of adverbial-

al clauses. Thus, जैसे जाय मोह भ्रम भारी करहु सो जतन, 'make such an effort as that vain affection and gross error may depart'.

e. Similarly जहाँ may take the place of the noun and relative which should appear in the adjective clause; as, धन्य सो नगर जहाँ तें आये, 'blessed that city whence they came'.

Adverbial Clauses.

730. The *adverbial* clause is the expansion of an adverb. It therefore defines the predicate of the principal clause in respect of time, place, manner, cause, or any other adverbial idea.

731. *Temporal* adverbial clauses are regularly introduced by जब (जद or जौ), 'when', to which the correlative तब (तद or तौ) regularly corresponds in the principal clause. As remarked in § 496, related adverbial ideas are expressed by the combination of the postpositions से, तक, etc., with the temporal adverb.

Examples are as follows: जब वहाँ न पाया तब आपस में बोलीं, 'when (they) found (him) not there, then they said among themselves';—जब से आप हमें . . . नंद को यहाँ रख आये तब से परबस थे, 'since you left me at the house of *Nand*, I have been subject to others'; जब तक साँसा, तब तक आसा, 'while there is life, there is hope'.

a. For the above adverbs may be substituted various nouns denoting time, as समय, काल, दिन, etc., preceded by the relative pronoun in the subordinate, and the correlative, or a demonstrative in the principal clause. Thus, e.g., जिस समय अनिरुद्ध जी को बानासुर ले गया, उस काल अनिरुद्ध जी खिचारेते थे. 'at the time *Bánásur* carried off *Aniruddh*, *Aniruddh* was reflecting'.

b. Occasionally a temporal clause is elegantly introduced by कि, as, वह भूखा बैठा था, कि इस में विस्वामित्र ने यह बचन कहा, 'he was seated hungry when *Visvámitra* said this word'.

c. As in adjective clauses, the relative is often omitted; as, सब गोपियाँ चारों ओर से घेर कर खड़ी भईं तब श्री कृष्ण उन्हें साथ लिये वहाँ आए, 'all the milk-maids stood encircling him on every side, then *Shrī Kṛishṇ*, taking them along, came to that place'; चलेहु प्रसंग दुरायडु तबहुं, 'when conversation is actually going on, even then conceal (it)'.

732. *Local* Adverbial clauses are regularly introduced by the relative adverbs **जहाँ**, or **जिधर**, or their equivalents, combined when necessary with various postpositions. The proper correlative or the demonstrative regularly follows in the principal clause.

Thus, **जहाँ लोमस ऋषि थे तहाँ कितने एक लड़के खेलते हुए जा निकले** 'several children playing came out where the sage *Lomas* was'; **जहाँ कंस गया है तहाँके तुम्हें भी भेजूंगा**, 'where *Kans* has gone, will I send you too, to that very place'.

a. When the principal clause precedes the subordinate, **जहाँ** is commonly preferred to the correlative **तहाँ**; as, **रानियां जहाँ गईं जहाँ ... दोनों खीर मृतक लिये बैठे थे**, 'the queens came where the two heroes were seated with the corpse'. **वहीं गया जहाँ असुदेव देवकी थे**, 'he went to the very place where were *Basudev* and *Devaki*'.

b. Occasionally, as in temporal clauses, a noun of locality, combined with the relative or correlative pronoun, takes the place of one or both of the local adverbs; as, **धन्य यह ठौर जहाँ आकर प्रभु ने दर्शन दिया**, 'blessed (is) this place, where the lord has come and revealed himself'.

733. *Modal* Adverbial clauses are regularly introduced by the modal adverb **ज्यों**, or its equivalents, followed by **त्यों**, etc., in the principal clause.

Thus, **ज्यों रथ निकट आया, त्यों गोपियां कहने लगीं**, 'as the chariot drew near, the milk-maids began to say—'. Or, rarely, the adverbial clause may be introduced by **कि**, indicating it as the explication of **यों** in the leading sentence. Thus, **यों कह देवकी को बचाऊँ कि जो पुत्र मेरे होगा सो तुम्हें दूँगा**, 'speaking thus, I may save *Devaki*, namely, The one which I shall have I will give to you'.

Rem. The latter clause here approximates closely in character to an objective substantive clause; but differs from it in that the sentence is not given as the very words to be spoken, so that it cannot stand in the relation of an accusative to the verb **कह**.

a. Still more common than the above, is the adverbial use of **जैसे** or its equivalents to introduce a modal clause. This is used almost invariably in introducing a comparison. Thus, **जैसे आप ने कंस को मार भक्तों को सुख दिया तैसे ही मधुपुरी का राज कर प्रजा पालन कीजे**, 'as your

majesty, having destroyed *Kans*, gave joy to your worshippers, even so, reigning over *Madhupúr*, be pleased to take care of the people'; जैसे बने तैसे ही ले आते हैं, 'in whatsoever way it may be accomplished, so will we bring him'.

b. When the principal clause precedes the other, the demonstrative is commonly substituted for the correlative pronominal. Thus, ऐसा सुख माना कि जैसे तपो तप कर अपने तप का फल पाप सुख माने, 'they rejoice as an ascetic, having done penance, rejoices on receiving the fruit of that penance'.

c. The correlative may be omitted from the principal clause; as, जैसे खाल लुहार के सांस लेते बिनु प्राण, 'like bellows of the blacksmith, it breathes without life'.

d. For जैसे and तैसे, जिमि and तिमि are often substituted in the *Rámáyān*. The correlative, however, is often omitted. Thus, जिमि यह कथा सुमायत मोही तिमि जनि हरिहि सुनावहु कबहू, 'never tell this story to *Hari*, as you have told it to me'. सहित दोष दुख दास दुरासा दलद नाम जिमि रवि निस नासा, 'the Name removes the worshipper's despair, with (his) sin and sorrow, as the sun destroys the night'.

e. As in other adverbial clauses, appropriate nouns combined with the relative and correlative pronouns, may take the place of the modal adverb; as, जहिदि विधि भा आगे कहब, 'I will tell thee hereafter in what way it happened'.

734. In temporal, local and modal adverbial clauses alike, one principle determines the use of the indicative or contingent tenses. When the adverbial clause is introduced merely as a supposition, without reference to any objective reality, then one of the three contingent tenses, future, imperfect, or perfect must be used; but when it is presented as an objective reality, one of the indicative tenses.

a. Thus, the contingent future is used in indefinite statements of time or place; as, जब वह आवे मुझे खबर दीजे. 'when he comes, (then) let me know'; जहाँ मिले उसे वहाँ पकड़ लाइयो, 'seize and bring him from wherever you may find him'.

b. Similarly, one of the contingent tenses is commonly employed in comparisons, when the object with which comparison is made, is

regarded merely as a *mental conception*. Thus, दोनों खीर ऐसे टूटे जैसे हाथियों के झुंड पर सिंह टूटे, 'the two heroes broke (upon them) as a lion might break upon a herd of elephants'. But when the illustration is regarded as an *objective reality*, one of the indicative tenses is employed. Thus, श्री कृष्ण बलराम ऐसे सोभायमान लगते थे जैसे सघन घन में बामिनी सुहावनी लगती है, 'Shrī Kṛiṣṇ (and) Balrām seemed as beautiful as seems the lightning in a dense storm-cloud'.

Rem. The choice of the tense in comparisons is thus obviously determined entirely by the way in which the speaker or writer chooses to regard the object with which comparison is made.

c. In poetry, the copula being omitted, the mode of conception is left undefined. Thus, जो गुनरहित सगुन सो कैसे जल हिमरूप, 'He who is the unconditioned, how becomes he conditioned? as the water'.

735. *Causal* adverbial clauses express (1) the reason, ground, or consequence of the principal clause. They are commonly introduced by जो, used as a conjunction (§ 520), in the sense of 'since', or 'whereas'. The principal clause is then introduced by सो or तो.

Examples:—हम जो ऐसे दुख में हैं हमें कोई कुड़ानेवाला चाहिये, 'since we are in such trouble, we ought to have some deliverer'; कितनी रक खेर में जो ऊँघो जो सोके उठे, तो नंद उस के पास जा बैटे, 'after some time, as Udho Ji, having slept, arose, Nand went and sat beside him':—sometimes the subordinate clause is not formally stated; thus, सो जानी पुबध मरने के अनन्तर पाषाण के समान हो रहता है, 'so intelligent man after death passes into the condition of a stone'.

(2) Causal adverbial clauses may express the *condition* under which the action of the principal verb takes place, as the *causa sine quā non* of the event. The subordinate clause is called the *protasis*, and the principal clause the *apodosis*. The *protasis*, expressing the condition, is regularly introduced by जो or यदि or the Persian अगर, 'if'; and the *apodosis*, by the illative तो.

736. It is important to give careful attention to the discriminative use of the tenses in compound sentences involving a condition. The following principles are to be noted.

The realization of the condition may be (1) possible, (2) actual, or (3) impossible. Hence, three general cases present themselves :—

(1) The condition may be only subjectively assumed as a *possibility*, which may or may not be in accordance with fact. In this case the verb of the *protasis* must be in one of the three contingent tenses, future, imperfect or perfect. (§§ 604, 622, 631.) When the consequence is regarded as certainly following, if the condition be fulfilled, then the verb of the principal clause will be in one of the indicative tenses; but when the conclusion is presented (*b*) as merely a possible issue, one of the contingent tenses must be employed.

Thus, *a*. **कल जो सुरासिंध बड़ आवे तो प्रजा दुख पावेगी**, 'if *Jurdsindh* should attack us to-morrow, then the people will have trouble'; **जो त्रिलोकी की माया दूँ, तौमी तुम्हारे शून से उत्तरन न दूँ**, 'if I should give the riches of the three worlds, yet I am not free from indebtedness to you'; **जो तेहि आबु बध बिनु आवौ । तो रघुपतिसेवक न कहावौ**, 'if I come to-day without having slain this (demon) then let me not be called the servant of the lord of *Raghu*':—*b*. **जो इसी को मारब तो निर्भय राज कब**, 'if I but kill this woman, then I may reign without fear'; or, with the respectful form for the contingent future; **जो आप इसे खोया चाहिये तो मैं एक उपाय बताऊँ**, 'if your honor wish to get rid of this, then I may suggest a plan'. Thus the contingent future is used in both *apodosis* and *protasis* to express a conceivable hypothesis, with its consequence. Thus, **जो दिन प्रति अहार कर खोई बिस्व बेगि चौपट होई**, 'if he should eat every day, the world would soon be a waste':—*c*. For the contingent future in the *protasis* the imperative may be substituted; as, **सो कृप्य कर कहो तो हमारे मन का संदेह जाय**, 'kindly tell me that, (*i.e.*, if you will tell me,) 'then the doubt of my mind may be removed'.

Rem. Observe (1) that as the Oriental dislikes direct and positive assertion a contingent tense is often used in Hindi, when English idiom would require the indicative:

Rem. (2) It must also be remembered that in all but the most modern Hindi these nice discriminations are constantly neglected, so that, in poetry especially *e.g.*, we often find the forms of the contingent future, where the

letter of these rules would require absolute future; as, e.g., *jo ihi barai amara so hot*, where modern idiom would require *hogá*; he who marries this girl shall become immortal'.

(2) When the condition is assumed as a reality, or in the future, past or present time, as when its fulfilment is assuredly expected, then the protasis takes the verb in the absolute future or some other of the indicative tenses. In the apodosis the conditions above specified necessarily regulate the choice of a contingent or indicative tense.

Examples:—*जो मैं निकलूंगा तो उस को अपमर्याद होगी*, 'if I come out, then he will be degraded'; *जो मैं अब क्रोध करता हूँ तो काज बिगड़ेगा*, 'if I now get angry, the business will be spoiled'; *जो तू ने नहीं लिया तो और कौन ले गया*, 'if you did not take him, then who else did carry him off?'

(3) In the third place, both condition and consequence may be contrary to fact and impossible of realization. The protasis expresses a condition which was not realized, the apodosis a consequence which would have followed had not the condition failed. The verb of the protasis is commonly put in the indefinite imperfect, much less frequently in the negative contingent perfect, and very rarely in the negative contingent imperfect. The verb of the apodosis is commonly also found in the indefinite imperfect.

Examples:—*जो मैं उन से कुछ मांगते तो वह देते*, 'had I asked any thing from him, he would have given (it)'; *जो यह प्रसंग चलता तो मैं भी सुनता*, 'had this story been going on, then I too should have heard (it)'; *जो मैं आया न होता तो उन को पाप न होता*, 'had I not come, they had not had sin'.

a. Sometimes the past imperfect is used in the apodosis; thus, *जो चाहता तो ला सकता था*, 'he was able to bring it, if he had wished'. The past tense, *था*, of the copula is sometimes found alone in the apodosis; thus, *जो तुम मेरी सुन्ते तो अच्छा था*, 'it had been well if you had heard what I had to say'.

737. The conditional conjunction is often omitted in all varieties of the conditional sentence. Thus, *जमुना के तीर पर जा रूँ तो बचूँ*, '(if) I go and live on the bank of the Jamná, then I may escape'. Here

may be noted the common idiom, in which a verb is repeated with *तो*; as, *e.g.*, मुझे कष्ट होय तो होय, *lit.*, '(if) trouble be to me, then it may be', *i.e.*, 'very possibly I may have trouble'.

a. In phrases introduced by *नहीं तो*, or its equivalents, there is an ellipsis of the entire protasis except its negative. Thus, इसी समय जाताया चाहिये नहीं तो क्या जानिये पीछे क्या दुख दे, 'I ought to inform him at once, (if I do) not, then who knows what pain he may afterwards give?' Similar are the following passages from the *Rāmāyan*; सोच रघुनाथ तुमहि करनीया नतव. . . में न जियव, 'that, O lord of *Raghu*, is to be done by you, else I shall not live'; सुमुखि हो नत जीवन हानी, 'be cheerful; else there is peril of your life'; सहेउं कठोर बचन सठ तारे नाहिनत लै जातेउं सीताहि बरजोरे, 'I endure thy hard words, wretch, else I would carry off *Sitā* by force'.

b. The illative conjunction *तो* is also sometimes omitted from the apodosis; and often, as in the following, both the illative and the conditional conjunction are omitted. Thus, काम पड़े अपना बल दिखाते हैं, 'if occasion arise, then they show their strength'. This omission is specially common in poetry; as, एक बार कैसेहुं सुधि जानौ कालहू जीति निमिष महं आनौ, 'could I in any way at all know one trace (of her), I could in a moment conquer and bring captive Death himself'.

738. Sometimes a clause is at once temporal and conditional. In this case, the *protasis* is introduced by *जब*, but the *apodosis*, by the illative *तो*; as, जब वह आवे तो मैं कहूँ, 'when he comes, then I may tell'; where *तो* represents the 'telling' as conditioned by the previous clause.

a. Very often the temporal adverb is merely implied, and *तो* alone in the *apodosis*, marks the conditional character of the *protasis*. Thus, उस का ध्यान कूटा तो उन्हों ने ध्यान कर जाना, '(when) his meditation was broken, then, reflecting, he knew'; एक दिन राजा परीक्षित आखेत को गये तो वहां देखा, 'one day (when) *Rājā Parīkṣit* went to hunt, then he saw there—'.

739. Concessive clauses are a species of conditionals, and are subject to the same rules as to the employment the tenses. The subordinate clause is introduced by *यद्यपि*, *यदपि*, *जो भी*, or even *जो* alone; to which *तथापि*, *सदपि*, or colloquially *तो भी* or *पर*, answer in the principal clause.

Examples :—यद्यपि वे पुरुष ज्ञान स्वल्प मानते हैं तथापि उस को ज्ञानस्वरूपता केवल नाममात्र की है, 'although they regard man as intelligent, yet his intelligence is only a mere name'; यद्यपि असमंजस भारी तथापि ज्ञान एक सुनहु हमारी. 'although there is great uncertainty, yet hear a word of mine'; जो अनेक जन्म अवतार ले बहुतेरा कुछ दीजिये तौभी विद्या का पलटा न दिया जाय, 'if one should become incarnate in countless births, and give never so much, yet an equivalent for learning could not be given'; कोई इस देह को पोषे पर यह कभी अपनी न होयगी, 'although one cherish this body yet it will never become his own'.

a. Sometimes the concessive conjunction is omitted; thus, क्या हुआ जो अजकी लड़ाई में हारे, 'what though we have been worsted in this present battle?'

Of Interrogative Sentences.

740. These present but little that calls for special remark. In the absence of any other interrogative word, a question is often indicated by the interrogative pronoun, क्या (poet. कि [की] or किं), which in such cases is incapable of translation. When a question merely implies perplexity, so that a direct answer is not expected, the contingent future is employed; but when asked for information, one of the indicative tenses is required.

Examples :—अब इस गोकुल में रहना कैसे अने. 'now how can one manage to remain in *Gokul*? ' ऐसे लोग क्या कुछ भला कहते हैं, 'are such people called any thing good?' यह अपमान कैसे सहा जायगा, 'how shall this dishonor be endured?'—where the question is equivalent to a strong negative statement; मैं तुझे क्या मारूँ, 'why should I kill thee?' रामचन्द्रनि हठ करके कि काऊँ, 'will the mother of *Rám* ever show obstinacy?' की तुम्ह हरिदासन्ध मंहं कोई, 'are you one of the servants of *Hari*?'

741. The Hindí exhibits a special fondness for interrogative forms. Thus, the interrogative is often substituted for the demonstrative, or correlative pronoun or adverb in the various compound sentences above noted,—especially when surprise is expressed. Thus, गर्व रावण कुंभकरण को कैसा खो दिया कि जिन को कुल में एक भी न रहा, 'how did pride ruin *Rávan* and *Kumbhakaran*, so that not even one of their family remained!' उभय मध्य स्थित होइति कैसी अन्न जोइ विद्य माया कैसी, '*Sítá*

appeared between the two, like the Illusive Power between *Brahm* and the soul'; राजा युधिष्ठिर कहाँ आते हैं कि जहाँ मय दैत्य ने मन्दिर बनाए थे, 'where does Rájá *Yudhishtir* come, but where the demon *máyá* had built a palace?'

Of the Collocation of Words.

742. The normal order of the parts of a simple sentence in Hindí, is (1) subject, (2) predicate, (3) copula, as मनुष्य पापी है, 'man is a sinner'; राम दास बुद्धिमान है, '*Rám Dás* is wise'. But in the passive construction of transitive verbs, the case of the agent takes the first place, the subject nominative or the accusative the second, and the predicate verb the last place; as, उस ने रस्वियाँ मंगाईं, 'he sent for ropes'.

743. Hindí, however, allows of the greatest liberty in deviating from this normal order, whether for the sake of emphasis, or to meet the necessities of metre in poetry, and of rhythm even in prose. In general, a word is rendered emphatic in proportion as it is displaced from its normal position in the sentence. Thus, the subject is rendered emphatic when last in the sentence; as, सजते हैं पति को अकुलीनी नारी, '*base-born women* desert their husbands'. The predicate is also emphasized by placing it after the copula, last in the sentence; as, तुम्हारा पुण्य है बहुत और पाप है थोड़ा, '*abundant* is your merit, and your sin *little*'; ये हैं ब्रह्मा रुद्र इन्द्र के बेटे, 'this is the lord of *Brahmá*, *Rudra* and *Indra*'. Or the predicate, if emphatic, may take the first place in the sentence; as, सामर्थी देखें हैं जो मा बाप की सेवा करते हैं, '*those are powerful*, who obey their parents'.

744. The copula receives the greatest emphasis when placed in the beginning of a sentence; as, है तो अच्छा, 'it is indeed good'. This is especially common, to heighten the effect of a following adversative clause; as, है तो गरीब, पर बुद्धिमान, 'he is indeed poor, but wise'; हैं तो कुशल होम से पर ... निपट भावित हो रहे हैं, 'they are indeed well, but...are in much anxiety'.

745. The object of a transitive verb regularly immediately precedes it; as, वह हम को मारता है, 'he is beating me', but is emphasized when first in the sentence; thus, इस अजीब को मैं कैसे जीतूंगा, 'this unconquerable one how shall I conquer?' A less emphatic position is the last; as, जो व्याहेगा उसे वो मारेगा मुझे, 'he who marries *her*, will kill *me*'. The transitive verb itself is emphatic in the first place; thus,

मारें कहा तोहि हम. 'shall I kill thee?' and also in the following; सो देते क्यों नहीं, 'why do you not give it?'

a. If a verb have an indirect object, this regularly immediately precedes the direct object; as, मैं तुम को यह किताब देता हूँ. 'I give you this book'. But words denoting the motive or object of an action, are regularly placed immediately before the verb; as, वह हम को बचाने आया, 'he came to save us'. But for emphasis it may follow the verb. Thus, यह असुर आया है प्रजा को दुख देने, 'to afflict the people this demon has come'.

746. In contrasted clauses the emphatic words may be placed, the one at the beginning of the first clause, the other, last in the second; thus, दुख रहा उस ने, हम को दिया सुख, 'sorrow he endured, to us gave happiness'.

747. In interjectional phrases, the following is an illustration of the common order; धन्य है परमेश्वर को, 'praise unto God!' But the copula may sometimes be omitted, and the order inverted; thus, तुलसी ऐसे पतित को बारबार धिरकार, 'Tulsī! on such a sinner, again and again a curse!'

748. The vocative usually stands first in a sentence, but may come last for emphasis; as, तैं ने यह क्या किया पापिनी, 'what is this thou hast done, thou wicked woman?'

749. When pronouns of different persons follow one another in the same construction, the order is the reverse of English, the 1st person always precedes the 2nd, and the 3rd. Thus, हम तुम ने क्या फल पाया, 'what fruit have you and I obtained!' गुरुपत्नी ने हमें तुम्हें ईंधन लेने भेजा, 'The guru's wife had sent us and you to get firewood'.

750. Attributive adjuncts, whether adjectives, participles, or genitives, invariably precede the nouns they qualify. When they follow they are to be taken predicatively and are thus rendered emphatic. The only exception to the statement is in the case of the genitive which, in books written under the influence of Persian, often follows the substantive in imitation of Persian idiom.

Examples are, वह बड़ी बस्ती है, 'that is a large town'; यह मेरी पुस्तक है, 'this is my book'; मैं ने वहां मरे हुए सिंह को देखा, 'I saw a dead lion there'. But reversing the order, these all become predicative adjuncts. Thus, वह बस्ती बड़ी है, 'that town is large'; यह पुस्तक मेरी है, 'this book is mine'; मैं ने वहां एक सिंह मरा हुआ देखा, 'I saw a lion dead there'.

751. Appositive adjuncts are regularly treated as attributives, and precede the noun which they define; thus, *दशरथ का पुत्र राम*, 'Rám the son of *Dasarath*'; *भवानी सुनार*, 'the goldsmith *Bhaváni*'.

752. All adjuncts, whether attributive or predicative, are rendered emphatic by separation from the noun which they qualify.

Thus, *बिधाता का भी कुछ तुम पर बस न चलेगा*, 'even *Brahmá* will not have any power over you'; *कल युग में राजा उपजे हैं अभिमानी*, 'in the *Kali Yug* kings have arisen (who are) proud'; *चार पाँव रखता हूँ तप सत दया और सोच*, 'I have four feet, (*viz.*,) penance, truth, mercy, and meditation'.

753. Adverbial adjuncts, whether words or phrases, as, *e.g.*, conjunctive participles with their adjuncts, regularly closely precede the verb they qualify. They may even come between a verb and its object. In accordance with the general principle above noted, they become emphatic in proportion to their separation from the verb. Or emphasis may be expressed by placing them after the verb.

Thus, *शीघ्र आओ*, 'come quickly!' *वह काशी में रहता था*, 'he was living in *Káshí*'; *वह हम से हर दिन कहता*, 'he would every day say to me—', *तुम चलकर देखो*, 'go and see'. But with more or less emphasis *हर दिन वह हम से कहता*, '*every day* he would say to me'; *तुम आओगे कब*, '*when* will you come?', etc., etc.

754. When the negative is used with compound verbs, the emphasis of the negation properly falls upon that part of the compound to which it is immediately prefixed; as, *e.g.*, *मैं नहीं लिख सकता हूँ*, 'I am not able to write'; but, *मैं लिख नहीं सकता हूँ*, 'I am not able to write'. The force of illustrations is indeed lessened when dis severed from the context; but the following may be of some value: *श्री कृष्ण चंद जी मुख से तो कुछ न बोल सका, पर आँखें डबडबाय ... देख रहे*, '*Shrí Krishn Chand* with his mouth indeed was unable to speak, but with eyes full of tears stood gazing'. Here the emphasis is on the speaking; but in the following, it is the fact of *ability* on which the stress of denial falls; *मेरे चारब बीस बिस्वें से अब कलि युग में चार बिस्वे रहे इस लिये कलि के बीस में चल नहीं सकता*, 'my feet are twenty in all, now in the *Kali Yug* four out of the twenty are left, hence to walk I am unable'.

Again, as appears from the context, with an emphasis on the prohibition ;—**तुम अपनी बहन को ... निकलने न दो** 'do not allow your sister to come out'; but with a different emphasis, **रुषा को मंदिर में उठाया लाया और फिर न जाने दिया**, 'he took up and carried *Ushá* to the palace, and did not let her return'.

a. Observe that when the passive conjugation is used in strong denials the negative, in accordance with the above, is almost invariably placed immediately before the auxiliary. Examples are very numerous; thus, **उस समय की सोना कुछ खरनी नहीं जाती**, 'to describe the beauty of that tune is impossible'; **मेरे चल्यो नाहि जातु**, 'for me to walk is impossible'.

755. Of conjunctions it is to be observed, that **भी** must always immediately follow the word which it emphasizes. Thus, **मेरा भी एक बेटा पढ़ता था**, 'one son of mine also was reading; i.e., of mine, as well as of some other person; but, **मेरा एक पुत्र भी पढ़ता था**, 'one son, also, of mine, was reading; or with yet a different sense, **मेरा एक पुत्र पढ़ता भी था** 'one son of mine was reading also'; **तो**, as a particle of emphasis, regularly follows the word which its emphasizes; as, **मैं तो जरूर आऊँगा**, 'I indeed, will surely come'. But as an illative particle it commonly takes the first place in the sentence; as, **जो आप आज्ञा करें तो हम जन्मभूमि देखि आयेँ** 'if your honor will give permission, then I will go and see my birth-place'.

a. **और** (अब, जो, और, वो) 'and', **कि**, 'that', **परन्तु**, **पर**, **किन्तु**, 'but', 'yet', **या**, **अथवा**, or **या**, 'or', must occupy the first place in the sentence they introduce, or immediately precede the phrase they annex. **जो** or **यदि**, 'if', **यद्यपि**, **तथापि**, etc., 'although', regularly take the first place in the sentence. But after emphatic words may precede them. Thus, **यह आदमी जो आवे भी तो भी उस से तो क्या काम हो सके**, 'this man, even if he come, then of what use can he be?' **वह राजा यद्यपि बहुत ही धनवान है तथापि किसी को भी कुछ देता नहीं**, 'that *Rájá*, although very wealthy indeed, yet never gives any thing at all to any one'.

756. As to the arrangement of the various members of a compound sentence, the following points are to be observed :—

(1) Final substantive clauses introduced by **कि**, 'that', and causal sentences introduced by **क्योंकि**, 'because', can never stand first as sometimes in English. Thus, **मैं इस लिये आया हूँ कि आप से भेंट होय**, 'I have come that I may have an interview with you'; **मुझ से इस युद्ध**

में रहा नहीं जाता क्योंकि शूद्र राजा हो अधिक अधर्म मेरे पर करेंगे, 'it is impossible for me to remain in this age, because *Shudras*, becoming kings, will exercise more injustice over me'.

a. But final and causal sentences introduced by the relative pronoun may emphatically precede the principal clause. Thus, तुम ऐसा उपाय करो जिस से जन्म सुफल होय, 'contrive such such a plan as that your birth may prove fruitful (of good)'.

b. Adjective clauses introduced by the relative जो, regularly precede the correlative clause; but the relative when emphatic may be placed last. Thus, वह गुरु काम का है जो दुख हर सके, 'that spiritual guide is of use who is able to remove sorrow'; उस पुष्प बिमान में बैठे जो लंका से आया था, 'he sat in that flower-chariot which had come from *Lanká*'.

757. Adverbial clauses, denoting place, time, manner, or the condition of an action, usually precede the principal clause which they follow. But when there is emphasis upon the principal sentence it will precede the subordinate clause.

a. It is to be especially observed that a conditional clause cannot follow the principal clause as freely as in English. The learner should be especially careful, in translating such English phrases, as, he will go if you will', to avoid the English order, as in most cases the Hindí will then be obscure. The conditional clause in Hindí very rarely and exceptionally takes the second place in a compound sentence.

b. Examples of the emphatic position of the principal before the adverbial clause are as follows :—हम ने तो यह तभी जाना था जब श्री कृष्ण चंद ने ... ब्रज की रक्षा करी, 'we indeed knew this even that time when *Shrī Krishṇ Chand* protected *Braj*'; आप ने बड़ी कृपा की जो आप मेरी सुधि ली, 'your honor has exercised great compassion, that you have come and taken thought for me'.

758. It is important to remark that in poetry, all rules and principles touching the position of words and sentences, give way to the exigencies of the verse. Thus even the order of the parts of compound words is reversed; as, e.g., in मर्दनमयन for मयनमर्दन, 'destroyer of *Mayan*', to rhyme with सयन in the previous line. Words denoting plurality (§ 147) may precede the noun they modify; as, देहिं गुन मारी 'they utter abusive words'. Even the postpositions may pre-

cede the noun ; as, मांझ त्रिवेनी for त्रिवेनी में. 'in the Triple junction'. And an attributive may follow its noun, even at a long distance ; as, रेनु भवसागर त्रिज कोन्ह यह, 'who has made this ocean of life as sand'. And a conditional conjunction may appear in the end of the sentence to which it belongs ; as, कोटिसिंधुसोषक तव सायक यदपि, 'although thy arrows could dry up ten million oceans'. And the parts of compound verbs are separated and inverted, quite at the pleasure of the poet, as illustrated in § 447, (1).

SUPPLEMENT.*

PROSODY.

1. The Hindí system of prosody, in its fundamental principles, is substantially identical with that of the Sanskrit. In no modern language, probably, has prosody been so elaborately developed as in Hindí. Indeed, as yet, prose Hindí is quite exceptional, and almost owes its existence to the stimulus of a foreign government, or the labors of missionaries; who, as might be expected, are for the most part unable to write a foreign language except in prose. Native writers, left to themselves, have almost without exception written in verse, and their labors have resulted in a system of versification which for inexhaustible variety, as well as for its intrinsic beauty, is probably unsurpassed.

2. A general understanding of the principles of Prosody is a prerequisite absolutely necessary to the understanding and interpretation of Hindí poetry. Without this, the student will often be left to uncertain conjecture; nor, again, can any person, without an understanding of this topic, even read properly the simplest Hindí verse. His enunciation, if in public, is sure to be chiefly a matter of amusement to the natives who may hear him.

3. Hindí prosody knows nothing of metre determined, as in English verse, by the accent. Missionaries have indeed produced many hymns, in accentuated verse, after the manner of English metres; but verse of this kind is entirely a foreign importation, nor is there any reason to believe that the natives of India will ever be led to exchange their own admirable system for the comparatively harsh and unflexible system of English versification, which the exigency of the occasion has called into, probably, a merely temporary existence.

4. All Hindí verse is regulated, like that of classic Greek and

* It is proper to remark that as the author was unexpectedly compelled to leave India when the printing of the Syntax had reached p. 344, it became necessary for him to attend to the printing of the Prosody, which required his personal supervision, before the Syntax was finished. The paging could not therefore proceed continuously with the rest of the book, so that it became necessary to introduce the prosody in the shape here presented, as a supplement. This will explain the irregular form of this chapter.

Latin, by a regard to the quantity of the syllables, as *long* or *short*. In Hindí poetry, however, unlike that of ancient Greek, Latin and Sanskrit, rhyme (सुक्त) is almost universally employed; and usage demands that rhyming lines shall always correspond, not in one only, but at least in the two last syllables.

N. B. It should be remembered, however, in order to the correct interpretation of this rule, that the vowel *a*, inherent in all consonants, which in prose is often silent when medial, and always silent when final, in poetry is always counted and commonly pronounced. Thus, *e.g.*, कात्, although in prose a monosyllable (*bát*), in poetry is reckoned a dissyllable, *báta*. (*Vid.* § 10, *e.*)

5. Quantity is either *long* (गुरु or दीर्घ) or *short* (लघु or ब्रह्म). A long syllable is denoted in Hindí prosodial notation by the mark ३, and a short syllable by the mark १, which signs are thus respectively equivalent to the English marks – and ˘.

6. Quantity is determined by the following rules.

(1) The vowels अ, इ, उ and ऋ, are *short*, and the remaining vowels आ, ई, ऊ, ए, ऐ, ओ and औ, are *long* by nature.

a. It is important to observe that although ए, originally, denoted a long diphthongal sound only, it has come to represent also, in Hindí, as in Prákrit, a short sound, ॐ (§ 1. *b*); for which reason, in Hindí poetry, ए is sometimes treated as a short vowel.

b. The principle which regulates the quantity of ए seems to be as follows. Whenever ए represents an original radical, as, *e.g.*, in a noun like खेटा, or in a *gunated* causal base, like करे in करना, from किरना; or has resulted from the combination of two formerly concurrent letters, as in करे for करह, from करहि, or छोड़े for छोडयाह; in such cases ए is invariably long. But in words where ए represents a primitive short vowel, *a* or *i*, as, *e.g.*, in खेहि for खिहि, रहें for रहिं (१), it is usually, though not invariably, counted prosodially short. A good illustration is found in the following half *Dohá* from the *Rámáyana*; खेहि राखेउ रघुबीर ते उखरे तेहि काल मई. This line can only be scanned in accordance with the above principle, by counting ए in खेहि, राखेउ and तेहि, as short, and the remaining *e*'s as long. Otherwise we shall have 27 instants, instead of 24, as required for each line of a *Dohá*. But in the following *Arddh Chaupát*, ए is short in खेहि, and long in तेहि: उमय वृषय खिनवति खेहि तेही. This Prákritic short or 'common' ए appears

chiefly in the oblique forms of the various pronouns, and as a union-vowel before verbal terminations ; as, तेहि, चलेउ, करेसु, etc., etc.

(2) A short vowel before two consonants in the same word becomes long by position. Thus, उ in बुद्धि, and अ in the first and second syllables of प्रत्यक्ष, are long by position.

a. In Sanskrit prosody, a final short vowel was also lengthened before a conjunct consonant initial in a following word. But Hindí poets commonly neglect this.

Exc. 1. A short vowel before the plural termination न् or न्नि, and sometimes before न्द and न्ज, as in मुनिन्द्, सुन्द् and ज्ञन्ज, remains short.

Exc. 2. A short vowel before a conjunct consonant of which the second element is र, as, e.g., अ in अग्नेर, may be counted either long or short.

(3) A short vowel before *Anusvár* or *Visarg* followed by a consonant, is long by position. Thus the short vowels in दुःख, वंग, लिंग, are all long by position. So also *Anusvár* in the end of a line lengthens a preceding short vowel ; as in अयं, नमामयं.

a. But when *Anusvár* stands, as is very often the case, for *Anunásik* (§ 7), a preceding short vowel remains short. Thus, e.g., in संवर, करदिगौ, मुद्, *Anusvár* stands for *Anunásik* ; and therefore the vowels अ, इ, and उ, retain their natural short quantity.

7. The unit of metrical quantity is called मात्र *mátra*, 'an instant'. A *mátra* denotes the length of time occupied in the utterance of a short vowel, as अ, इ, or उ. All long vowels and diphthongs are regarded as consisting of two *mátras*. This must be carefully borne in mind, in order to understand the prosodial measurement of verse. Thus the words तप, ताप, तपस्वी, contain, respectively, 2, 3, and 5 *mátras*, as follows ; तप. $\check{1} + \check{1} = 2$; ताप. $\bar{2} + \check{1} = 3$; तपस्वी, $\check{1} + \bar{2} + \bar{2} = 5$. Similarly the line काम क्रोध मद लोभ की, contains 13 *mátras*.

Rem. For मात्रा, मत्त also occurs in some native works. कल is also used in the same sense.

8. The laws of Hindí prosody allow a great degree of liberty in respect of orthography, and even of grammatical construction. The following principles regulate *prosodial license*.

(1) A long may be written for a short vowel, and *vice versá*.

a. This rule most commonly operates in final letters and at the end of lines, either for the sake of rhyme, or to fill out the total quantity of the line ; as in हनुमाना for हनुमान (to rhyme with आना);

बानी (to rhyme with पद्मबानी); and (to fill out quantities) बहूता for बहुता, दूता for दून, कोहू for कोह, etc., etc.

b. But medial radical vowels also are sometimes shortened, even in the middle of a line; as, *e.g.*, in ठकुर for ठाकुर, पदसन for पदोसन, जगन्ध for जगन्ध, सुखि गी for सुखि गी, जगधिं for जानधिं, कमनीय for कामनीय, etc., etc.

(2) *Anusvár* is inserted or omitted for the sake of rhyme; as in करार्ध, सुधीं, to rhyme with कार्यं and सीधं; and दाक (for दांठ) to rhyme with काक.

(3) Diphthongs medial and final are resolved into their component vowels; as, भयचातुर for भयातुर; कइच, मिलच, करच, for कइ, मिले, and करे; पइठिही for पैठिही, etc., etc. The latter vowel is then very often prolonged; as, *e.g.*, in करई, परई, for करे and परे; and sometimes the former vowel is lengthened; as in the following, where उड़ाई is written for उड़ी, to rhyme with खाई; लरिकार्ई जई जई किरिई तई तई संग उड़ाई. More rarely both are lengthened; as in सकार्ई for सके, to rhyme with उपार्ई; thus, जिन घल जिनु रहि न सकार्ई.

(4) Occasionally a vowel of one organ is exchanged for one of another; as in देयो for देय, in the following: काहि कइ कोहि दूधन देयो.

(5) A syllable, most commonly रे, is often added to fill out a line and make a rhyme; as in खड़ेरे, करताइ, for खड़े and करत.

(6) A consonant is sometimes doubled, to lengthen a preceding vowel; as in दमकूही, जमकूही, कट्टिई, दपट्टिई, for दमकाई, etc.

Rem. It is possible that these, as also some other variations mentioned, are merely archaic forms of the words in question.

(7) The rules of agreement are often neglected, so that the masculine is used for the feminine, the singular for the plural, and *vice versa*, to meet the exigencies of the rhyme. Thus, we have किये for किया, गावा for गार्ई, पार्ई for पाओ, etc., etc.*

9. *Pause* (विराम) is of two kinds, *sentential* and *harmonic*. The sentential pause occurs at the end of correspondent lines, and is marked by the signs, † *half-pause*, and ‡ *full-pause*. The harmonic pause or *casura* varies in different metres, and is marked by no sign.

10. The simple feet used in Hindí verse are of three kinds, *viz.*, monosyllabic, dissyllabic and trisyllabic. Occasionally, compound polysyllabic feet are also employed. Each class of feet contains several varieties as indicated below.†

*Vid. §713. † In the following pages it has been thought wise ordinarily to employ the Hindí names and symbols for the various feet; as until the stu-

	6. रगण	र	३१३	Cretic, — —)
7. सगण	स	११३	Anapest,) — —	
8. तगण	त	३३१	Antibacchic, — —)	

a. The *longus* is in Hindí named *guru*, 'heavy', (also called *háru*), and the *brevis*, *laghu*, 'light', (also called *meru*).

b. The eight varieties of trisyllabic feet are often collectively termed *गण gan*, *par excellence*.

c. It is important to note that in Hindí works on prosody, the symbolic letters are always used to denote the feet. Thus *मञ्जन* would denote the three feet, *भगण*, *जगण*, *नगण*; *सरम*, *सगण*, *रगण*, *मगण*, etc., etc.

11. Polysyllabic feet are chiefly used in *Játi Chhand* (*Vid. infra*). They are formed by various combinations of the above three kinds; and have no specific names.

12. Hindí verse (*छन्द*) is of two classes; *viz.*, *वृत्त छन्द Vritt Chhand*, and *जाति छन्द, Játi Chhand*.

I. That is called *Vritt Chhand* which is regulated by the number of syllables (*अक्षर*) in each *charan* or metrical line. It is therefore also called *Varan Chhand*.

II. That is called *Játi Chhand* which is measured by the number of *mátras* or metrical instants in each line.

I. Of *Vritt Chhand*.

14. In *Vritt Chhand* each verse consists of four metrical lines (*charan* or *pád*). *Vritt Chhand* is further distinguished as of three

dent is familiar with them, he will be quite unable to read intelligently the simplest page of any native work on this important subject.

Orders, *vis.*; (1) सम *sama*, 'even'; अर्द्धसम *arddhasama*, 'half-even'; (3) विषम *viṣhama*, 'uneven'. These are distinguished as follows :

(1) In *Sam Vritt* each *charan* has an equal number of syllables.

(2) In *Arddhasama Vritt*, the first and third *charans* have an equal number of syllables, and also the *second* and *fourth*.

(3) In *Viṣhama Vritt* each *charan* has a different number of syllables.

N. B. Although *Vritt Chhand* is measured by the number of syllables in each *charan*, yet in most metres of this class these syllables are not taken indifferently, but in each variety are regulated by a certain sequence of *feet*, as in Latin and Greek verse.

15. Native prosodians divide verse of the 1st Order (*Sama Vritt*) of the First Class, into twenty six *Genera*, according to the number of syllables in each of the four *charans*. Each of these *genera* has its own specific name, as given below. Thus a verse of this class having three syllables in each *charan*, would belong to the 3rd Genus, named मध्या *Madhyá*; one of fifteen syllables, to the 15th Genus, named अतिशर्करी *Atisharkarí*, etc., etc.

16. Under each of the above genera, again, are contained as many *Species*, as combinations of long and short syllables are possible with any given number of syllables. Thus the 2nd Genus comprehends four species, as follows, (1) __; (2) ˘˘; (3) ˘—; (4) —˘: and the 3rd Genus, comprehends eight possible species; *vis.*, (1) ___; (2) ˘˘˘; (3) ˘˘˘; (4) ˘—˘; (5) —˘˘; (6) —˘˘; (7) ˘˘˘; (8) —˘˘.

Rem. It is plain that in metres of a large number of syllables the number of possible combinations must be very great. Native prosodians give ingenious rules for determining the possible varieties under each genus, the place of any specified variety in the *prastár*, (*udisht.*) or, the place in the *prastár* being given, to determine the metre of any required species (*nashit.*) But these matters seem to be of no practical importance, and we may wisely refer to native authors the student who is curious in such matters.

17. All *Sama Vritt* metres containing more than twenty six syllables are classified under a 27th Genus named दण्डक *Danḍak*; which is fancifully said to comprehend 999 varieties.

18. Finally, it should be observed that in *Sama* metres the 2nd *charan* must rhyme with the 1st, and the 4th with the 3rd.

19. The following are examples of the most common metres under each genus. As the 3rd and 4th *charans* are exactly like the 1st and 2nd, for lack of space, the first two *charans* only have been given in the examples after page 7.

CLASS I. वरुण छंद or वृत्त छंद.

ORDER I. समवृत्त

*Species. Feet in each charan.**Examples.*

GENUS I. उक्था.

ओ	ग	ओ ॥ हे ॥ ओ ॥ की ॥
---	---	-------------------

GENUS II. अस्युक्था.

काम	गग	दाता ॥ लाता ॥ कोर्ह ॥ वोर्ह ॥
मधु	लल	तिय ॥ जिय ॥ जधु ॥ मधु ॥
मही	लग	रमा ॥ समा ॥ नही ॥ मही ॥
खाद	गल	रेनि ॥ नैनि ॥ चाद ॥ खाद ॥

GENUS III. मध्या.

ताली (मारी)	म	हे स्वामी ॥ ही कामी ॥ तू दाता ॥ हे आता ॥
कमल	न	खरन ॥ खरन ॥ कमल ॥ कमल ॥
मंदर	म	धावत ॥ स्वावत ॥ चंदर ॥ मंदर ॥
शुद्धी	य	भवानी ॥ सुवानी ॥ सुने सो ॥ कहे सो ॥
नरिंद	ज	सम्हार ॥ सवार ॥ परिंद ॥ नरिंद ॥
मृगी or प्रिया	र	हे खरो ॥ पत्खरो ॥ तो हिया ॥ री प्रिया ॥
रम्य	ख	धरनी ॥ खरनी ॥ रमनी ॥ रमनी ॥
पंचाल	त	नाचन्त ॥ गावन्त ॥ दैताल ॥ पंचाल ॥

GENUS IV. प्रतिष्ठा.

कन्या or तीर्था	मग	हे कर्तारा ॥ मेरे भारा ॥ तूही टालै ॥ मोही पालै ॥
समुद्धी or कला	भग	भामिनि जो ॥ कामिनि सो ॥ हानि करे ॥ प्रान हरे ॥
मुद्रा	यल	भजै राम ॥ खरे काम ॥ न ह्यपाहि ॥ न मुद्राहि ॥
कुमारिका	जग	करो कृपा ॥ दयामया ॥ न ह्योदिये ॥ न मारिये ॥
राम	सग	जग माहीं ॥ सुख नाहीं ॥ तजि कामै ॥ भजै रामै ॥
सुद्धि	जल	समै तजि ॥ प्रभू भजि ॥ टरै दुख ॥ मिले सुख ॥
धारी or धार	रल	नाम तोर ॥ मुक्ति मोर ॥ मोर भार ॥ तू उतार ॥
खोर	सल	हर पीर ॥ खर भीर ॥ खरखोर ॥ रघुखोर ॥

GENUS V. सुप्रतिष्ठा.

सम्मोहा	मगग	कांधा की धानी ॥ राधा तू मानी ॥ मानी तो मानी ॥ मेरी का हानी ॥
अमक	मलल	श्रुति कहहि ॥ हरिजनहि ॥ कुवत नहि ॥ अमक वहि ॥
हंसी or पंक्ति	भगग	तारक ईसा ॥ देत असीसा ॥ मारत द्रोही ॥ पालत मोही ॥
बिष्णु	मलल	दास जगत ॥ झूठ लगत ॥ याहि तजहि ॥ यीशु भजहि ॥
विलास	जगग	कृपा आपानो ॥ मुही दिखानो ॥ कुचाल म्बारो ॥ तुही सुधारो ॥
प्रिया	सलग	करहु दया ॥ करबामया ॥ मनरंजना ॥ दुखमंजना ॥
हारित	तगग	तो मानु भारी ॥ ठाने पियारी ॥ सौते सुखारी ॥ हेती हनारी ॥

4th ,,	२(खज)+ग	हित जानि मेर खिसराय प्राप हो	।

CLASS II. जाति छंद *Jāti Chhand.*

ORDER I. गण छंद *Gaṇa Chhand.*

23. *Jāti Chhand* has already been defined in 13, II, of this chapter. It is divided by native writers into *Gaṇa Chhand* and *Mātra Chhand*.

24. In *Gaṇa Chhand* the verse is commonly measured by the number of instants in each line; but the order of feet in each line, within certain limits, is fixed and invariable. In *Mātra Chhand* the order of feet is for the most part left to the option of the composer.

a. This distinction between *Gaṇa Chhand* and *Mātra Chhand*, as laid down by native prosodians, cannot, however, be rigidly maintained. In many metres classified as *Mātra Chhand*, certain requisitions and restrictions are made as to the nature of the feet employed, and on the other hand, in some *Gaṇa Chhand* metres, many of the feet are left to the option of the writer.

25. Native writers have divided *Gaṇa Chhand* into six species, explanations and examples of which are given below. Each of these species, again, comprehends many varieties according to the succession of feet in the line. A few illustrations are given under each species.

26. The 1st and most popular species of *Gaṇa Chhand*, is termed *Aryyá, Gáthá, or Gáhá Chhand*. In all *Aryyá* metres each verse consists of two lines (*dal*), the 1st of which contains 30, and the 2nd, 27 *mātras*. Each line must contain $7\frac{1}{2}$ feet, each of which, again, must contain 4 instants, except the 6th of the 2nd line, which has only one instant. A *jagan* (_ _) or a polysyllabic foot, is required in the 6th place in the 1st line; but *jagans* are prohibited in the odd feet of the 2nd line. The cæsural pause falls after the 3rd foot or 12th instant of each line.

27. The following is an example of that variety of *Aryyádi* metres which is known, *par excellence*, as **आर्या** or **गाहा**.

1	2	3	4	5	6	7	$\frac{1}{2}$																
भ	+	न	ल	+	ख	।	न	ल	+	ग	ग	+	ख	+	भ	+	ग	= 30 instants.					
ग	ग	+	भ	+	भ	।	ग	ग	+	ख	+	ख	+	न	ल	+	ग	= 27 instants.					
आ	ख	ख	ल	हु	ख	ख	म	धुरा	र	ह	त	ज	ह	ं	दी	न	ब	ंधु	आ	प	अ	ली	।
मा	धो	को	ब	ंध	वा	वन	आ	हो	अ	ल	ती	क	स	नि	ह	ं	ल	ली	।				

28. **चपला छंद** must have a *jagan* in the 2nd and 4th places each line.

$$स + ख + स + ख + स + नल + गग + ग = 30.$$

$$भ + ख + स + ख + नल + ल + स + ग = 27.$$

करुणानिधान जगनाथ जान आज मोहि शरब तेरी है ॥

देखहु कृपा नयन से निहारि धरत सबन करी है ॥

29. The 2nd species of *Gana Chhand* is called (from its chief variety) **गीति छंद** *Gīti Chhand*. The principal variety differs from all metres of the 1st species in that *both* lines contain 30 instants. The 6th foot must be a *jagan*, as in the 1st line of *Aryyá Chhand*. The other general laws of the verse are the same as in *Aryyá Chhand*. (*Vid.* §26, *supra.*)

गीति छंद.

$$गग + गग + गग । भ + स + ख + स + ग = 30 \text{ instants.}$$

$$गग + स + भ । नल + स + ख + गग + ग = 30 \text{ instants.}$$

राधो माधो मेरी बात सुनहु साथ त्यागि मति जाओ ॥

मानो हमरी सत्यहि दर नाई यह जानि बूकि तूं जाओ ॥

30. **उपगीति छंद** contains in each line 27 instants, and follows in both lines the rules laid down for the 2nd line in *Aryyá Chhand*.

$$गग + भ + स । स + स + ल + गग + ग = 27 \text{ instants.}$$

$$नल + स + स । नल + गग + ल + स + ग = 27 \text{ instants.}$$

आवो आज चलहु कुंजन में सबरी अहो वाली ॥

चलत फिरत कूठत हैं बिच बिच में सोह जनमाली ॥

31. **उद्गीति छंद** is the exact reverse of *Aryyá Chhand*, having 27 instants in the 1st, and 30 instants in the 2nd line. The same laws regulate the long and short lines as in *Aryyá* metres.

$$गग + भ + नल + गग + गग + ल + भ + ग = 27 \text{ instants.}$$

$$गग + गग + स + भ + स + ख + भ + ग = 30 \text{ instants.}$$

माधो आज चलहु तुम मानो मानो कहे हमरी ॥

हूँ वा कौ आज की नाशन शुभ कीर्ति कैलिहै तुमरी ॥

32. **आर्यागीति छंद** differs from *Aryyá Chhand* in that it adds one half foot to each line, making two lines of 8 feet each, instead of 7½. The 1st line therefore contains 32, the 2nd, 29 instants. The other rules for each line are the same as those already given. (§ 26, *supra.*)

गग+गग+स । भ+स+ख+गग+गग = 32 instants.

नल+नल+नल । नल+गग+ल+नल+गग = 29 instants.

मेरे प्यारे कहना मानहु अलकी नहीं बिसरो मो कौ ।

चरख शरख हम तजत न निसु दिन ध्याऊं कवन विधि तो कौ ।

33. The various metres in *Gana Chhand* classified by some as *Baitalyádi*, *Shikhádi*, *Vaktrádi* and *Achaladrityádi*, differ widely from the above *Aryyá* metres. A few examples are given under each head.

34. The *Baitalyádi* metres all consist of two lines, each containing six feet, and subdivided into two *charans* of three feet each. The number of instants varies from 28 to 32 in each line. The following are the most common varieties.

35. **बैतालीय छंद.** Two lines of 30 instants each, as follows: 6+र+लगा+8+र+लगा. The combination of long and short syllables in the polysyllabic feet, (the 1st and 4th,) is optional. Pause at the 14th instant.

मधु सूदन को लखो अली तुम देखो कैसे द्वियो गली ।

अब माधव राधिका अली सबरी जैसे हो चलो मली ।

36. **चारुहासिनी छंद** differs from the foregoing in substituting 6 instants for 8 in the 4th foot, making 28 instants in each line. The feet in both halves of each line therefore exactly correspond.

चलो चलो बाल साध री भलो भलो साज साध री ।

लखो लखो जात कांध री कहे कहे सांस बांध री ।

37. *Shikhádi* metres are characterized by having all the syllables, except the last two, of the same length. The number of instants varies from 28 to 32. The following are the most common varieties.

38. **अनंगक्रीडा छंद** has two lines of 32 instants each. In the 1st line all the syllables are long; in the 2nd, all are short. In this metre, therefore, no rhyme is possible. Pause at the 8th syllable of the 1st line, and the 8th and 16th of the 2nd.

आवो आवो ओ आवो हो मेरे द्वारे राधा माधो ।

निसु दिन लखत न कहत अवर कुह शरख चरख तजि भजत अवर कुह ।

39. **अतिरुचिरा छंद** Scheme, २९ल+ग=29 instants in each line. Pause at the 8th, 16th and 24th syllables.

भजहु मन चरख रहहु हरि शरख तजहु सब विषयन रमना ।

अलहु पद्य सुगम करहु तुम जनम सुफल नियर अर्वाह मरना ।

40. *Vaktrádi* metres all contain two lines, each of which is divided into two *charans* each of eight syllables. The second, third and fourth syllables must not form a *nagan* (_ _) or *sagan* (_ _). The following are the most common varieties.

41. **चपलावक्त्रा छंद** requires, in addition to the above conditions, that the fifth syllable begin a *nagan* (_ _).

घूमि देखो मगन में कौशो सोहत री आज ॥
कांधा आज मधुर में देखें री सखरो साज ॥

42. **युगमविपुला छंद** requires, in addition to the general conditions of *Vaktrádi* metres, that the fifth syllable of the even *charans* begin a *jagan* (_ _).

कहना मानु मेरो री आली चलहु आज हो ॥
मान से खपुरी राधे देखो कस न साज हो ॥

43. The *Achaladhrityadi* metres consist each of four lines of 16 instants, of which the 1st rhymes with the 2nd, and the 3rd with the 4th. The following varieties may be noted. The 1st and 2nd lines only are given in the examples.

44. **विश्लोक छंद** requires that the 5th instant begin a *jagan* (_ _) or *nagan* (_ _). The final syllable must be long.

माधो करो सहाय लोक की ॥ साधो सदा सुचेत योग की ॥

45. **चिचा छंद** requires a short syllable at the 5th, 8th and 9th instants, and a long syllable as final.

आज चलहु पगन विहारी जू ॥ देखहुं आज भलक तिहारी जू ॥

46. **उपचिचा छंद** requires that the 9th and 10th instant fall on one long syllable, which must be followed by two short.

विना परीक्षा तत्त्व न प्रगटे ॥ वेब धरे सों नाम नहिं छटे ॥

CLASS II. **जाति छंद** *Játi Chhand.*

ORDER II. **मात्रा छंद** *Mátrá Chhand.*

47. In *Mátrá Chhand* each *charan* or *dal* is composed of a certain number of instants. Often the *charans* are again subdivided into feet, each containing, again, a fixed number of *mátrás* or *instants*,

and following each other in an invariable order of succession. But the combination of long and short syllables in the several feet is left, for the most part, to the option of the composer; and the verse is thus regulated, not by any reference to the kind of feet employed, but by the number of instants required for each division of the verse.

a. Thus, *e.g.*, the first foot of the *Dohá* must consist of six instants, but these may be so combined as to form a double tribrach (२ नगण ० ० ० ० ० ०), or a molussus (नगण _ _ _), or any other feet possible under the conditions.

48. It should be particularly noticed that not only the total number of metrical instants in a *charan* or *dal* is fixed, but that also the number of instants in each foot is invariable. Thus the following half *Chaupát*, although containing the 16 instants required by rule, is faulty in the composition of its feet; मित्र कुम्हार माटी ताता. In this, the number of instants in each of the four feet is as follows; 7+3+4+2, whereas it should be, 6+4+4+2.

N. B. Observe that in the above, as in all the schemes given below, each figure denotes a foot or other section of a verse, and indicates also the number of instants which it contains. When any figure is followed by the sign of multiplication, \times , it is to be understood that the foot is to be repeated the number of times which is denoted by the multiplier. Thus (4×3) would denote that a foot of four instants was repeated three times; *i.e.*, $4 \times 3 = 4 + 4 + 4$. A comma after any figure will be used to denote the metrical pause; thus, 10, +8, +8, +6=32, is to be interpreted as denoting a line of 32 instants, composed of four *charans*, respectively containing 10, 8, 8, and 6 instants; the cæsural pause falling at the 10th, 18th, and 26th instant.

49. Verse in *Mátrá Chhand* may be conveniently distributed into three divisions; *viz.*, 1st, metres consisting of two lines only (द्विपाद); 2nd, those consisting of four lines (चतुष्पाद); 3rd, those consisting of more than four lines (अहुष्पाद).

a. Many metres are reckoned *Dvipád* by some prosodians, and *Chatushpád* by others. But this is a matter of no great practical importance.

50. Hindoo prosodians have enumerated and described a very great variety of metres in *Mátrá Chhand*, as in *Varaṇ Chhand*. But it will suffice to enumerate and illustrate a number of the most common. The metres under each class are arranged according to the number of *mátrás* in each line (*dal*), beginning with the shorter and proceeding to the longer metres.

I. Verse of Two Lines (द्विपाद).

51. **दोहा** or **दोहरा**. This contains two lines, each of 24 instants; each of which is divided into two *charans* and six feet, as follows; 6+4+3, 6+4+1. The last foot (3) in the first *charan* must not be a trochee (_ _); *i.e.*, it must be a tribrach (_ _ _) or an iambus (_ _). The last syllable of each line must be short.

माला फेरत युग गया गया न मन का फेर ।
कर का मनका झाड़िकै मन का मनका फेर ॥

Rem. This is at present the most popular and common of all metres. It is much used by *Tulsí Dás*, *Kabír*, and all the most esteemed poets.

52. **सोरठा**. This is simply an inverted *Dohá*; *i.e.*, the 2nd and 4th *charans* of the *Dohá*, are made to stand as 1st and 3rd, and *vice versa*. The same rules and restrictions as to feet hold as in the *Dohá*; *i.e.*, the final syllable of the short *charans* must be short; and the last foot of the longer *charans* must not be a trochee. The rhyme is not made at the end of the line, but maintains its original place at the end of the short *charans*. The scheme stands, 6+4+1, 6+4+3. In the following, *Tulsí Dás* has exceptionally rhymed also the longer *charans*.

कुंडरंदुसम देह उमारमन करुनाअयन ।
जाहि दीन पर नेह करो कृपा मर्दनमयन ॥

53. **उल्लाह छंद** contains in each line of two *charans*, 28 instants; the 1st and 3rd *charans*, each have four feet, $(4 \times 3) + 3 = 15$; and the 2nd and 4th, three feet, $6 + 4 + 3 = 13$ instants.

को प्रभु कहे गुन अमित तोर बुद्धि शक्ति प्रेम अपार ।
अब दिवधाम तजि अवतरियो कीन्ह तबहि नर निस्तार ॥

54. **ललित** or **हरिपद छंद** contains in each line 16,+12=28 instants. The last two syllables of each line must be *long*.

कहा मानु अब बात हमारी खलो सखी तू आजू ।
सुनी हाल हम आज तुमारी प्रिया सिधारी काजू ॥

55. **महीषरी** or **हरिगीति छंद** has seven feet in each line; thus, $(4 \times 5) + 6 + 2 = 28$ instants. Pause at the 16th instant, secondary pause at the 9th. The last syllable of each *charan* must be *long*.

बिनु दाम आवत काम जो नित ताहि नही भजे नरा ।
अगदीश रकहि झाड़ि सेवत देवगब संशय भरा ॥

56. **चूड़ियाला छंद** differs from the *Dohá* only in that a third *charan* of 5 instants is added to each line. Thus the scheme for each line is, $6+4+3$, $6+4+1$, $+3+2=29$.

में अल मिलन अर्धे सखी असुमति सुत अर्धे होय कता बहु ।
रूपटि रूपटि सब दौरिके यशुदा नंदन को लखवा बहु ॥

57. **चौपदी छंद** has in each line, $10+8+12=30$ instants; the last syllable must be *long*. Pause at the 10th and 18th instants.

अति कूर आकार बप न चीन्हे परम अतुर पद पावे ।
सब देखि अगत में आप भली है बाहर सुमति अतावे ॥

58. **चौबोला छंद** has in each line 30 instants. Pause at the 16th instant. Thus, $(4 \times 4) + (4 \times 3) + 2 = 30$ instants.

अमर चित बिचारि धरो तनु से भूपति खलि से कपट करो ।

Rem. In the *Chhandodāpak*, the line is divided thus, $(4 \times 3) + 3 = 15$, $(4 \times 3) + 3 = 15$. I have followed the *Pingalādarsh*.

59. **घत्ता or घत्तानन्द छंद** has two lines, each of 31 instants; each line has nine feet, with pauses at the 10th and 18th instants, thus, $(4 \times 2) + 2$, $4+4$, $(4 \times 3) + 1$.

मोहन मुख आगे अति अनुरागे में सुरही मसिहबि निदरि ।
दुख देत सु आली बिनु बन माली घत्ता लहि छूक तन अरि ॥

Verse of Four Lines (चतुष्पाद).

60. Of the various metres enumerated below, a number, as, *e.g.*, the *Tribhangi*, *Durmilá*, *Dandkalá*, *Lálavati*, *Padmávatí*, *Madanhar*, are reckoned by a few prosodians as verses of two lines (*द्विष्पाद*). The second pair is, indeed, in respect of feet, only a repetition of the first pair, and does not rhyme with it, so that the verse is really a compound of two *Dvipád* stanzas. On this account, while following common usage in reckoning these as *Chatushpád*, in many cases I have thought it necessary to give examples only of the first of the two couplets.

61. **गमक छंद** has in each line 5 short syllables.

अम सकल । अल विकल ॥ सुर अमृत । असुर मृत ॥

62. **दीपक छंद** has in each line 10 instants.

तुम रहहु प्रियनाथ । निसु समय मम साध ॥ अग को सुखदायक । प्रेम करै लायक ॥

63. The following have each 14 instants in each line, but differ in respect of the metrical pause, and the feet that are permissible.

- (1) गजल छंद, 7,+7,=14. Last foot must be a trochee.

अब तो हो तु प्रीय सचेत । मग में पढ़ि न रहे अचेत ॥
नयन खोलहु शत्रुन समीप । आगत रहे तू सखि दीप ॥

- (2) चम्पक छंद, 8,+6,=14. Last foot must be a spondee.

मुरली की धुनि सुनि घाई । सगरी सखियाँ उठि घाई ॥
मन मोहन की सुनि बानी । रहि रहि सारी मुसुकानी ॥

- (3) बज्र छंद, 6,+8,=14. First foot, $_ _ _$; last foot, $_ _ _$.

रहहु सदा रघुबंध नाथ । करहु कृपा अब आज साथ ॥
अतन करहु अब दीननाथ । धरहु अबे मम कांध हाथ ॥

64. चौपाई छंद, 8,+7,=15. Final syllable must be short.

करहु कृपानिधि धर्म विकास । मेरे हिय में ज्ञान प्रकाश ॥
रहहु सदा प्रभु चित में आय । कलमल राघव पल में जाय ॥

65. The following two contain each 16 instants to the line, but differ in the feet and pauses.

- (1) अडिल्ल or अलीला छंद, 8,+8,=16. No *jagans* ($_ _ _$) allowed; the last foot must be a *bhagan* ($_ _ _$). All four lines must rhyme.

अब वह आवत वेहु बजावत । म्वाल बाल को नाथ नचावत ॥
लखु अति रावत हवि बह द्वावत । भूमकि भूमकि सब खेल खिलावत ॥

- (2) चौपाई (also called पादाकुलक and कुलपाई) 6+4+4+2=16. The last foot is commonly, though not invariably, a spondee.

उधरहिं विमल विलोचन ही के । मिटहिं दोष दुष भवरजनो के ॥
सूकहिं रामचरित मनमानिक । गुण प्रगट जो जेहि खानिक ॥

Rem. This metre ranks with the *Dohá* (§ 51, *sup.*) in popularity. A large part of the *Rámáyān* of *Tulsí Dás* is composed in sections very commonly of four *Chaupáts*, alternating with one or two *Dohás*.

66. हंसगति छंद, 5+5,+5,+5,=20. Pause at the 10th instant.

यशोदा लाल तूं रारि काहे करो । कहोगी आज में जाय नहीं टरो ॥
सुनेगी यशोदा बतावैगी तेरो । ठीठ तो भयो है देखियो तु मेरो ॥

67. रासा छंद, 12,+9,=21 instants.

करहु कृपा अग स्वामी मेरे साथ हो ॥
रहियुं सदा अभिलाषी तेरे हाथ हो ॥

68. लीला छंद, 11,+11,=22. Last syllable must be long.

घन्य भयो में आच हरि के काच आयो ॥
लखो सखी सब साच कस हरि बय भायो ॥

69. रौला छंद, (also called रसावली,) 6,+(4×4)+2,=24. Last syllable must be long; pause at the 11th instant.

रवि हवि देखत घुसत घूँघू जहं तहं भागहीं ॥
चक्रवाक लखि अधिक रवि को हिय अनुरागहीं ॥

70. काव्य छंद, 6+(4×3)+6,=24; pause at the 11th instant.

माधव आच निहारि जात बालन संग कुंजन ।
देखि देखिके आप चलत मानहु दसगंजन ॥
आवै अच जो आच धर मिलि री नंदनंदन ।
करत बड़ो अनरीत चलत जिमि सिधुरविभंजन ॥

71. दुविया छंद contains 16,+12,=28 instants.

आयो आच यहाँ यदुनन्दन लीन्हे कर पट सारी ।
देखु देखु सखि सोहत कैसी मानो घनघट कारी ॥

72. चौपैया छंद, 10,+8,+12,=30 instants. Last foot a spondee. Subordinate rhymes fall at the 10th and 18th instant.

तल कितल रसातल गगन भुवन तल सृष्टि जितो जग माहीं ।
पुर ग्राम सुधल में कानन जल में धारि रहित कहु नाहीं ॥
पिय मिलहि न रामहि तजि सिय बामहि नहि बघार कहुं भागे ।
सुरपति सुत कांचो सब जग नांचो जां चौपैया लागे ॥

73. सवाया छंद, 16,+15,=31 instants. Last foot a trochee.

रेखो राम नाम को सौदा तोहि न भावत मूढ़ अयान ।
निसि दिन जात मोह बस दौरत करत सबै आच नम सिरान ॥

74. The four following metres have each 32 instants to the line, and differ only in the caesural pause, and the feet which are permitted.

(1) त्रिभंगी छंद, 10,+8,+8,+6,=32. No jagans (— —) allowed. Subordinate rhymes at each pause.

समुझिय जगु जन में को फलु मनु में हरि सुमिरन में दिन भरिये ॥
किगाढ़ो बड़ुतेरो छेब घनेरो मेरो तेरो परिहरिये ॥
मोहन बनवारी गिरधर धारी कुंज विहारी पगु परिये ॥
गोपिन को संगी प्रभु बड़ुंगी लाल त्रिभंगी उर धरिये ॥

(2) **पदमावती छंद** differs from the *Tribhangi* only in making two pauses instead of three in each line, thus, 10,+8,+14,=32. But some writers make three pauses, dividing thus, 10,+8,+6,+8,=32. The final syllable must be long. The remaining rules are the same as for the *Tribhangi*.

व्यालिनि खी वेनी लखि हखि सेनी तख तन चाखा मेरिं खू ।
 खसि खों मुख खोमित लखि ह्यो खोमित लावत टकी खकोरिं खू ।
 निकसत मुख स्वाखें पाव सुखार्थ संगन होइत भेरिं खू ।
 बाहिर आवत खख पदमावति तख भीर खुराई खडुं खोरिं खू ।

(3) **दुरमिला छंद**, 10,+8,+8,+6=32. This differs from the *Tribhangi* only in that the last foot must be a spondee. Secondary rhymes are made in the subordinate divisions of each line.

इक त्रिय कृतधारी पर उपकारी नित गुर आच्चा अनुसारी ।
 निरसंख्य दाता खख रस छाता सदा साधु संगति धारी ।

a. The **दंडकला छंद** differs from this only in requiring an iambus instead of the final spondee.

(4) **लीलावती छंद**. Scheme, 18,+14,=32. This differs from all the preceding in admitting only one caesural pause.

पीतांबर की चटक मटक भु की लटक कटक खख कुटल की ।
 मुसुकान विलोकन निरखि निरखि के हरखित हीय मानुकुल की ।

75. **हिंडोल छंद**. Scheme 10,+10,+10,+10,=40. The last foot must be an iambus; subordinate rhymes may occur at each pause,

प्राख के अपन में नेन में खैन में चित्त खख कर्ष में सदा खखो जमुना ।
 खयन में खलत में कहत में सुनत में खान खख पान में करो पाप वमुना ।

76. **मदनहर छंद** has in each line 10,+8,+8,+6,+8,=40 instants. The final syllable of each line must be long; but the last three syllables must not form a *ragan* (_ _ _). The first two and last two *charans* rhyme. Subordinate rhymes occur at the caesural pauses.

खखि लखु सुखार्थ खखि अधिकाई भाग मलार्थ जानि परे फल सुकृति करे ।
 अतिरूपसदन मुख होत खखन मुख दास खिये दुख दूरि करे मुख भूरि मरे ।

Verse of more than Four Lines (बहुपाद).

77. **कुण्डलिया छंद.** This is a compound metre of six lines, consisting of a *Dohá*, (§ 51 *sup.*) followed by two *Káryas* (§ 70 *sup.*) The last *charan* of the *Dohá* must be repeated in the beginning of the *Kárya*, and the last two syllables of the *Kárya* must be the same as the first two of the *Dohá*. This metre is much admired. The best examples are in the poem of *Girdhar Ráe*, which is written in this metre.

बीती ताहि बिहार दे आगे की सुध लेय ।
 जो बनि आवै सहज में ताही में चित देय ॥
 ताही में चित देय बात जोही बनि आवै ।
 दुरजन हंसे न कोइ चित में खेद न पावै ॥
 कह गिरधर कविराय यहै कर मन परतोती ।
 आगे कौ सुख होय समुक्त बीती सो बीती ॥

Rem. Sometimes for the *Kárya*, a *Rolá Chhand* (§69 *sup.*) may be substituted. This differs from the *Kárya*, however, only in the division of its feet.

78. **छप्पै छंद** consists of a *Kárya* (§ 70 *sup.*) and an *Ulláí Chhandá* (§ 53 *sup.*)

भाल नैन मुख अधर चिबुक तिय तुम विलोकि अति ॥
 निर्मल अपल प्रसन्न बाल सुभ वृत्ति प्रकी मति ।
 उपमा कह शशि पंख कंठ खिंदिय गुलाब वर ॥
 खंड धान तिथि प्रात पक्ष प्रफुलित सुयोग धर ॥
 सादर किशोर सुभ गंध मृदु नय लदास आवत न चित ॥
 सु कलंक रहित पुग सरल हित डार गहित घट पद सहित ॥

79. **रसिक छंद** consists of 6 lines, each of 11 instants. The final syllable must be short.

हंसत चखत दधि मुदित ॥ भुक्त भजत मुख रुदित ॥
 असित तियनि मिलि रहत ॥ रिसियत विरतिहि गहत ॥
 अगनित ह्वि मुख ससिक ॥ विसु तवन हरस रसिक ॥

Of metres used in songs (Bhajans).

80. Many of the metres enumerated above, in both *Varan Chhand* and *Mátrá Chhand*, are used in the composition of verse designed to be sung. The only special point to be noted is the custom of continuing the same rhyme throughout all the lines of the *bhajan*. A

whole or half stanza is often repeated as a refrain. Examples are added of common metres.

81. **तोटक सवैया.** Scheme, ८ स+ग Pause at 4th foot.

अप जोग करे तन साधि मरे नर कोटि उपाय रचे भरमार ॥
श्रुति चारि पुरान कुरान पढ़े नाहिं भेद मिले तन भूठि सतार ॥
गुर पंडित पीर फकीर फिरे बहु भांति क रूप विरूप खनाय ॥ etc.

82. **ध्रुपद गीत** has in each verse 32 short syllables, with pause and rhyme at the 8th, 16th, and 24th.

लह असन असन गह सरग सदन ।
दह अघ घन अन कह घरम खचन ॥

83. **पूर्वी गीत.** has two lines, of 6+6,+6+4=22 instants, with pause at the 12th; the last two syllables must be long.

काम लहर उठत सुंद क्रोध पवन जेरे ।
लोभ भौर छुमत ठौर मोह सघन घेरे ॥

84. **ललिता गीत.** In each line, 6+6+2,+6+4=24 instants, with pause at the 14th.

भव मय भंजन अनरंजन गंजन सकल हरन ॥
विपति निवारक सुखदायक लायक पढ़न चरन ॥

85. **भैरव गीत.** The scheme commonly used to this *Rág*, is as follows; 6+4+4+2,+6+4+2=28 instants, with pause at the 16th instant; the metre is complete in two lines.

भजन करो मन लार्हे लार्हे भजन करो मन लार्हे ।
प्रेम सुधा रस चाखो निरमल रसना रस अपनाई ॥

86. **ठुमरी गीत.** To this is sung a verse of two lines as follows; 6+4+4+2,+4+4+4=28 instants; or 6+4+4+2,+6+4+4+2=32 instants. Pause, in either, at the 16th instant.

- (1) अमरित भोजन ढाड़ि विमूढ़े कर नित गरल अहारी ।
कंठहि उतरत तन मन ग्रास्यो कोउ न करे पुढारी ॥
- (2) जोति घट गर्ह दौ नैनन की नाहि सुने स्वर नीके काना ।
सुंघि सके नहि फूलन वासा रसना भूले रस रचि नागा ॥

INDEX.

The numbers refer to the *paragraphs*.

- Ablative**, of the agent, 545, (6); in comparisons, (7); of manner, (9); of separation, (3); of use, (10); postposition of, omitted, 547.
- Ablatively dependent compounds**, 480, (4).
- Absolute Future**, how formed, 320, (3); syntax of, 611—613.
- Abstract nouns**, how formed, 469.
- Accent**, 27; in verbs, 335.
- Accentuated metres**, *Supp.* 3.
- Accusative in *ko***, 532; of the object, 531—534; of place, 535; of time, 536; twofold form, in nouns and pronouns, 138, 148, 206, 207.
- Accusatively dependent compounds**, 480, (1).
- Achaladhritiyādi* metres**, *Supp.* 43.
- Acquisitive compound verbs**, 361, (3); syntax of, 642, (2).
- Adjectives**, comparison of, 169; dialectic forms of, 167; how formed, 476; inflection of, 163, 164; syntax of, 563—569; used for nouns, 564; with ablative, 169, 566; with dative, 567, (1); with genitive, 567, (2), (3); with locative, 169, *d.* 555, (3), *g.*
- Adjective clauses**, 727—729.
- Adverbial clauses**, 730—739.
- Adverbial compounds**, 486.
- Adverbial participle**, 329.

§ 131. c. The origin of *h* in *bhaunhaiṅ* as suggested in the text is, I think doubtful. A nom. singular *bhaunh*, for *bhaun*, also exists, to which must be referred the plural, *bhaunhaiṅ*: *h*, therefore, cannot be merely a euphonic insertion.

§ 273. *Mhe* and *tushme* may preferably be assigned to increased Prakritic themes *asmaka*, *tushmaka*.
